Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f01: broadband weighted correlation
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

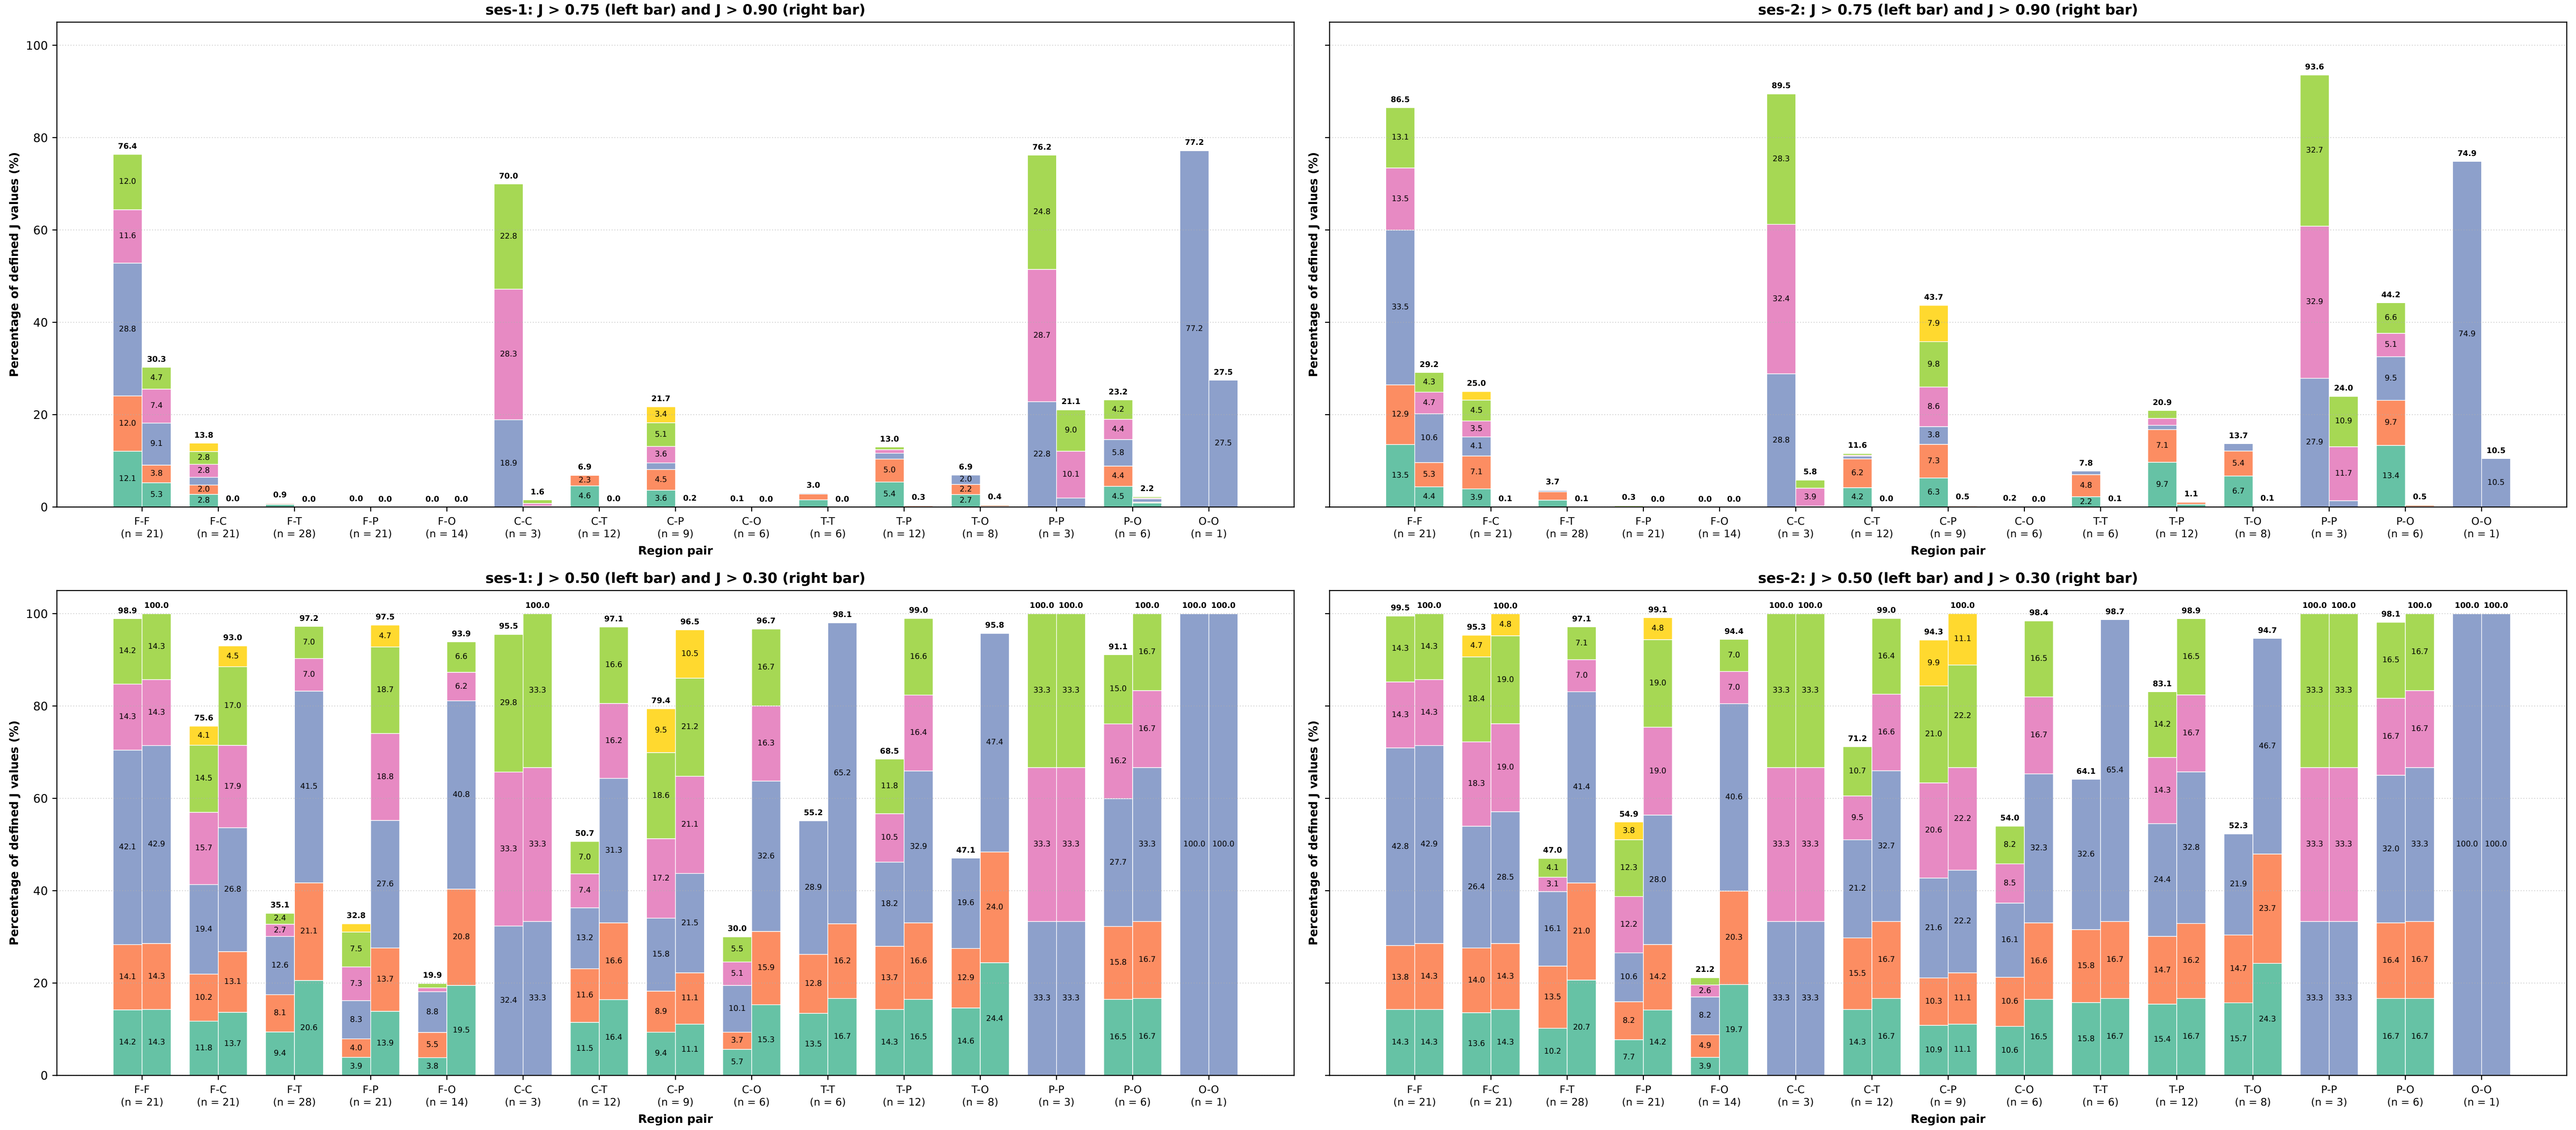

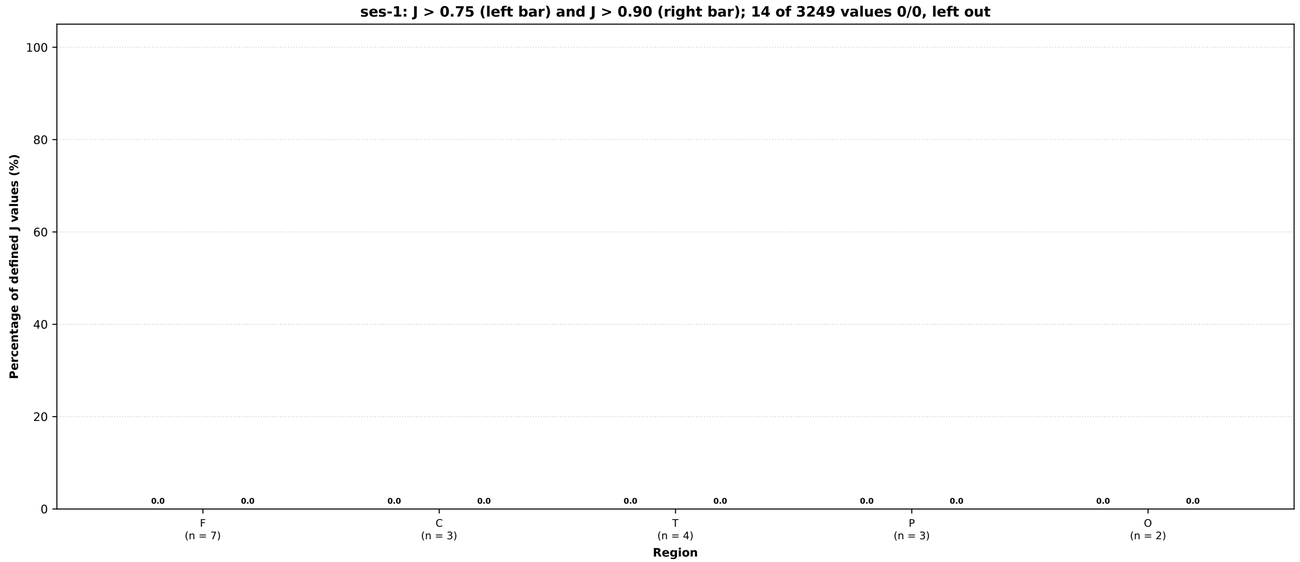

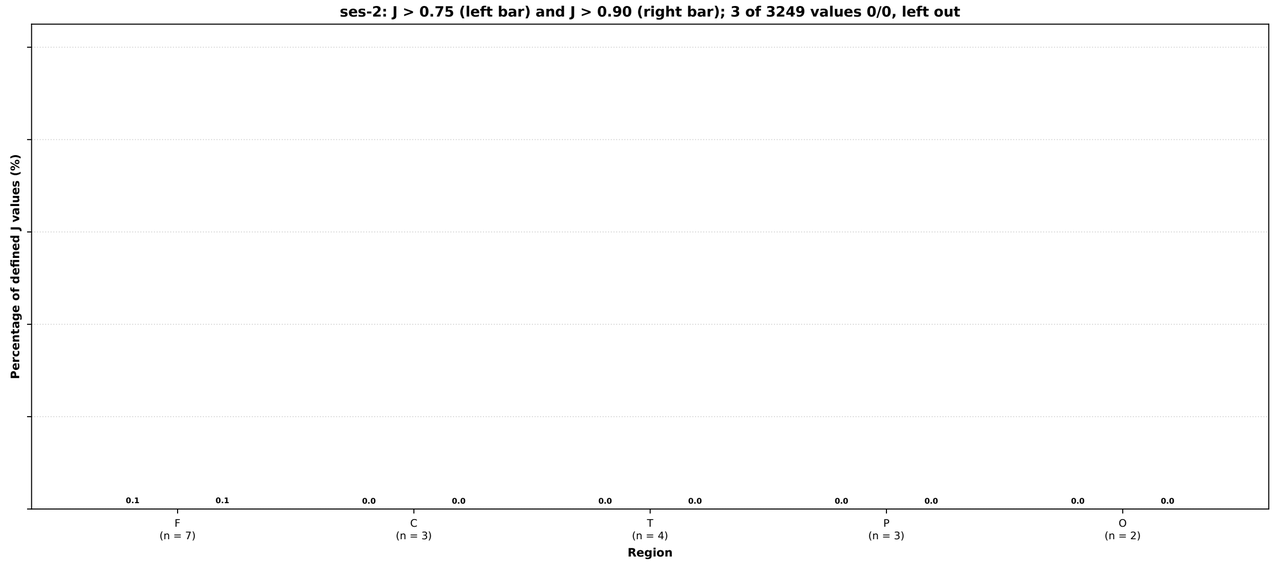

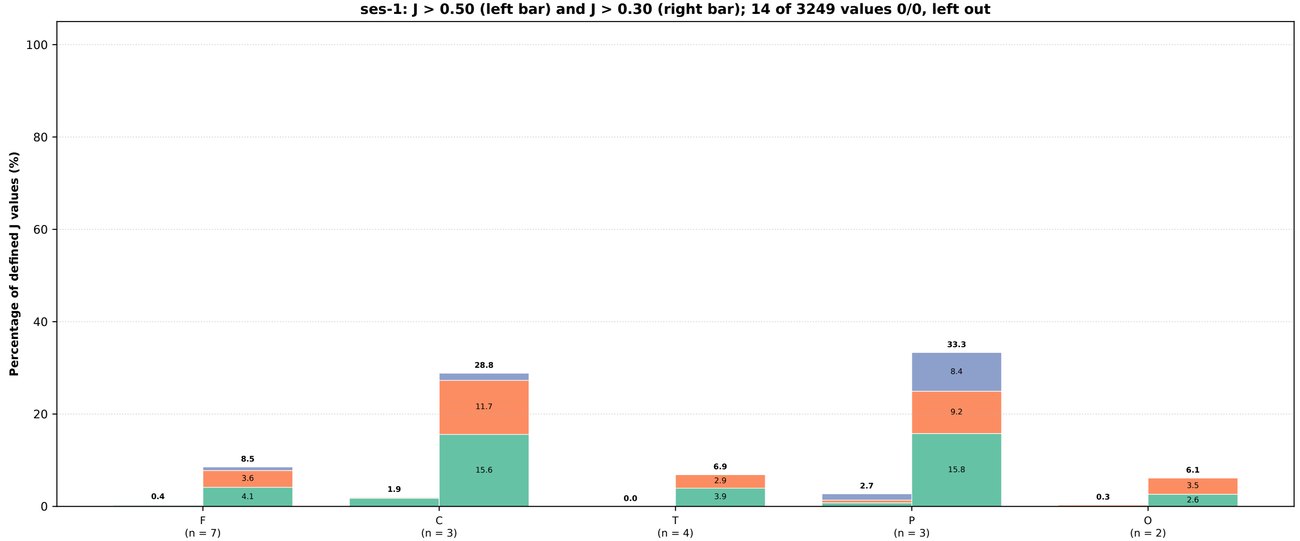

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f02: broadband weighted node betweenness
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

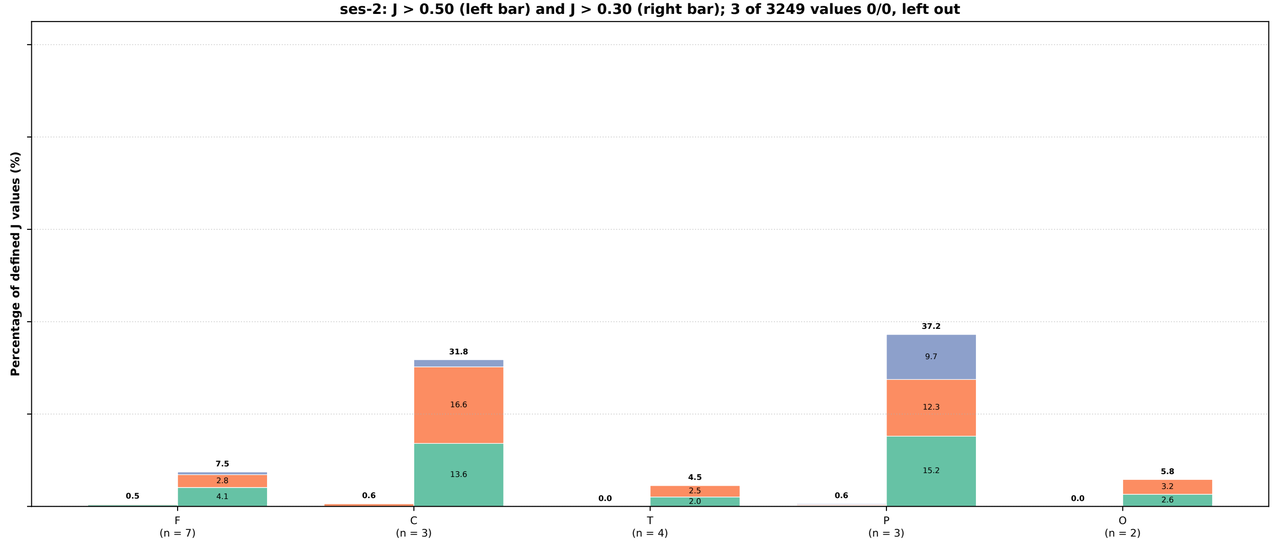

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f03: broadband weighted edge betweenness
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

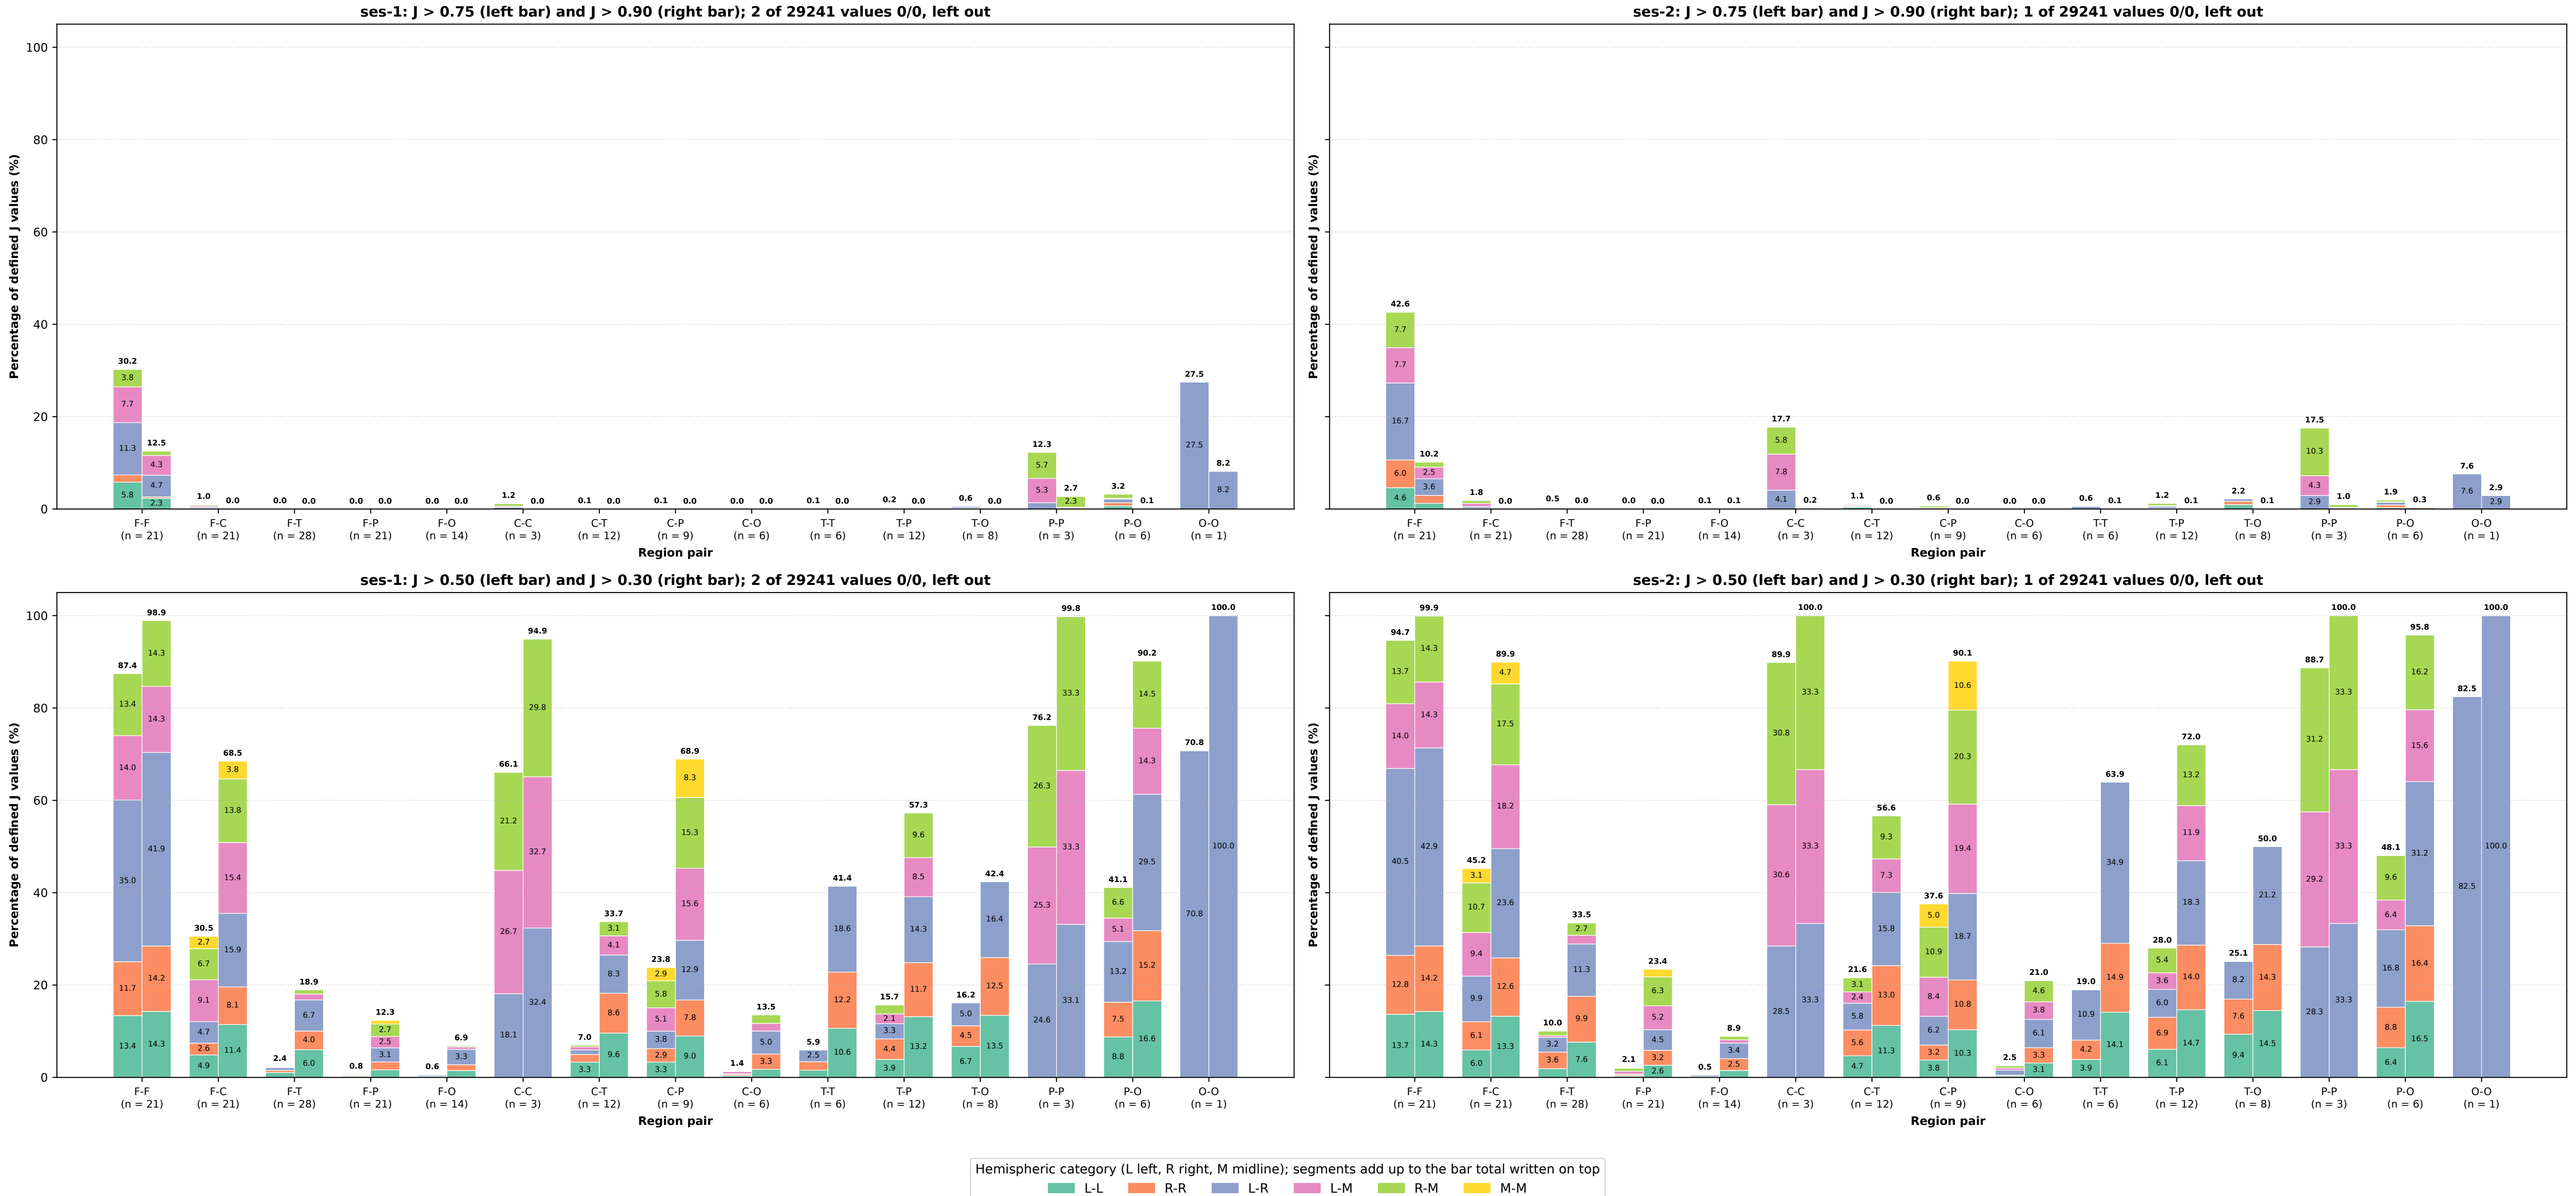

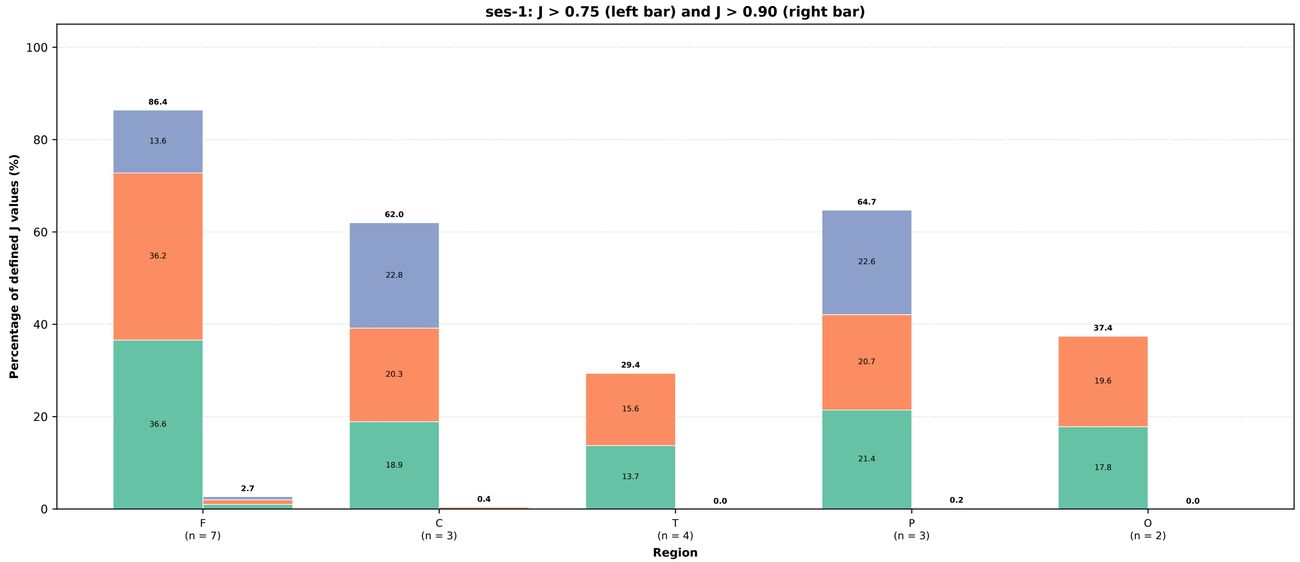

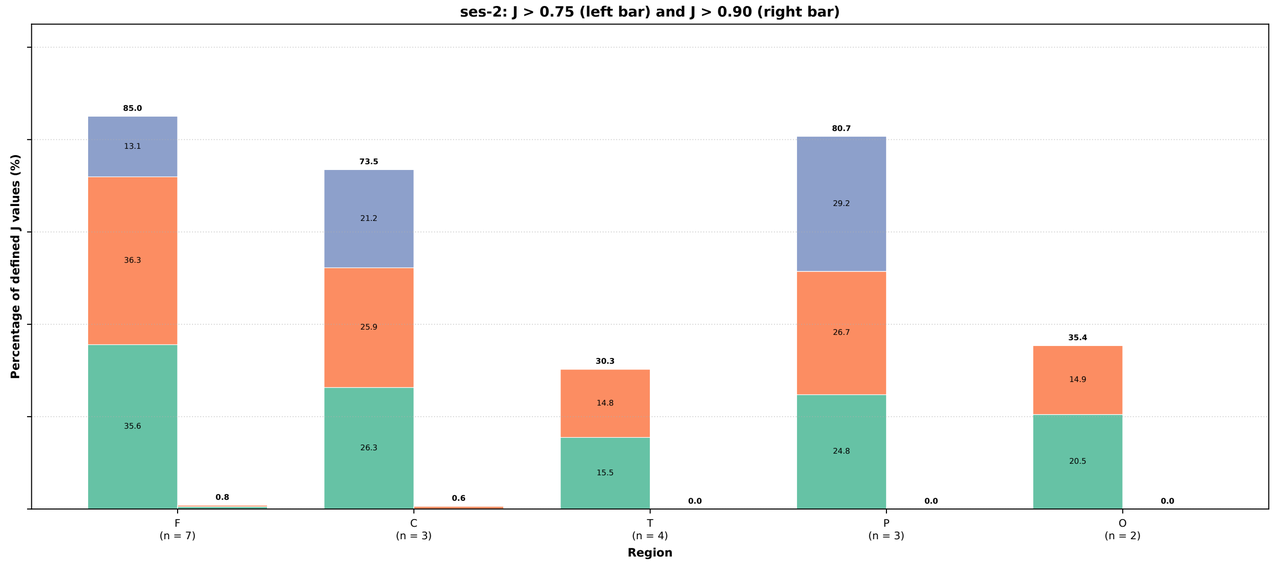

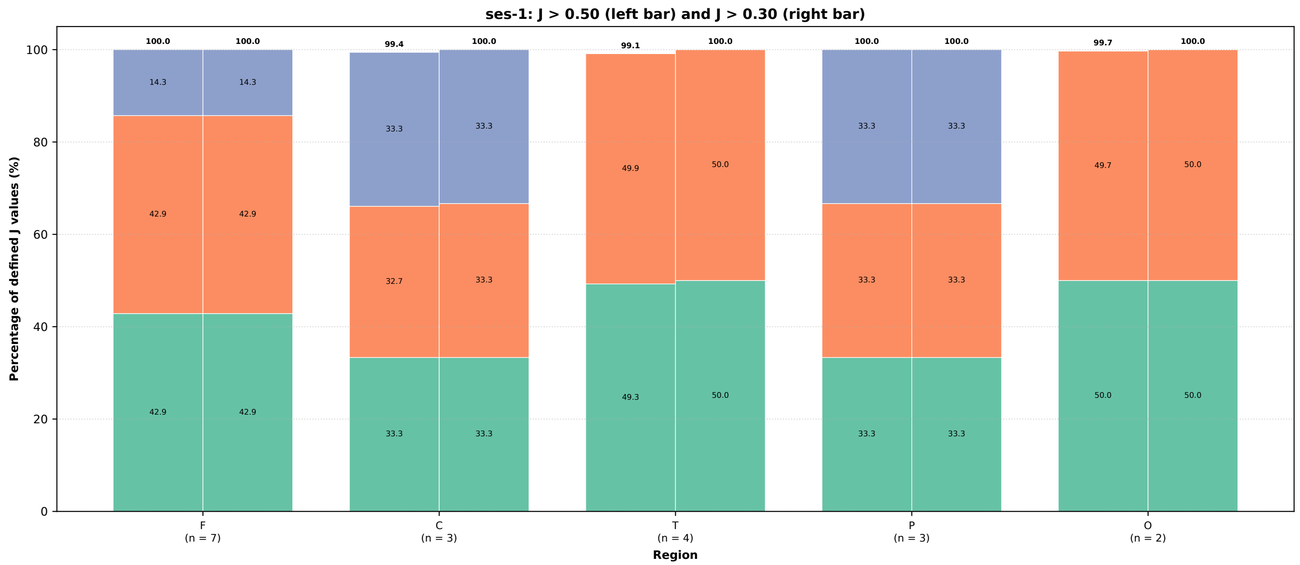

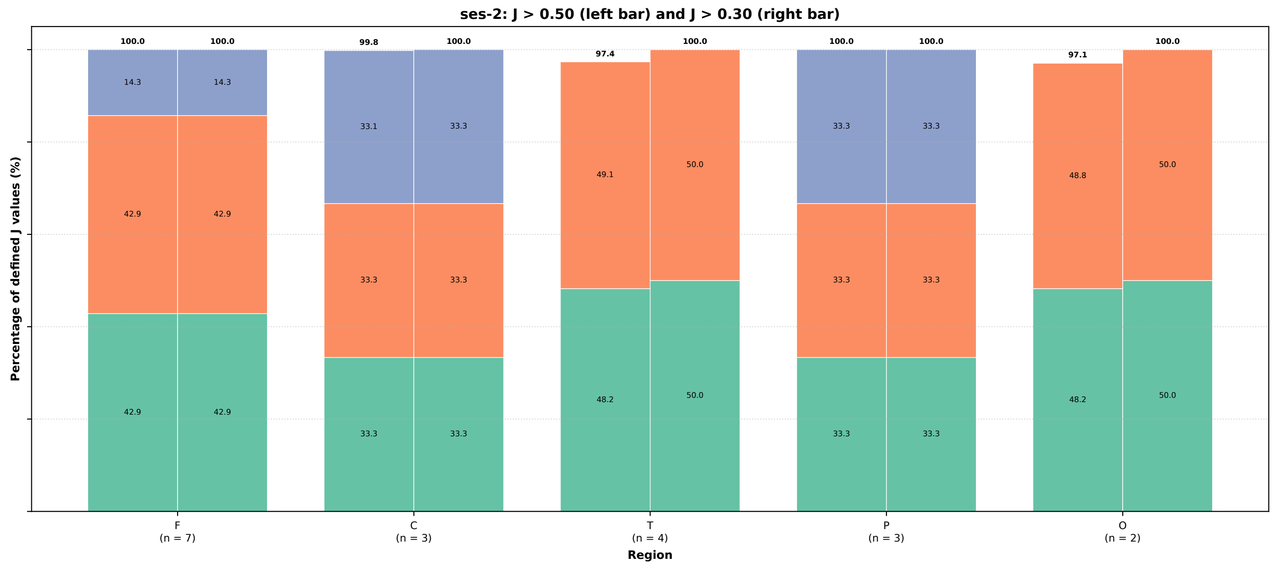

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f04: broadband weighted node strength
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

Hemispheric category (L left, R right, M midline); segments add up to the bar total written on top
L R M

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f05: broadband weighted edge strength
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

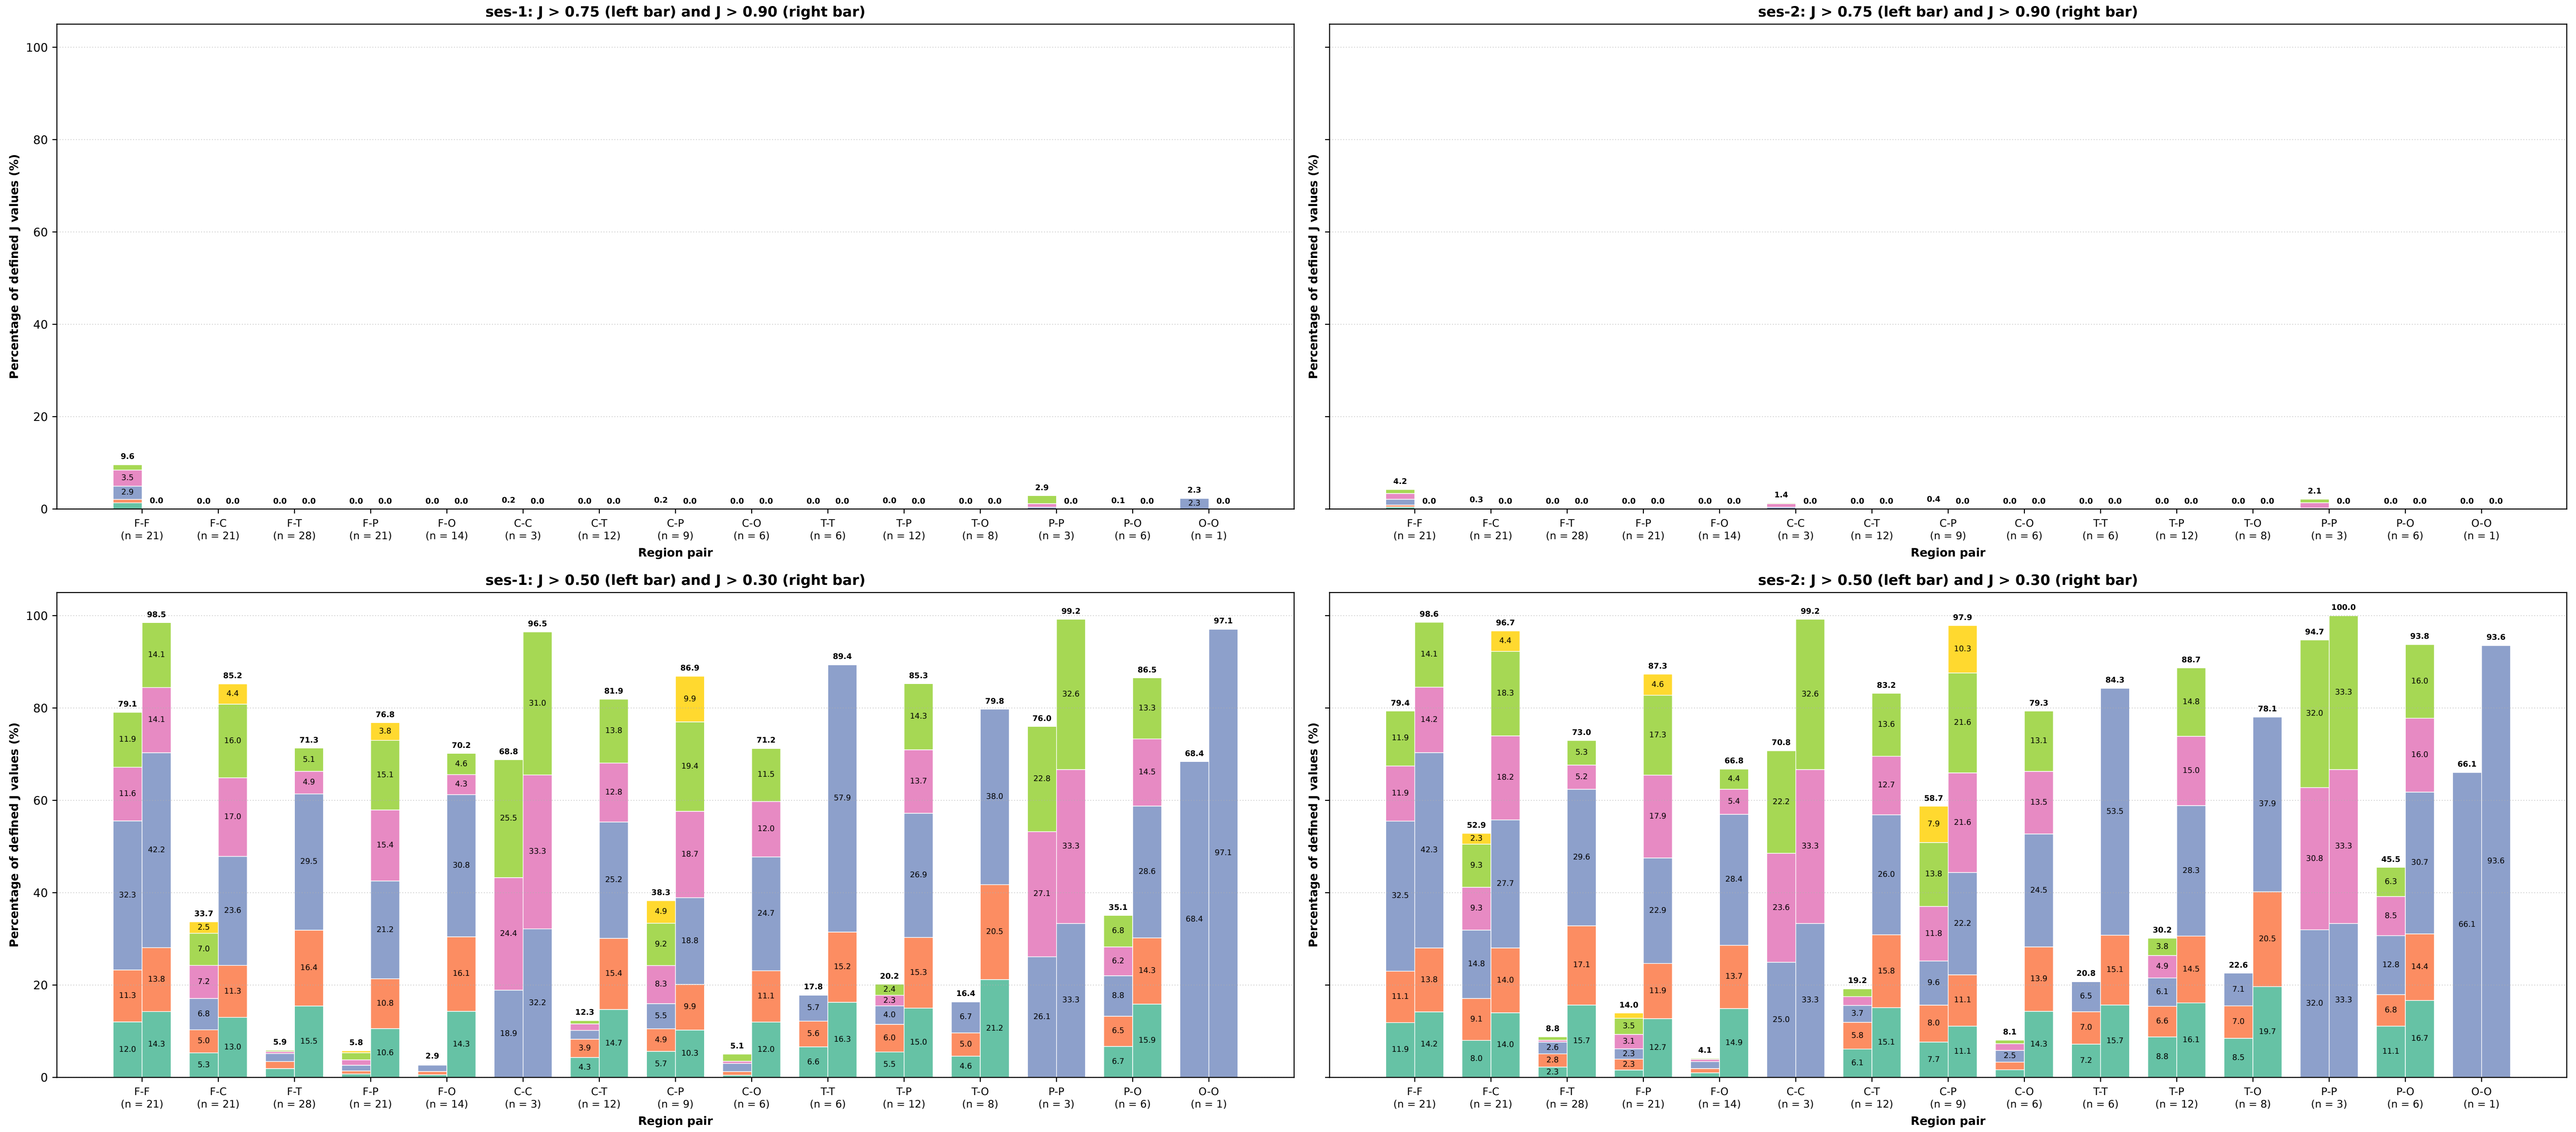

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f06: broadband weighted node eigenvector
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

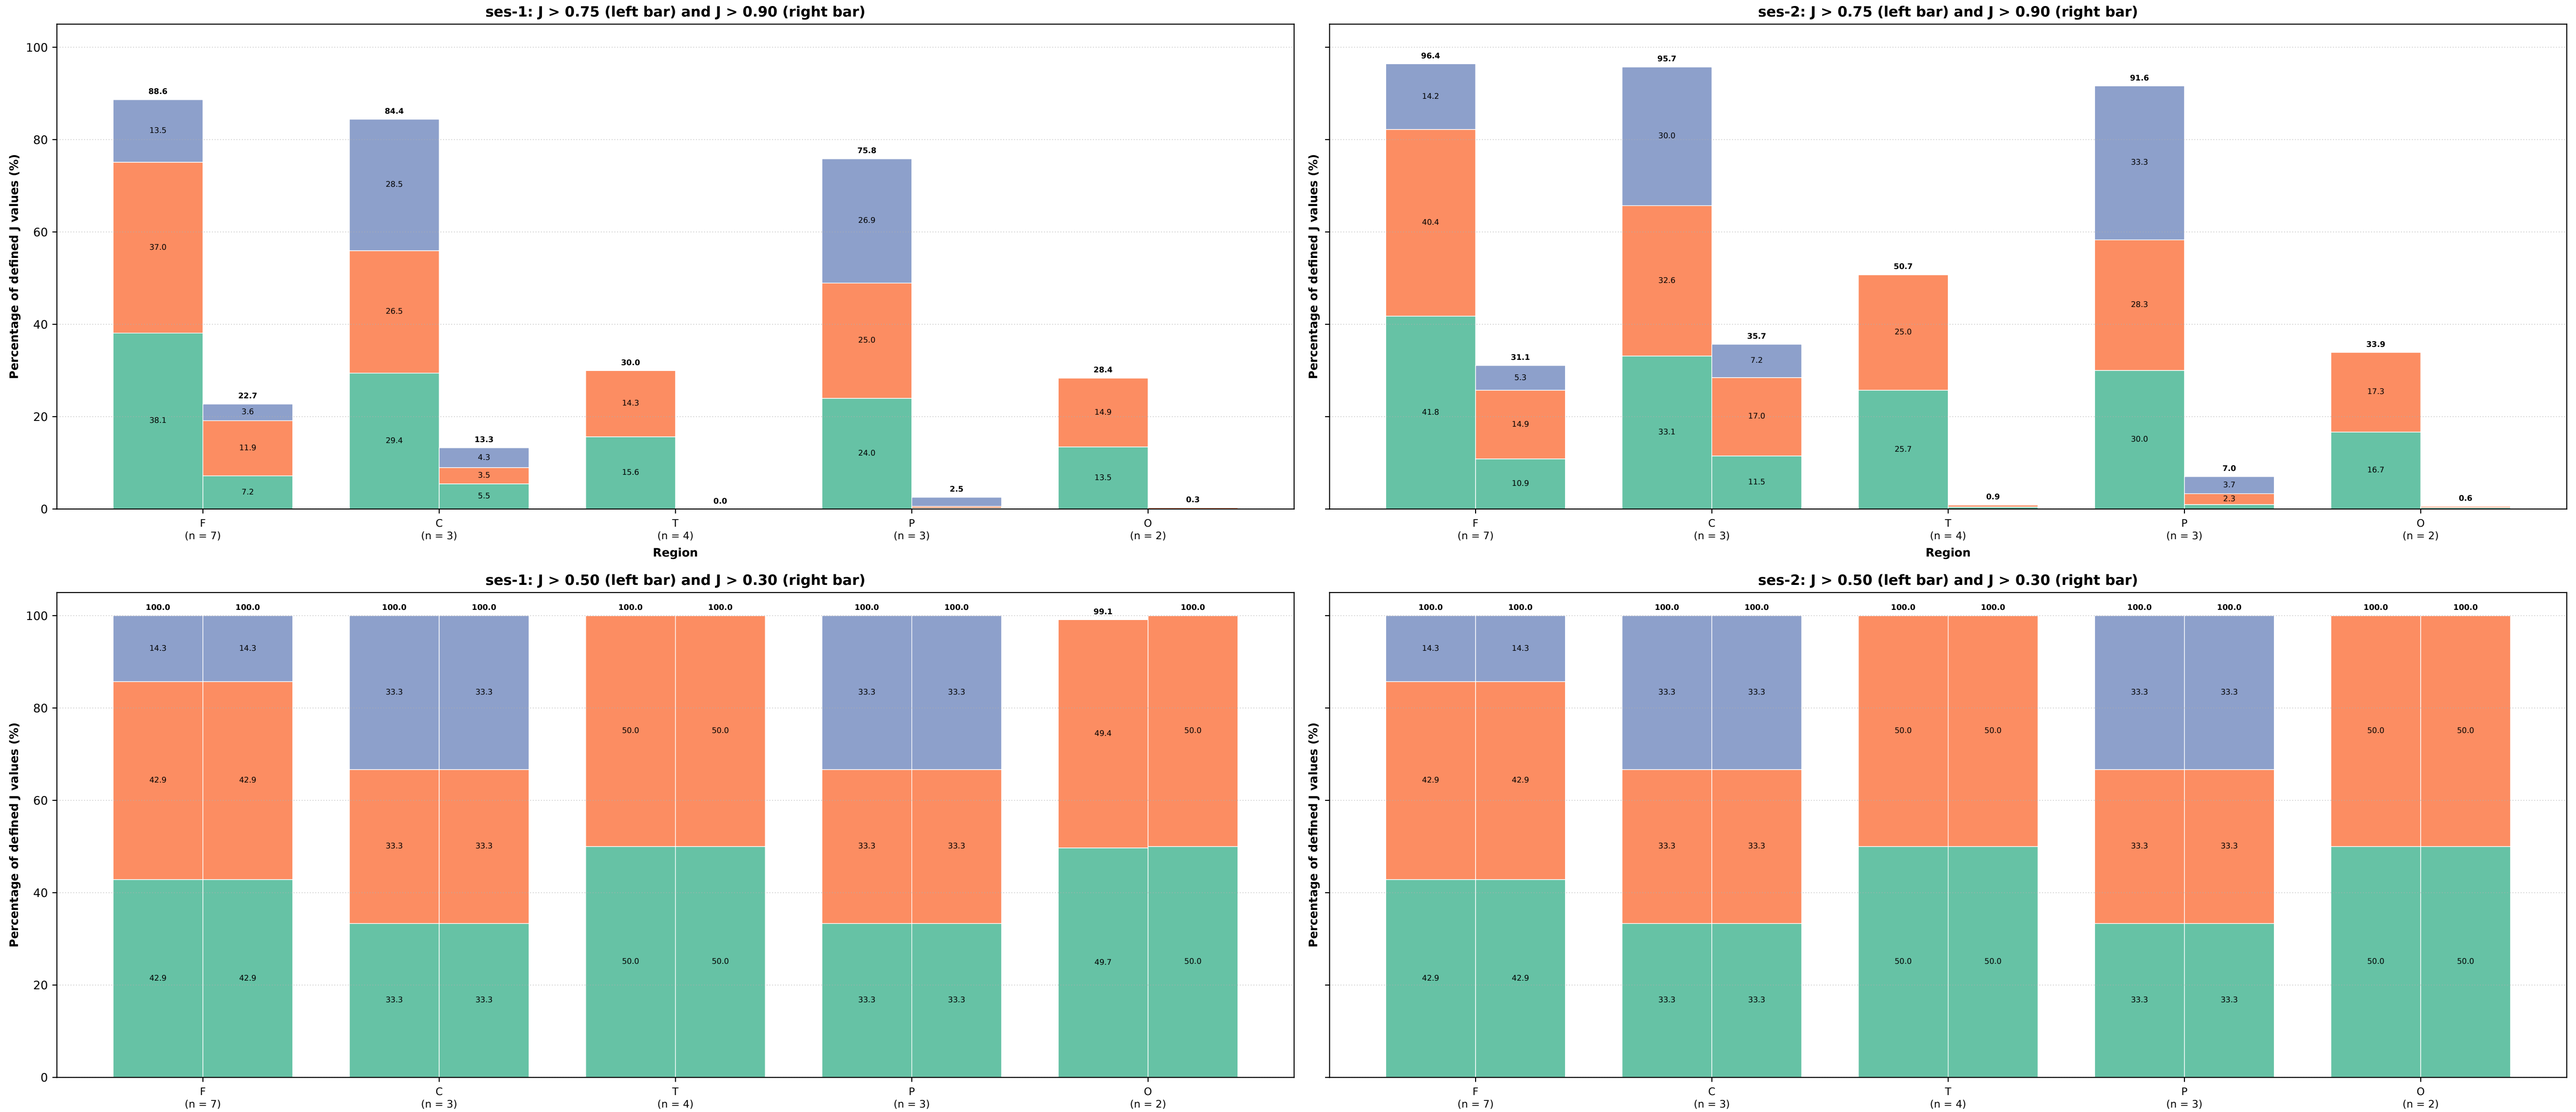

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f07: broadband weighted edge eigenvector
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

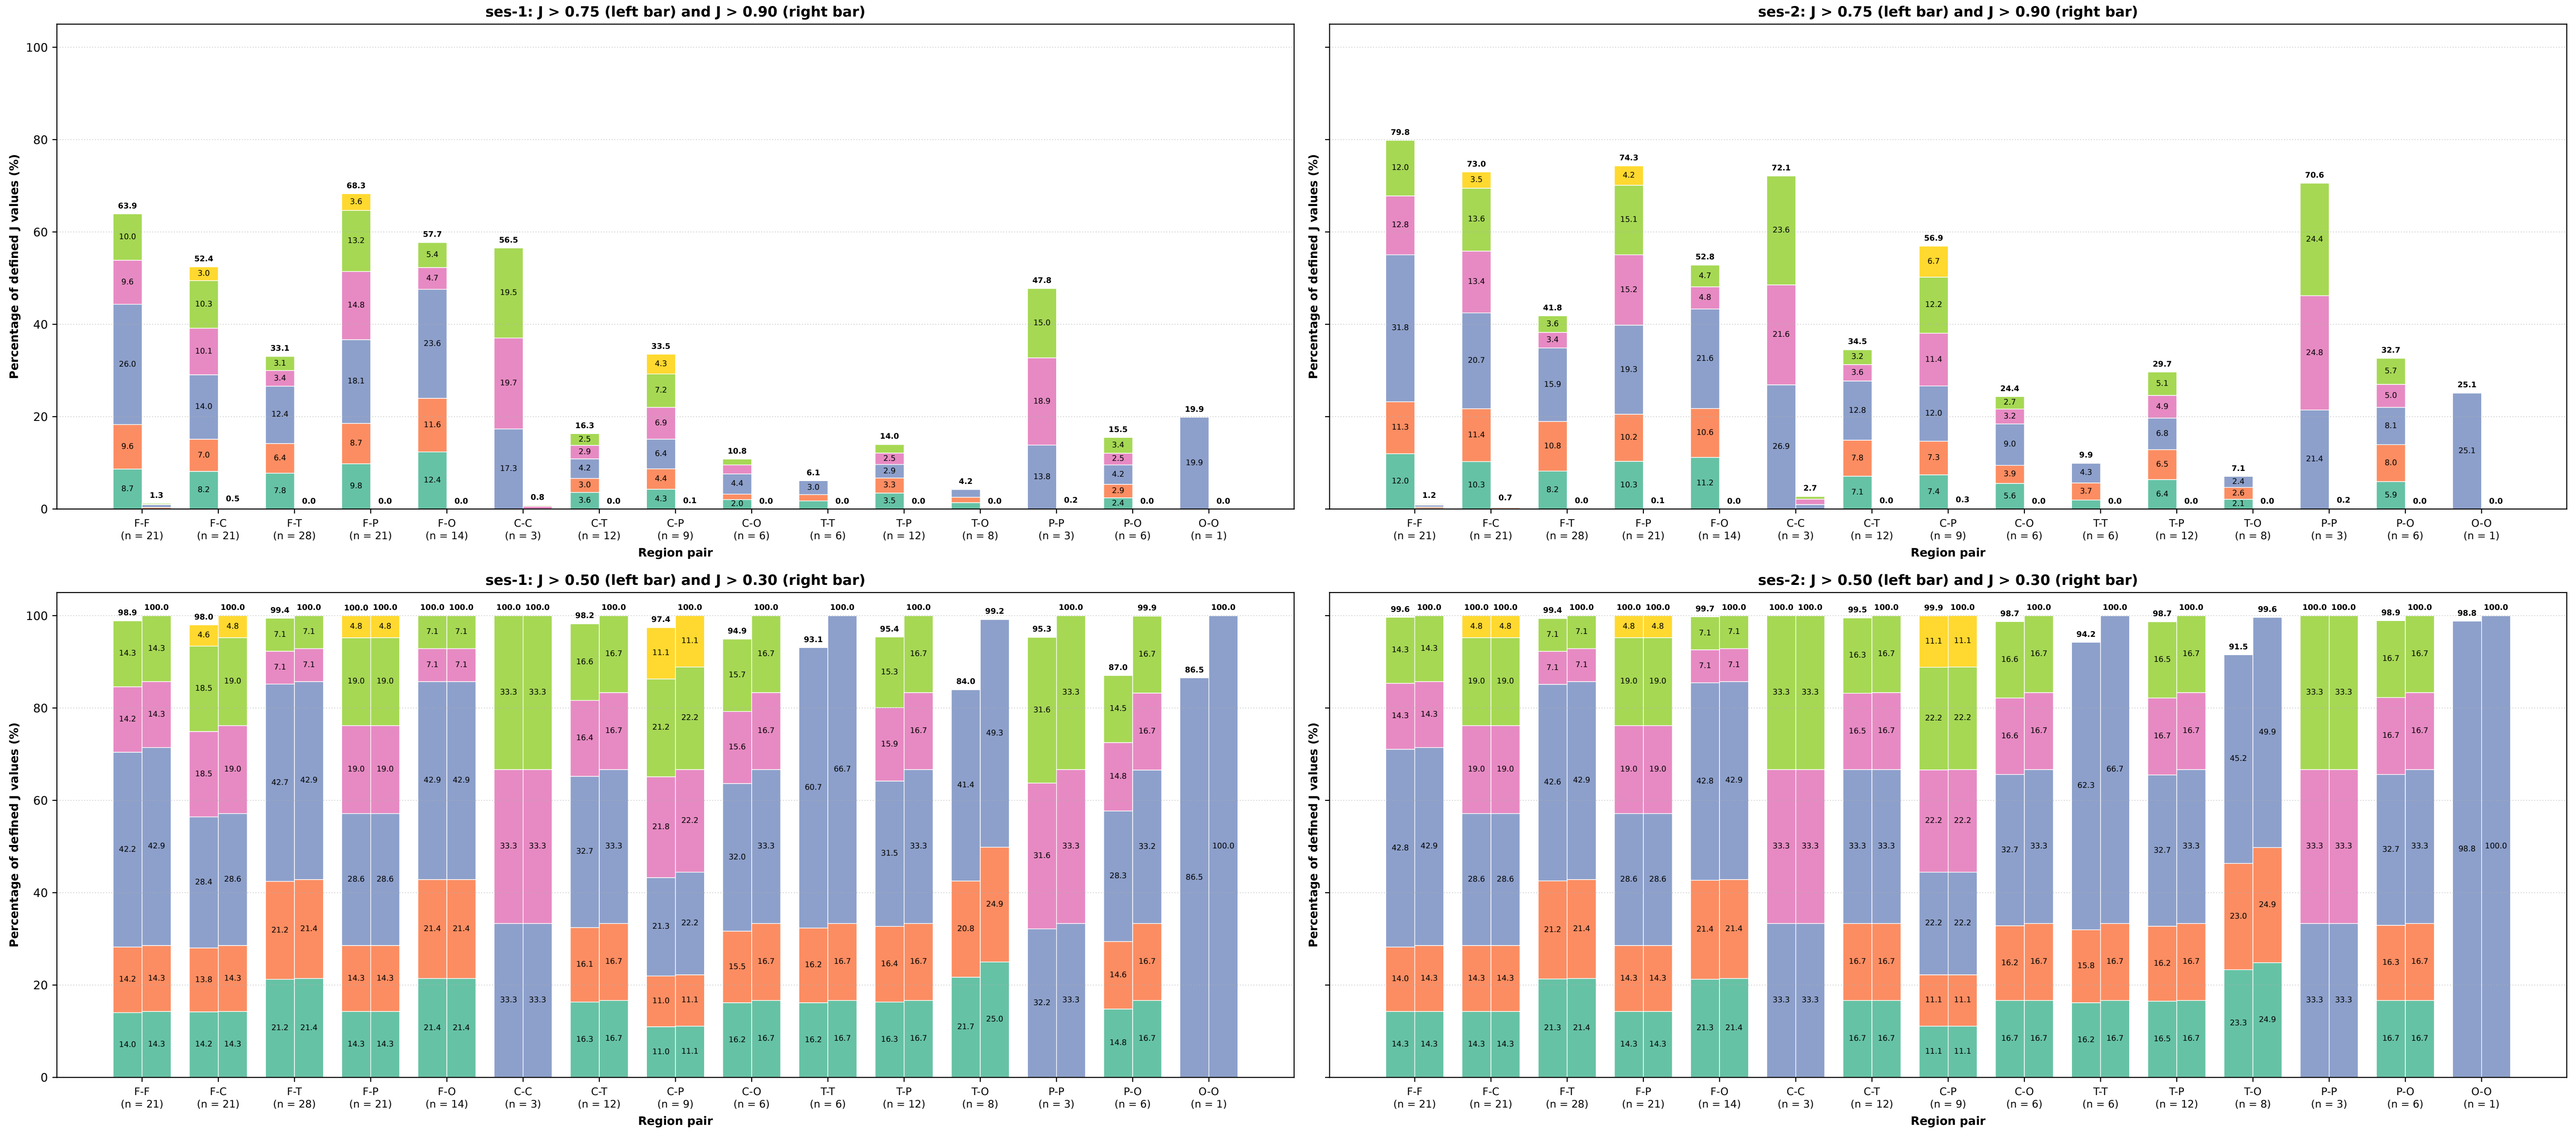

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f08: broadband weighted node closeness
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

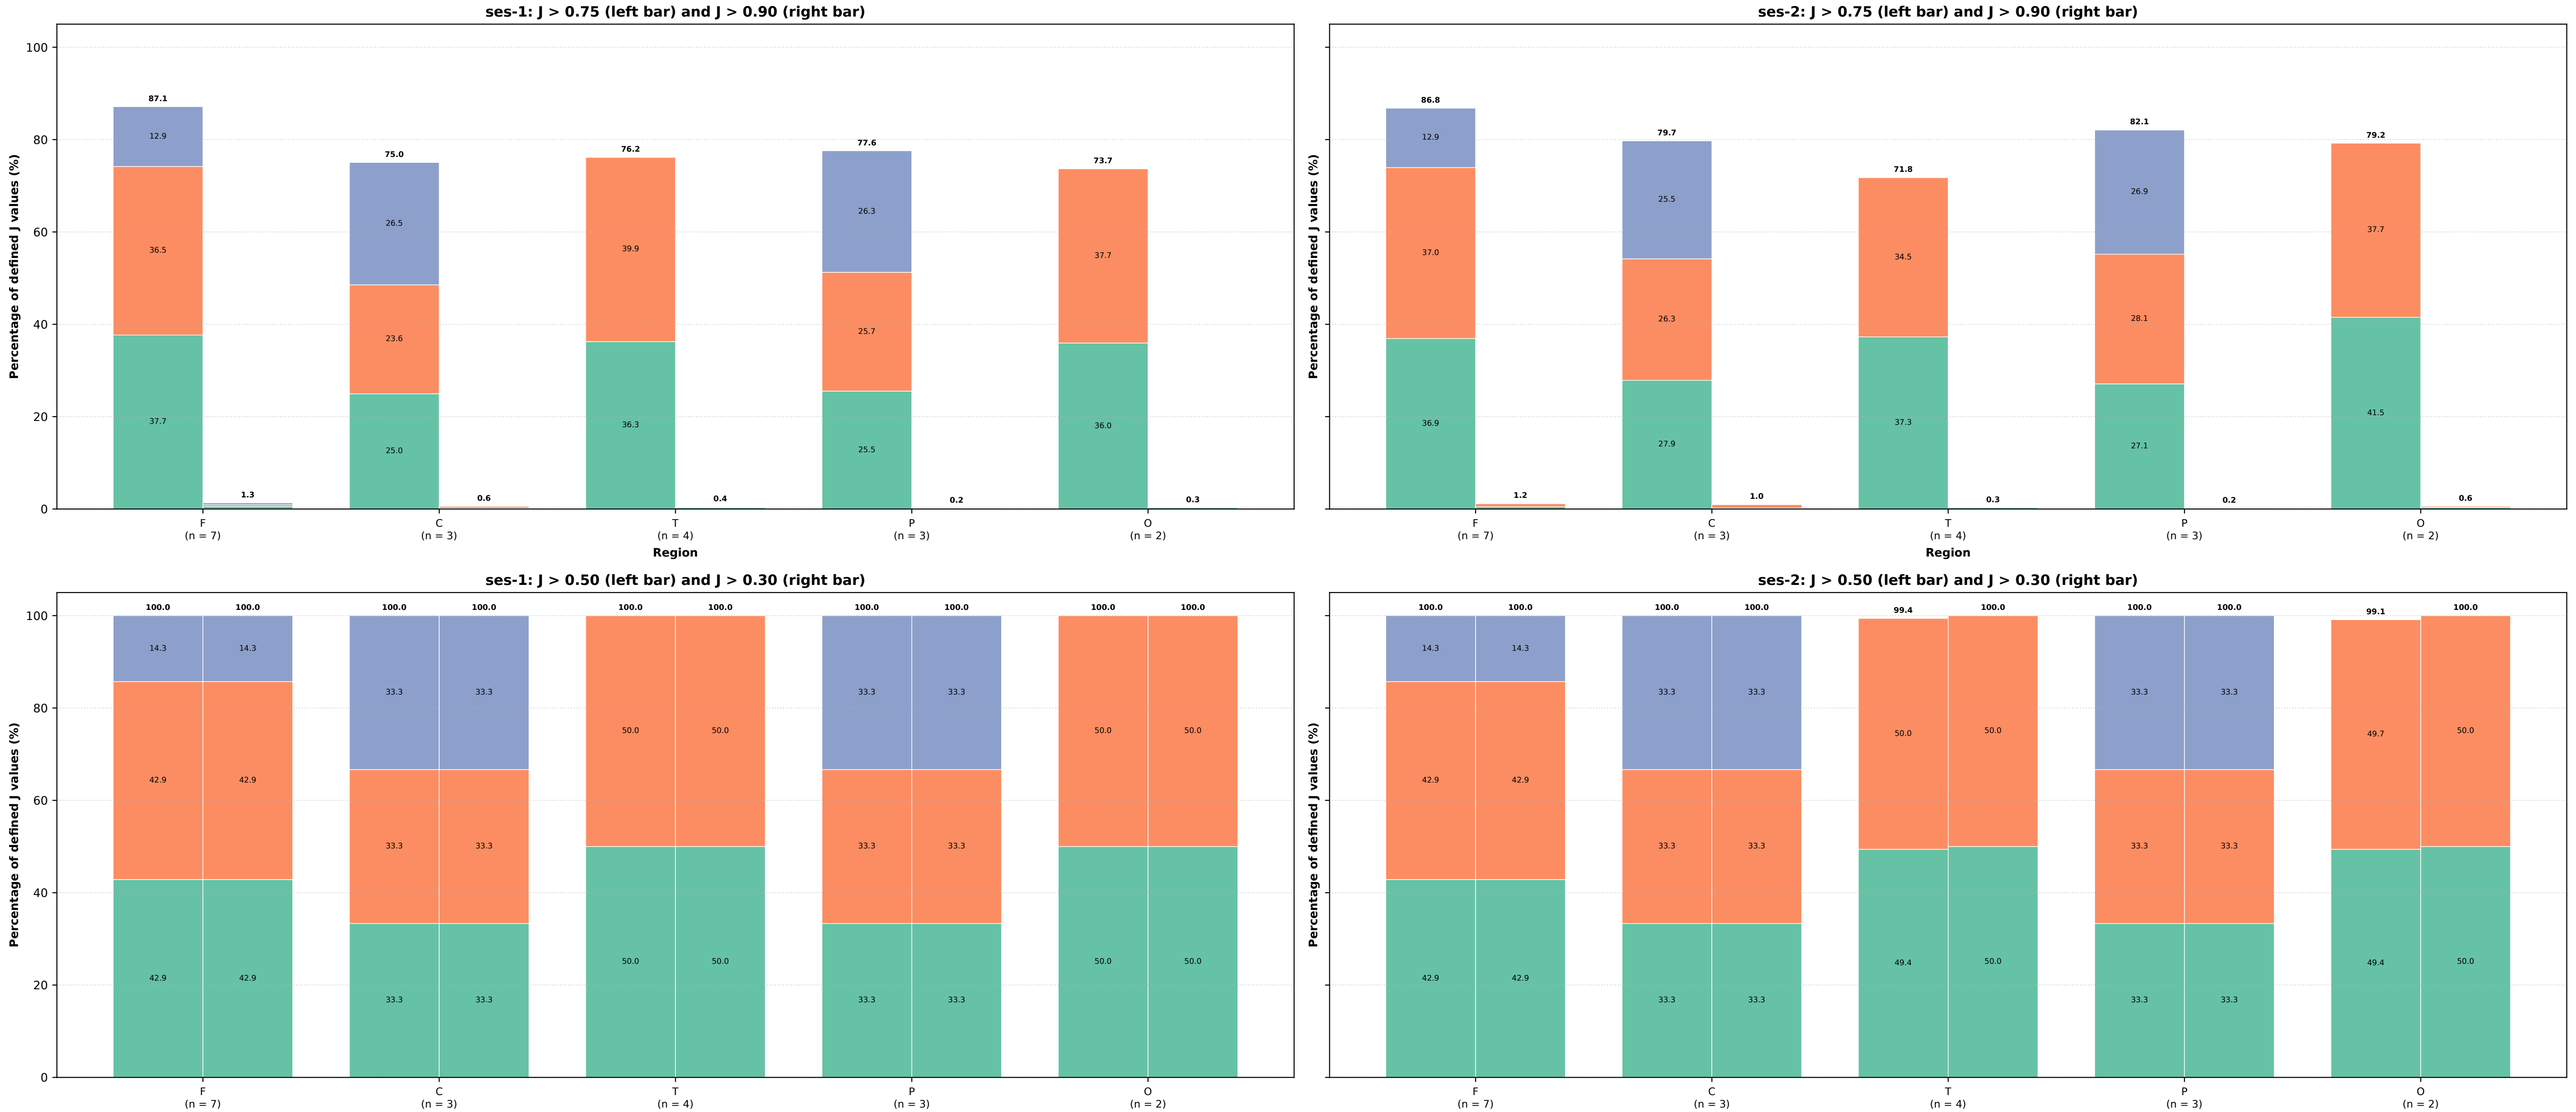

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f09: broadband weighted edge closeness
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

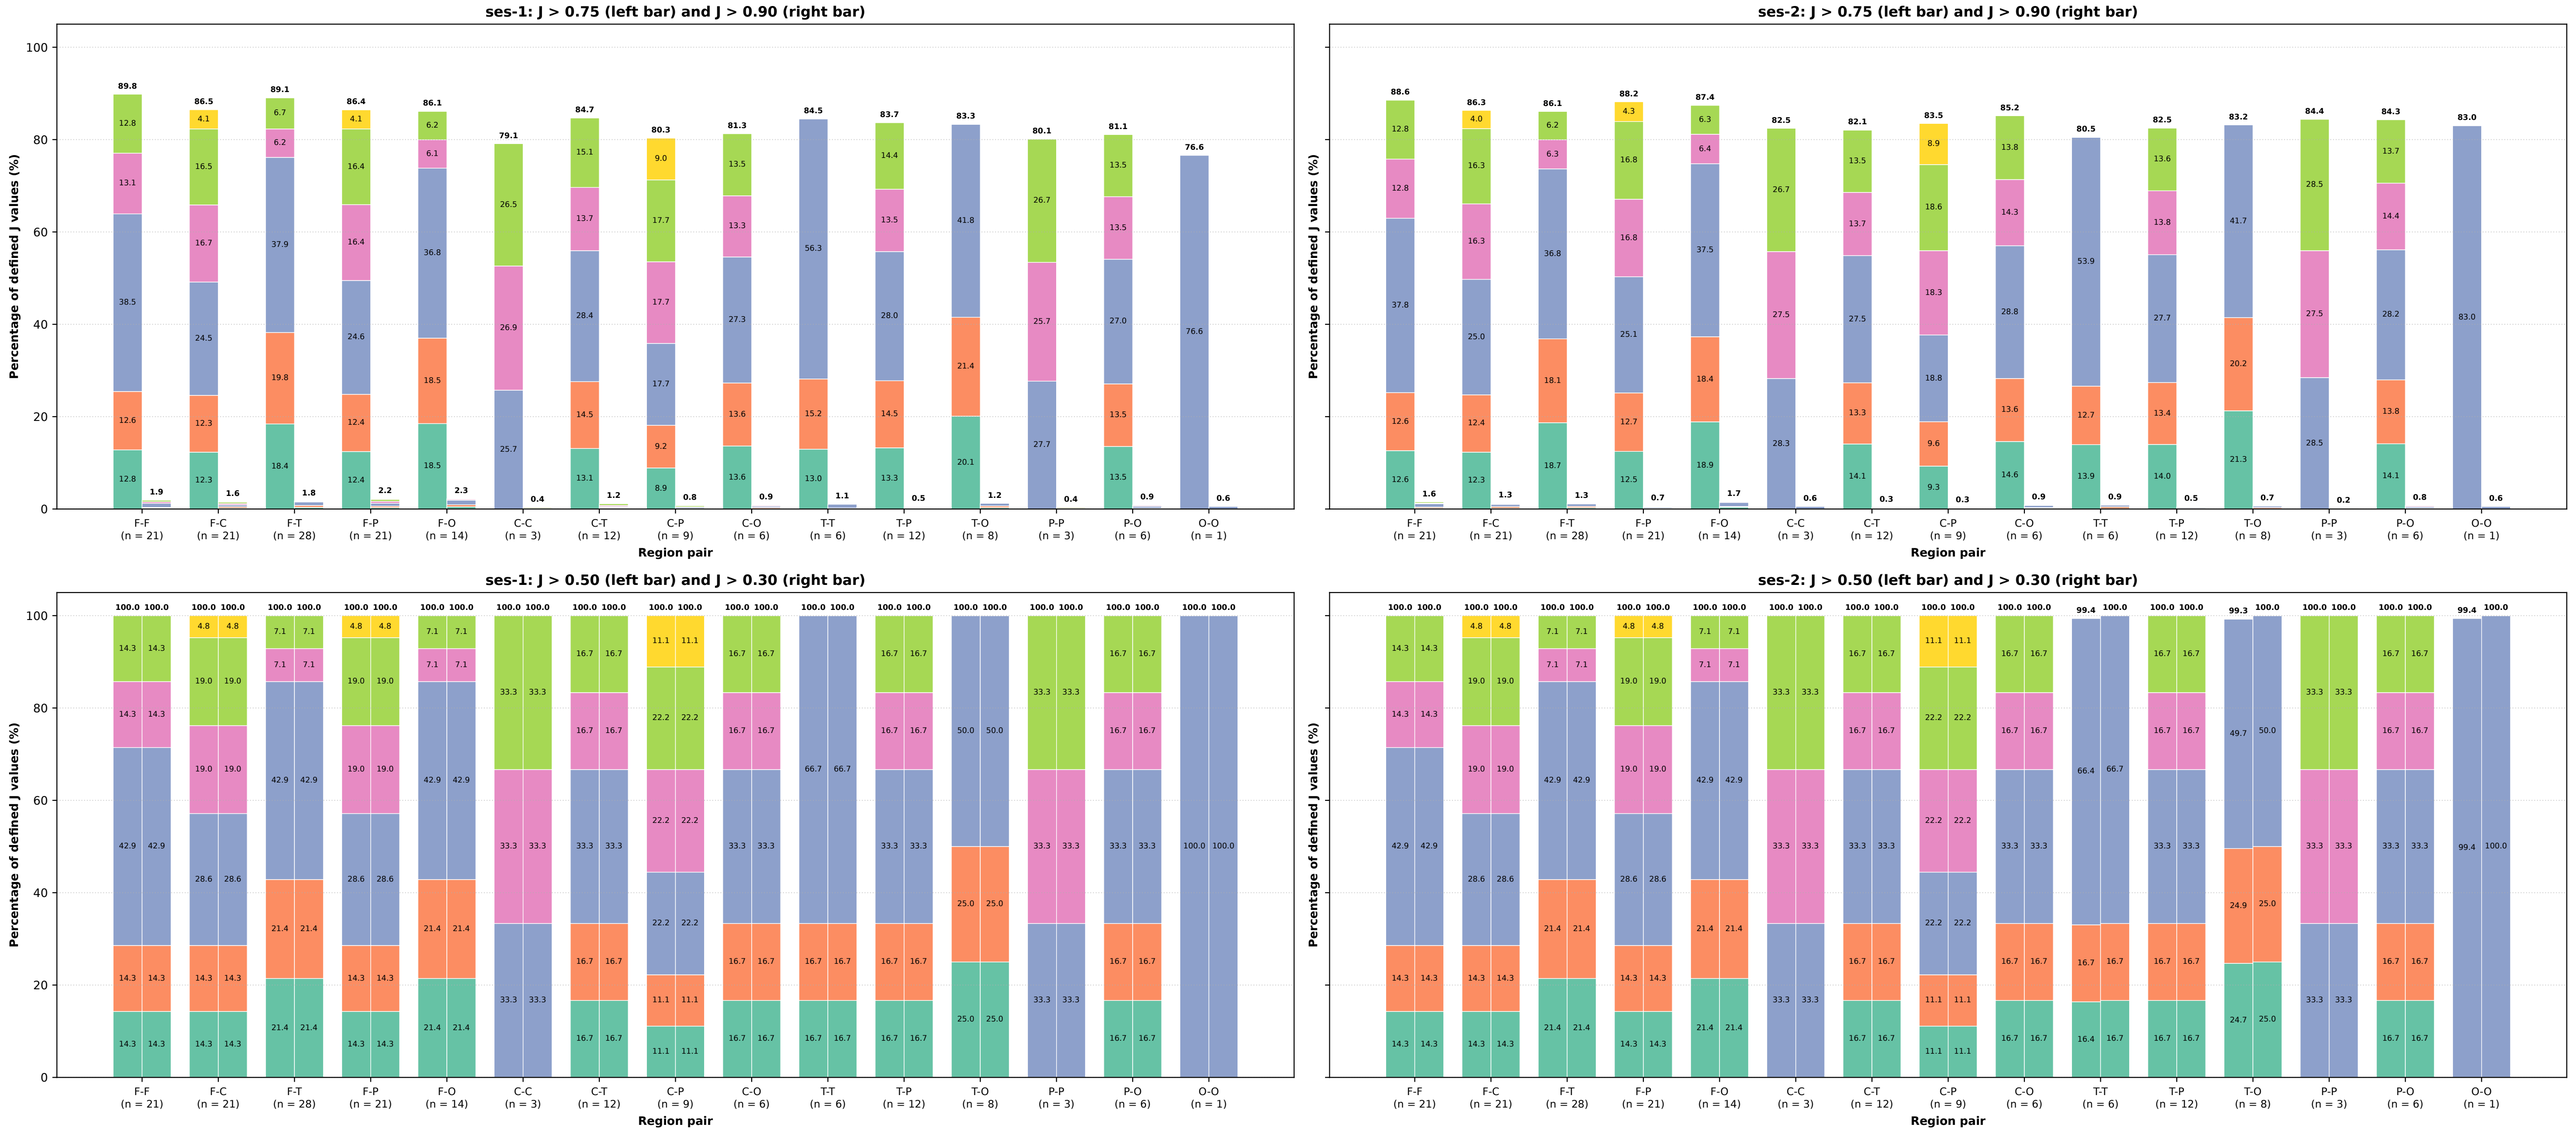

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f10: broadband binary adjacency
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

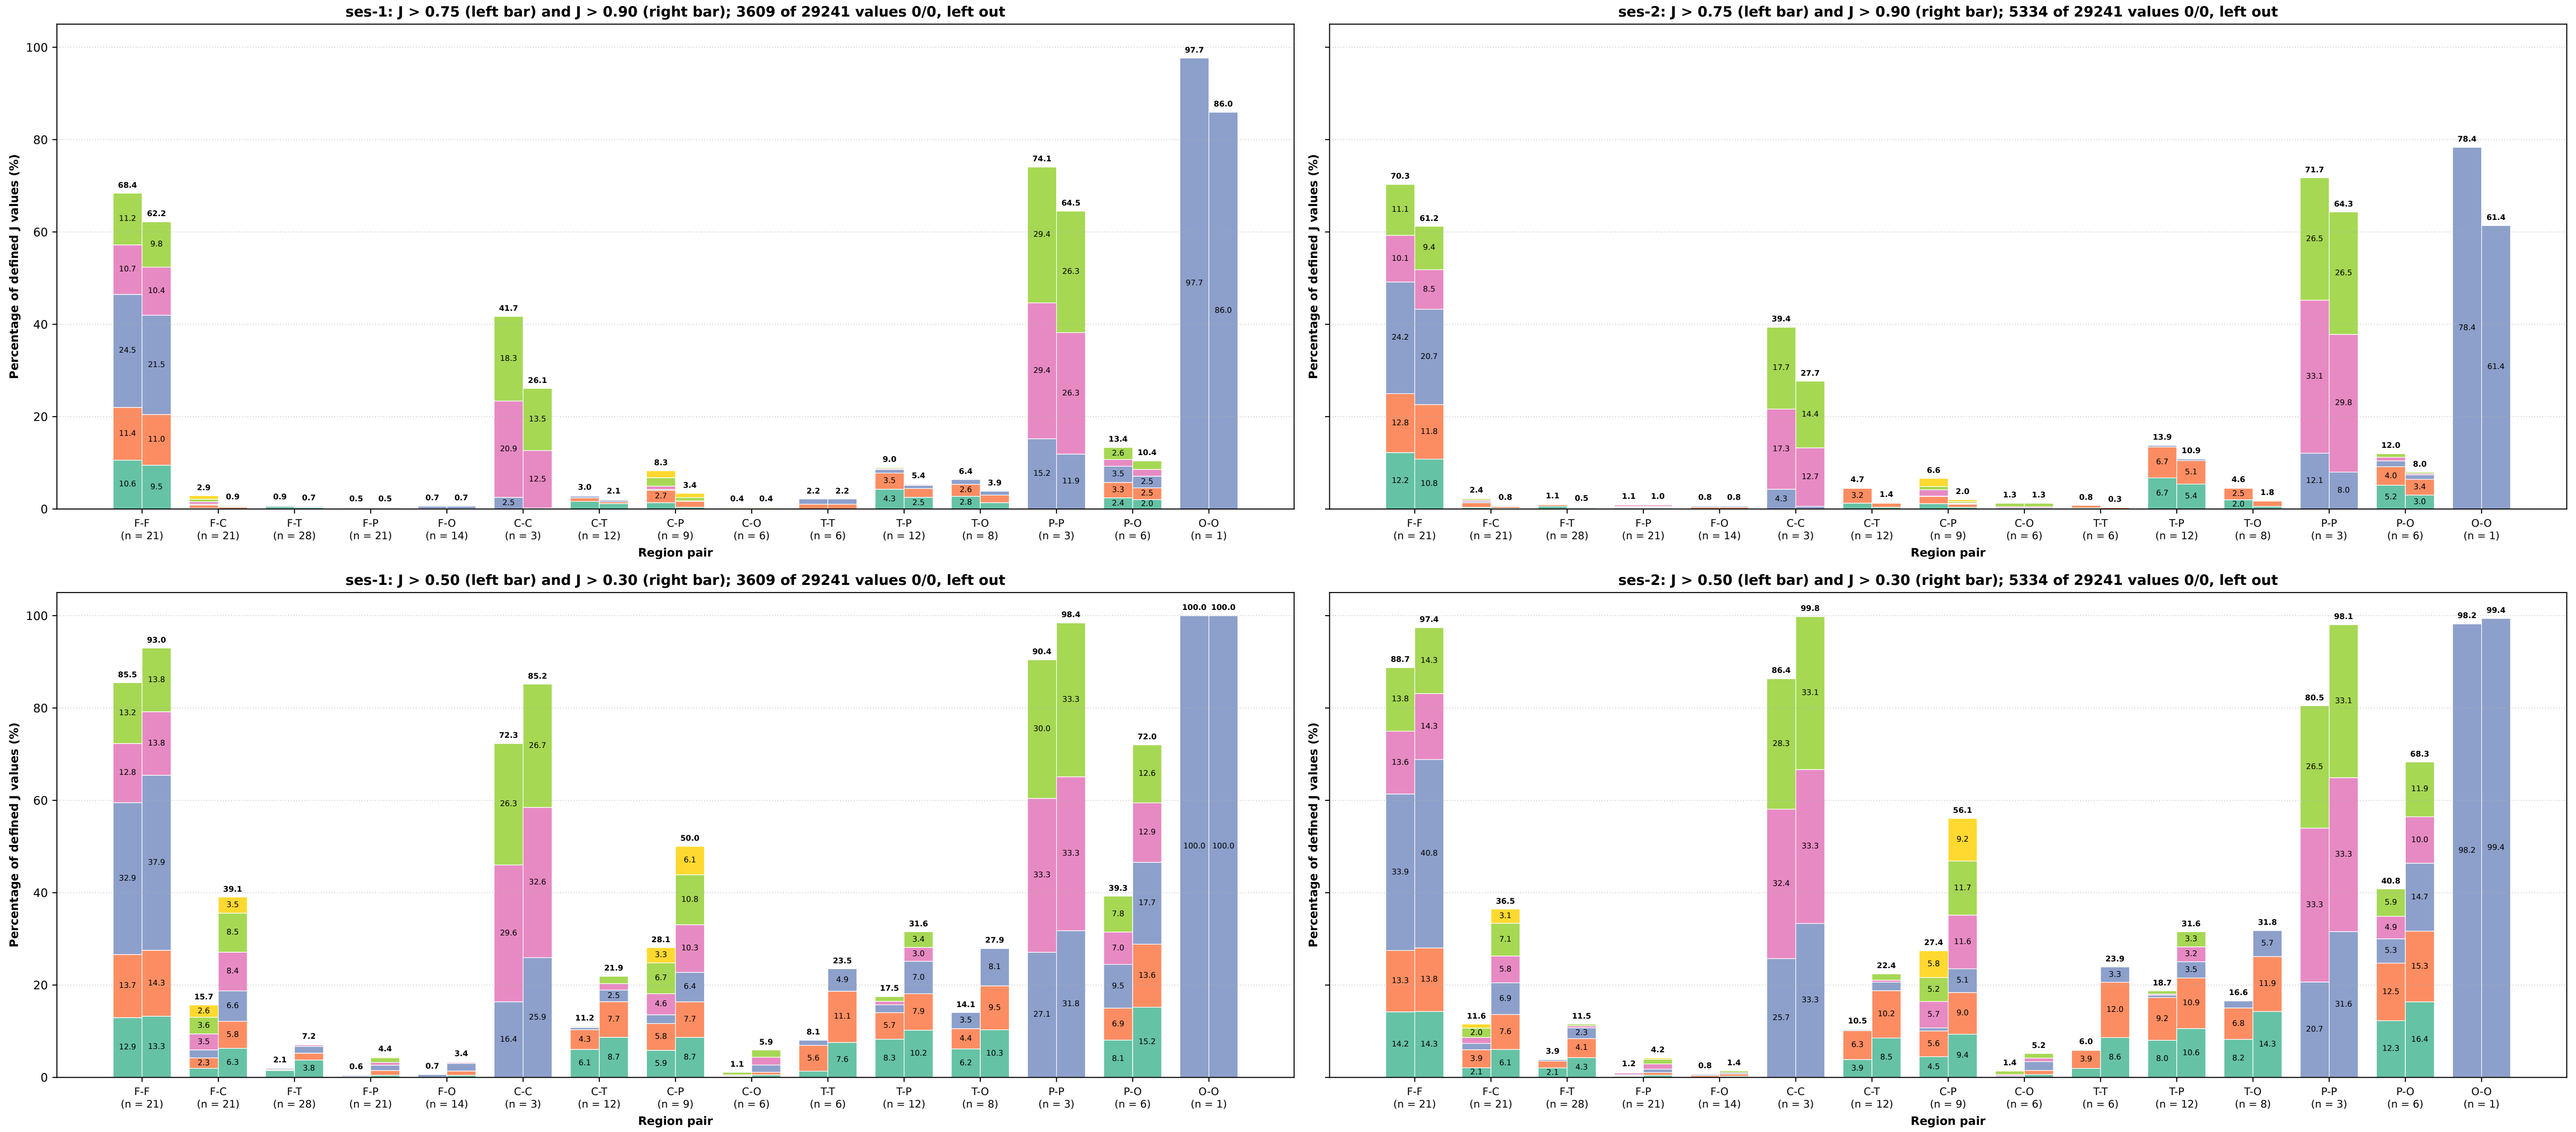

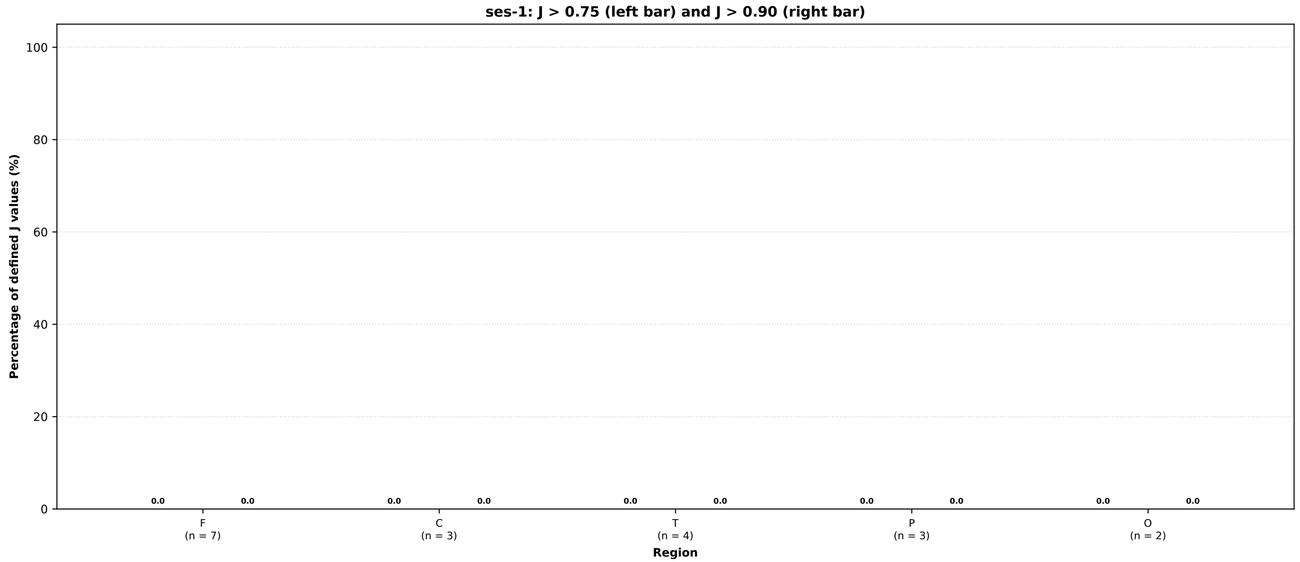

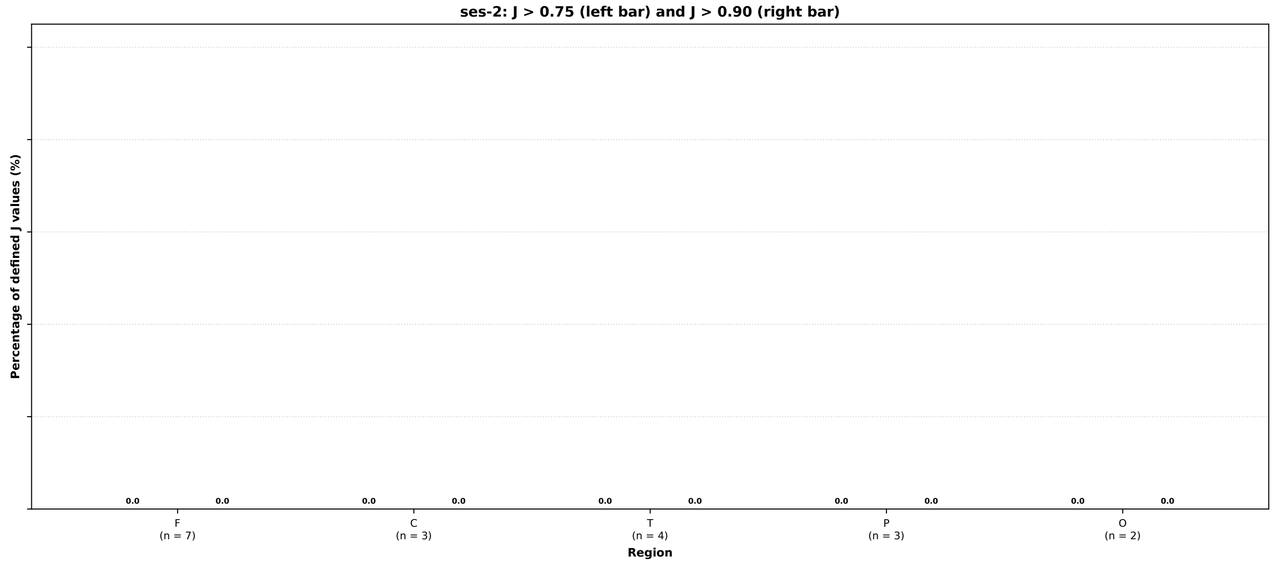

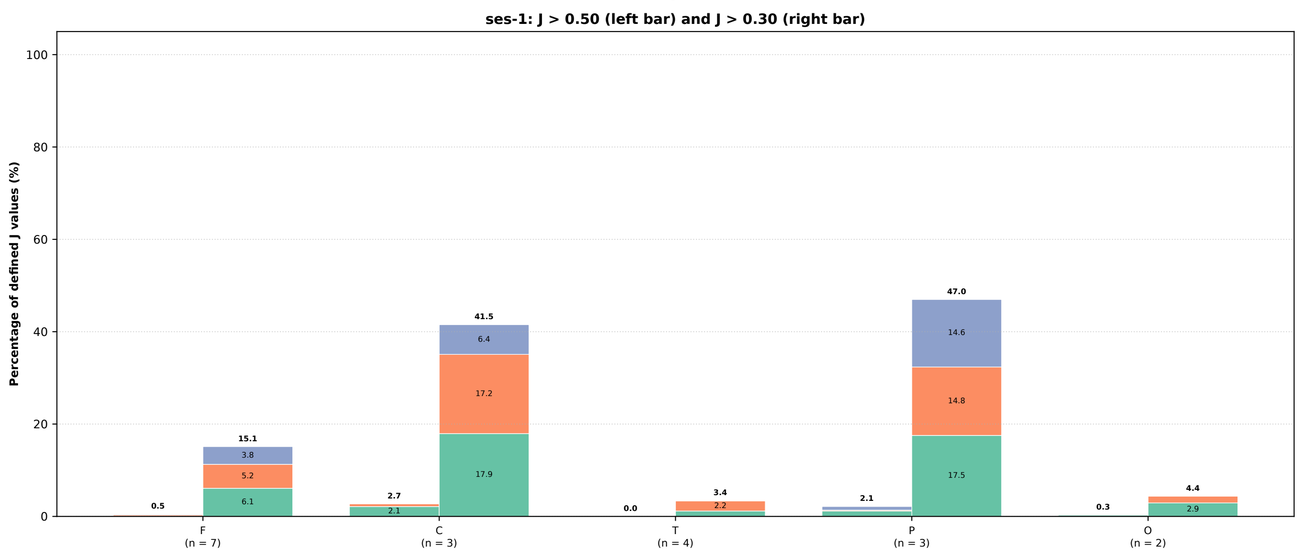

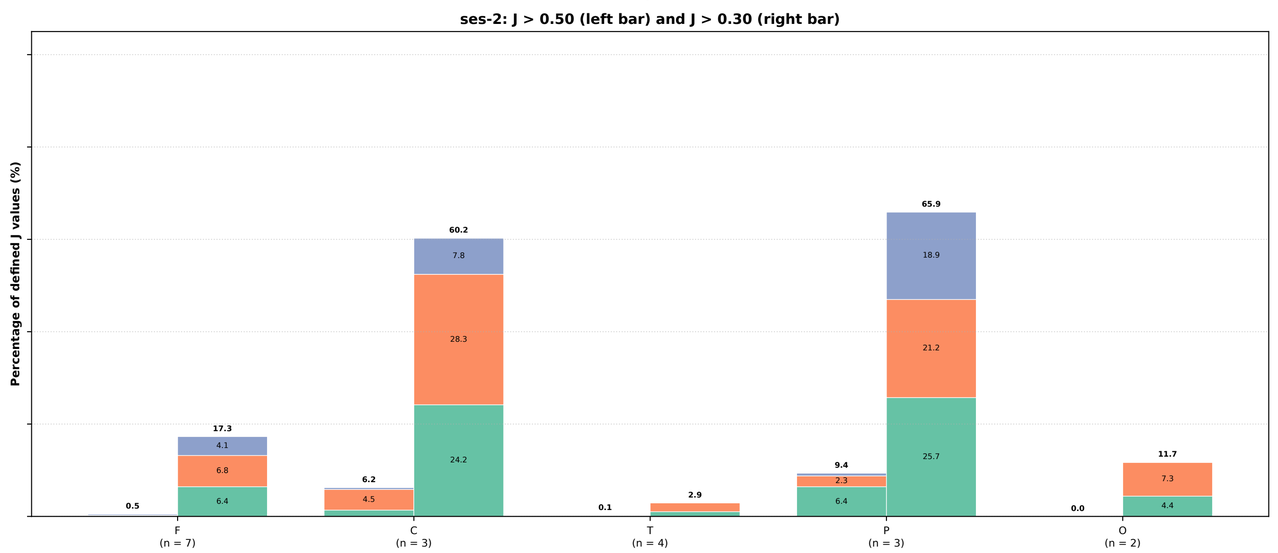

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f11: broadband binary node betweenness
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

Hemispheric category (L left, R right, M midline); segments add up to the bar total written on top
L R M

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f12: broadband binary edge betweenness
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

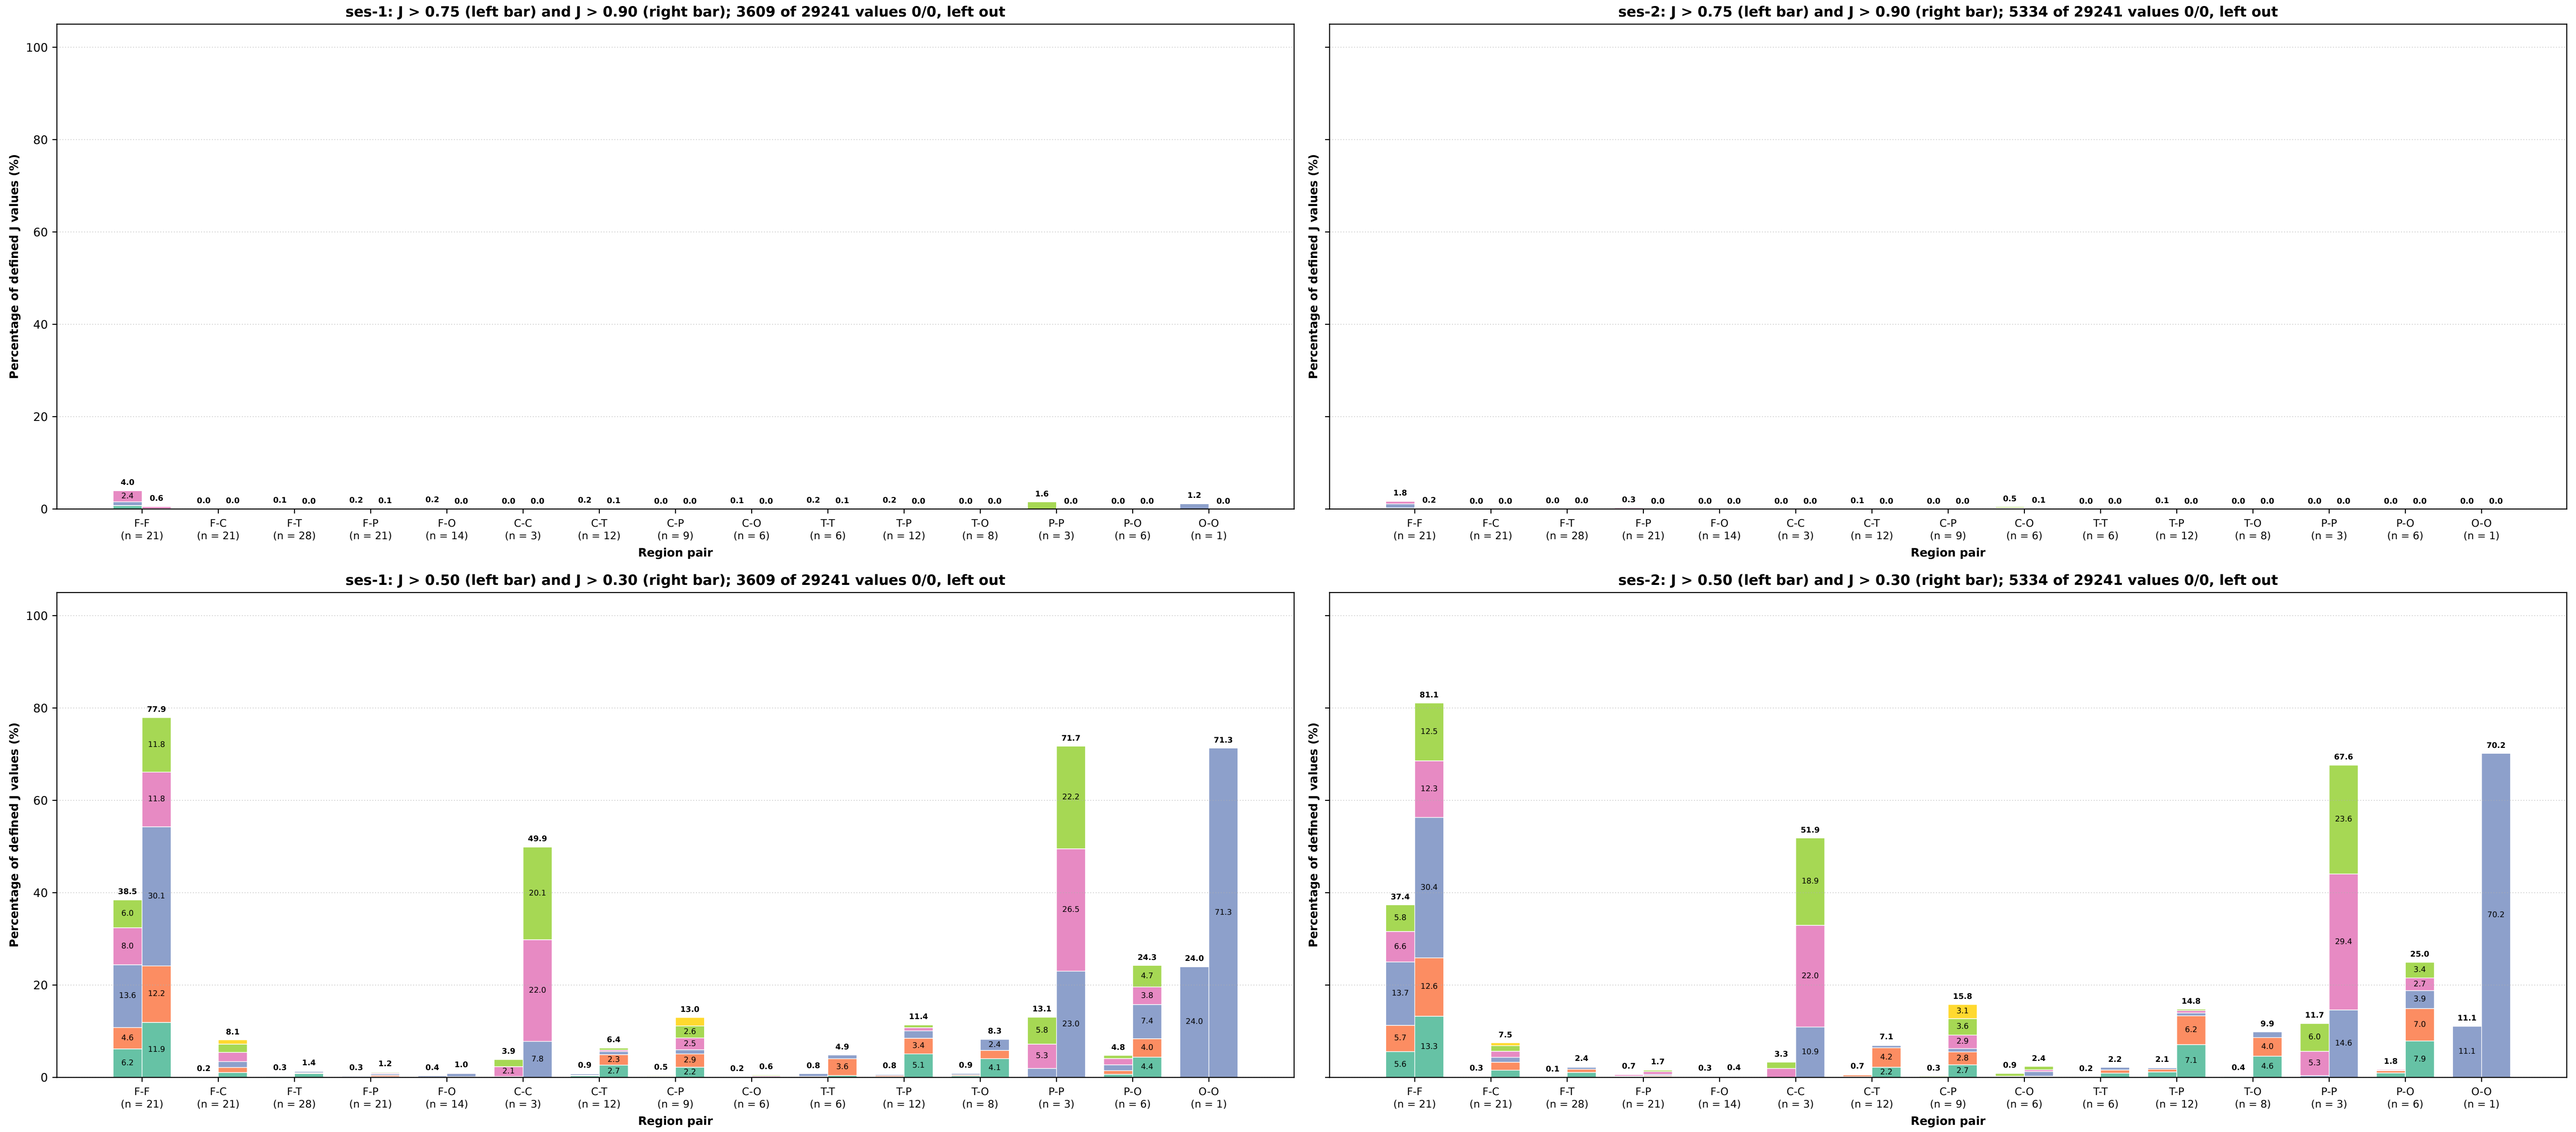

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f13: broadband binary node degree
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

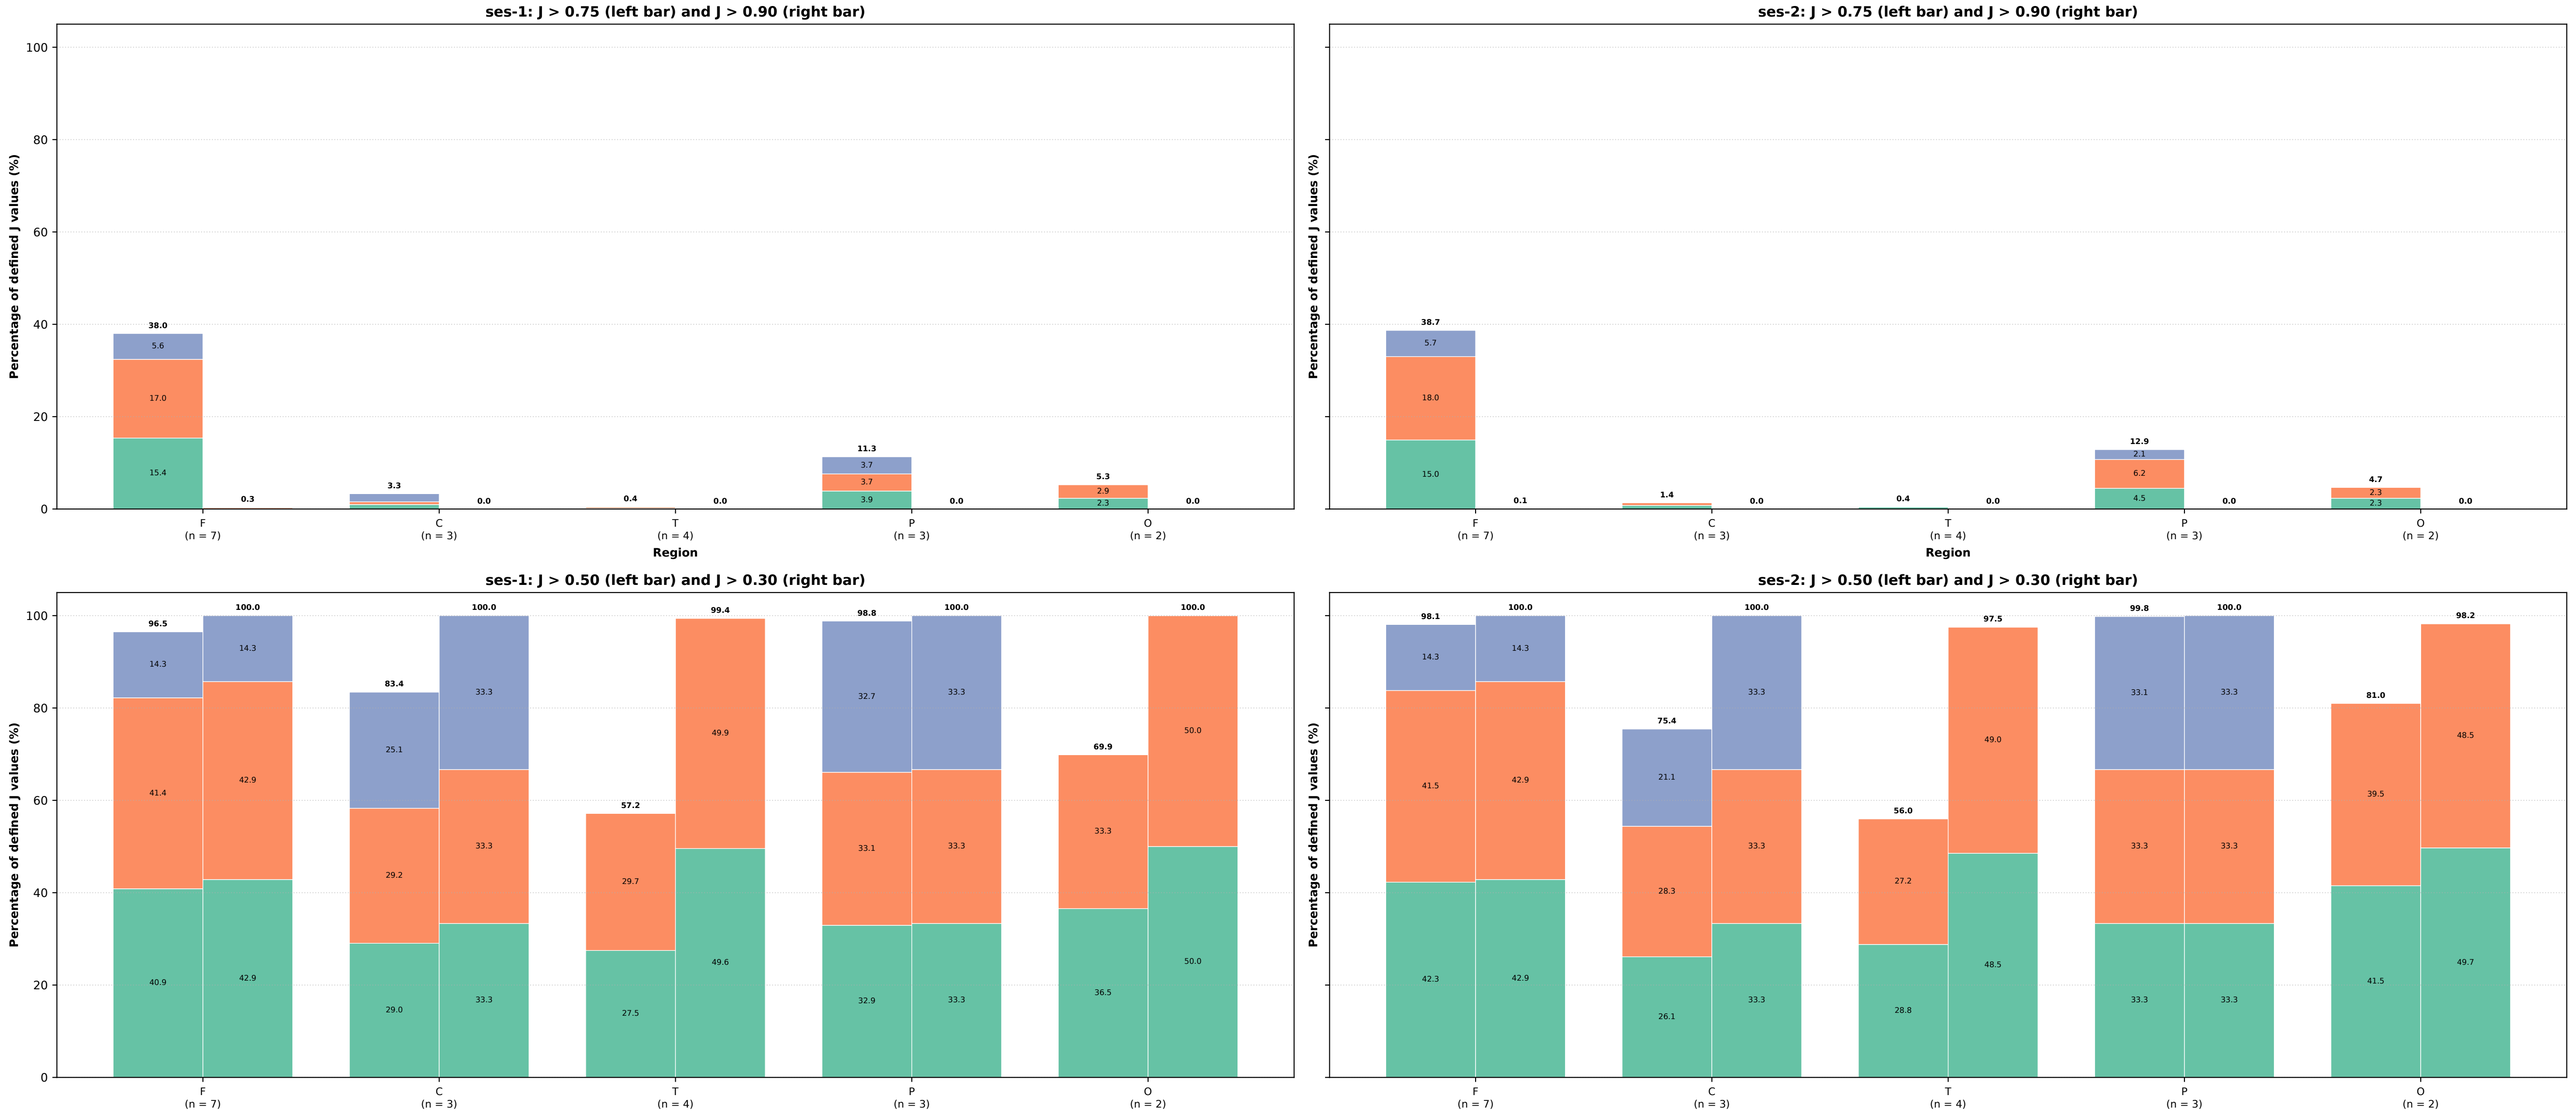

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f14: broadband binary edge strength
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

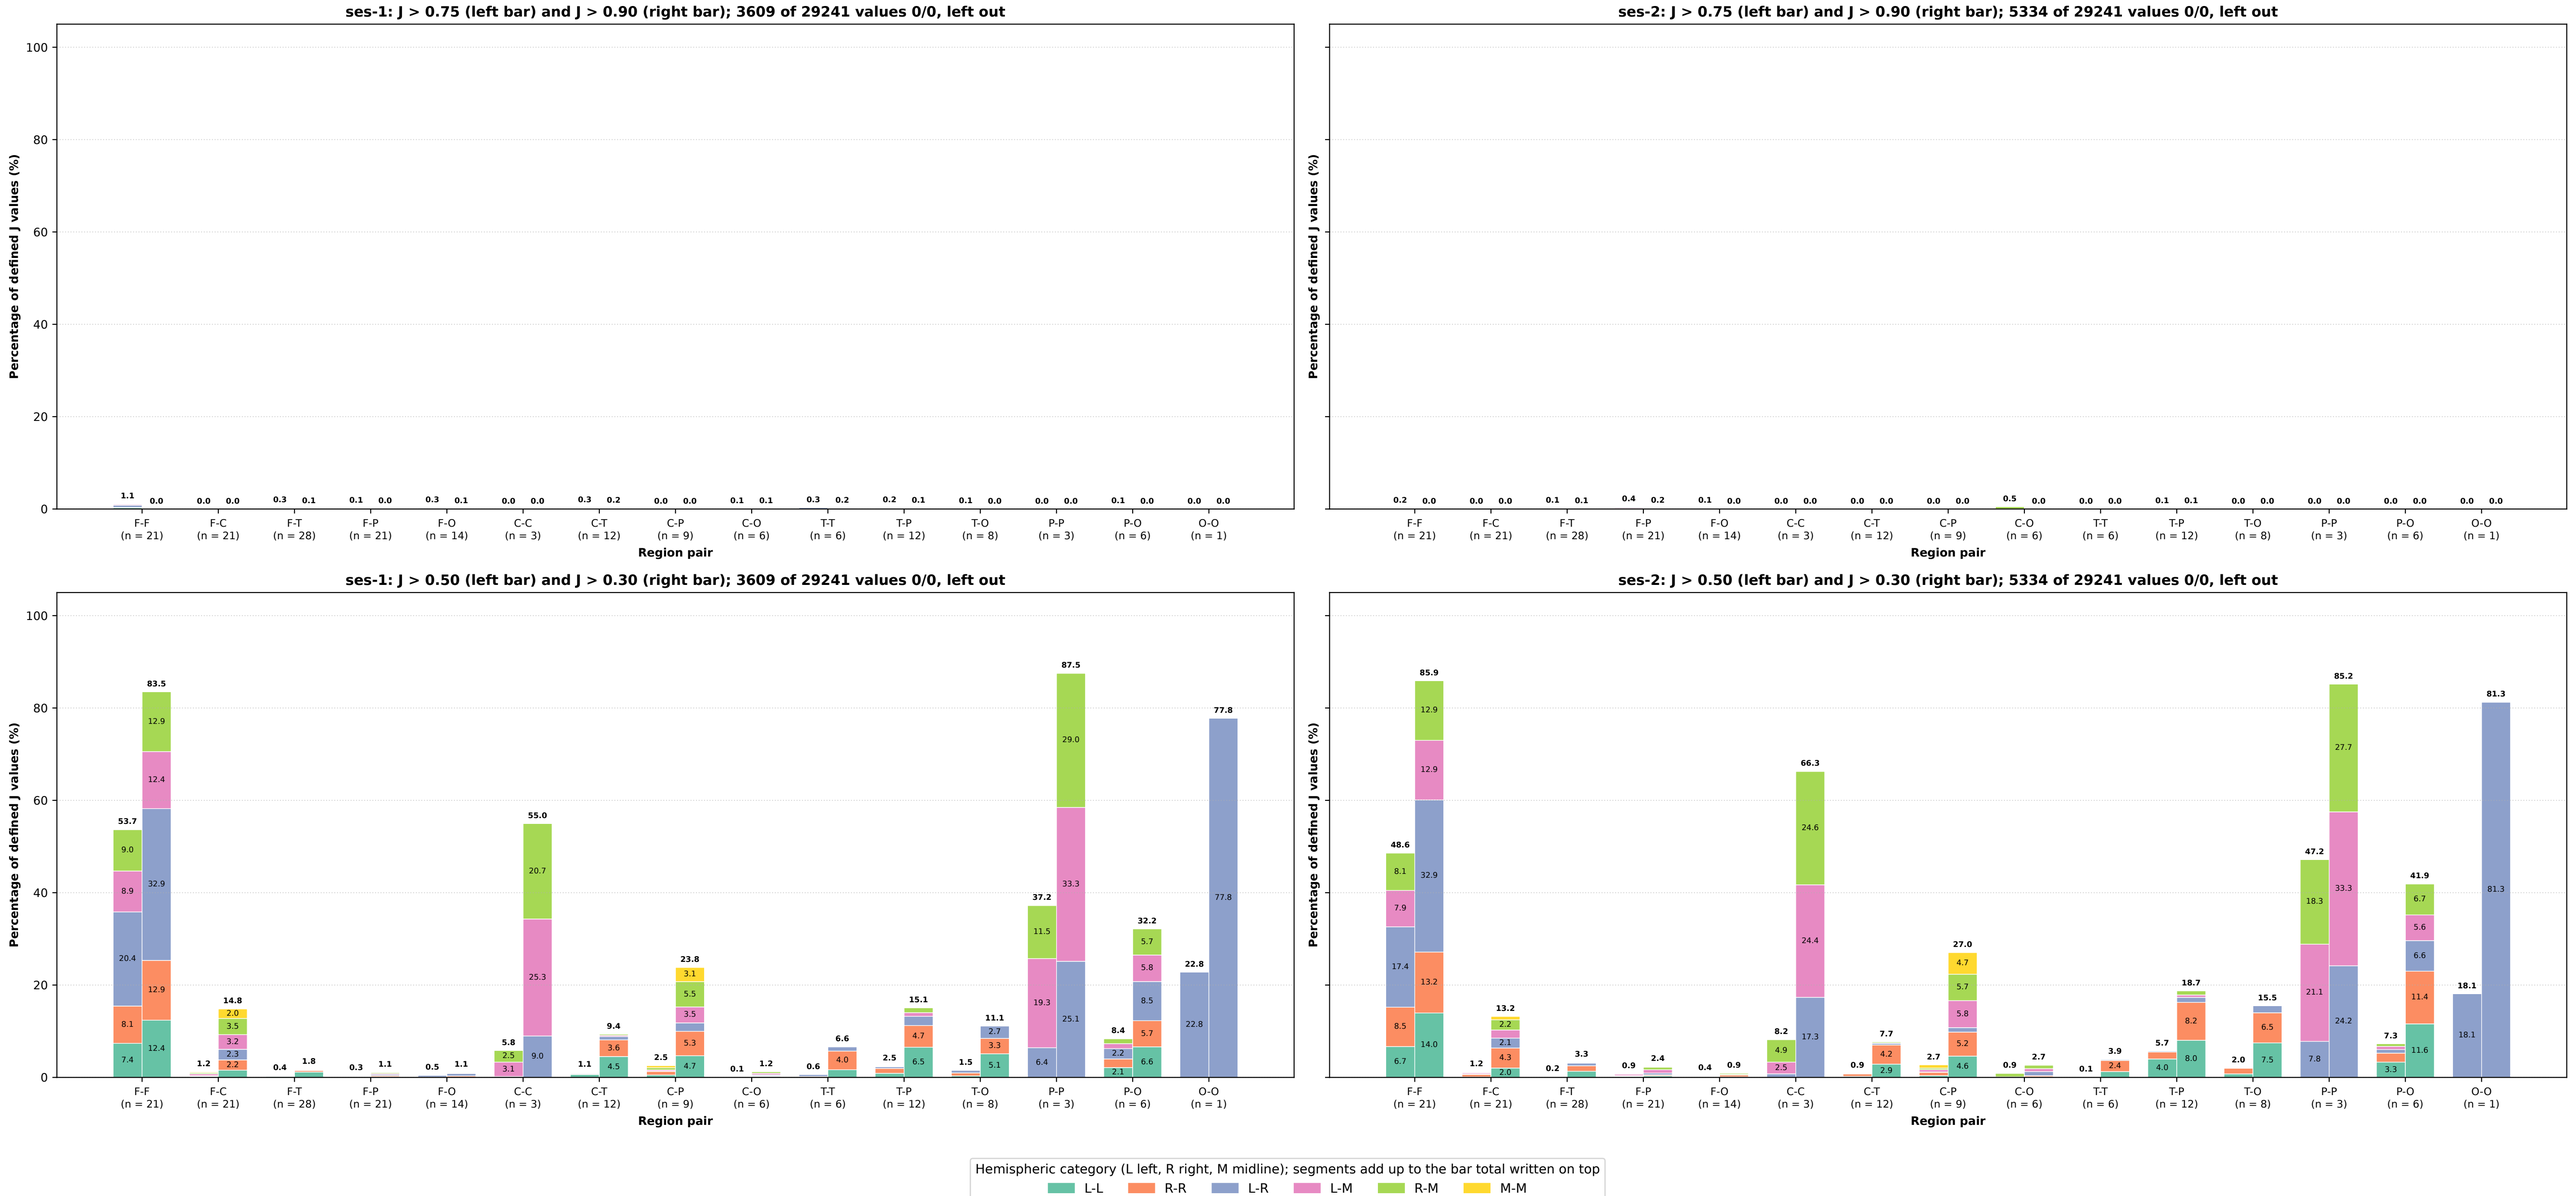

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f15: broadband binary node eigenvector
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

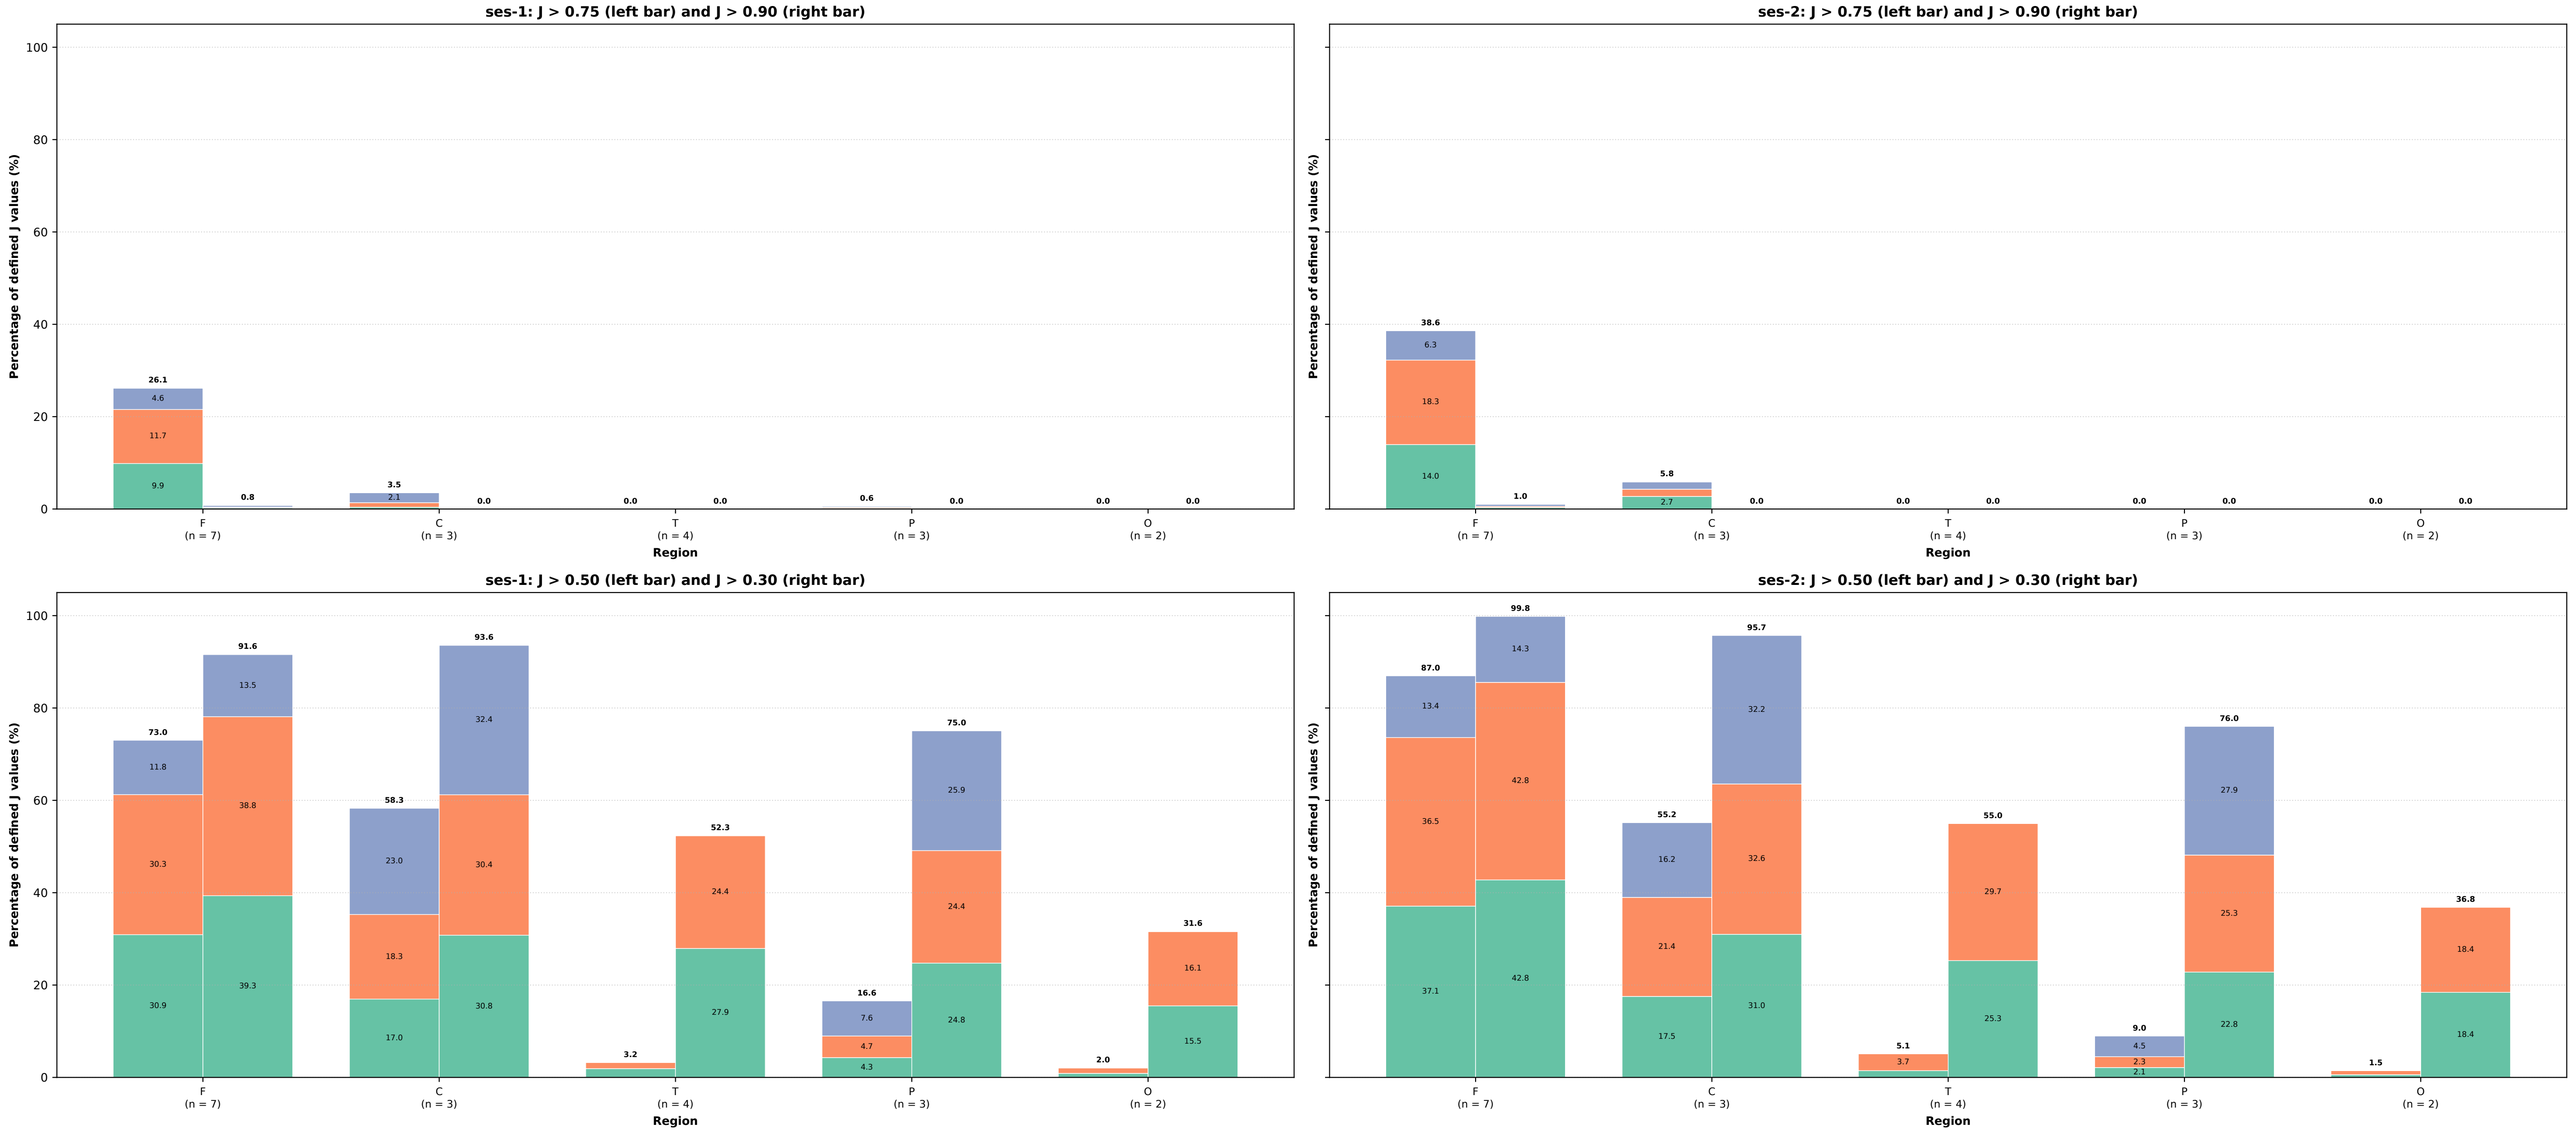

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f16: broadband binary edge eigenvector
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

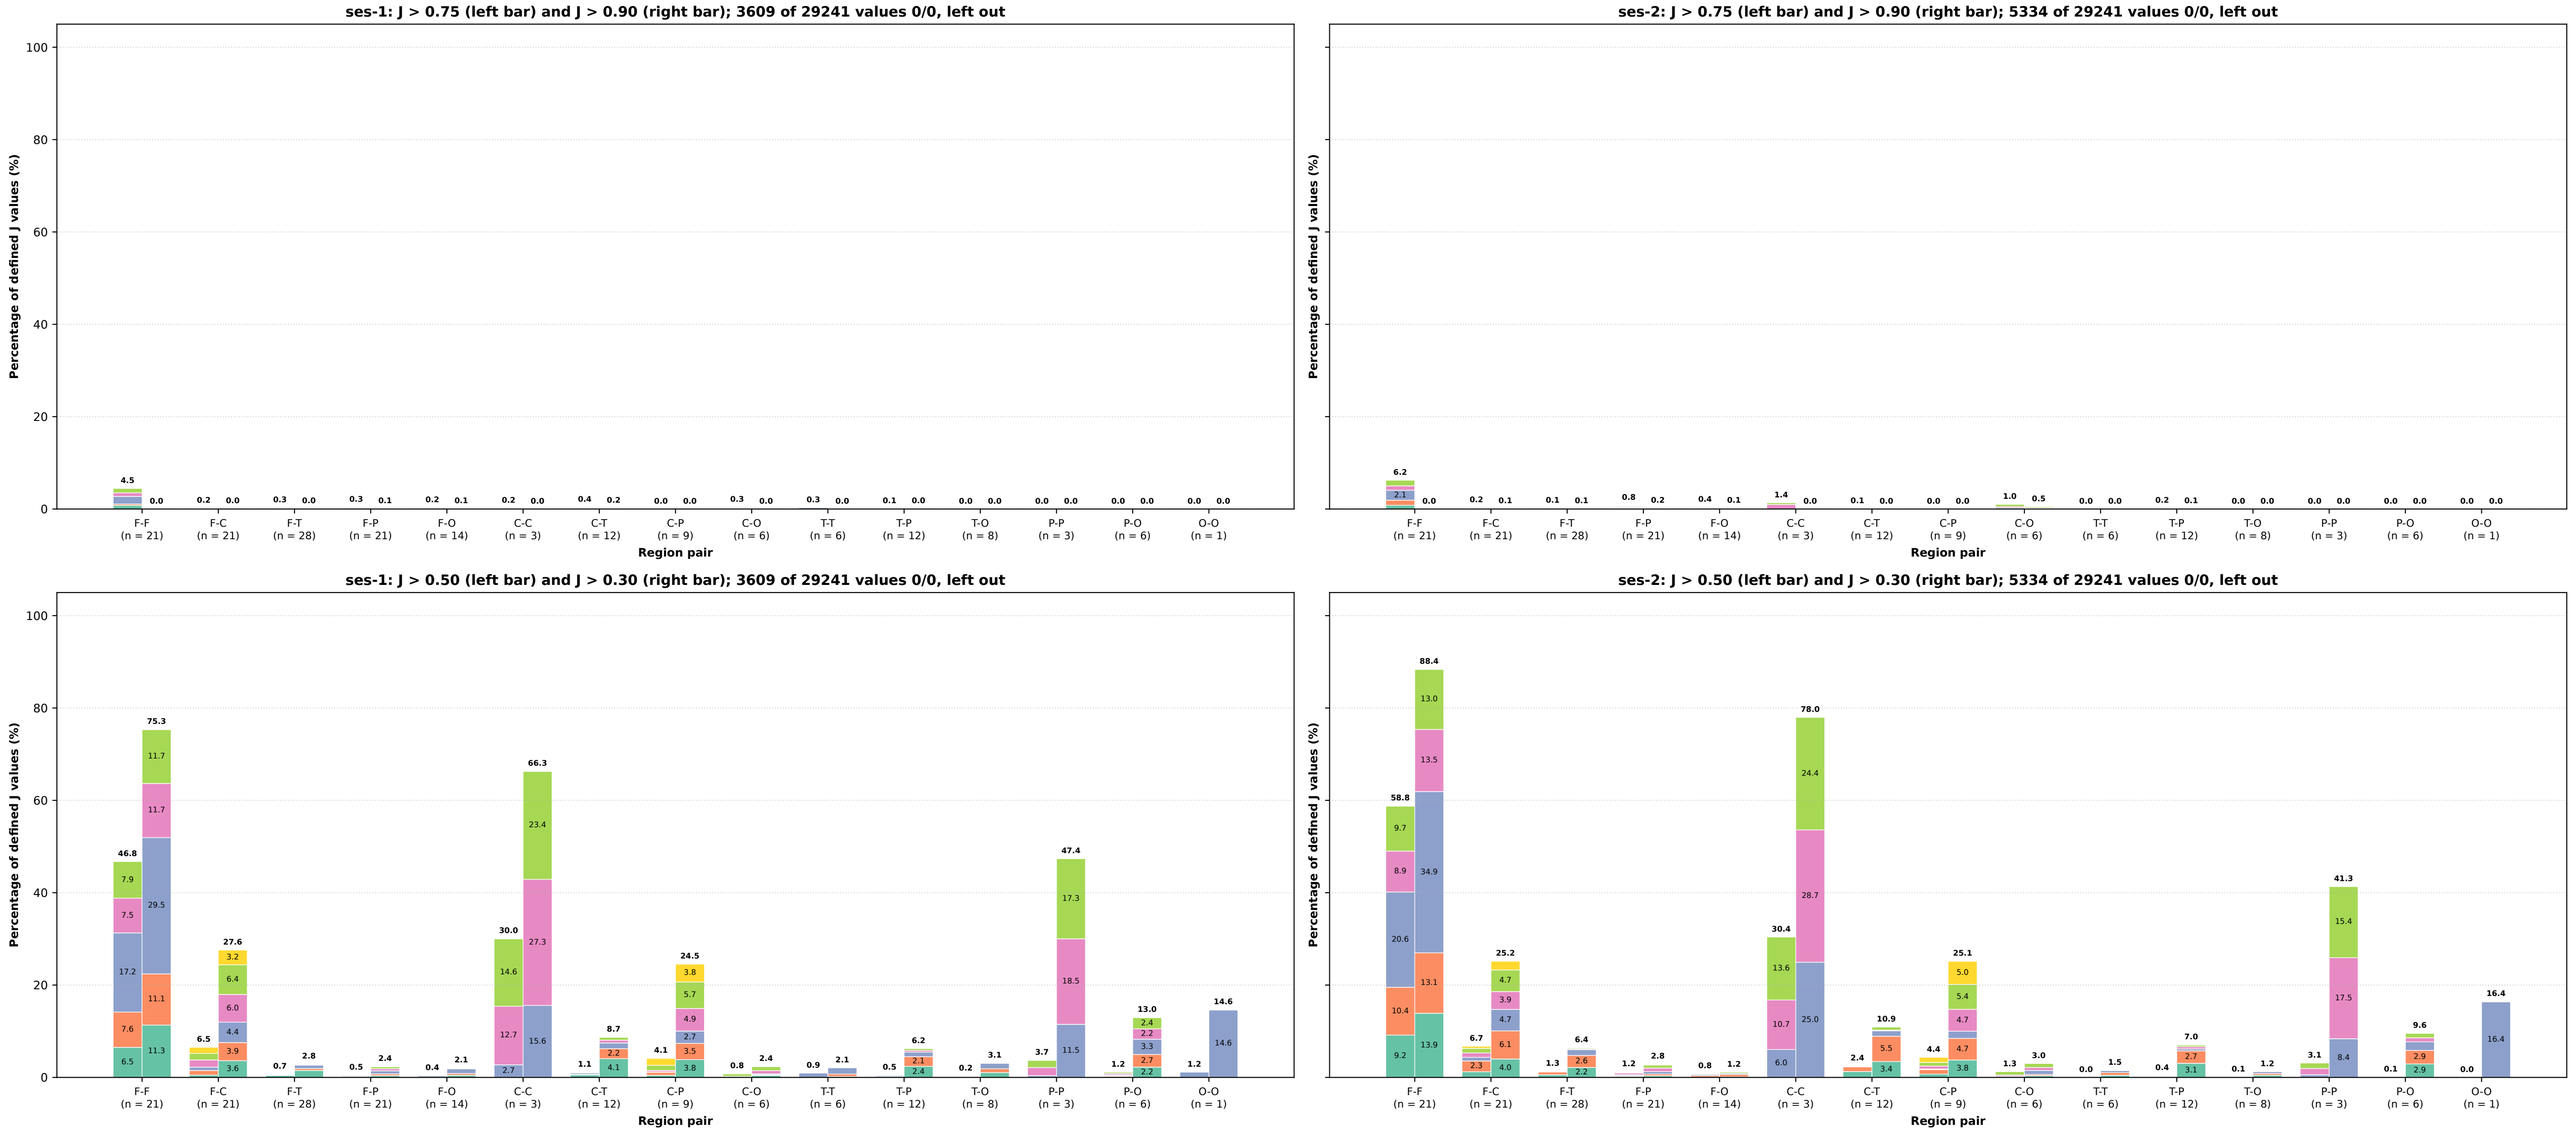

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f17: broadband binary node closeness
Each bar: all 171 infant pairs x the elements of that region (n elements below each label)

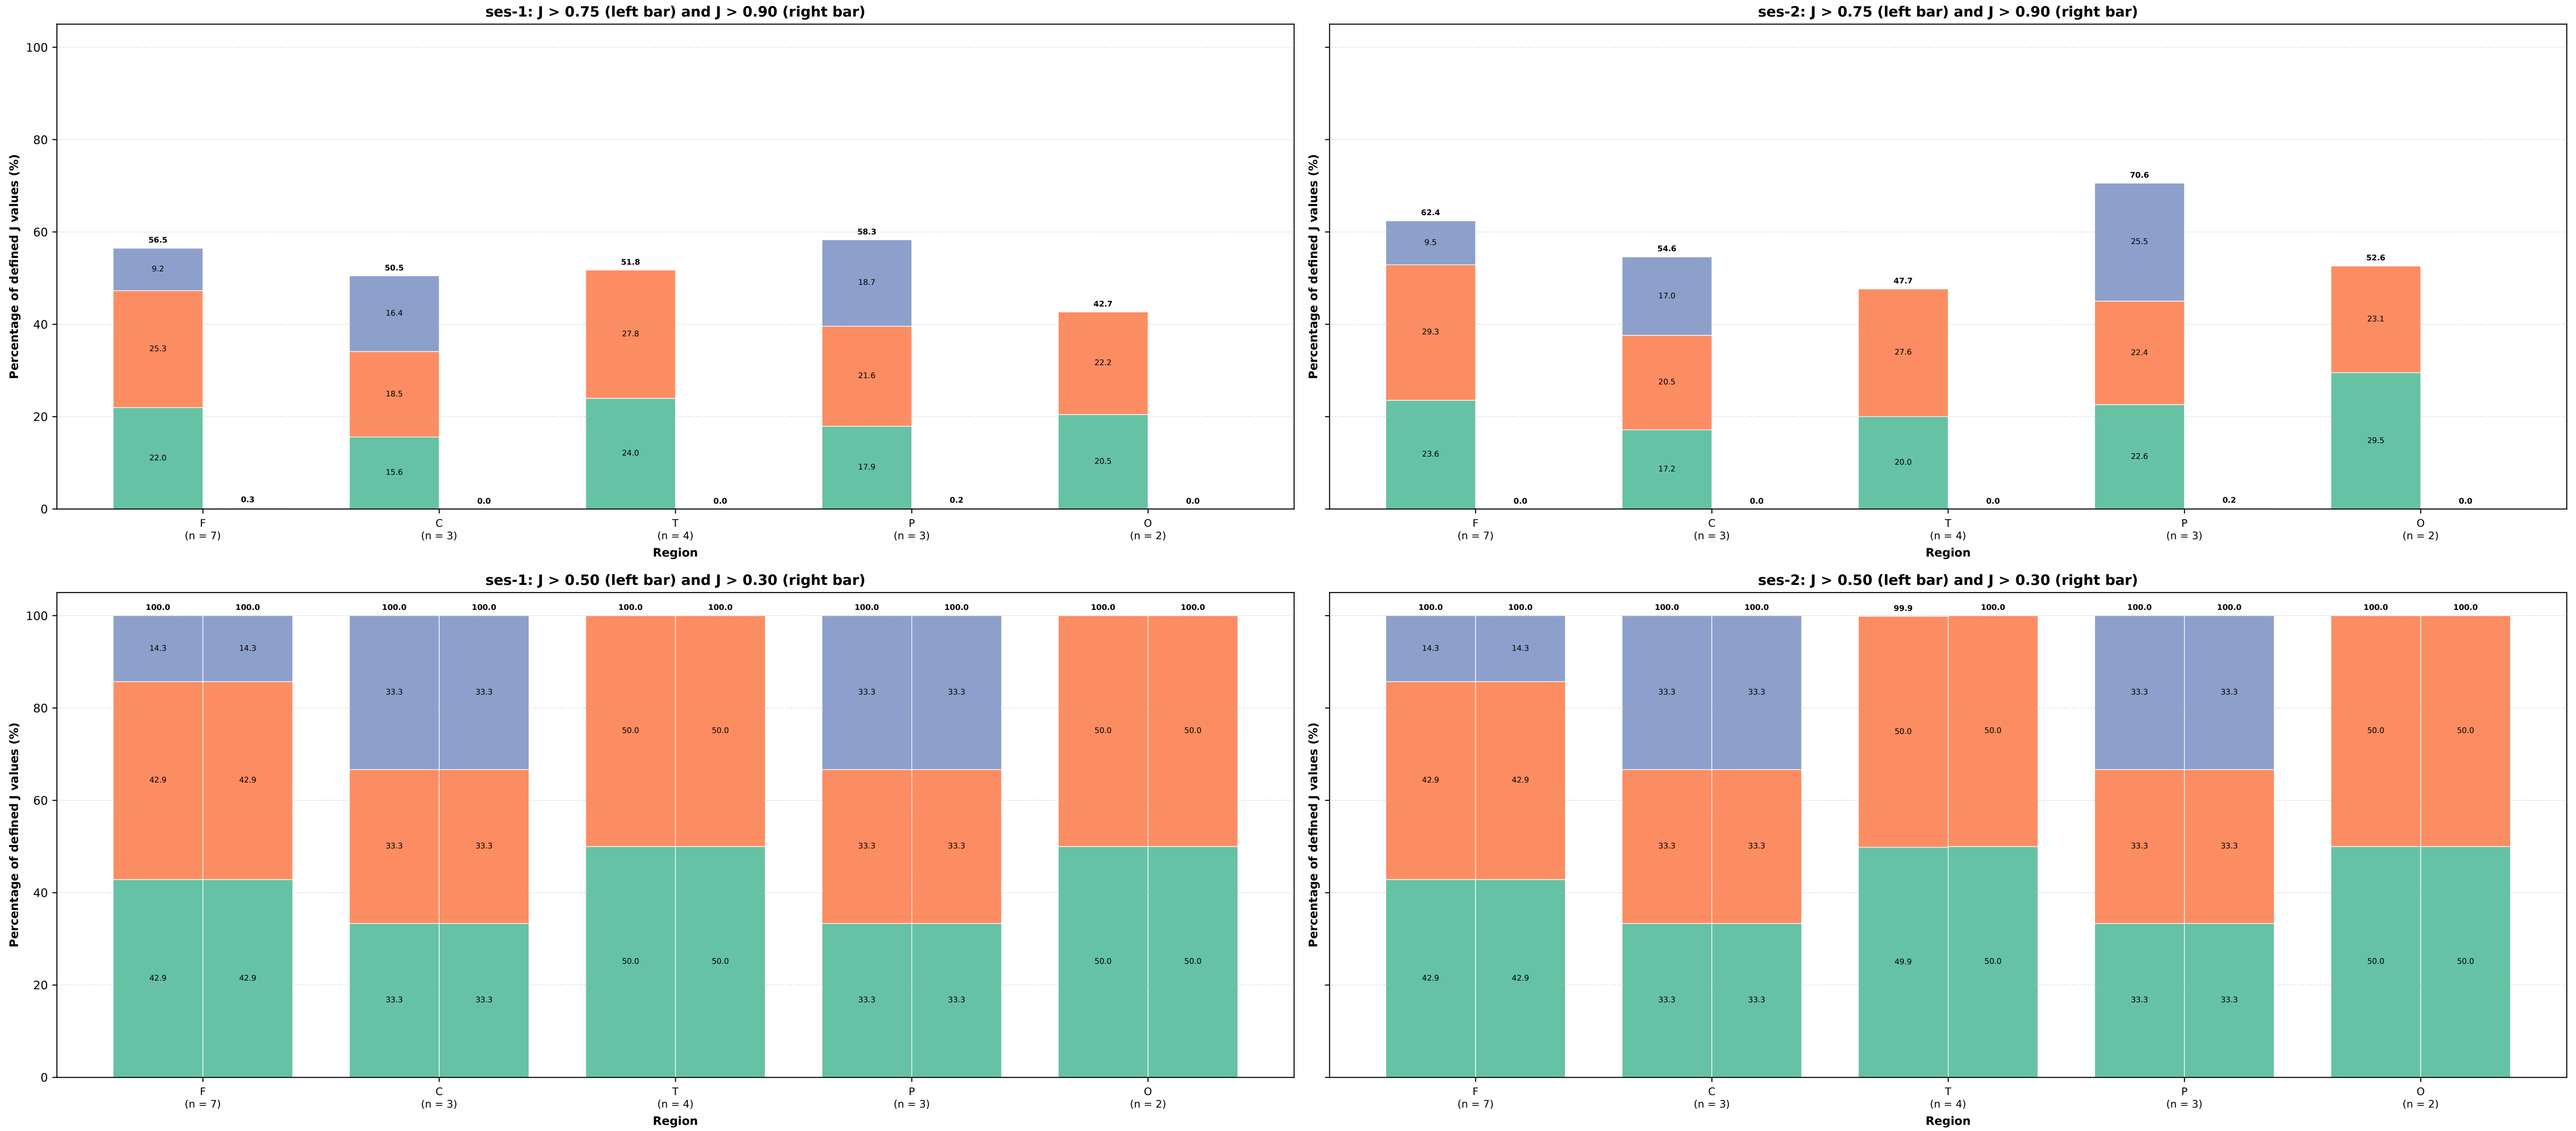

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f18: broadband binary edge closeness
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

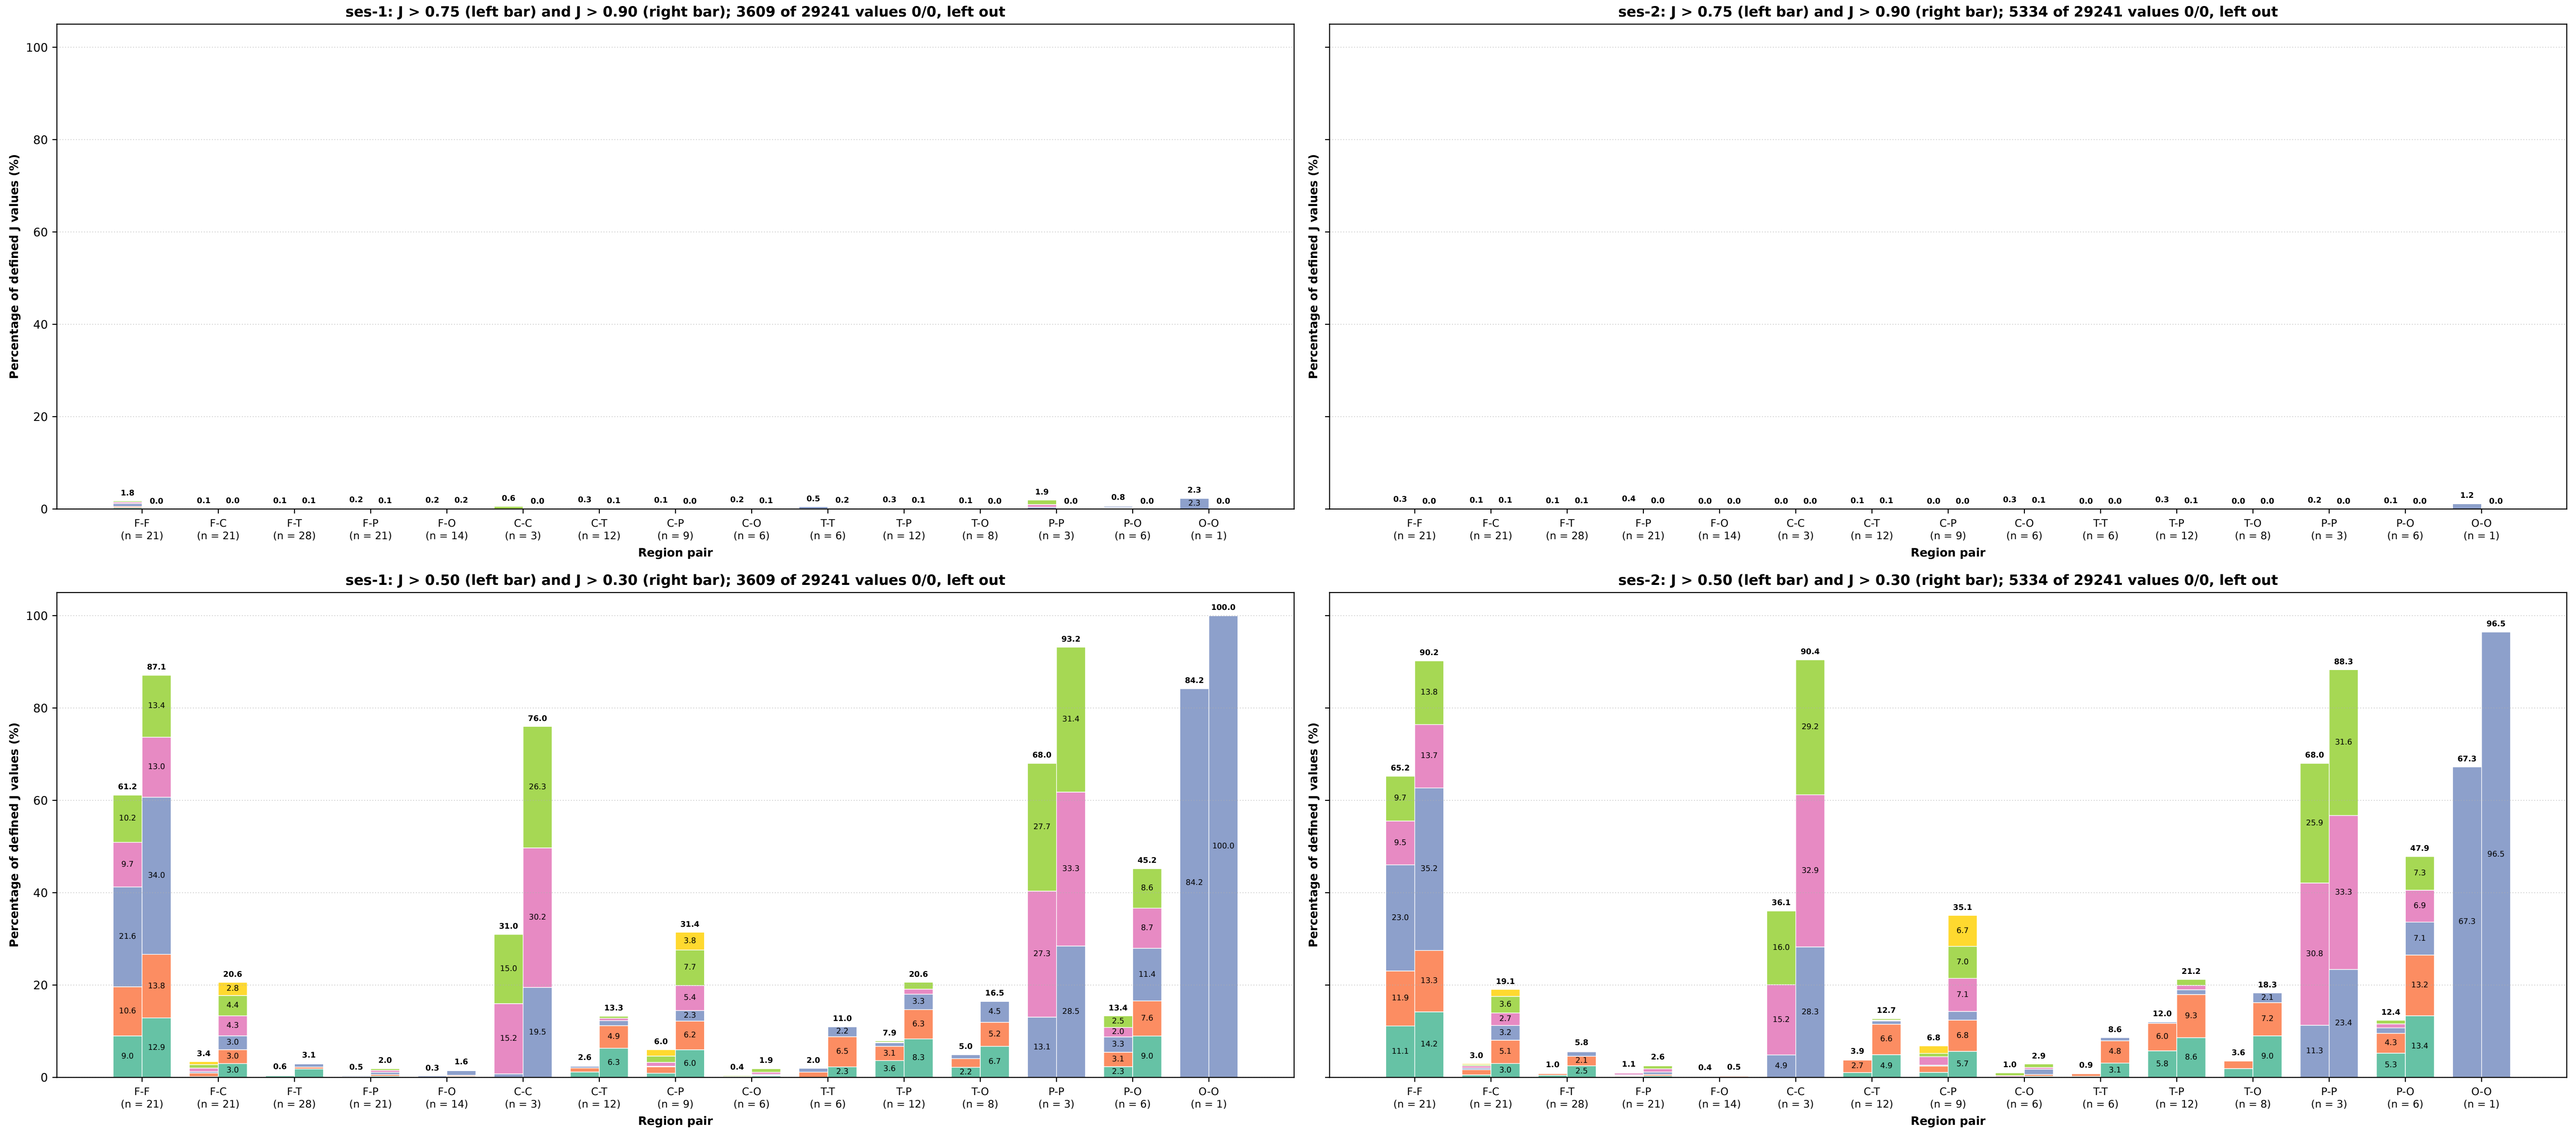

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f19: delta weighted correlation
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

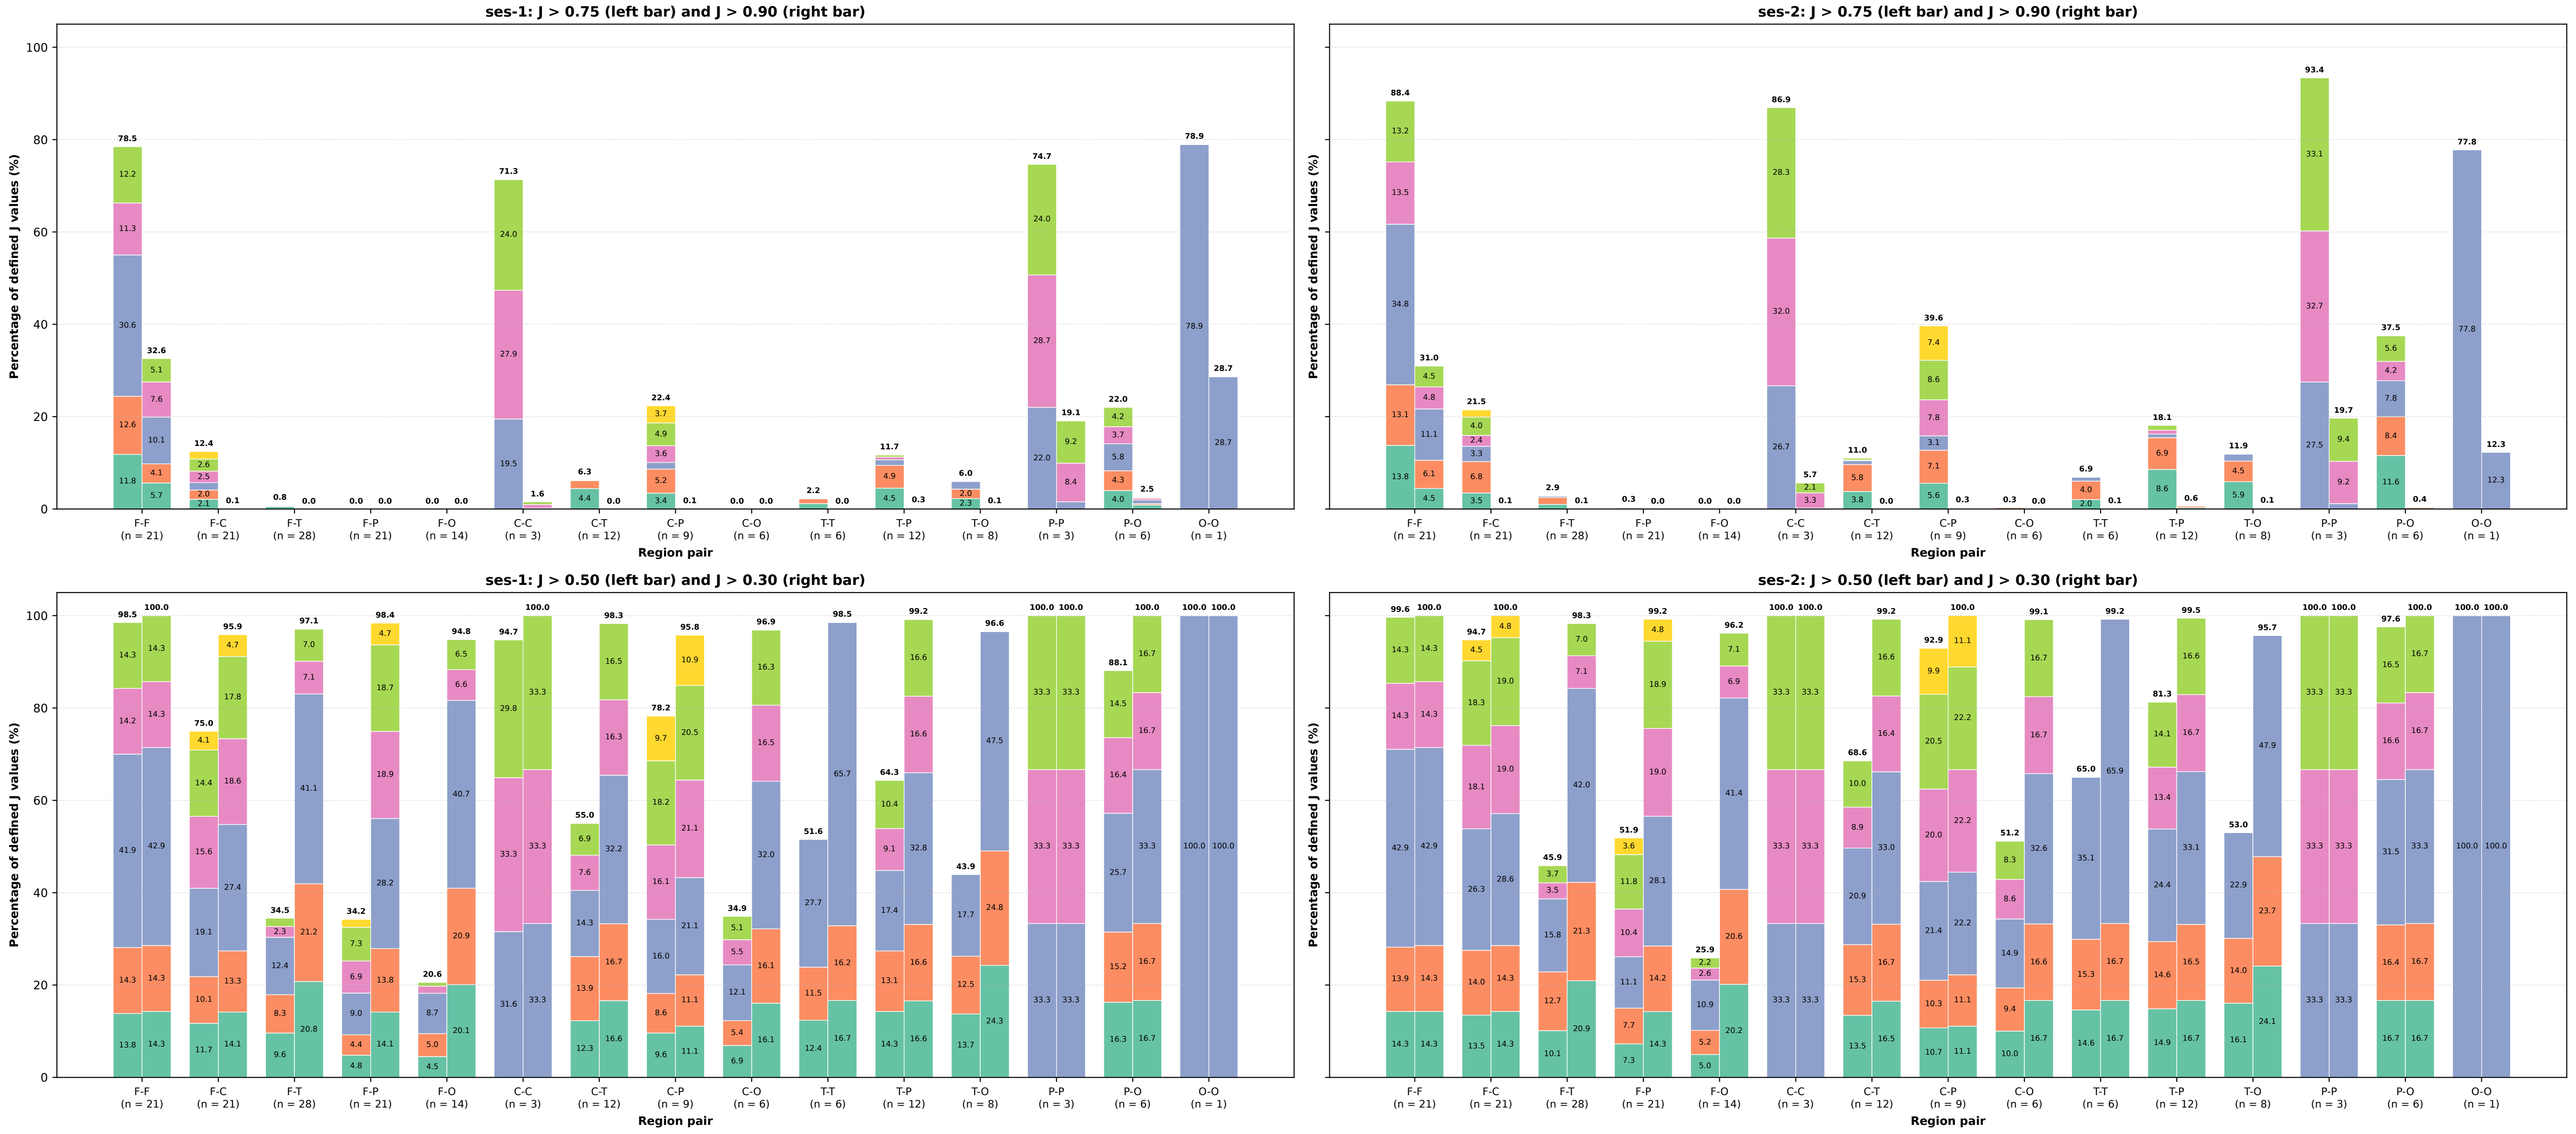

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f20: delta binary adjacency
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

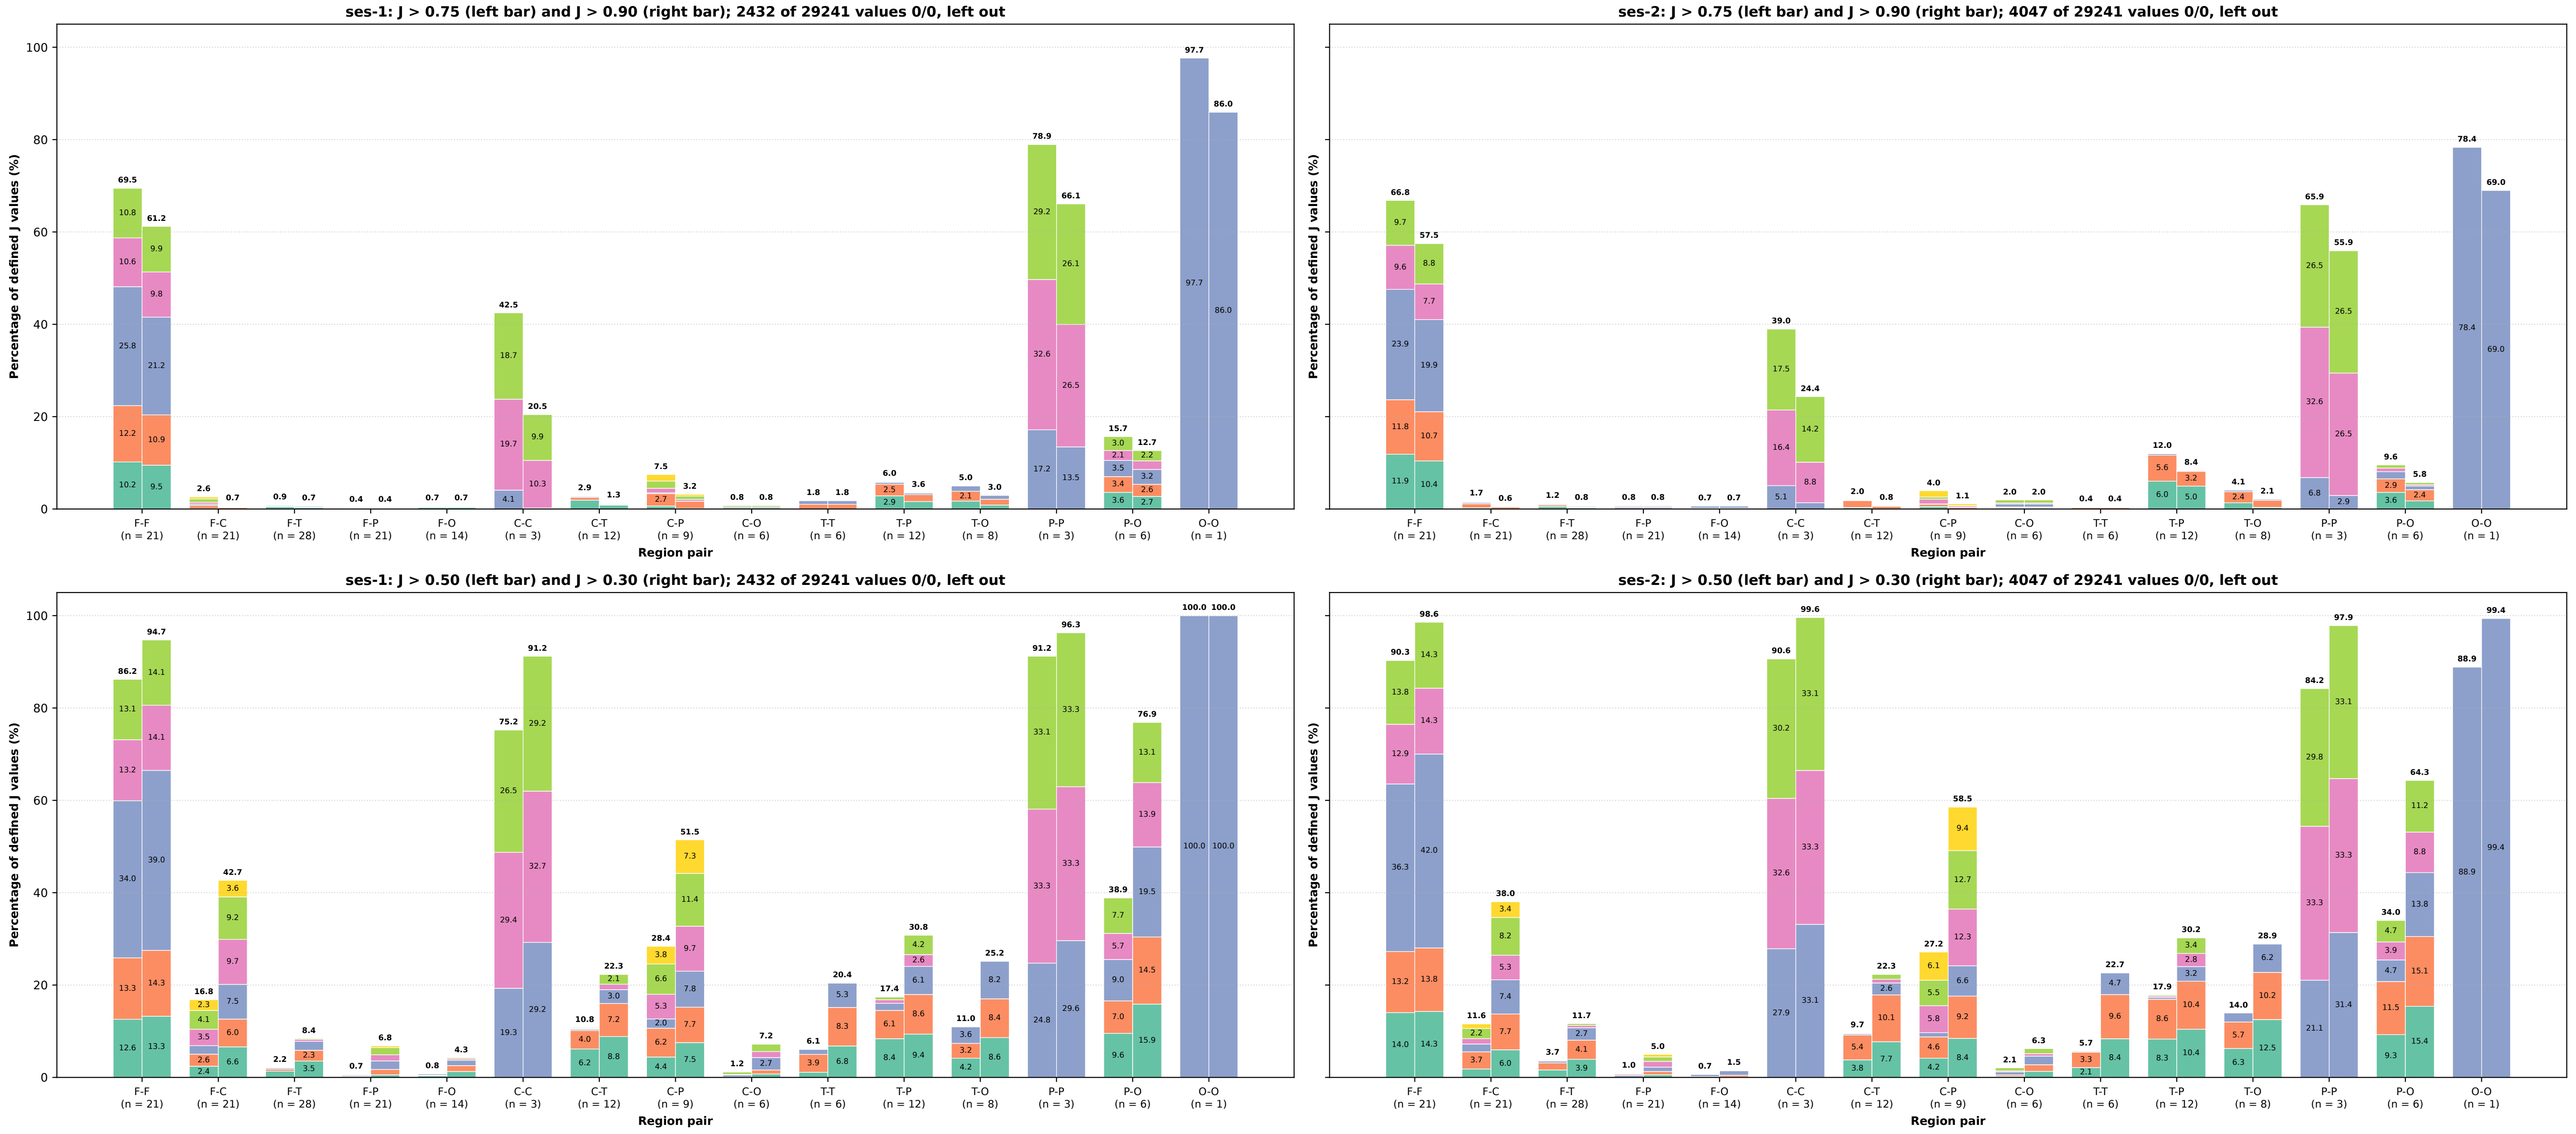

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f21: theta weighted correlation
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

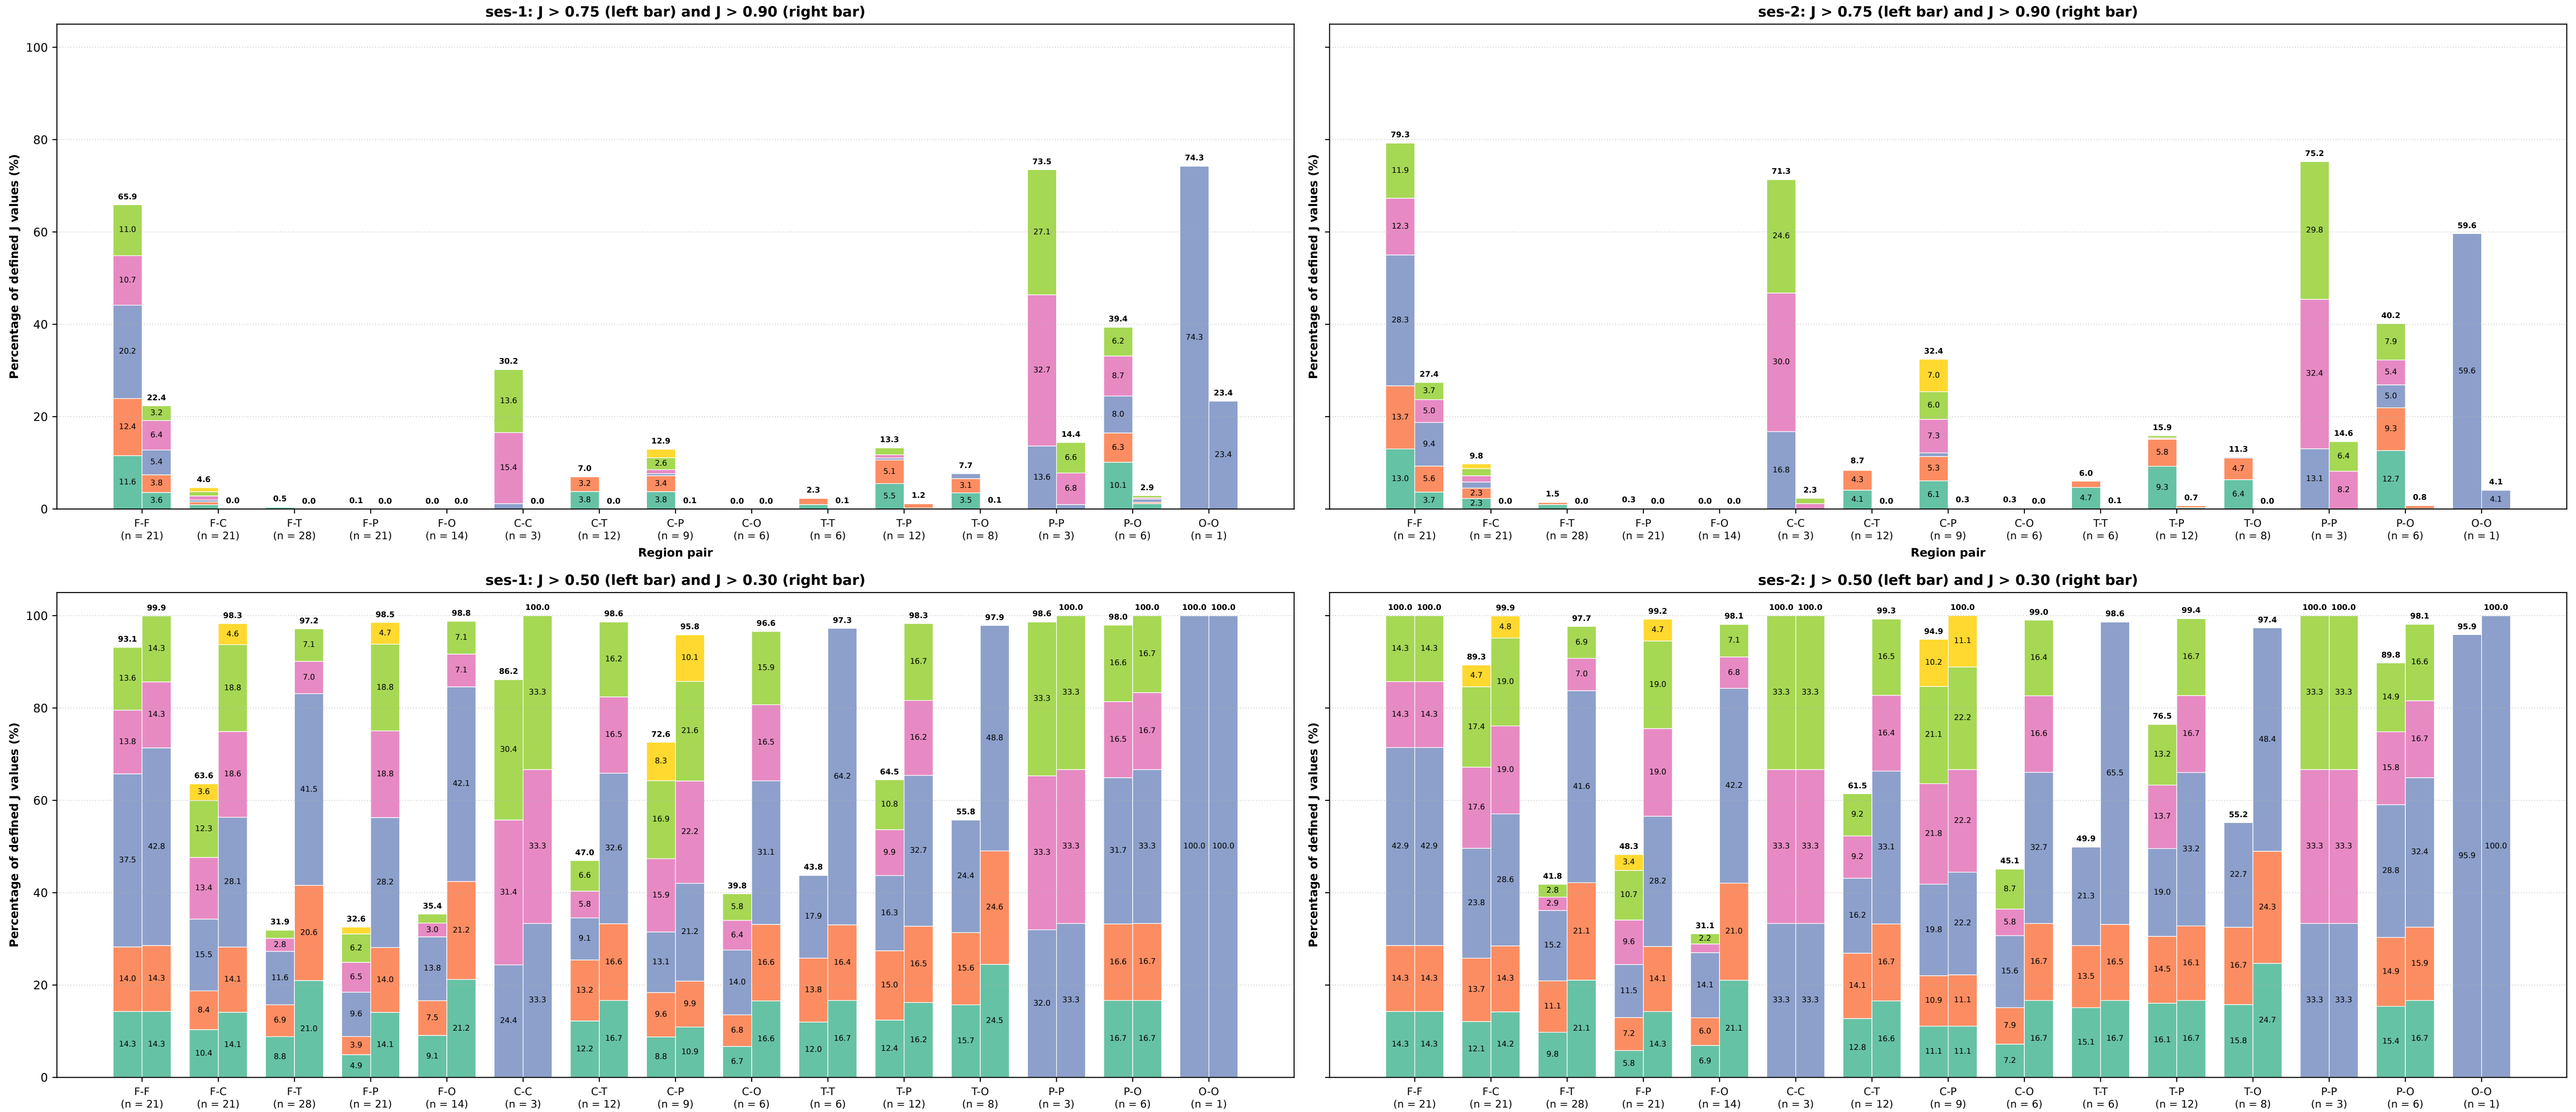

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f22: theta binary adjacency
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

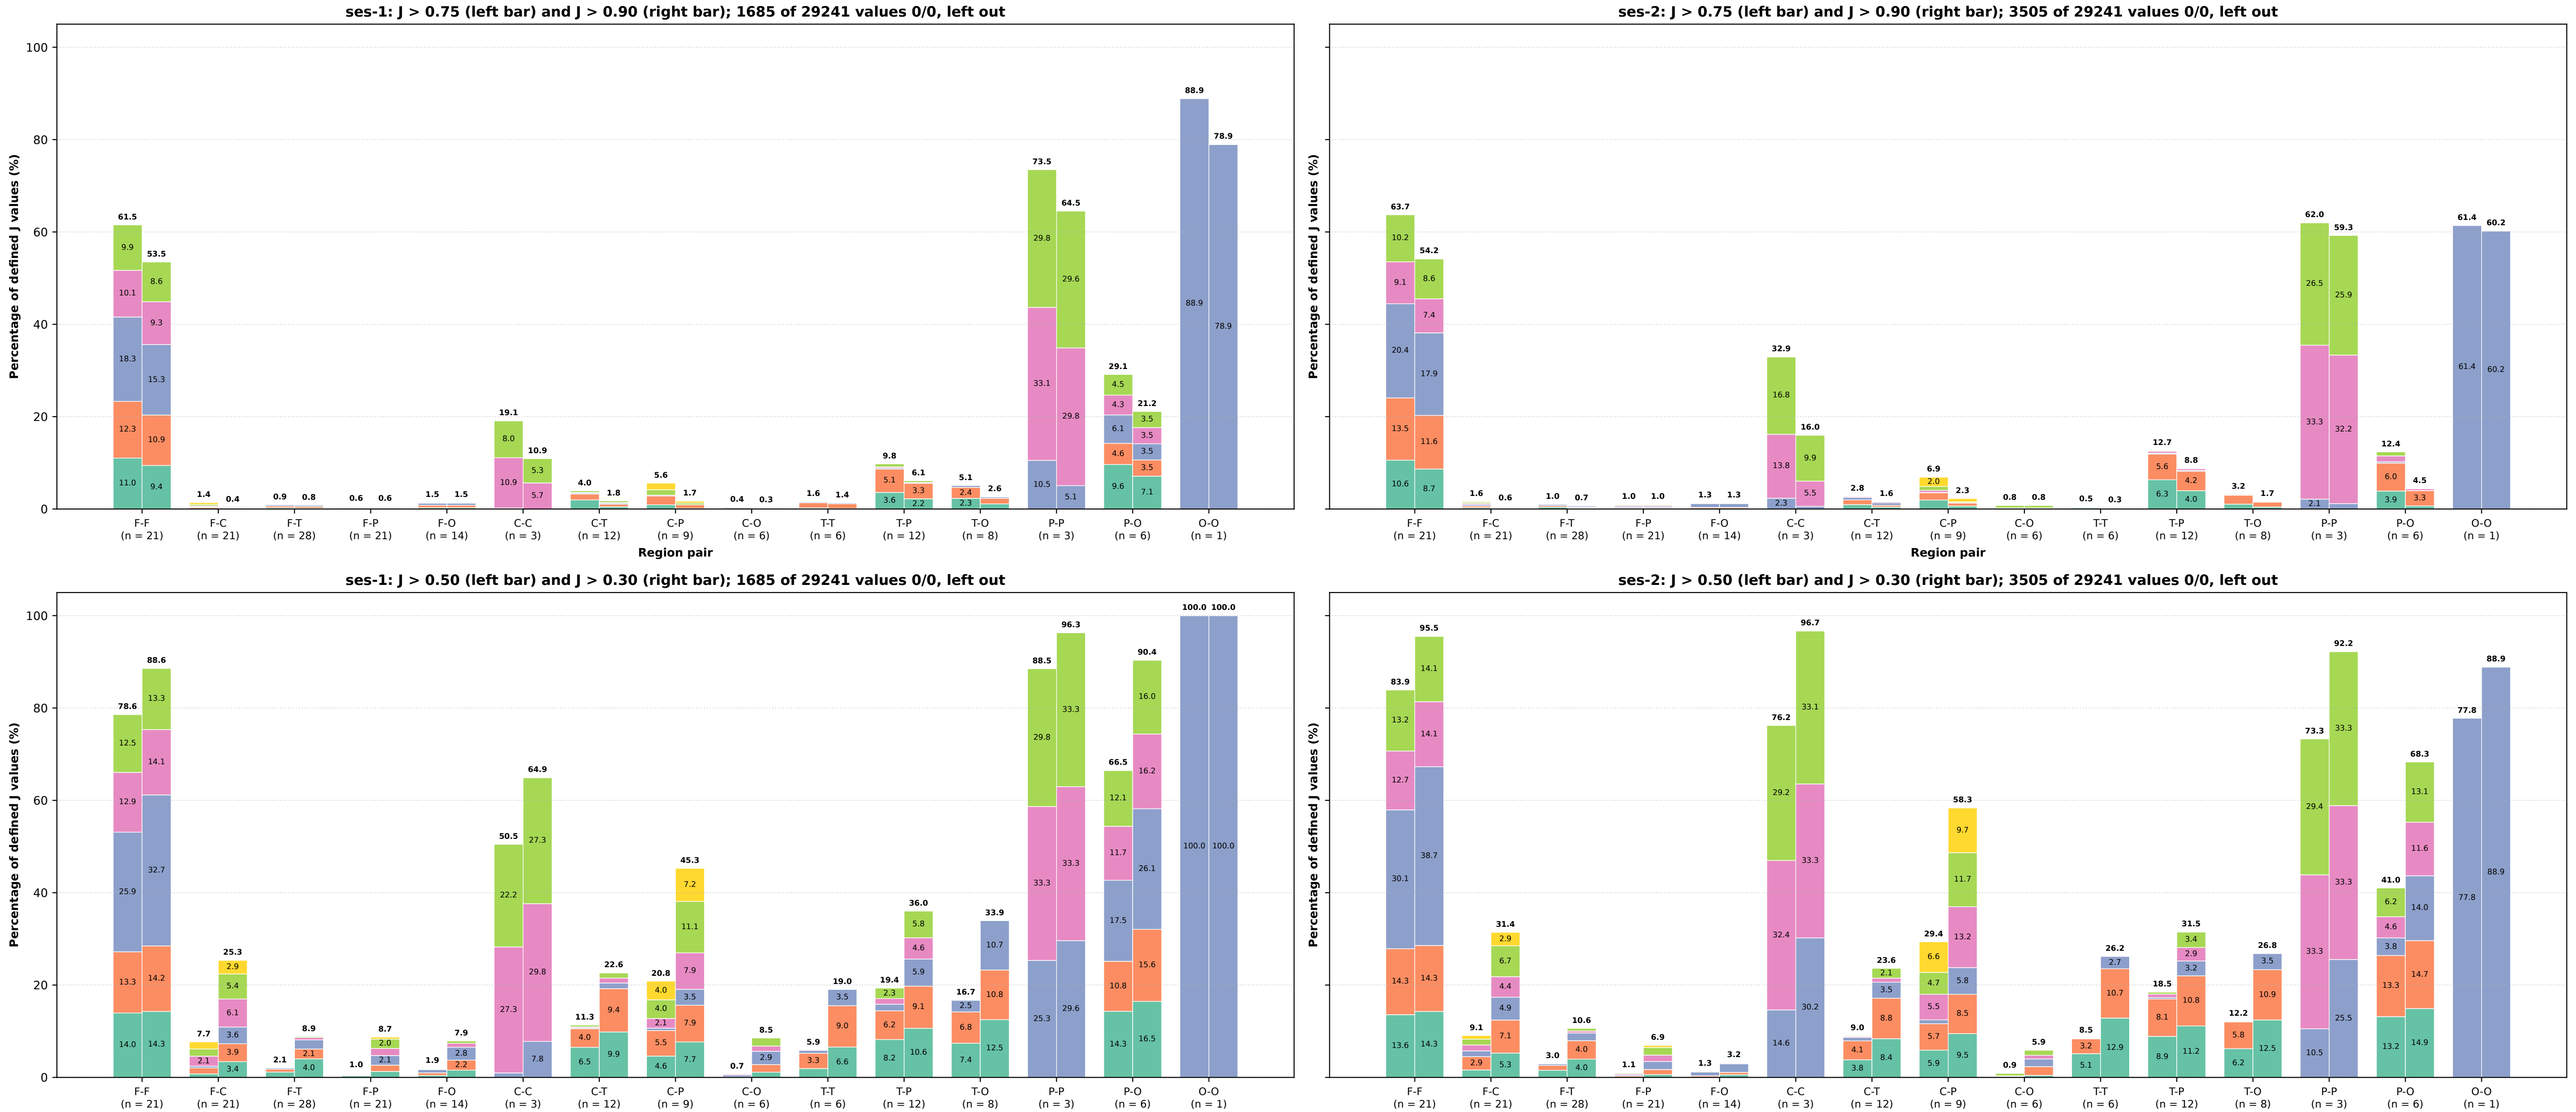

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f23: alpha weighted correlation
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

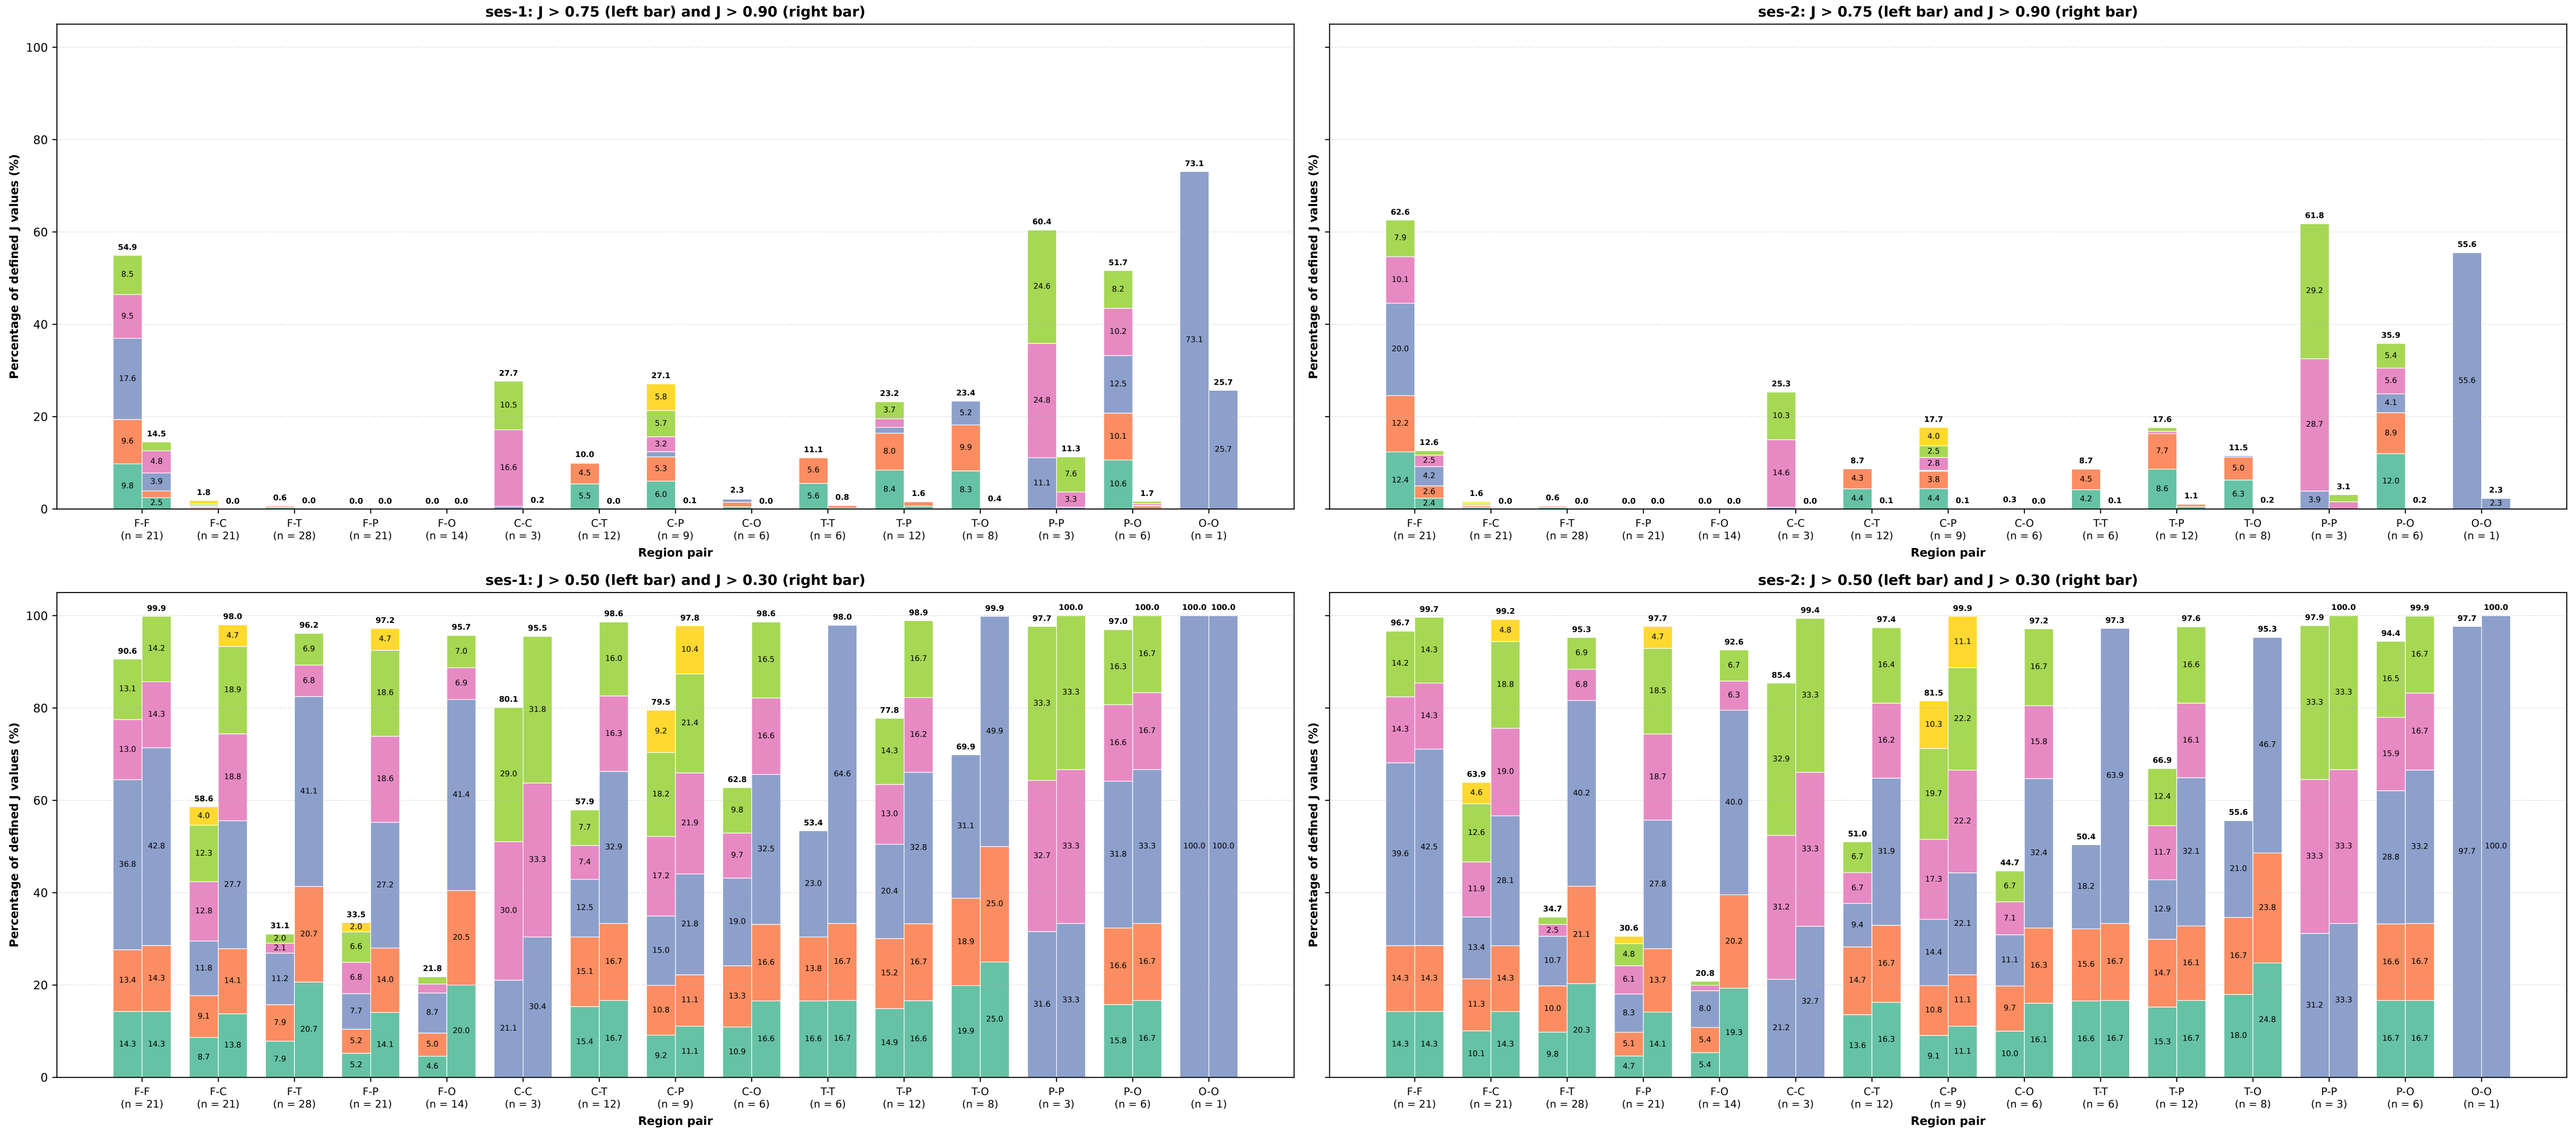

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f24: alpha binary adjacency
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

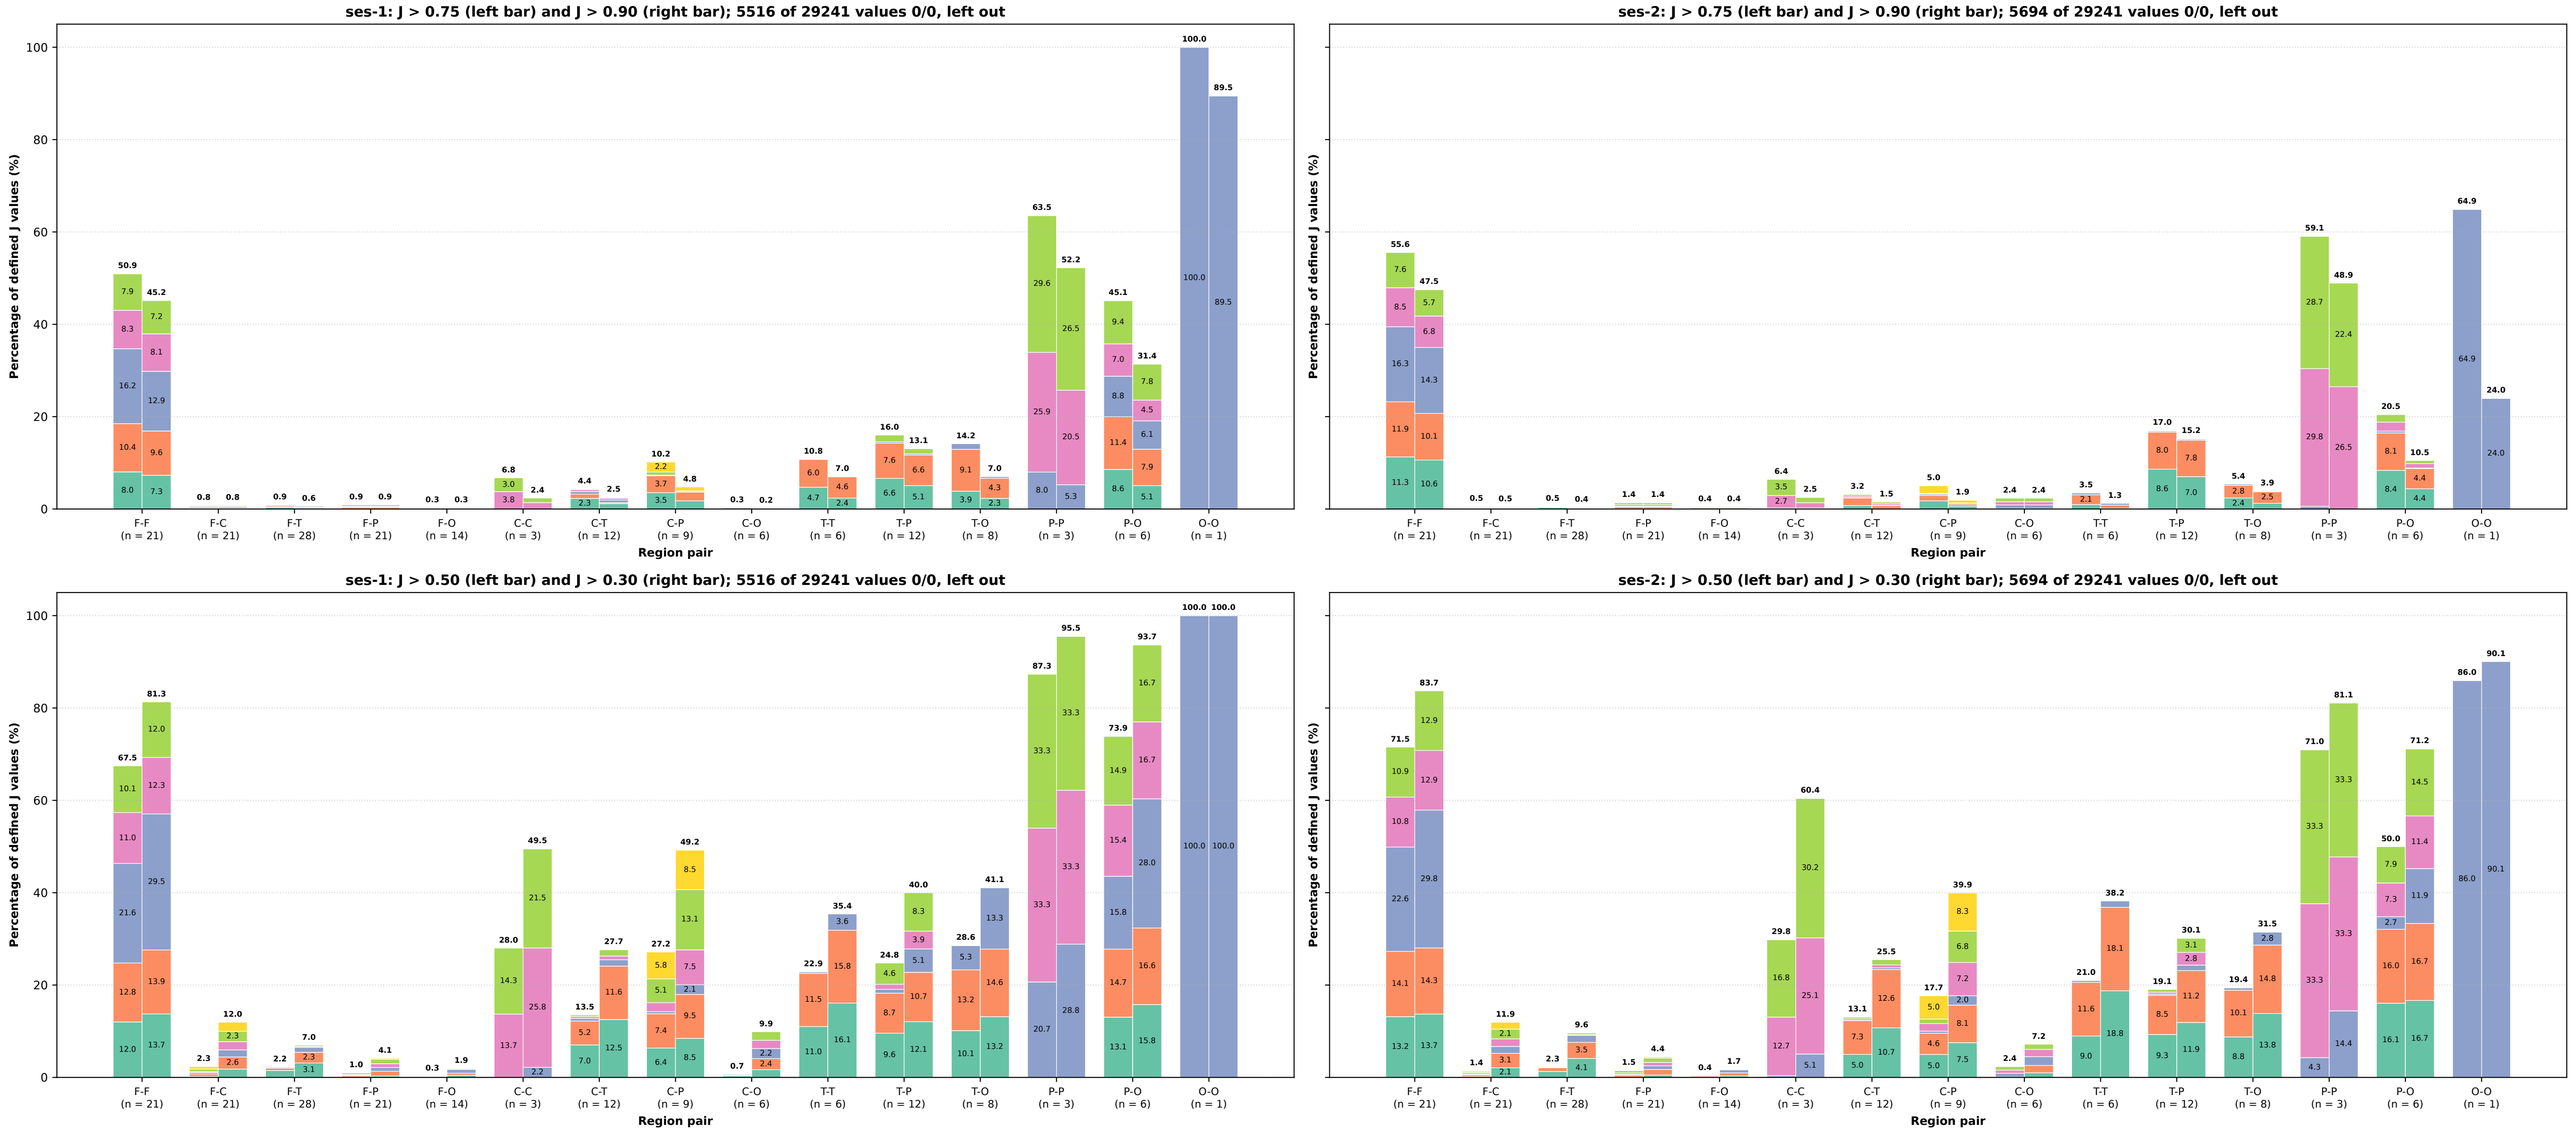

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f25: beta weighted correlation
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)

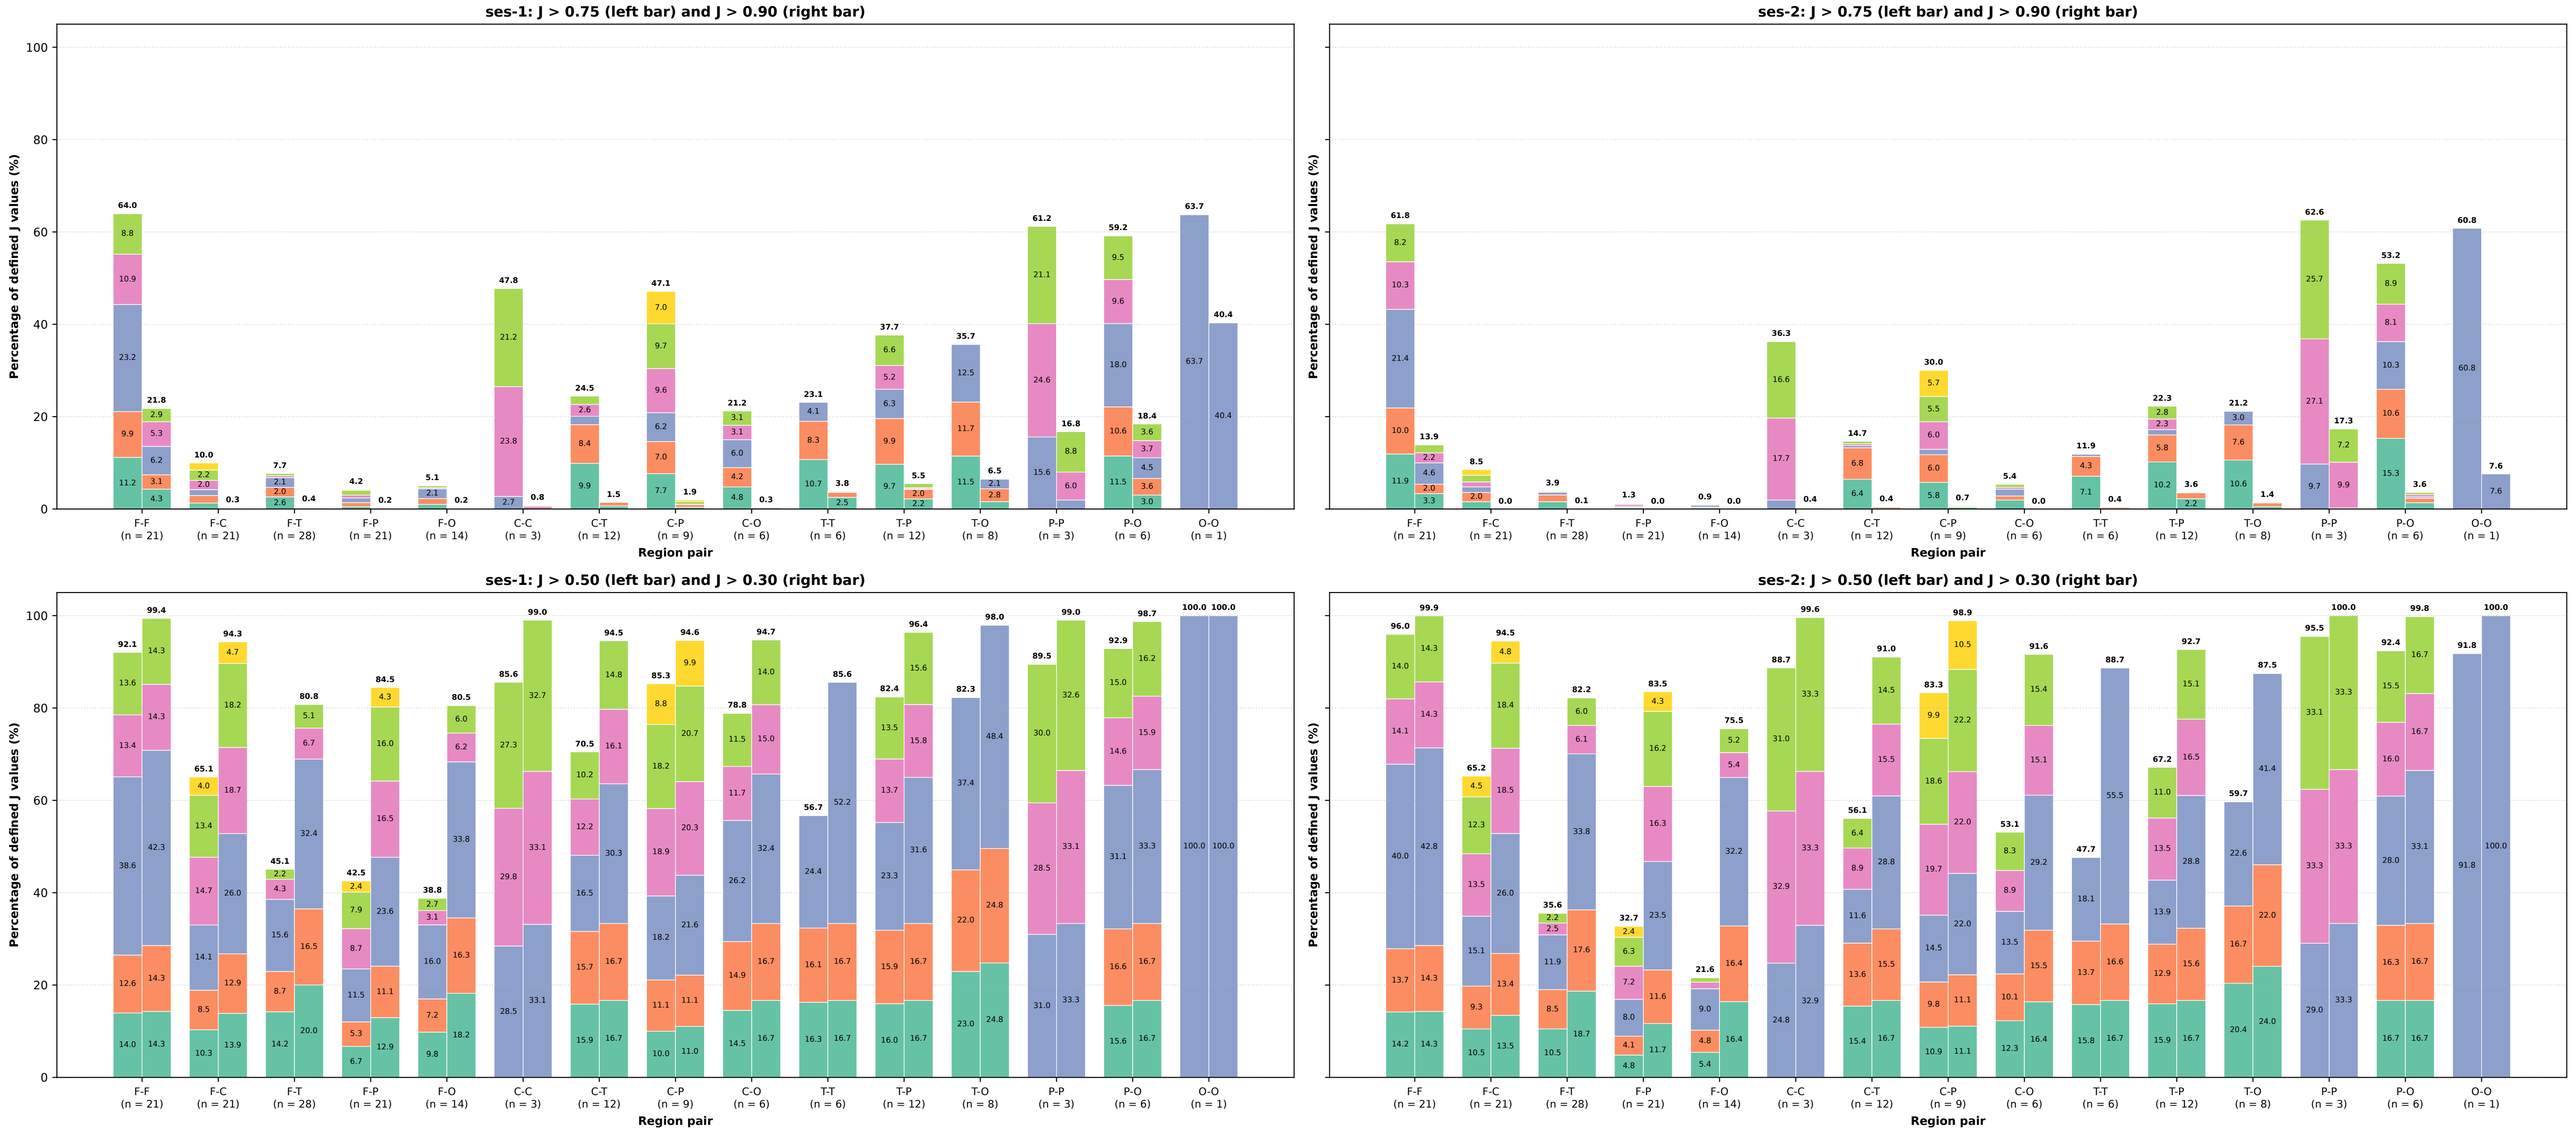

Figure 7 (Supplementary): Share of Element Similarities J Above a Threshold, f26: beta binary adjacency
Each bar: all 171 infant pairs x the elements of that region pair (n elements below each label)
