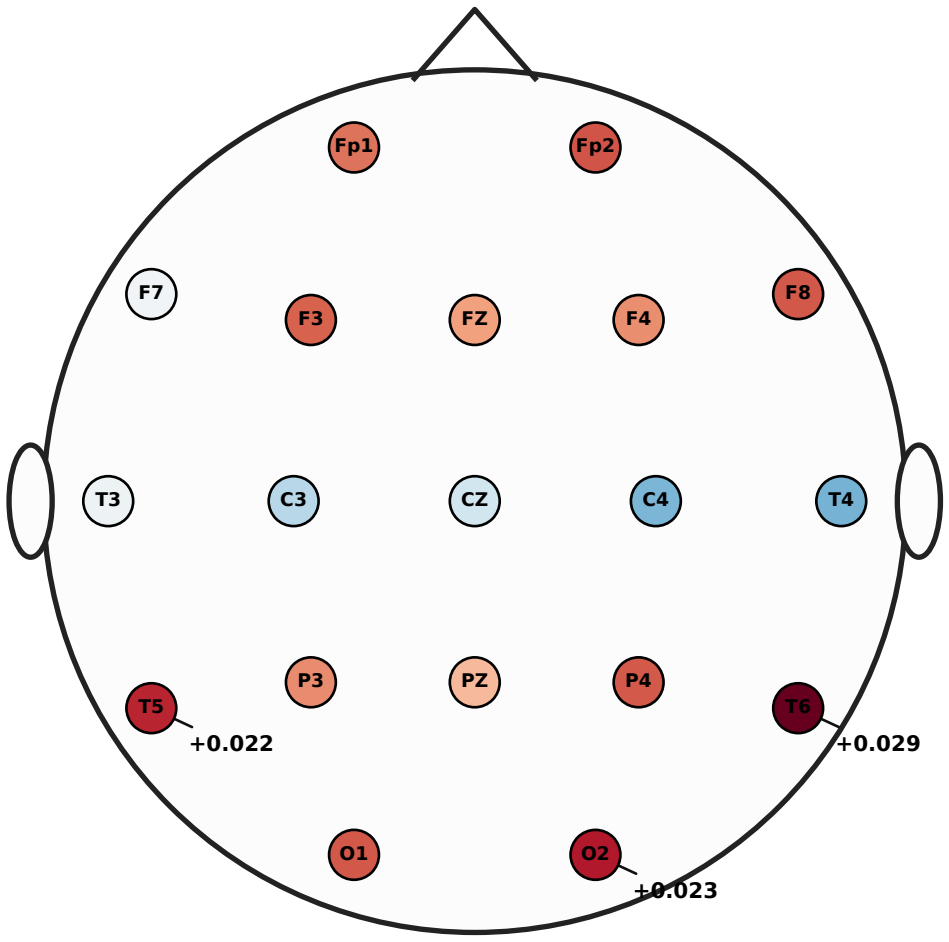

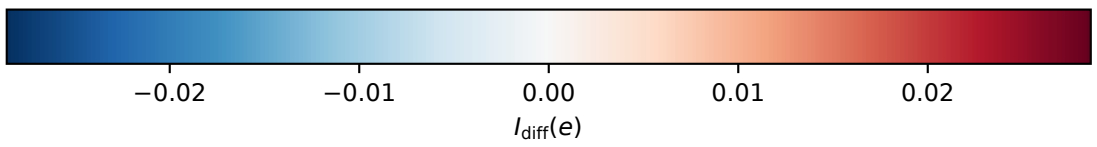

Figure 4: Scalp Maps of Individuality $I_{\text{diff}}(e)$
Nodes coloured by value; edges drawn only where FDR-significant

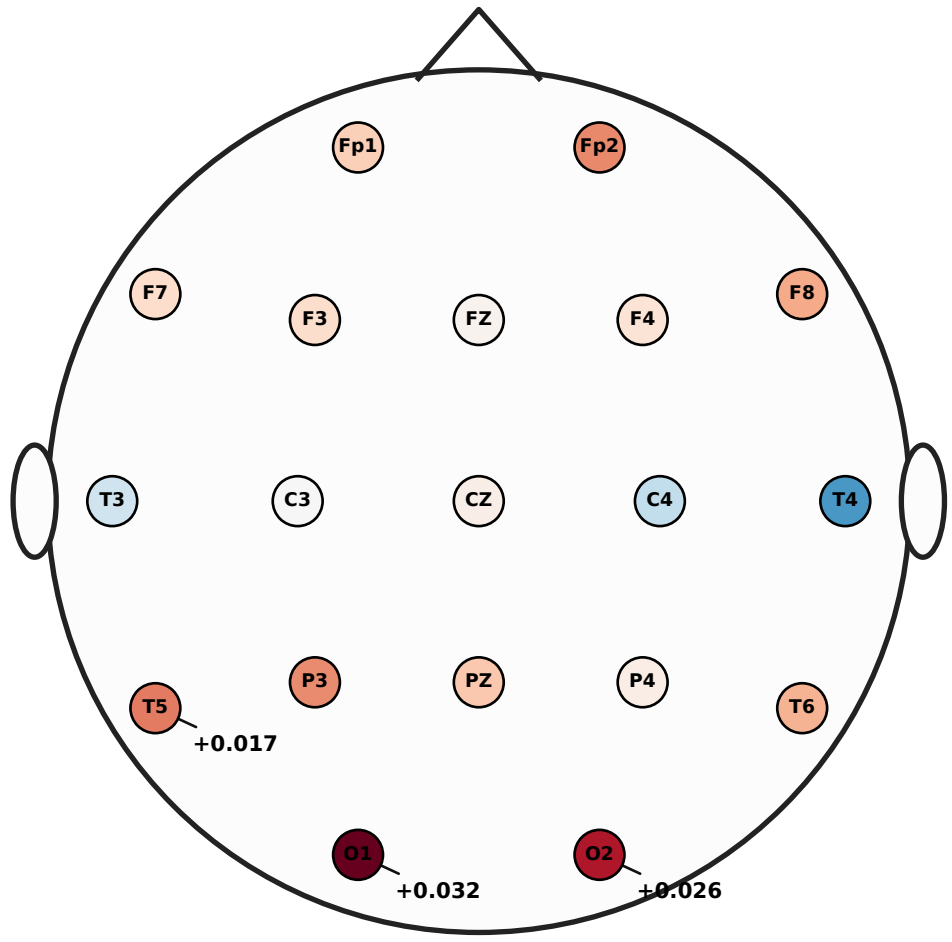

f06: broadband weighted node eigenvector

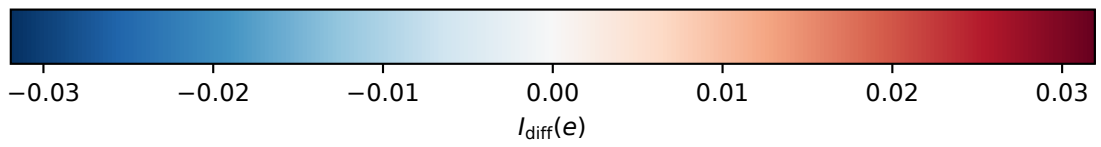

Thick ring: FDR q < 0.05 | labels: three largest values

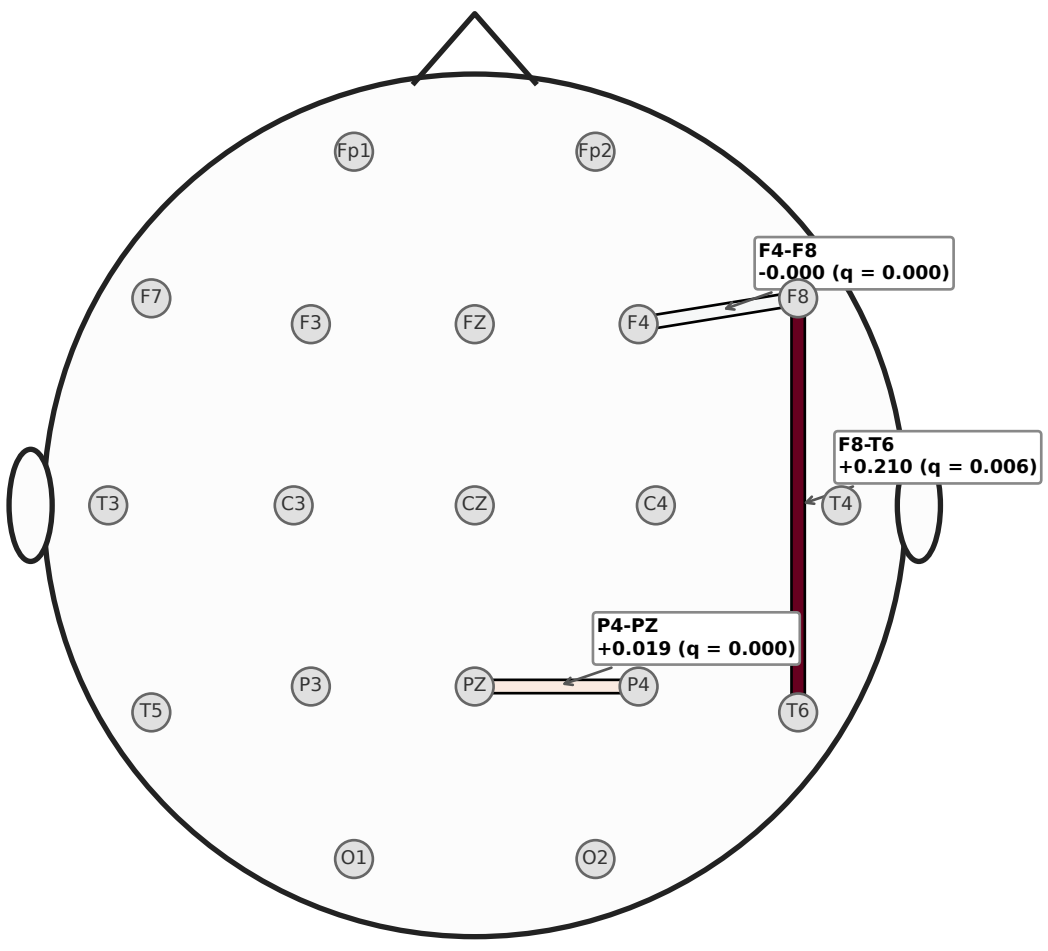

f04: broadband weighted node strength

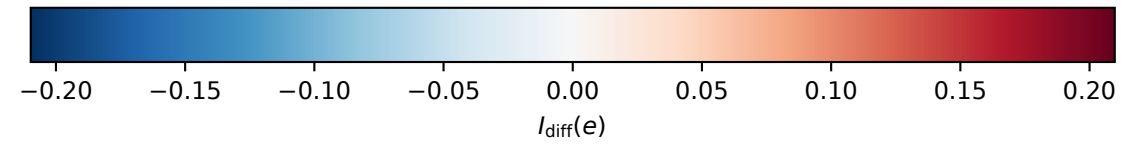

Thick ring: FDR q < 0.05 | labels: three largest values

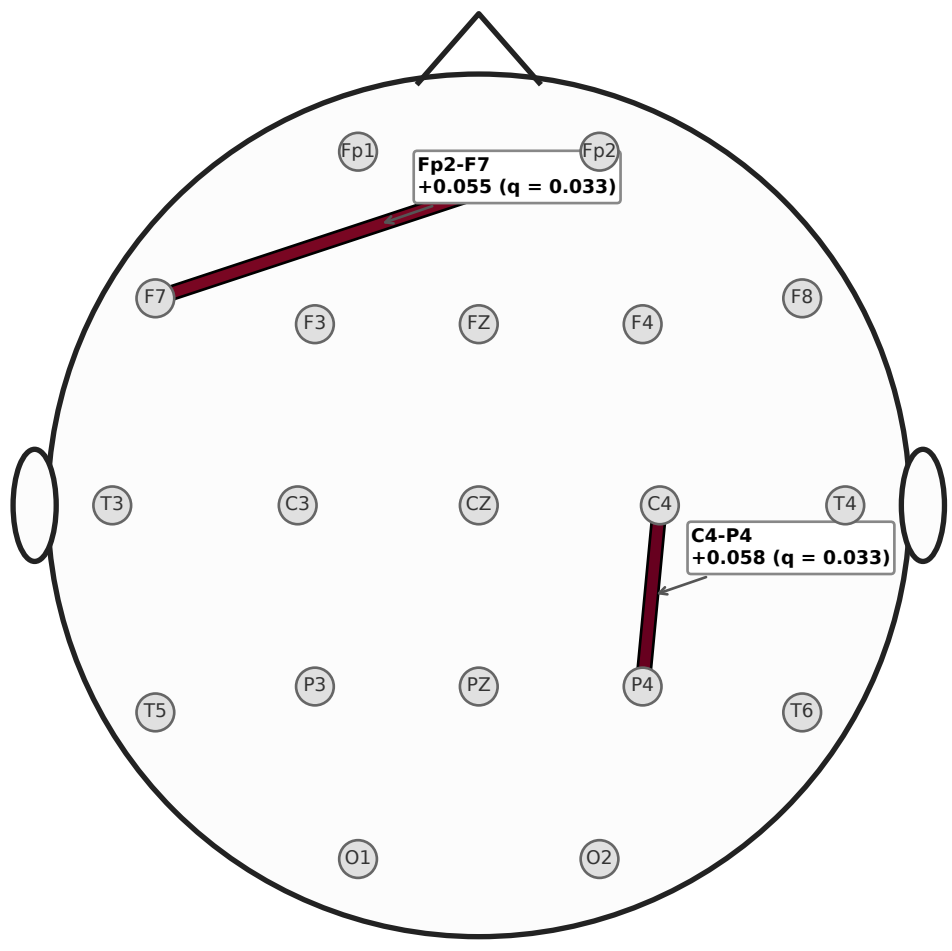

f20: delta binary adjacency

Edges drawn: FDR q < 0.05 only (3 of 171)

f12: broadband binary edge betweenness

Edges drawn: FDR q < 0.05 only (2 of 171)
