Figure 7: Element Similarity J for Every Infant Pair, f01: broadband weighted correlation
Rows sorted by age difference |Δage| at that session

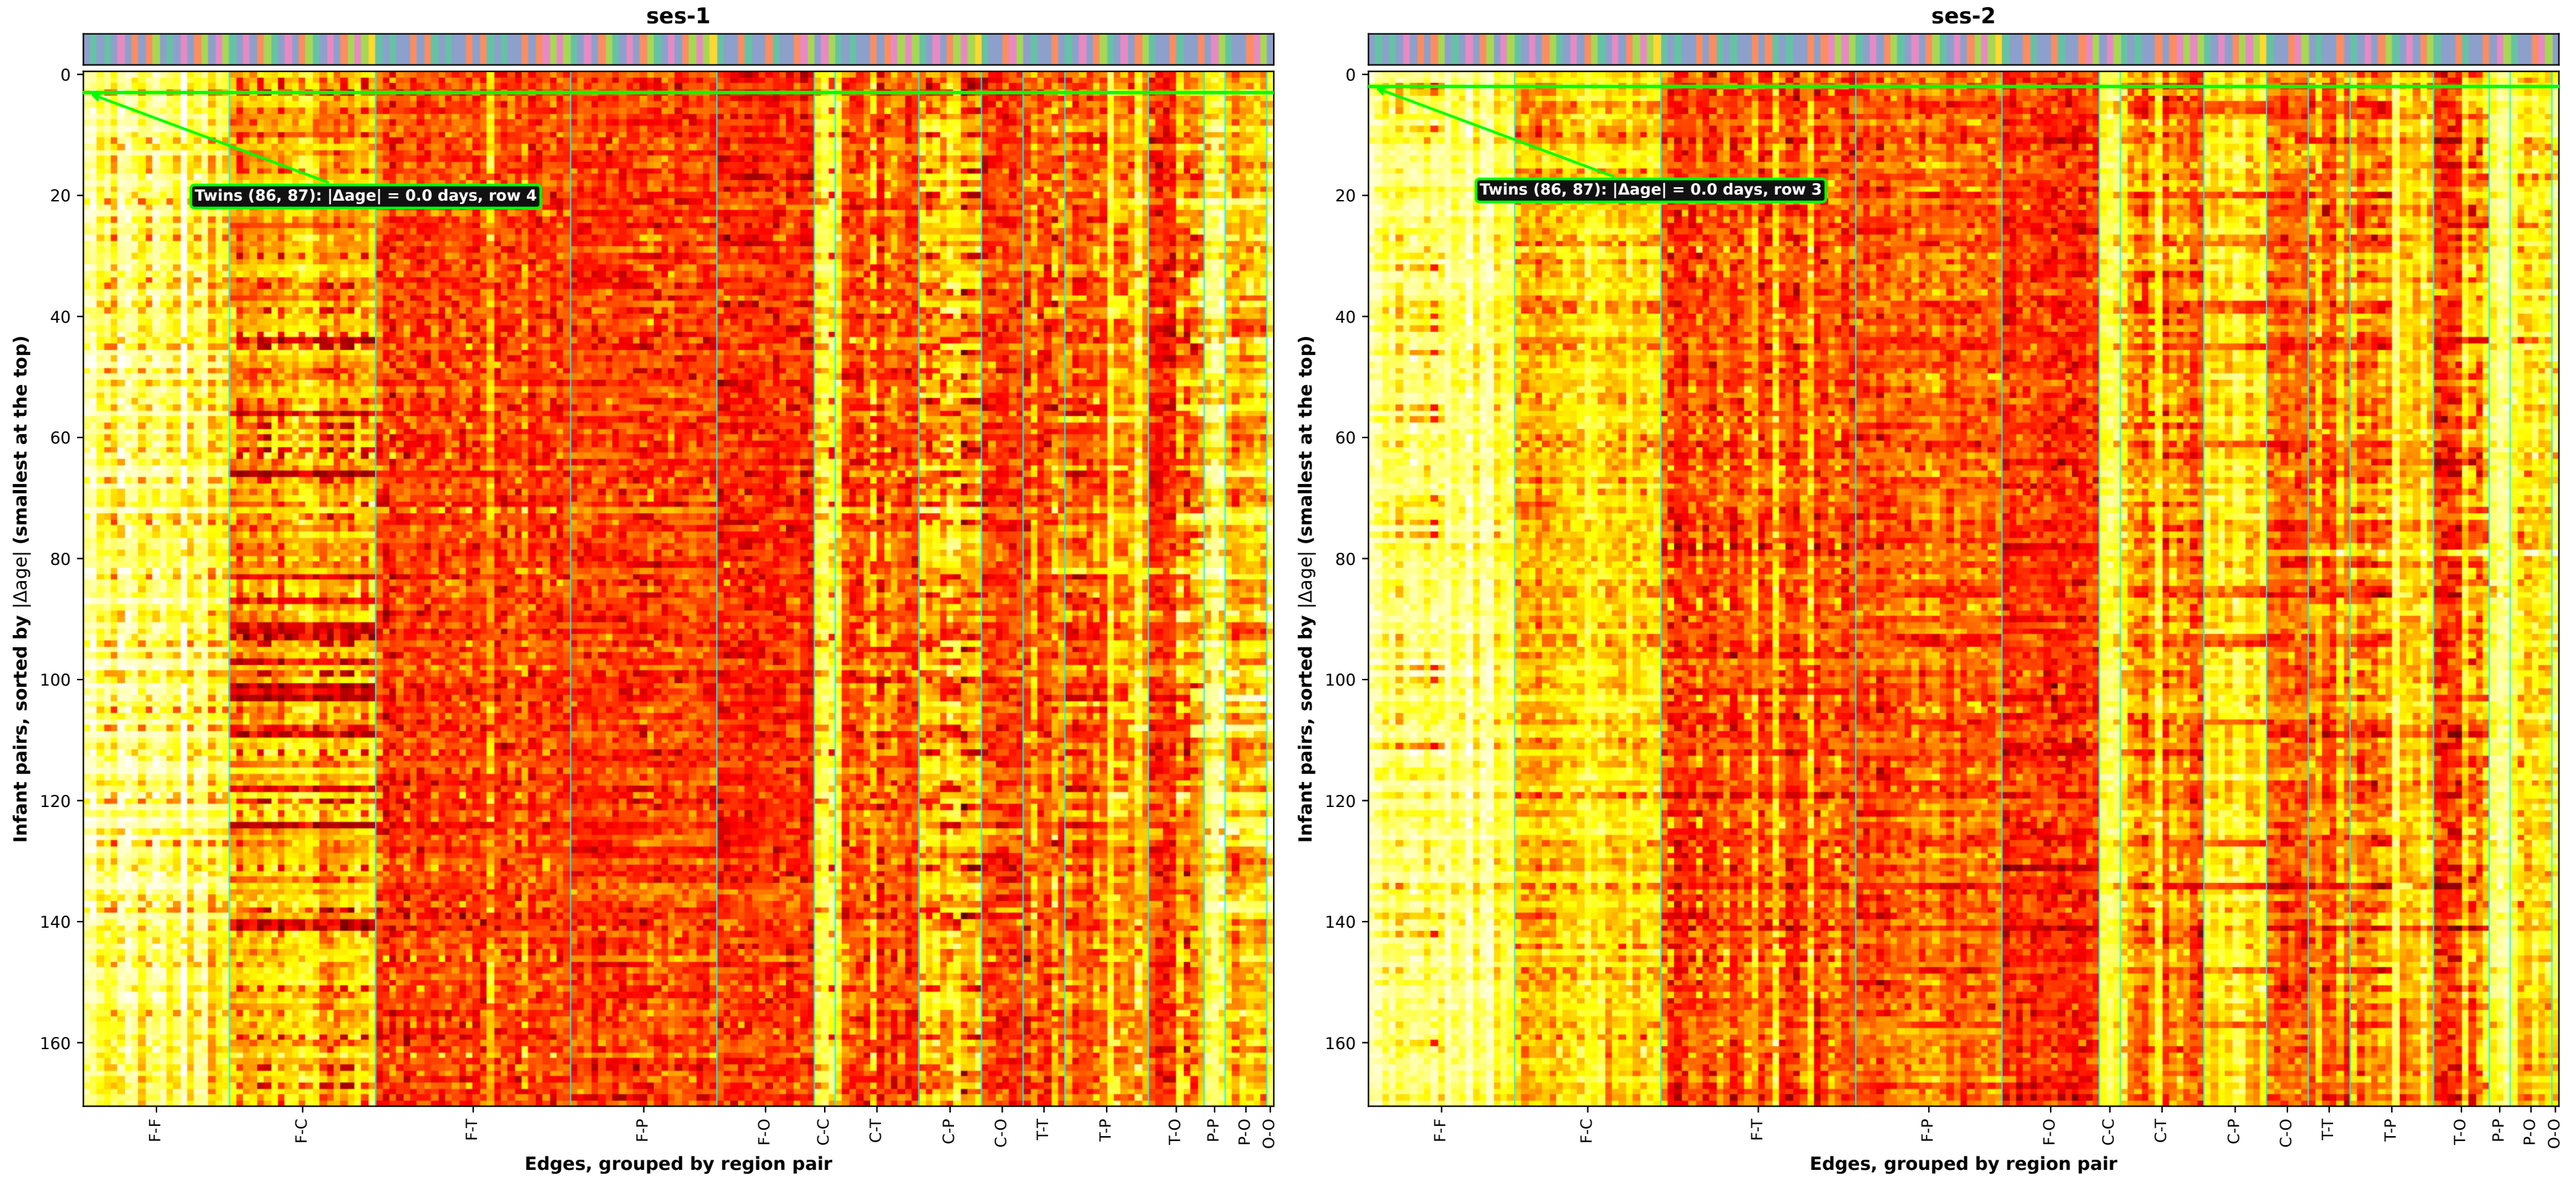

Figure 7: Element Similarity J for Every Infant Pair, f02: broadband weighted node betweenness
Rows sorted by age difference |Δage| at that session

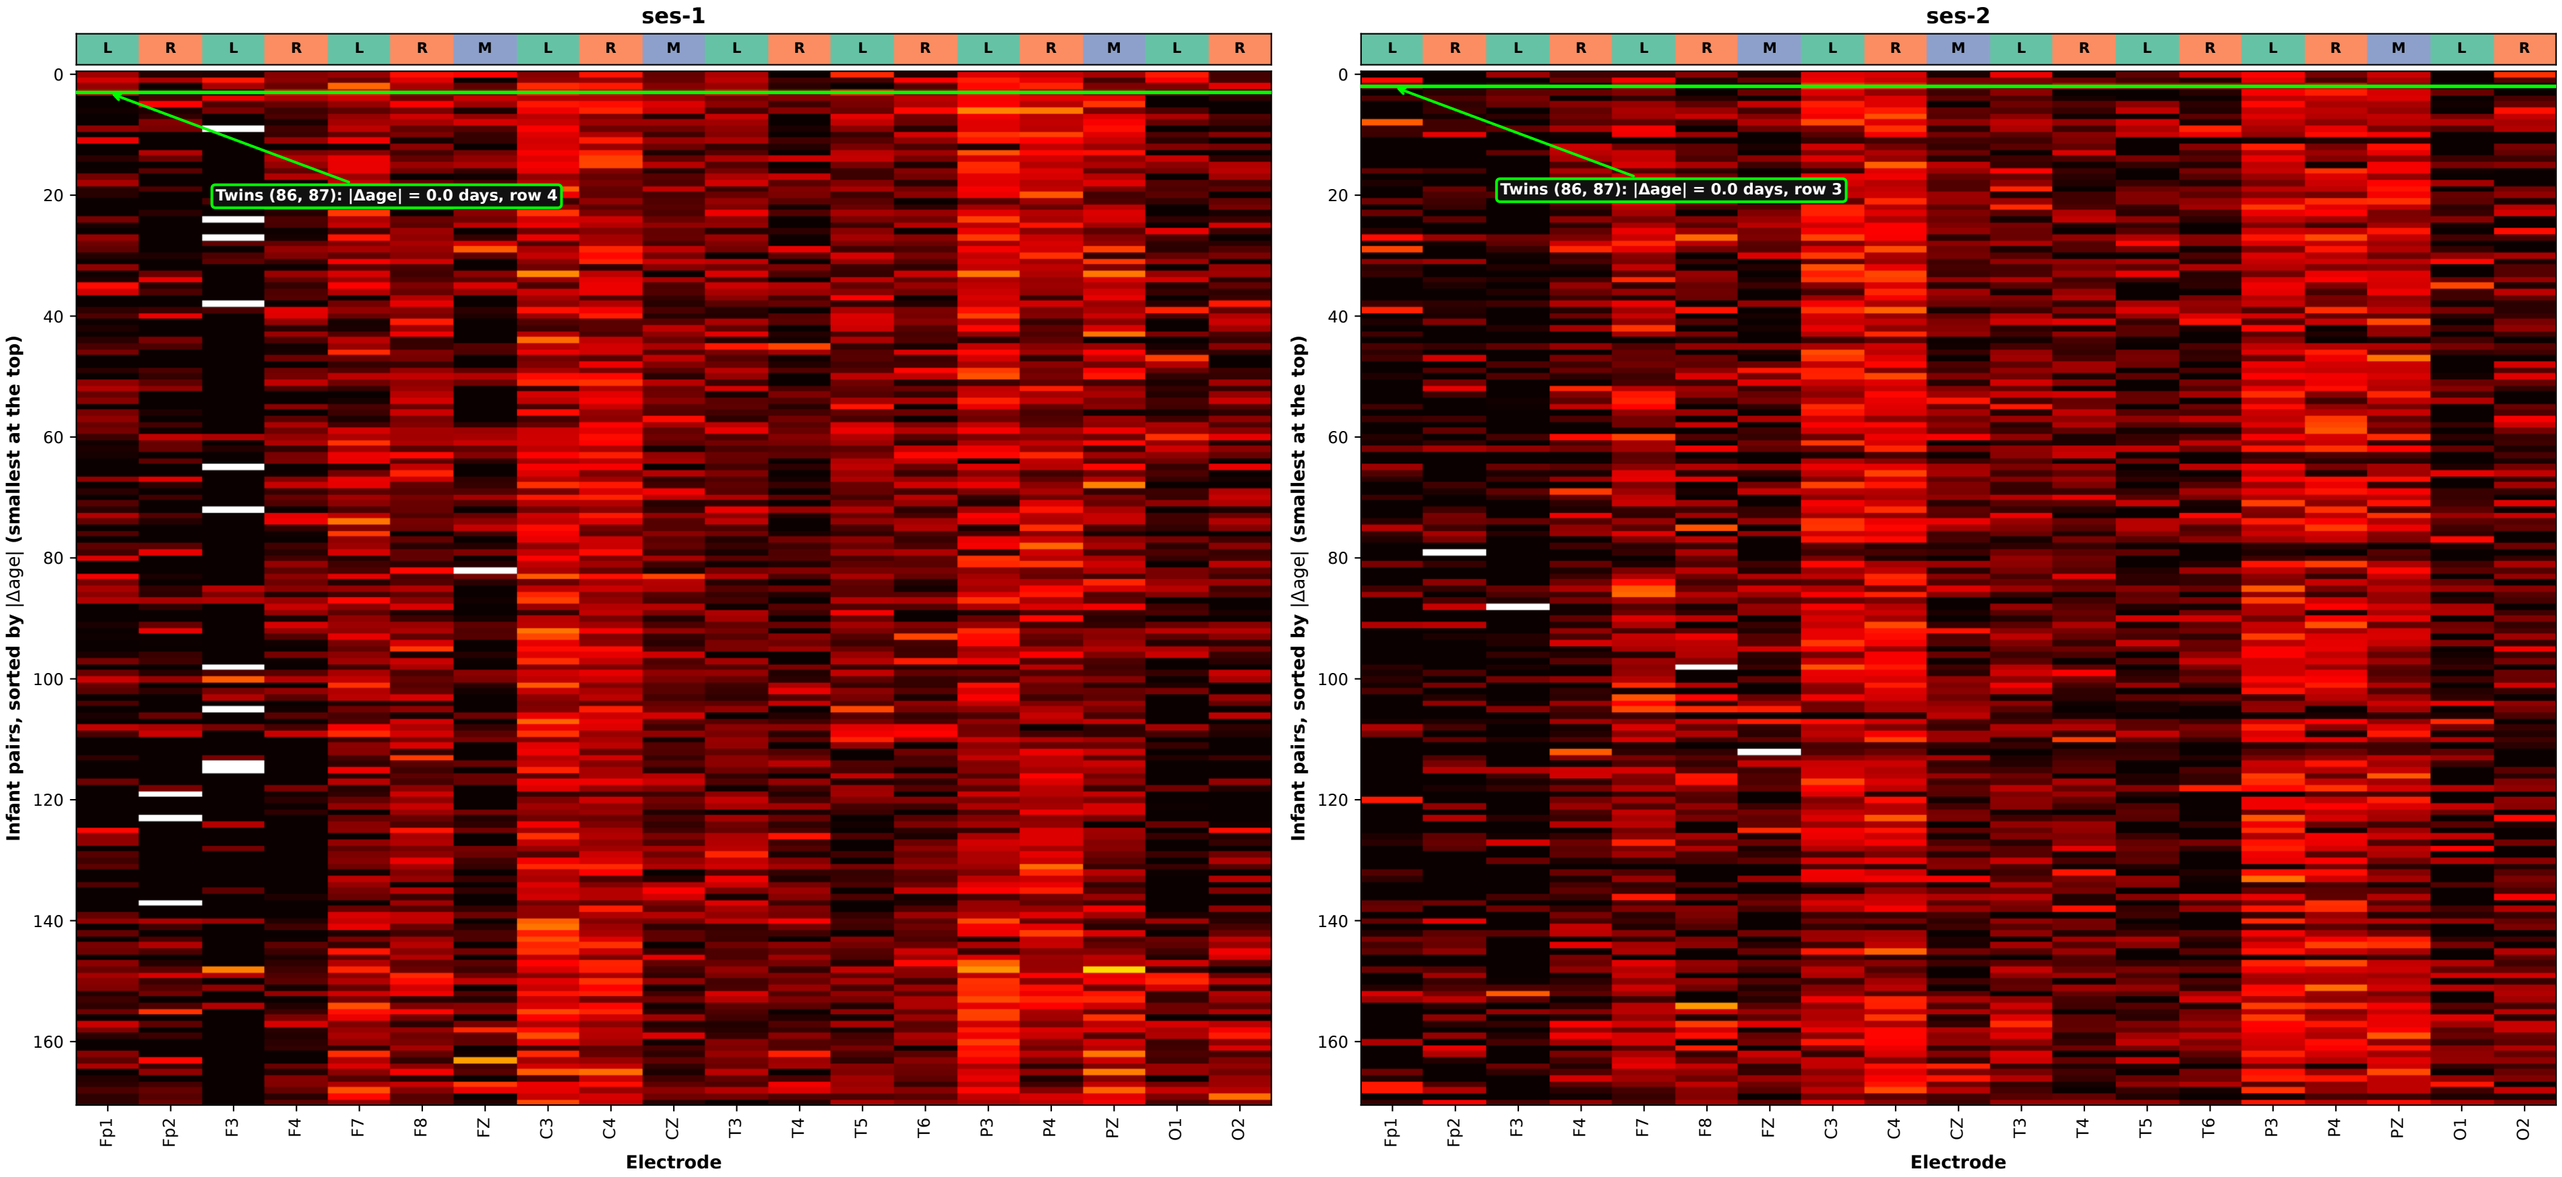

Figure 7: Element Similarity J for Every Infant Pair, f03: broadband weighted edge betweenness
Rows sorted by age difference |Δage| at that session

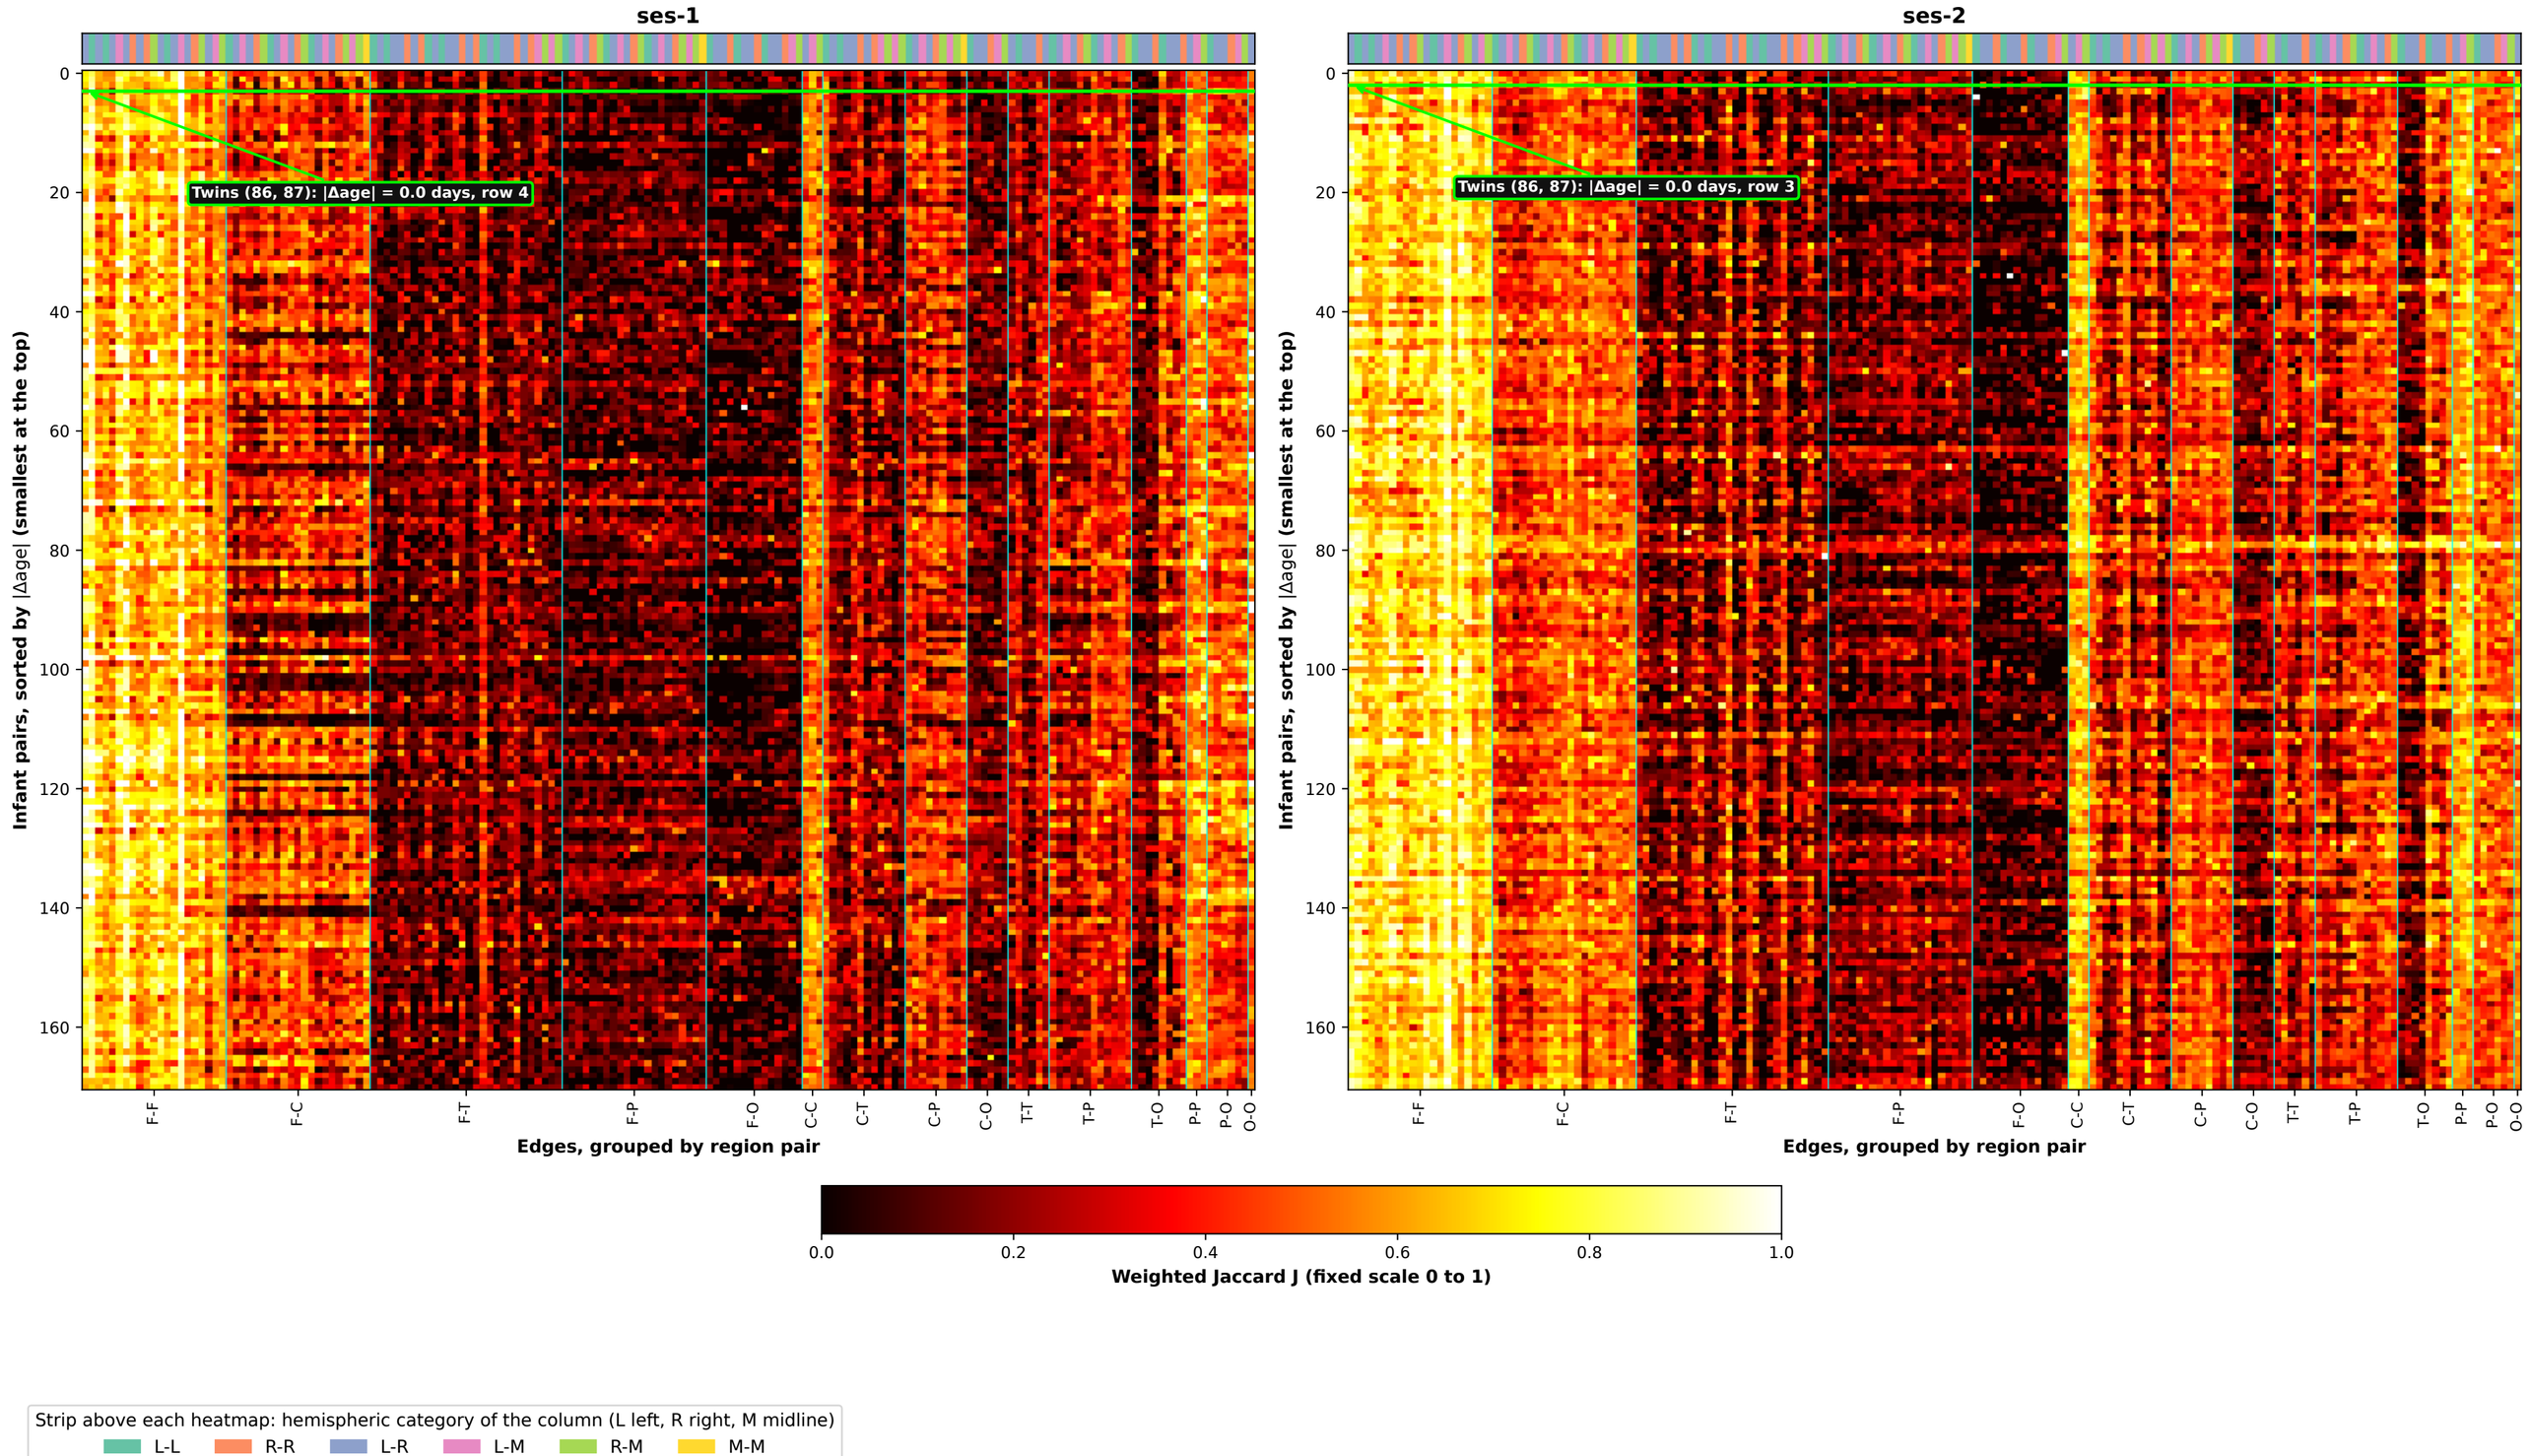

Figure 7: Element Similarity J for Every Infant Pair, f04: broadband weighted node strength
Rows sorted by age difference |Δage| at that session

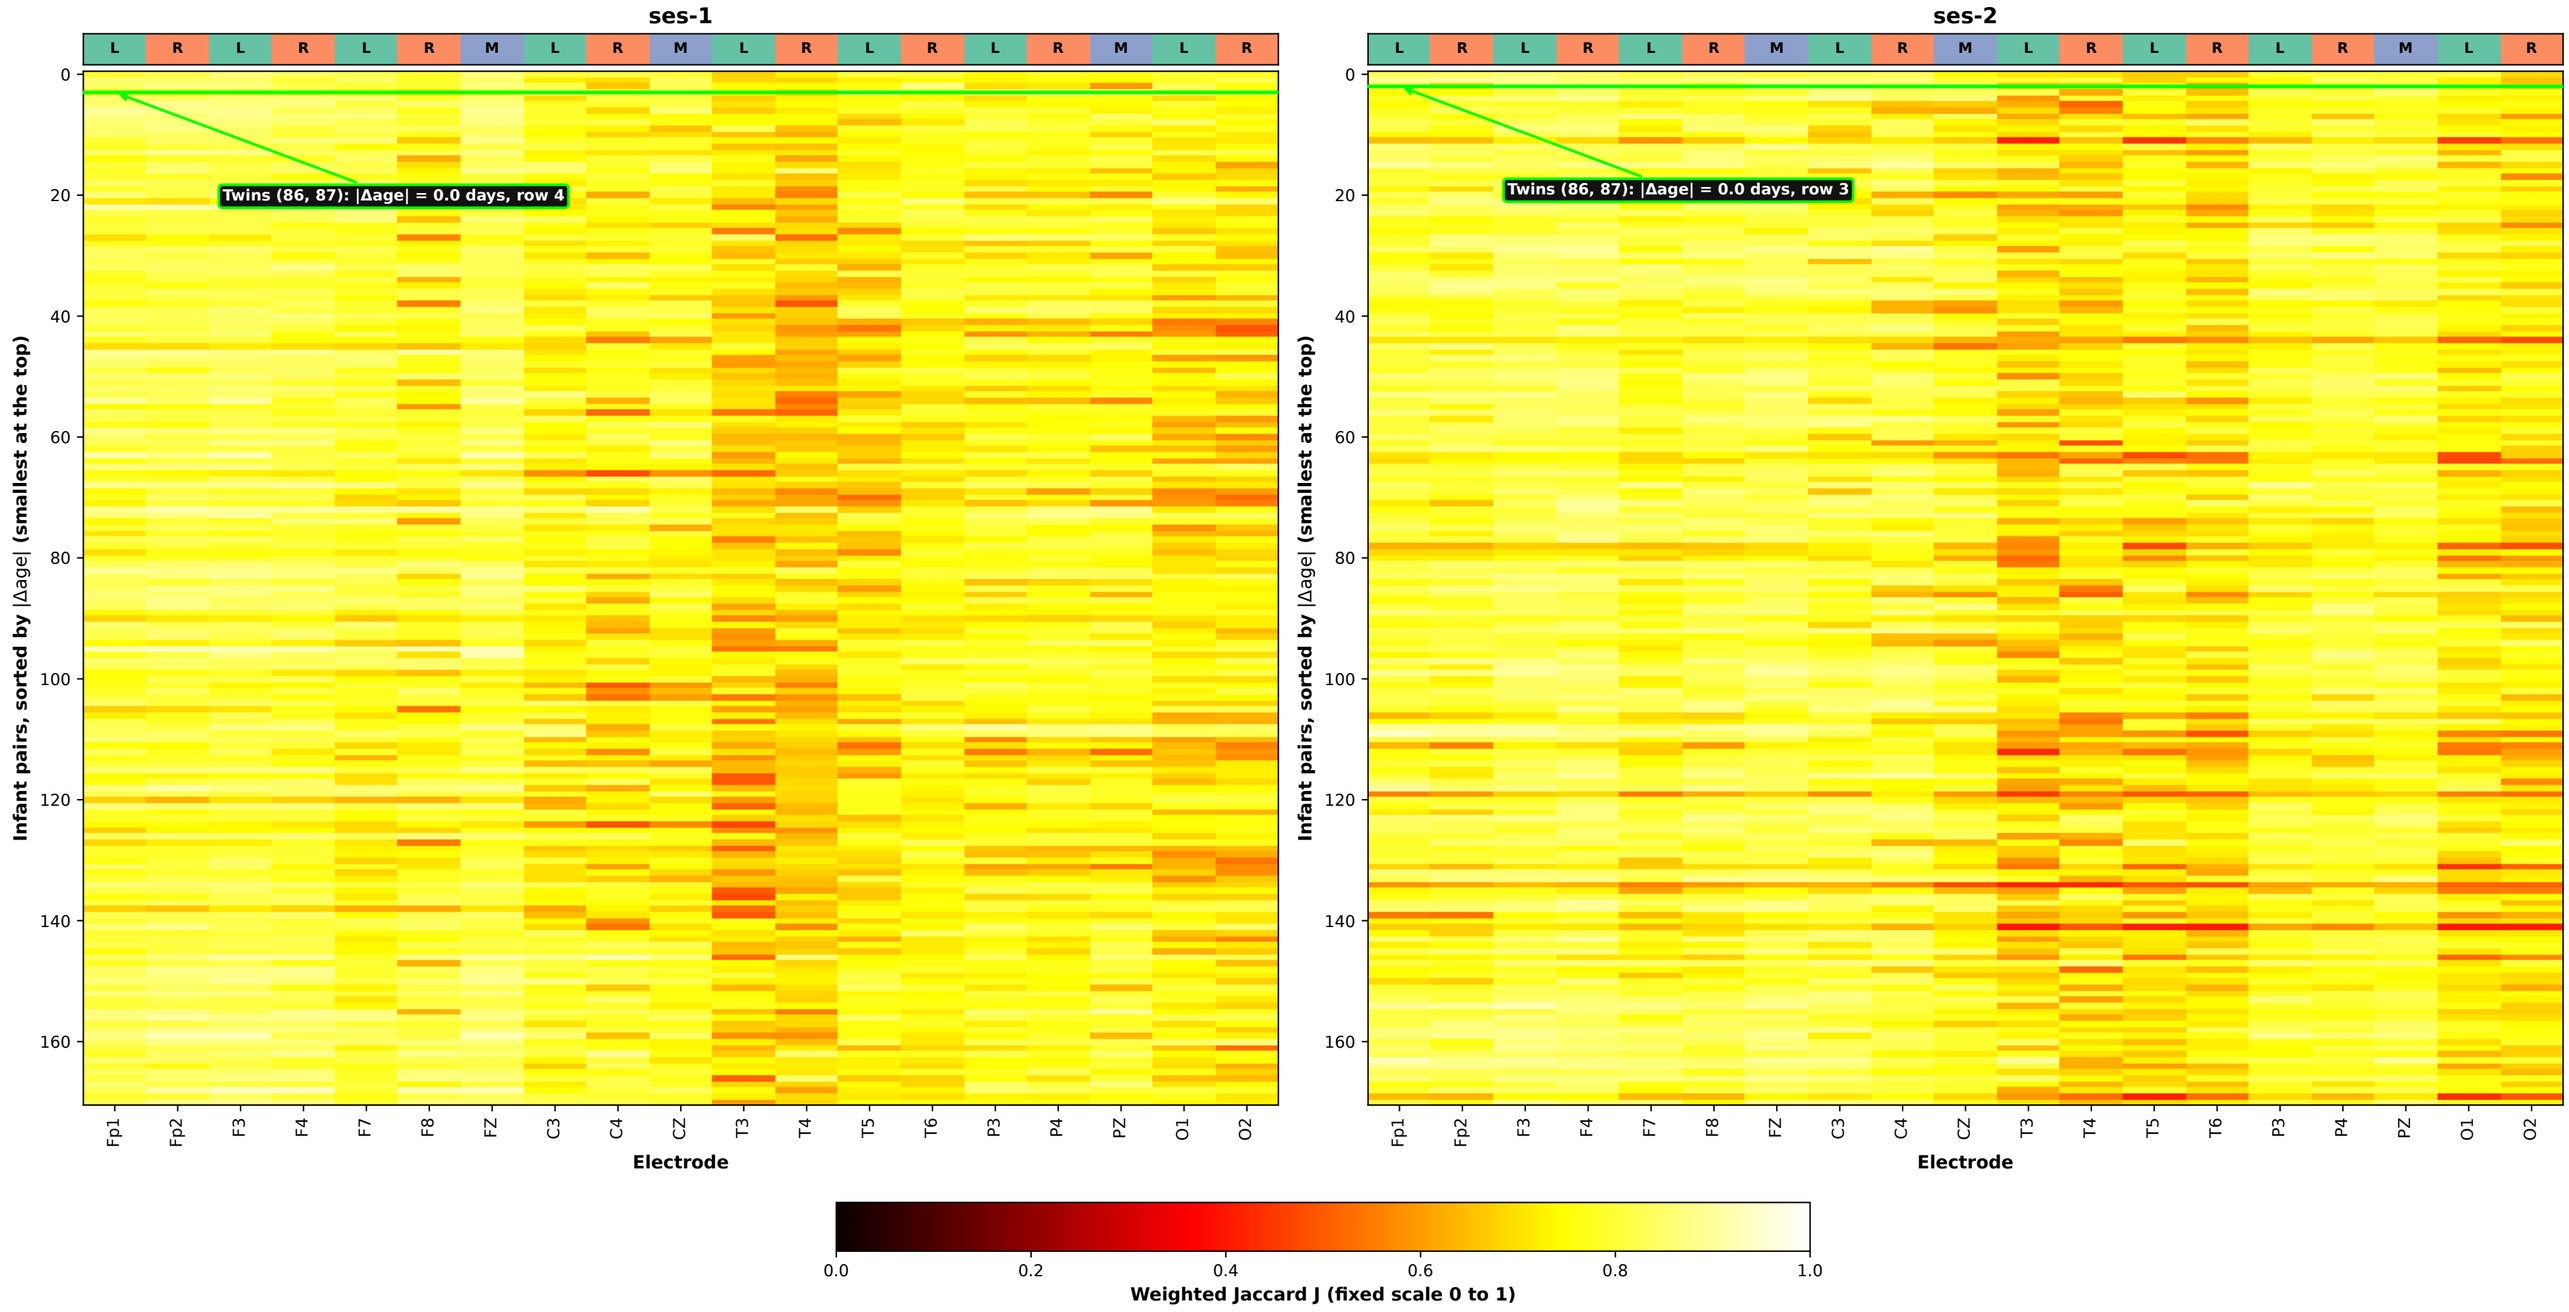

Figure 7: Element Similarity J for Every Infant Pair, f05: broadband weighted edge strength
Rows sorted by age difference |Δage| at that session

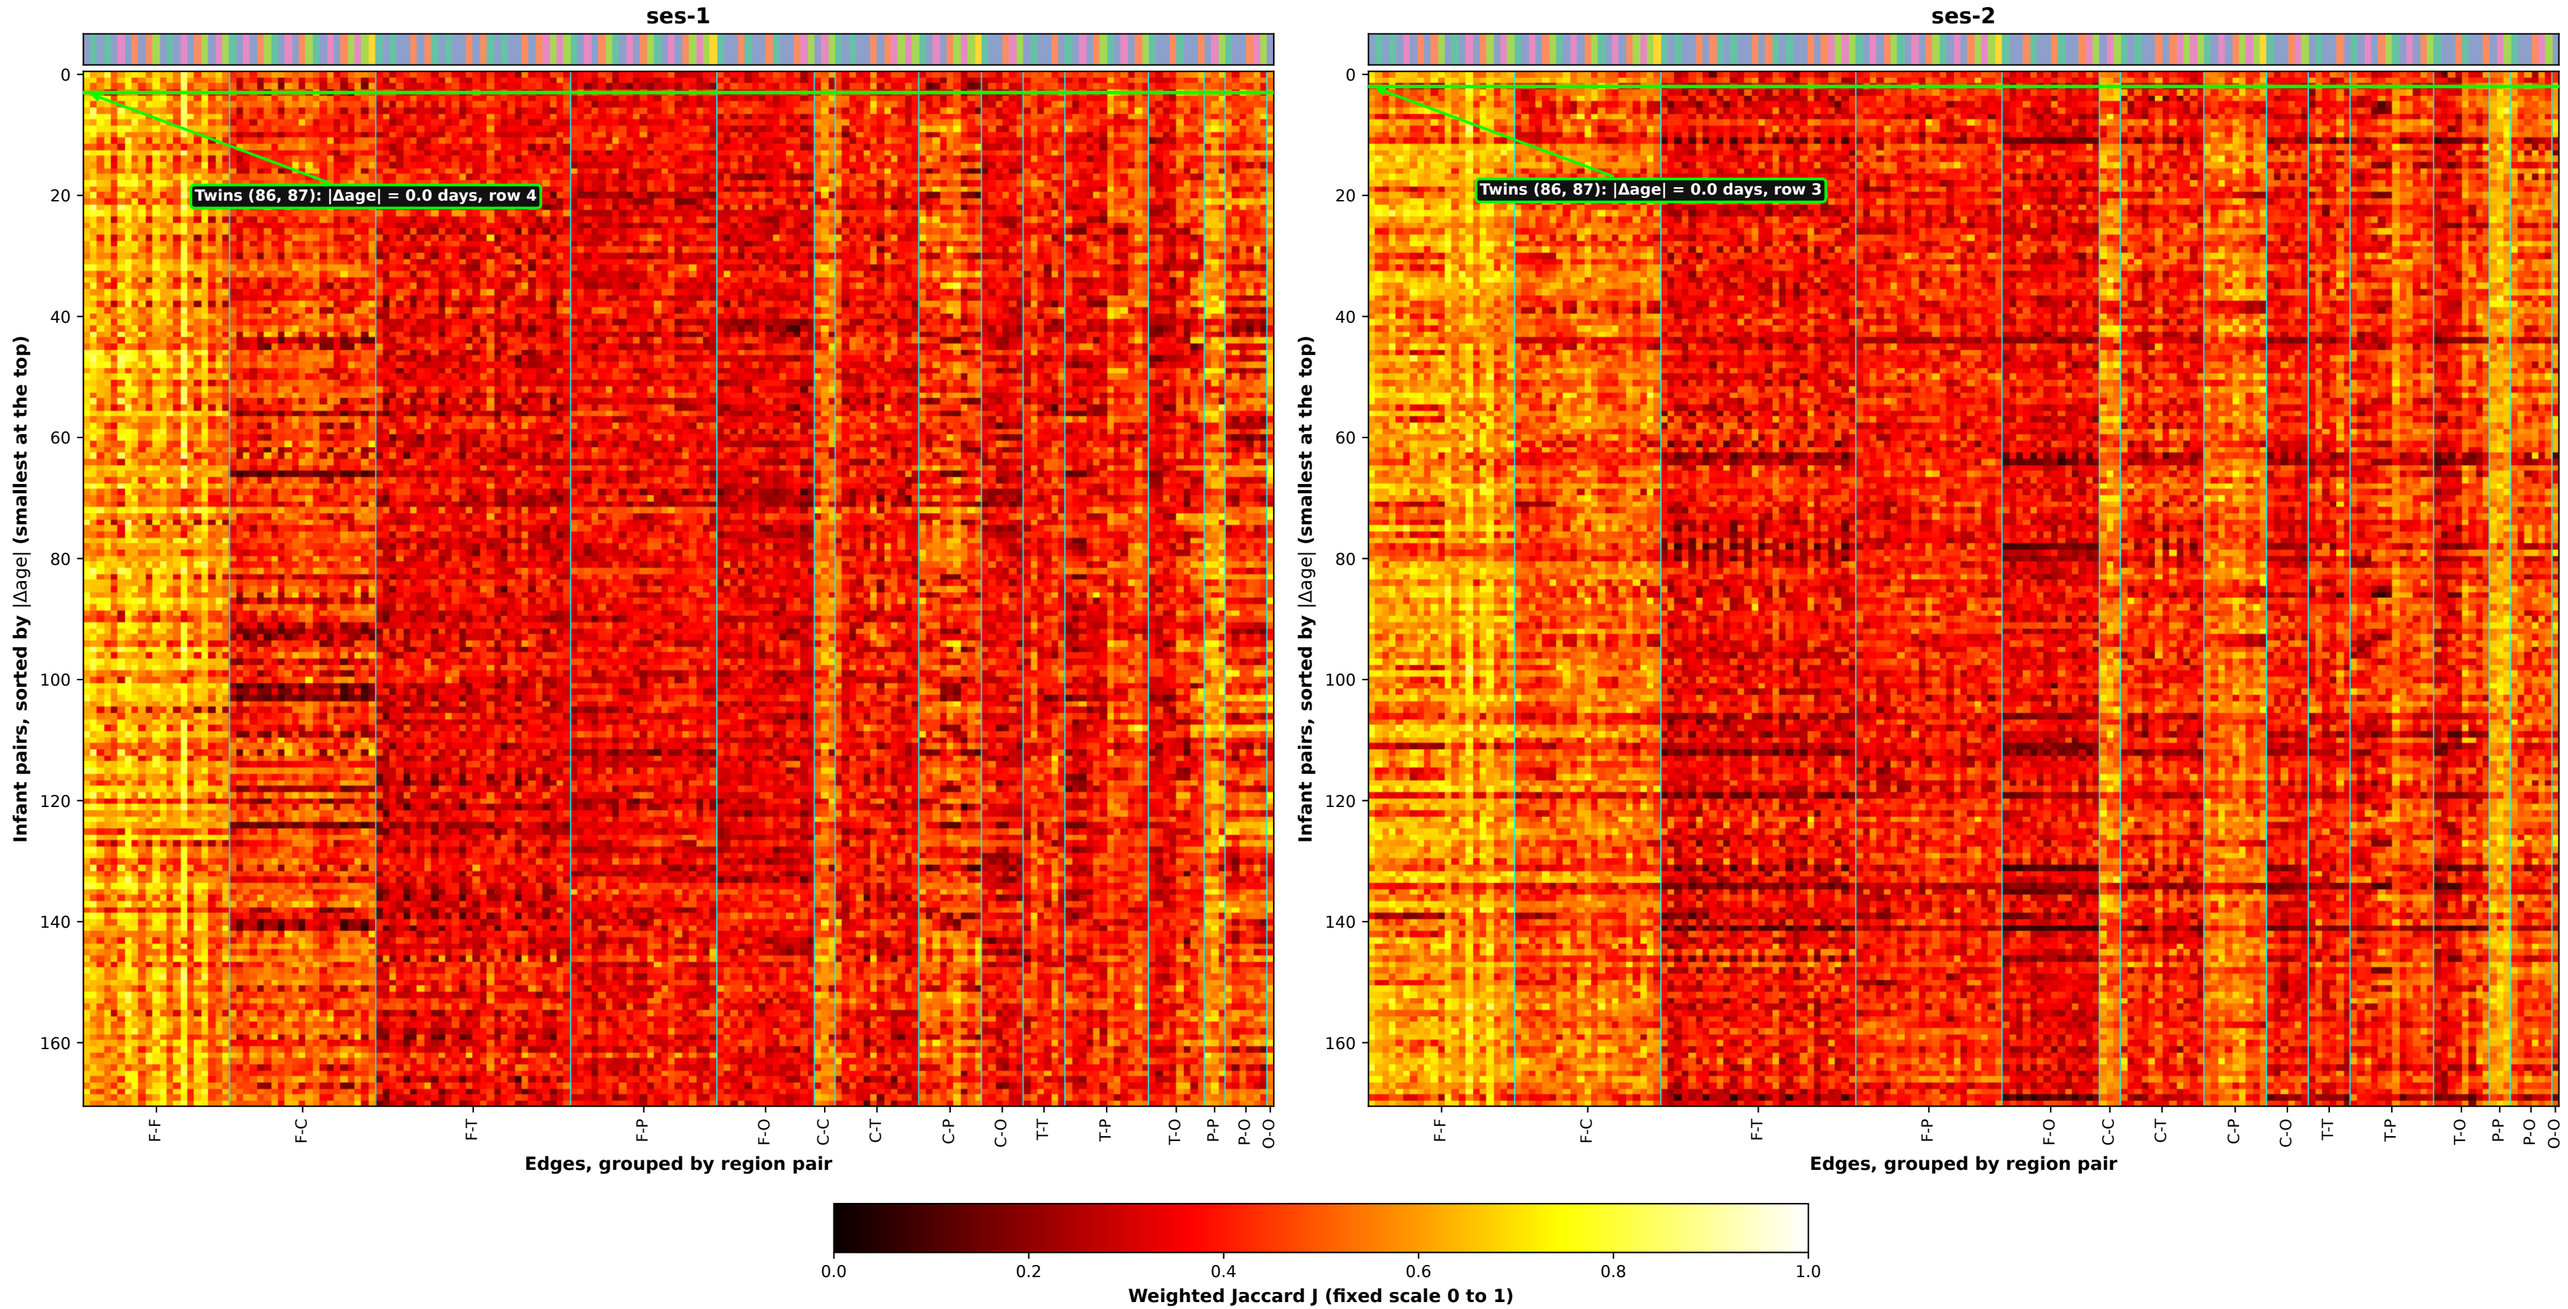

Figure 7: Element Similarity J for Every Infant Pair, f06: broadband weighted node eigenvector
Rows sorted by age difference |Δage| at that session

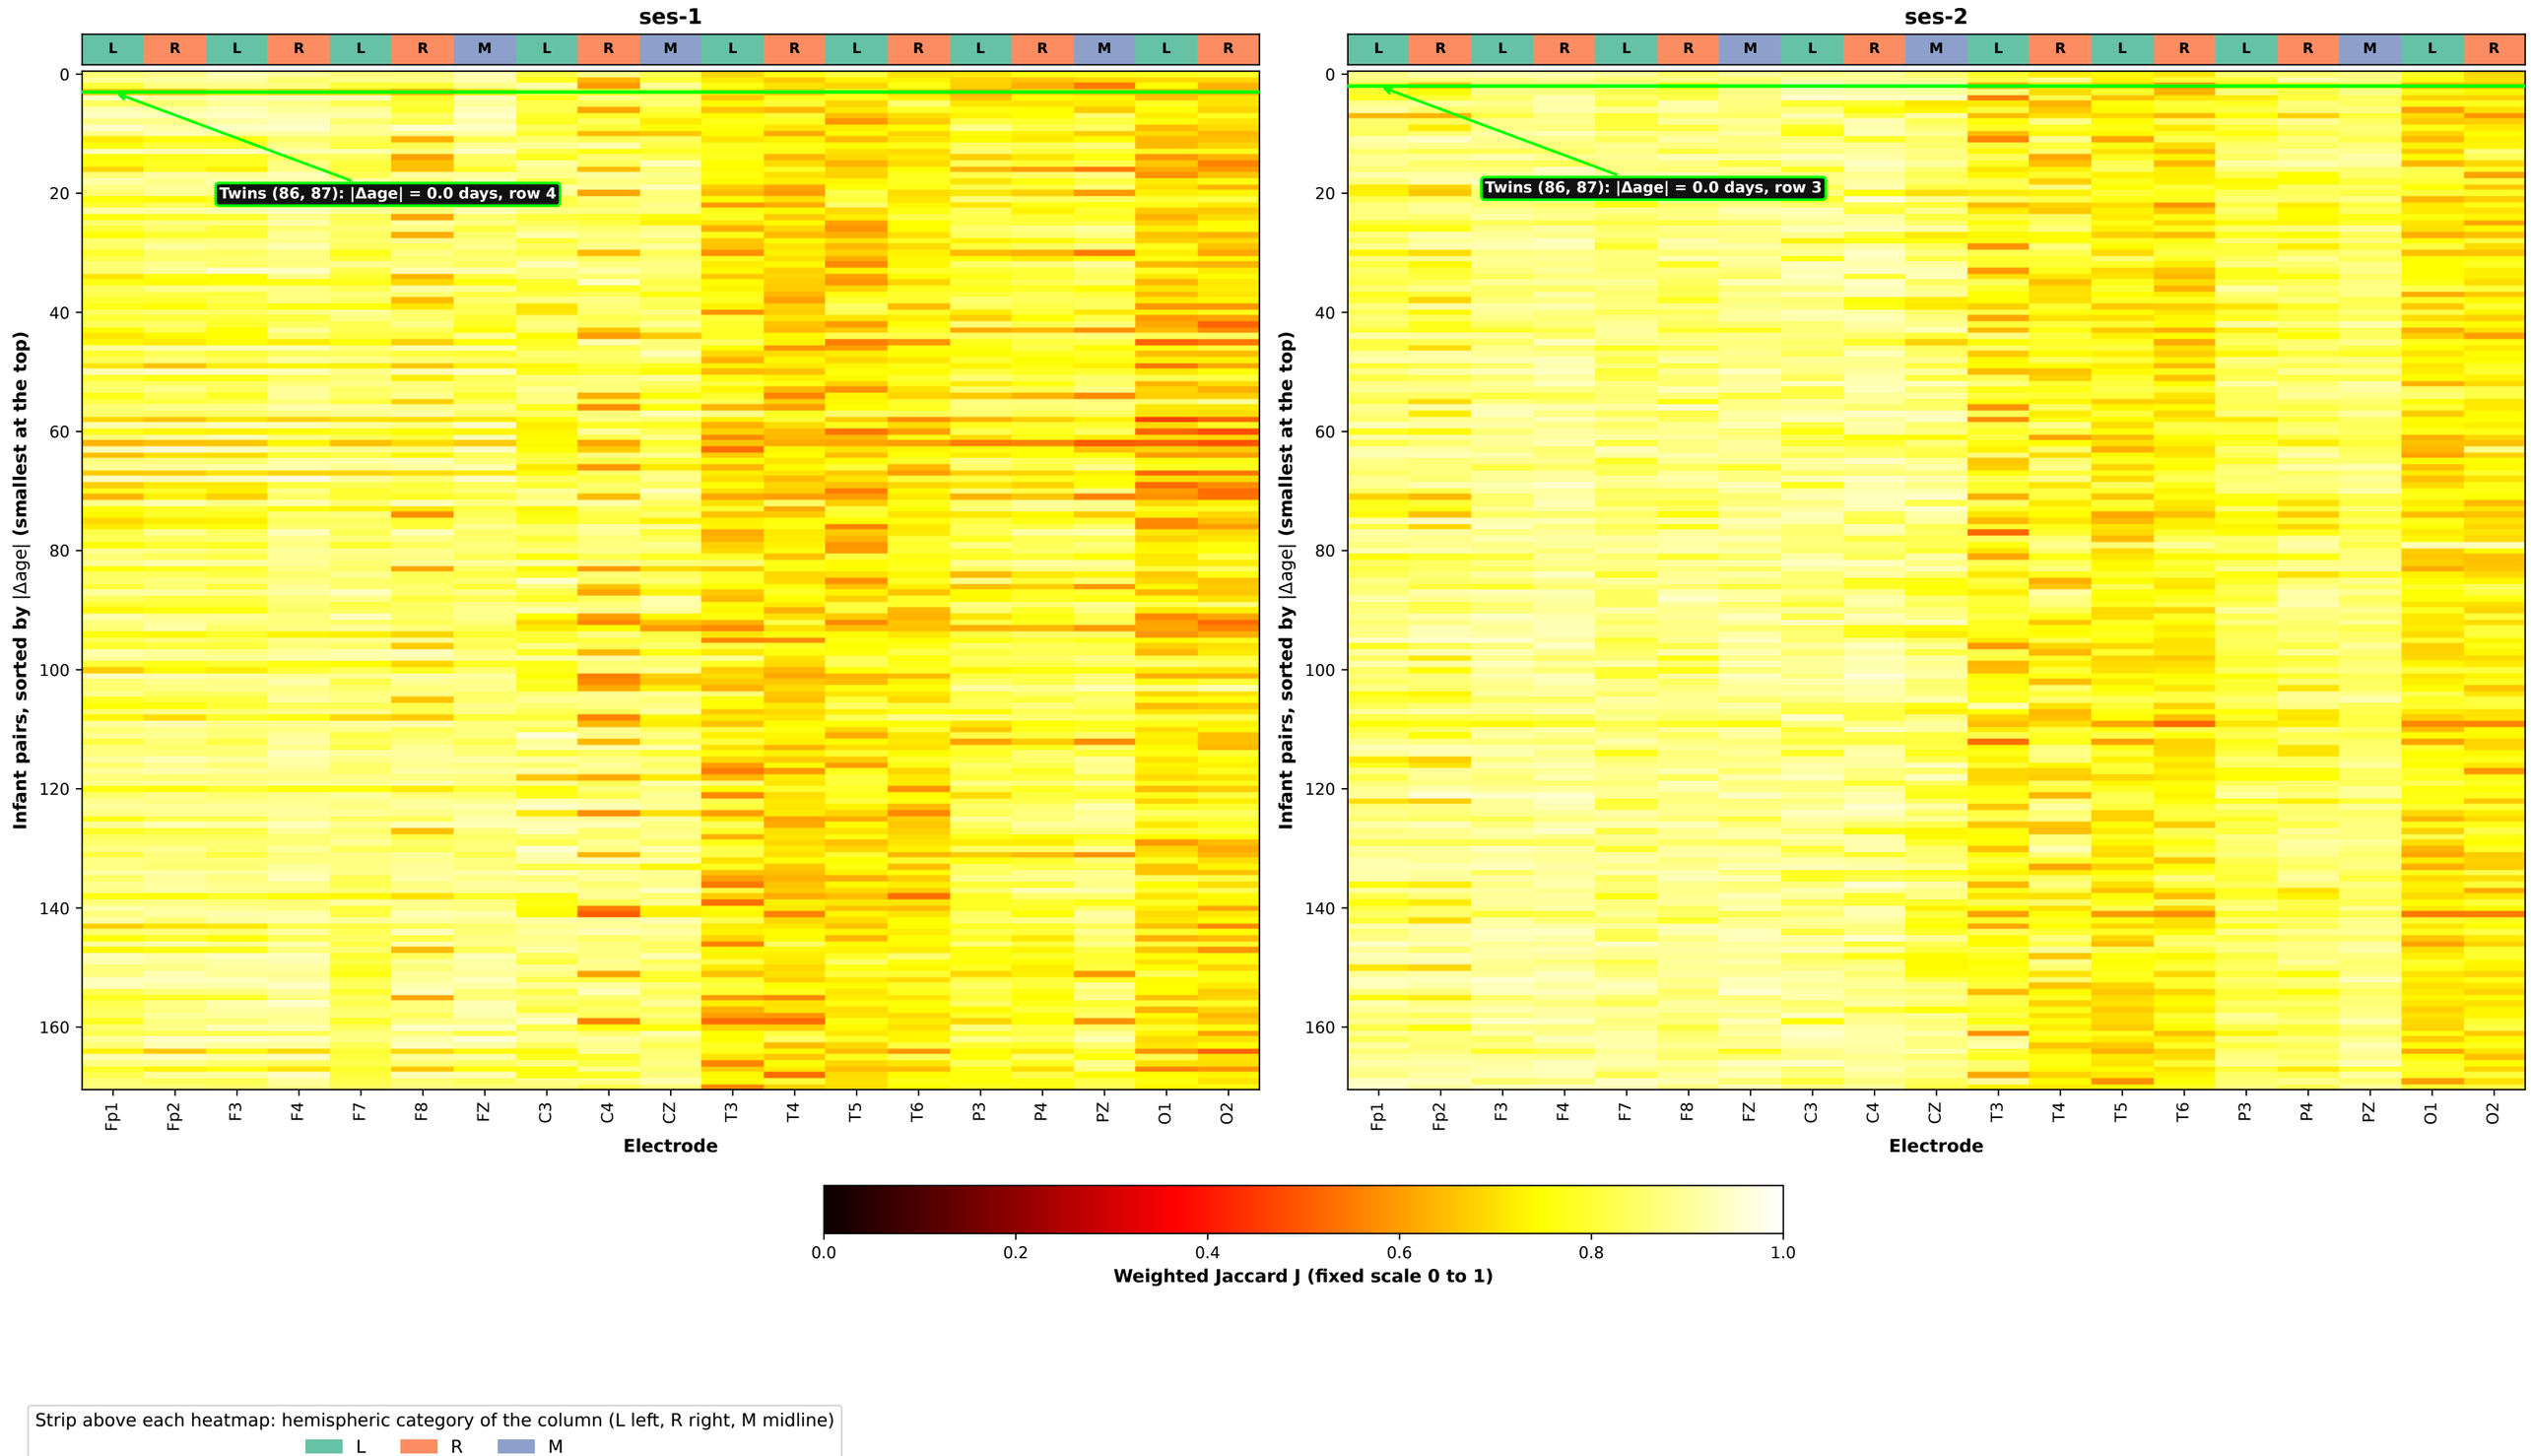

Figure 7: Element Similarity J for Every Infant Pair, f07: broadband weighted edge eigenvector
Rows sorted by age difference |Δage| at that session

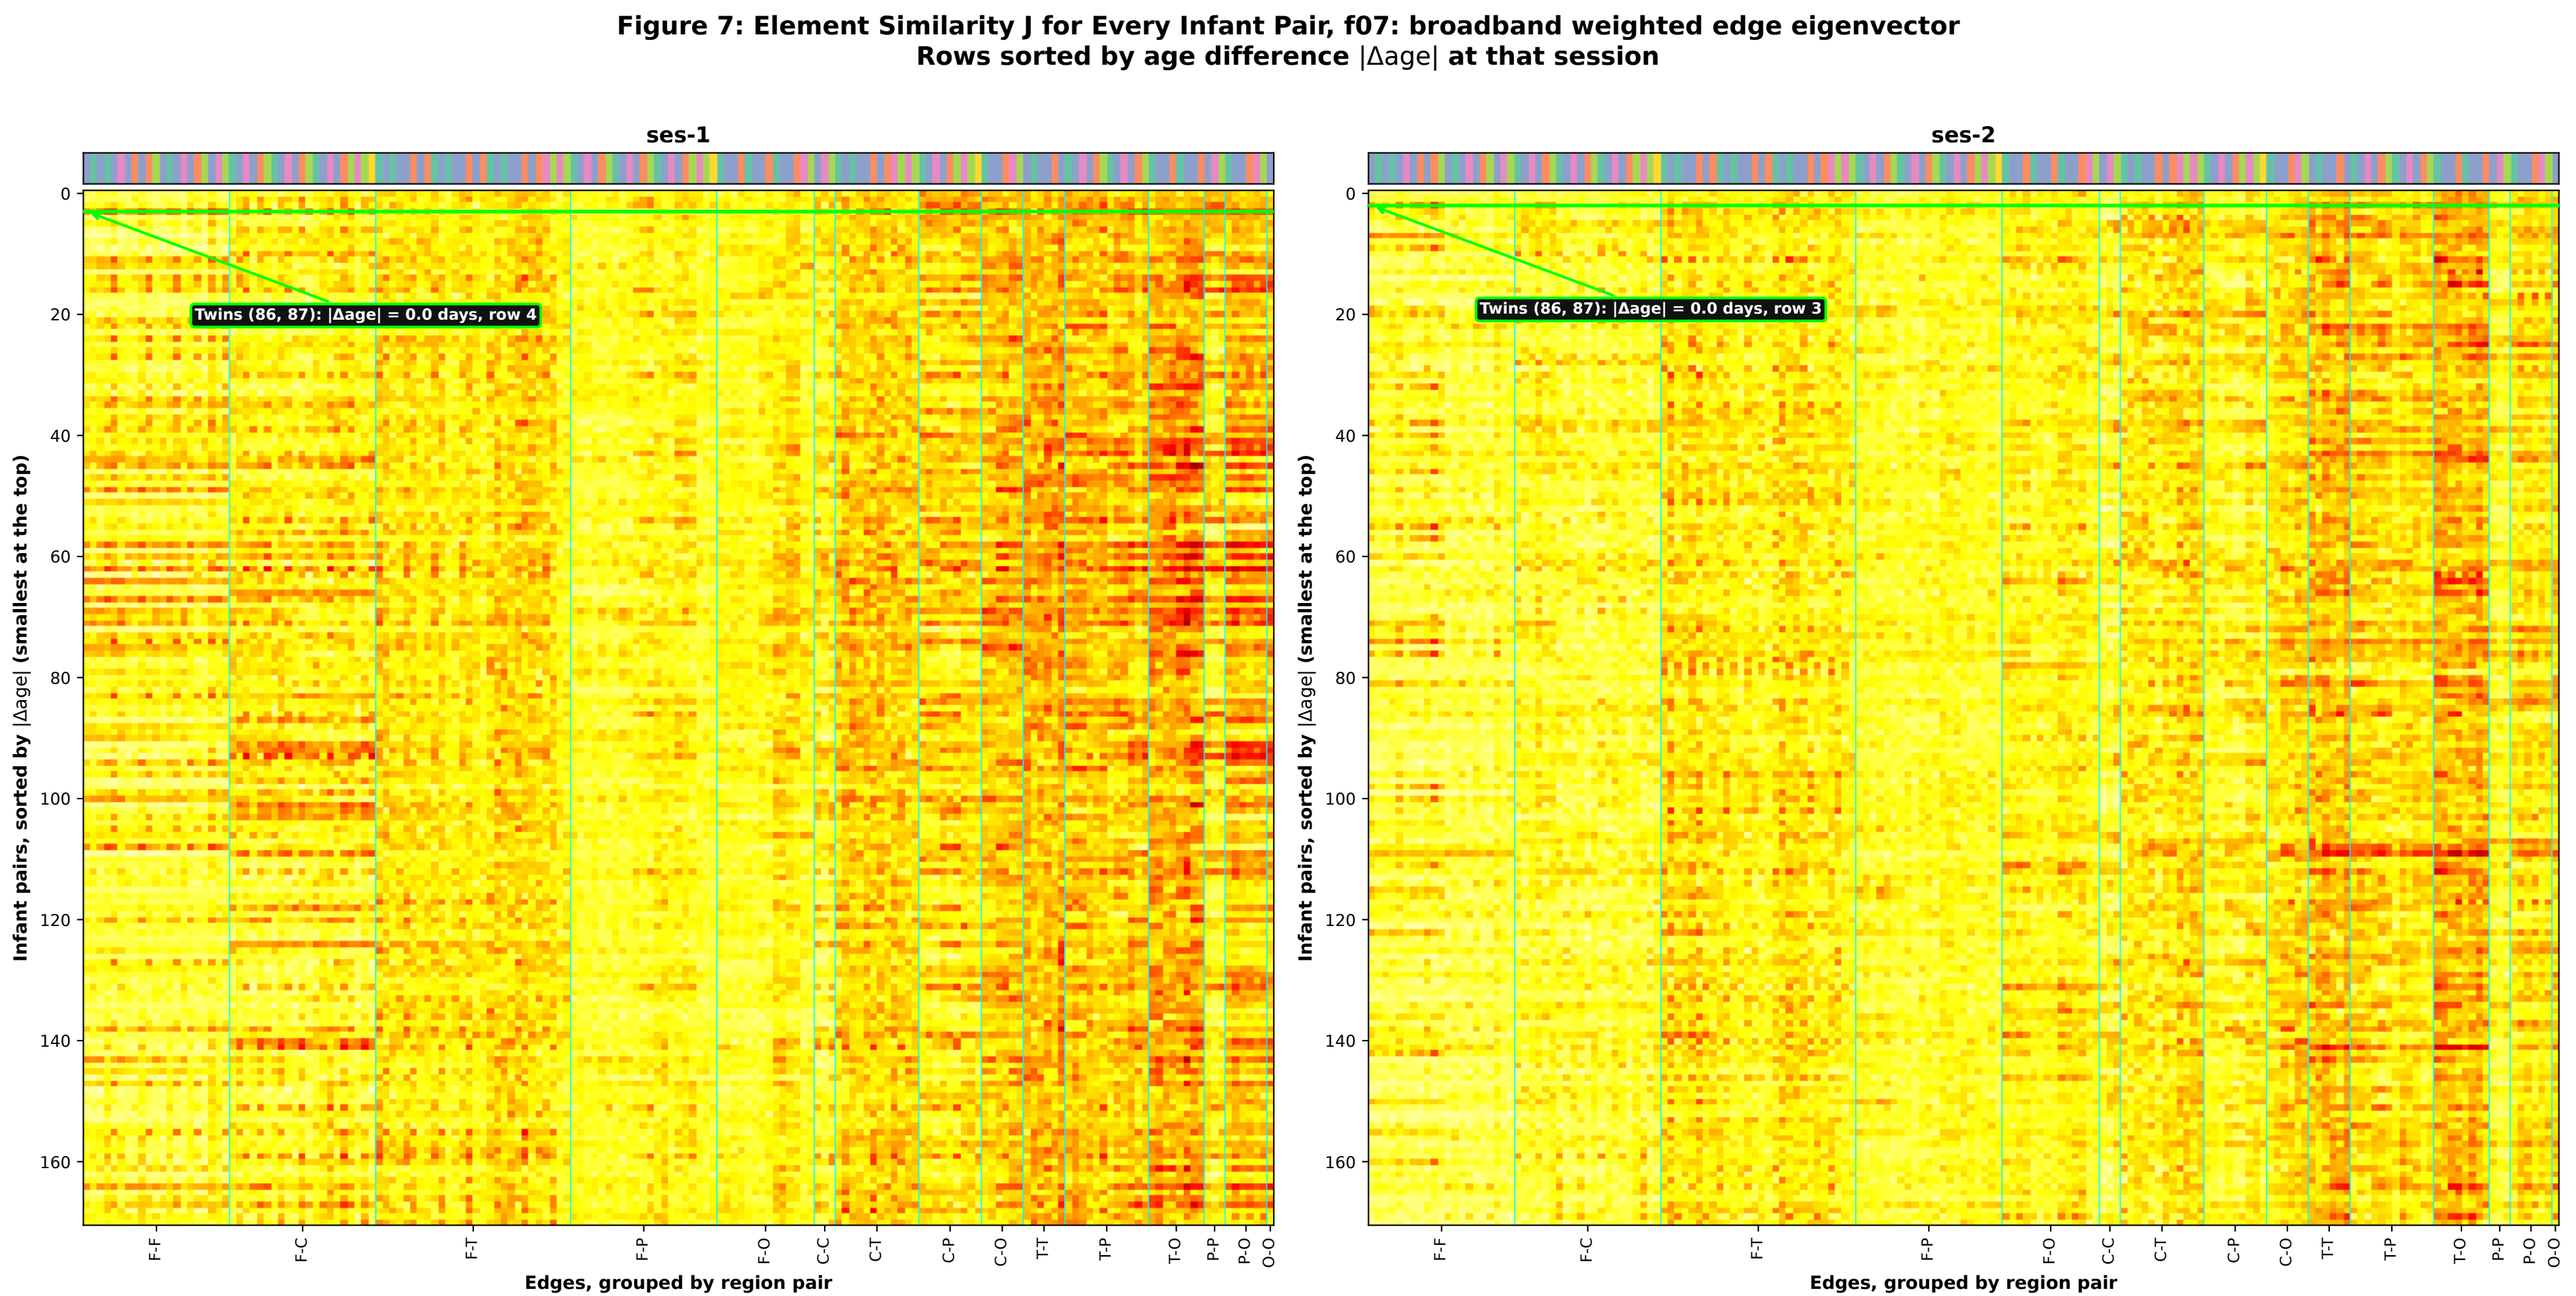

Figure 7: Element Similarity J for Every Infant Pair, f08: broadband weighted node closeness
Rows sorted by age difference |Δage| at that session

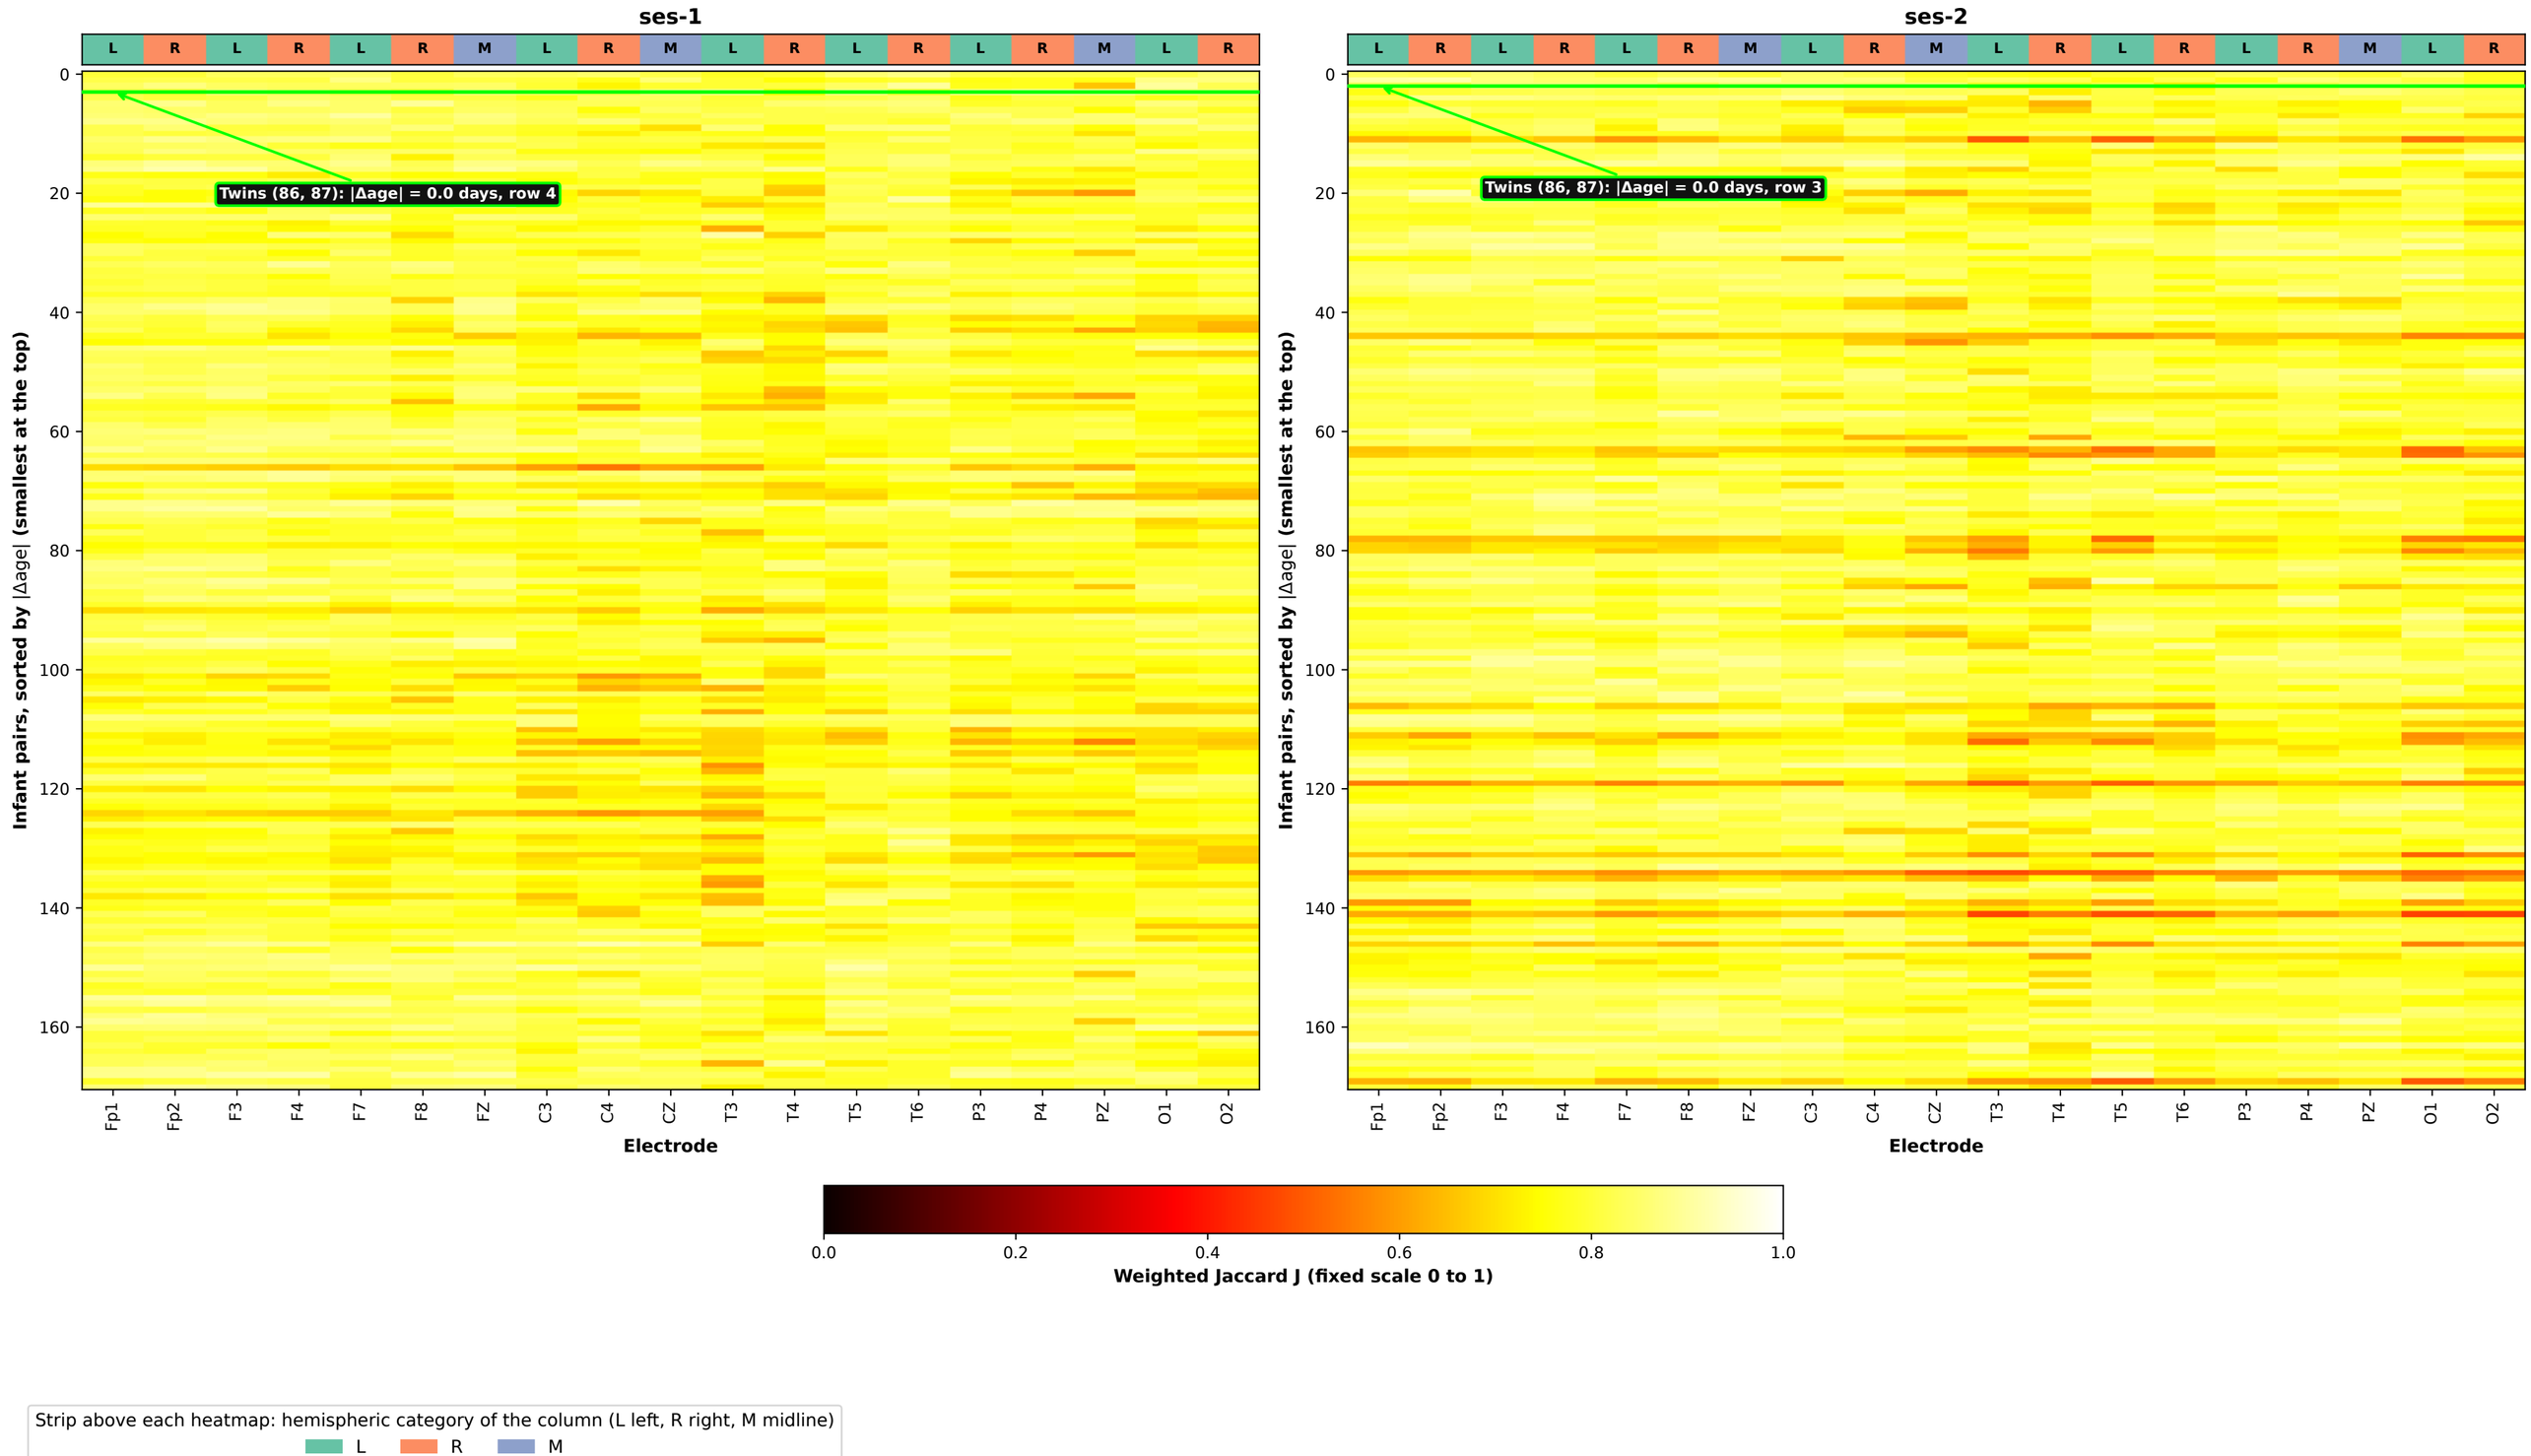

Figure 7: Element Similarity J for Every Infant Pair, f09: broadband weighted edge closeness
Rows sorted by age difference |Δage| at that session

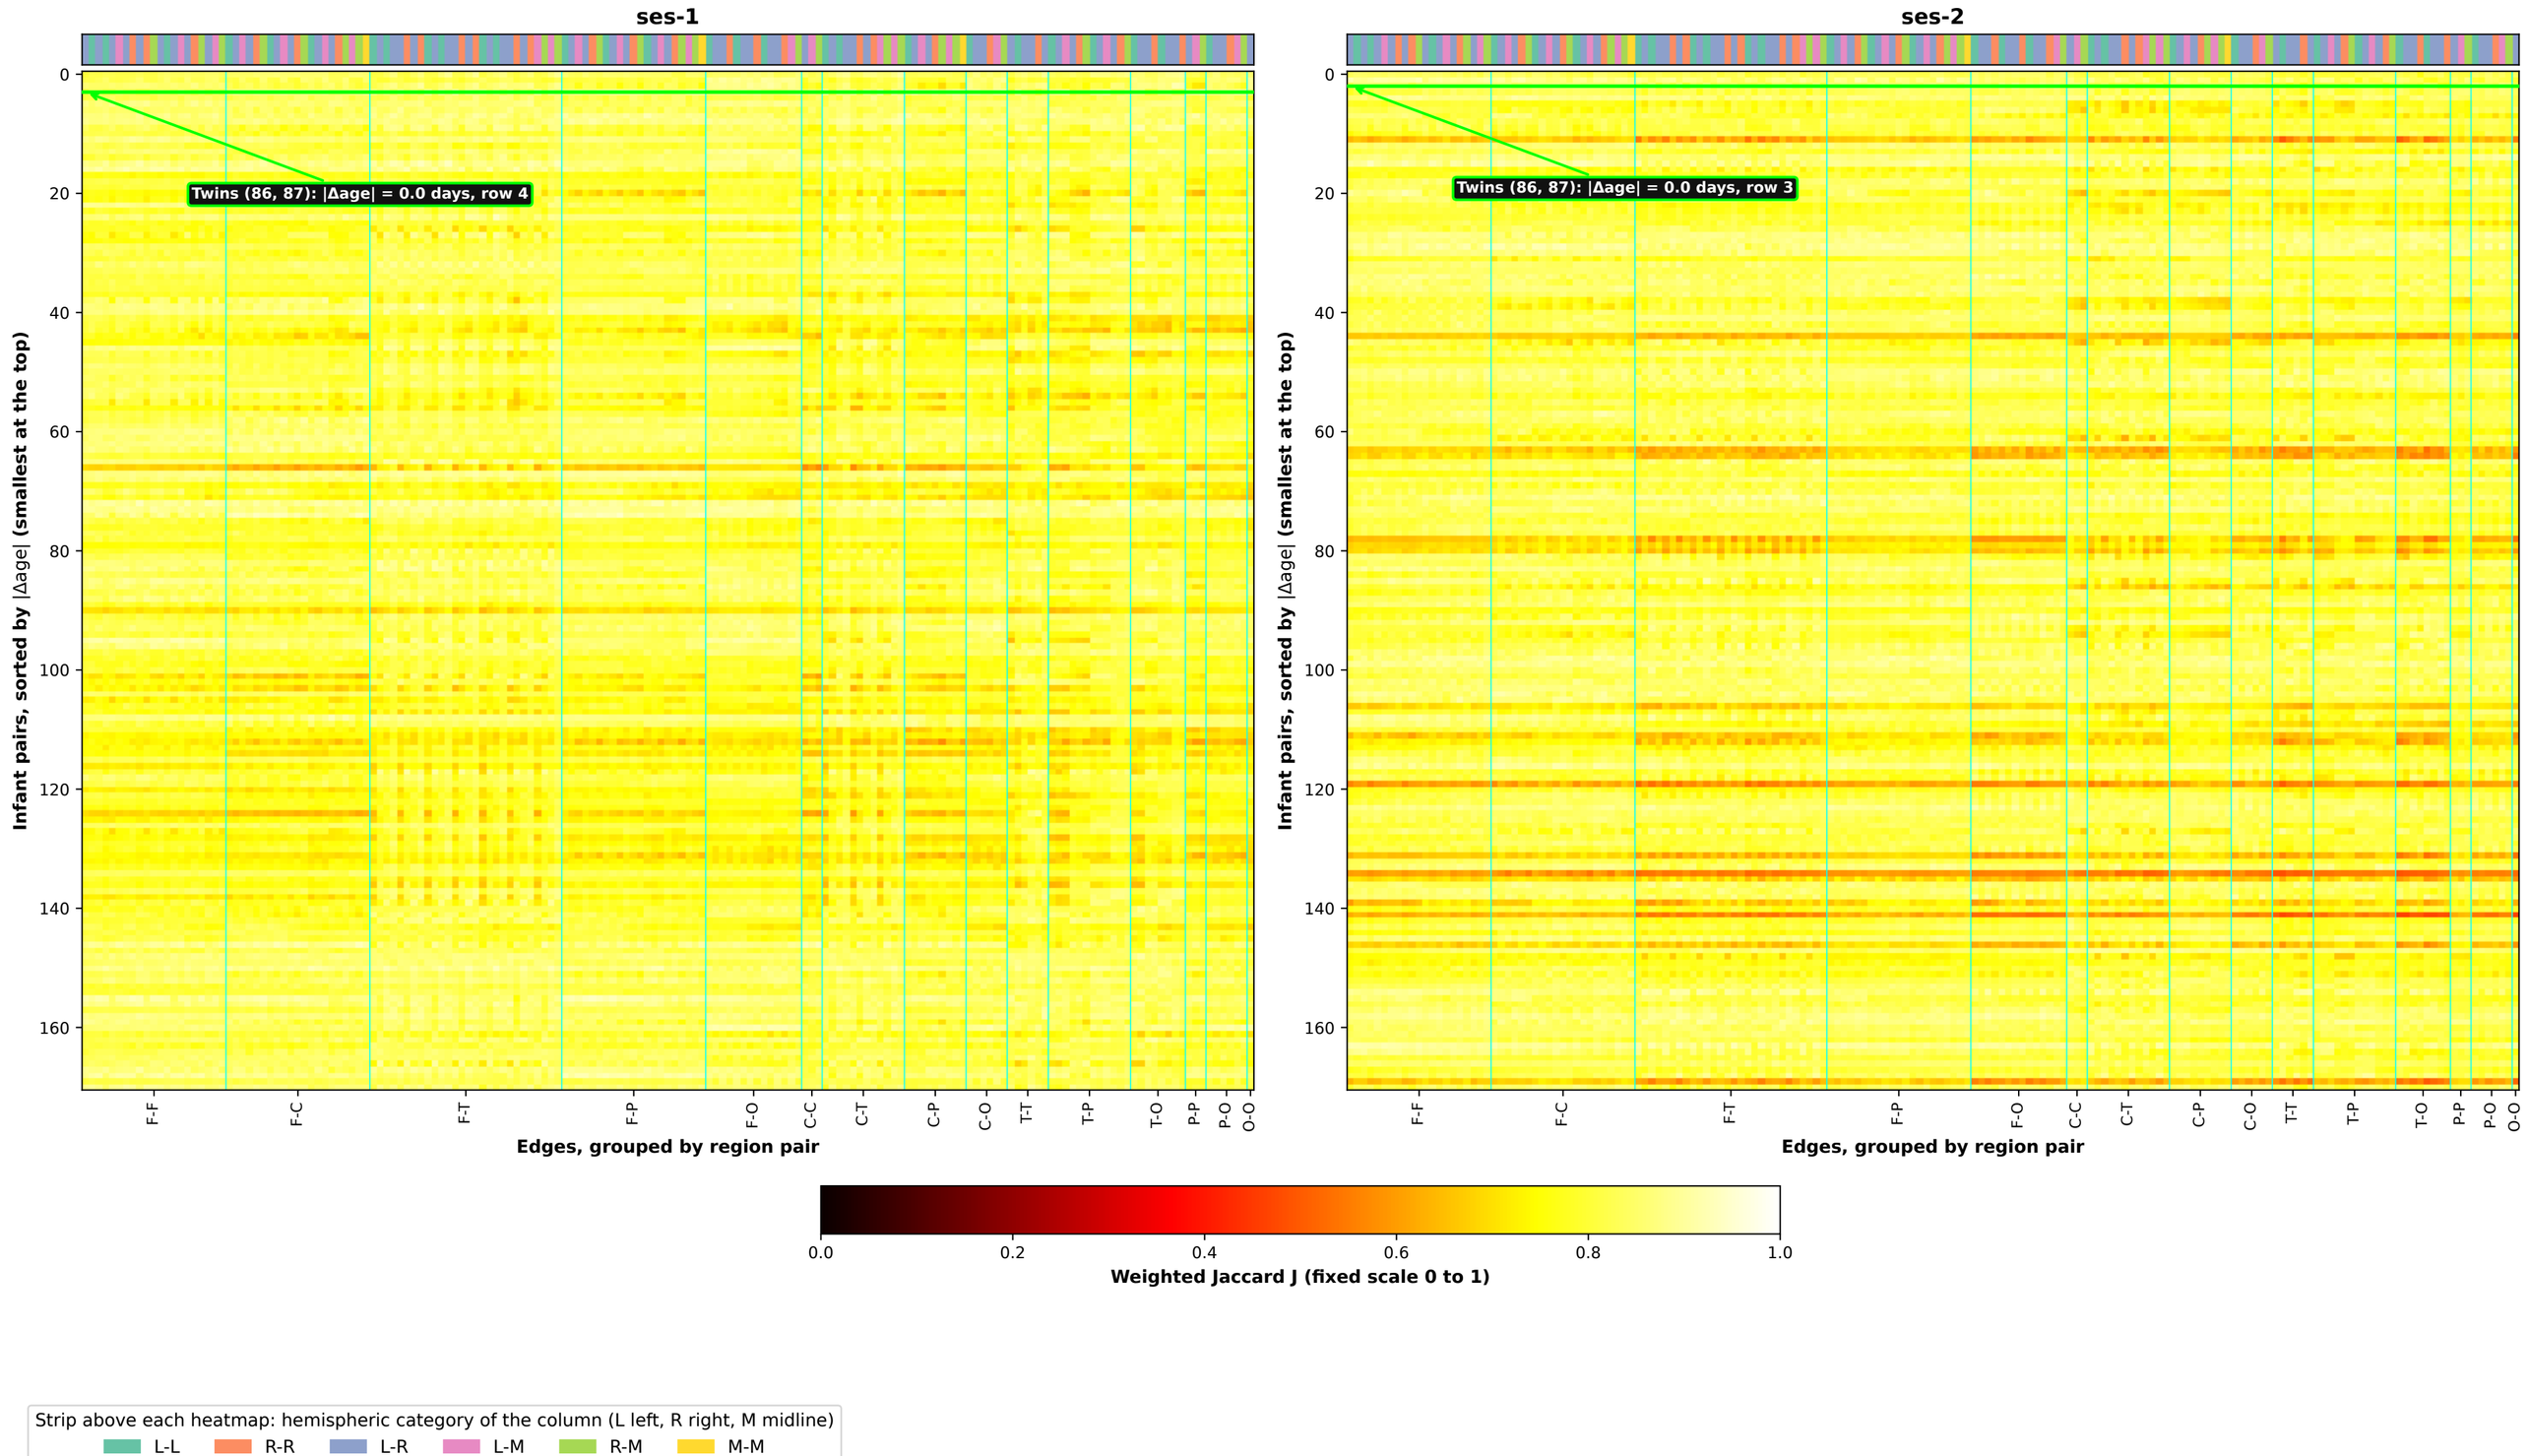

Figure 7: Element Similarity J for Every Infant Pair, f10: broadband binary adjacency
Rows sorted by age difference |Δage| at that session

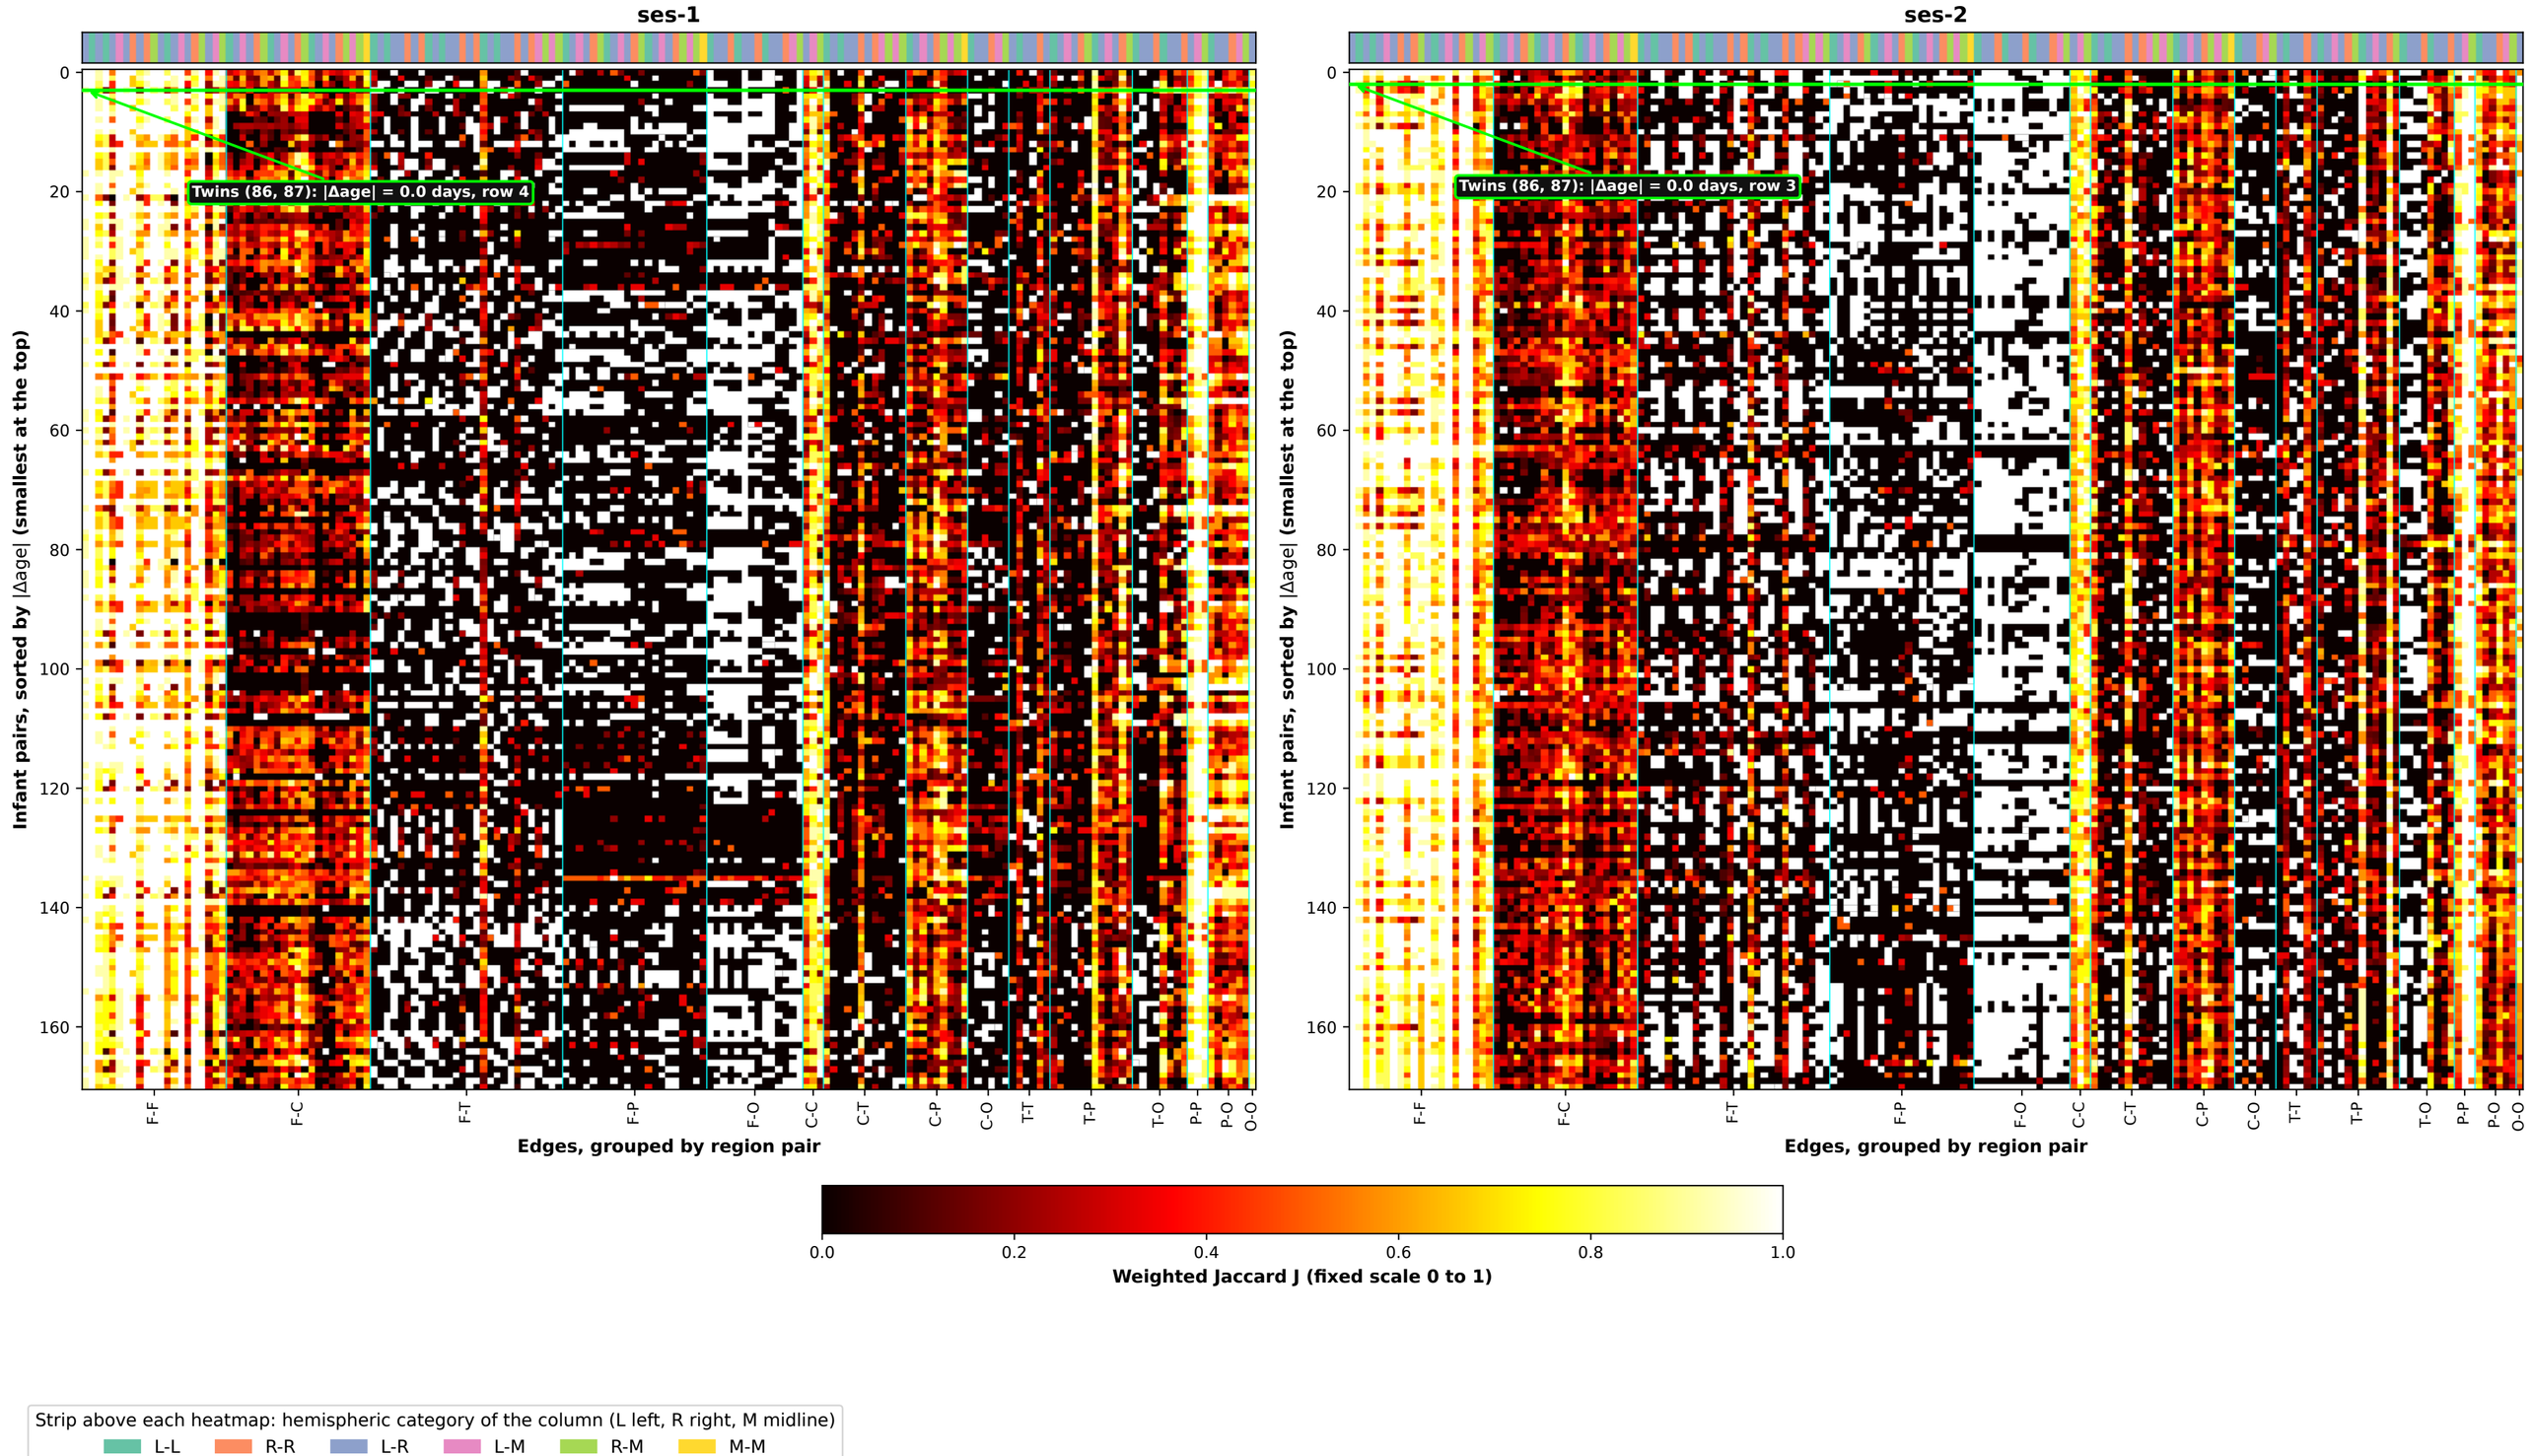

Figure 7: Element Similarity J for Every Infant Pair, f11: broadband binary node betweenness
Rows sorted by age difference |Δage| at that session

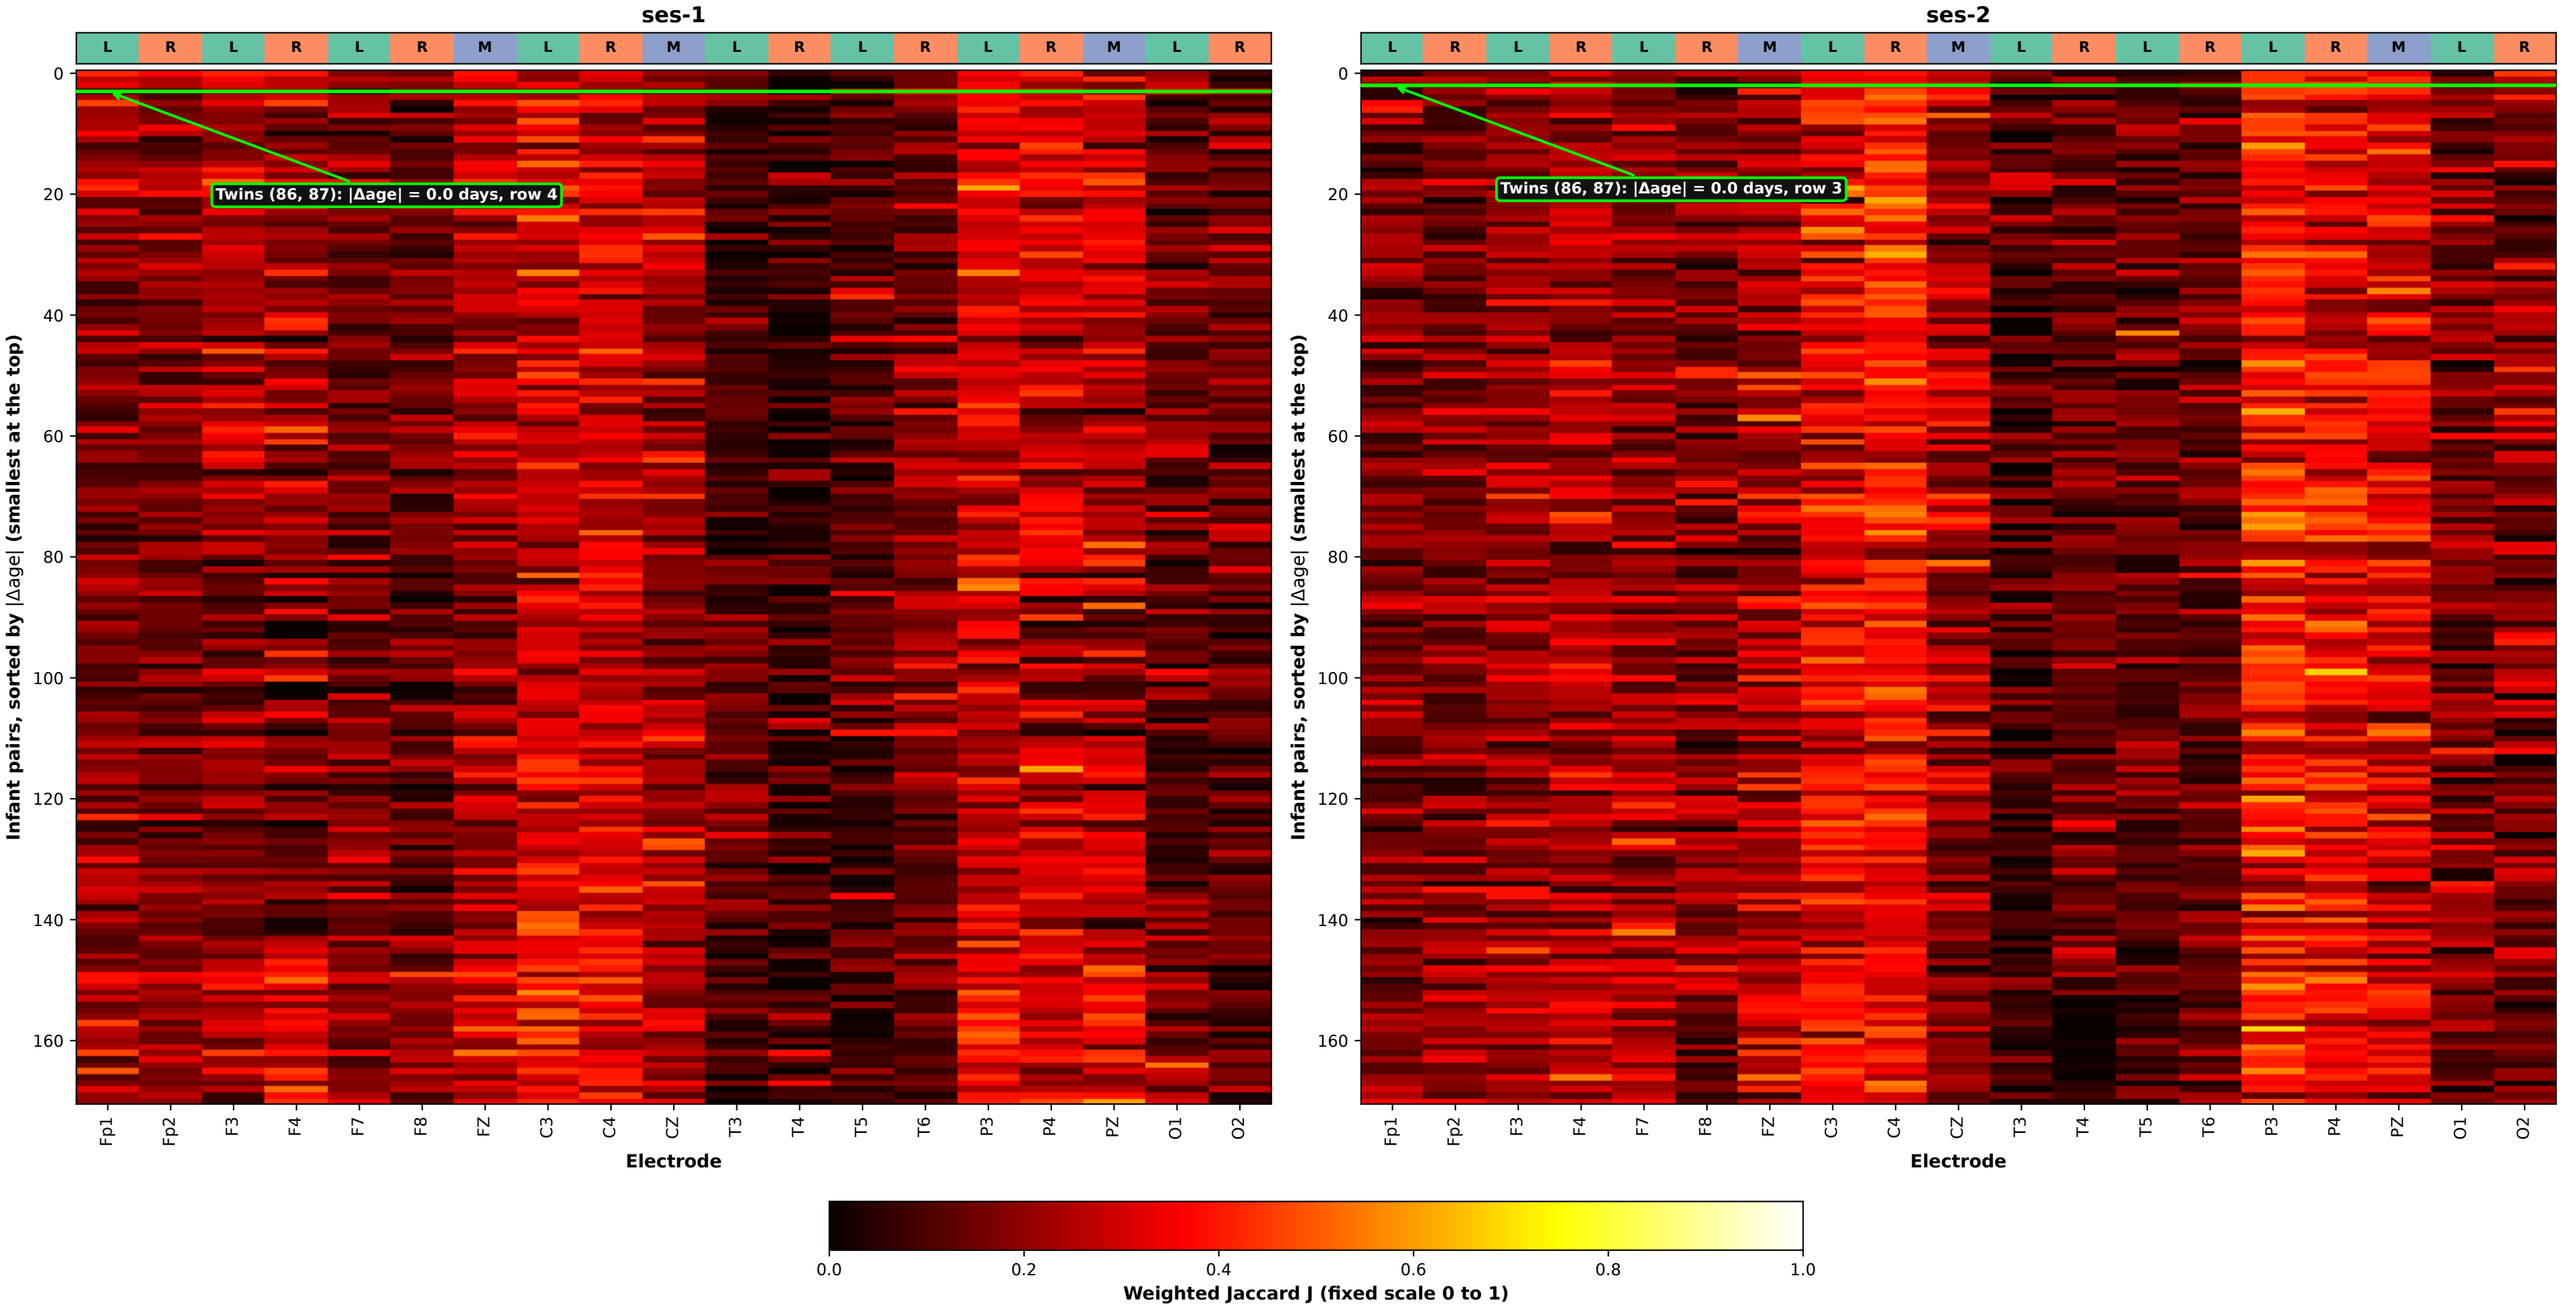

Figure 7: Element Similarity J for Every Infant Pair, f12: broadband binary edge betweenness
Rows sorted by age difference |Δage| at that session

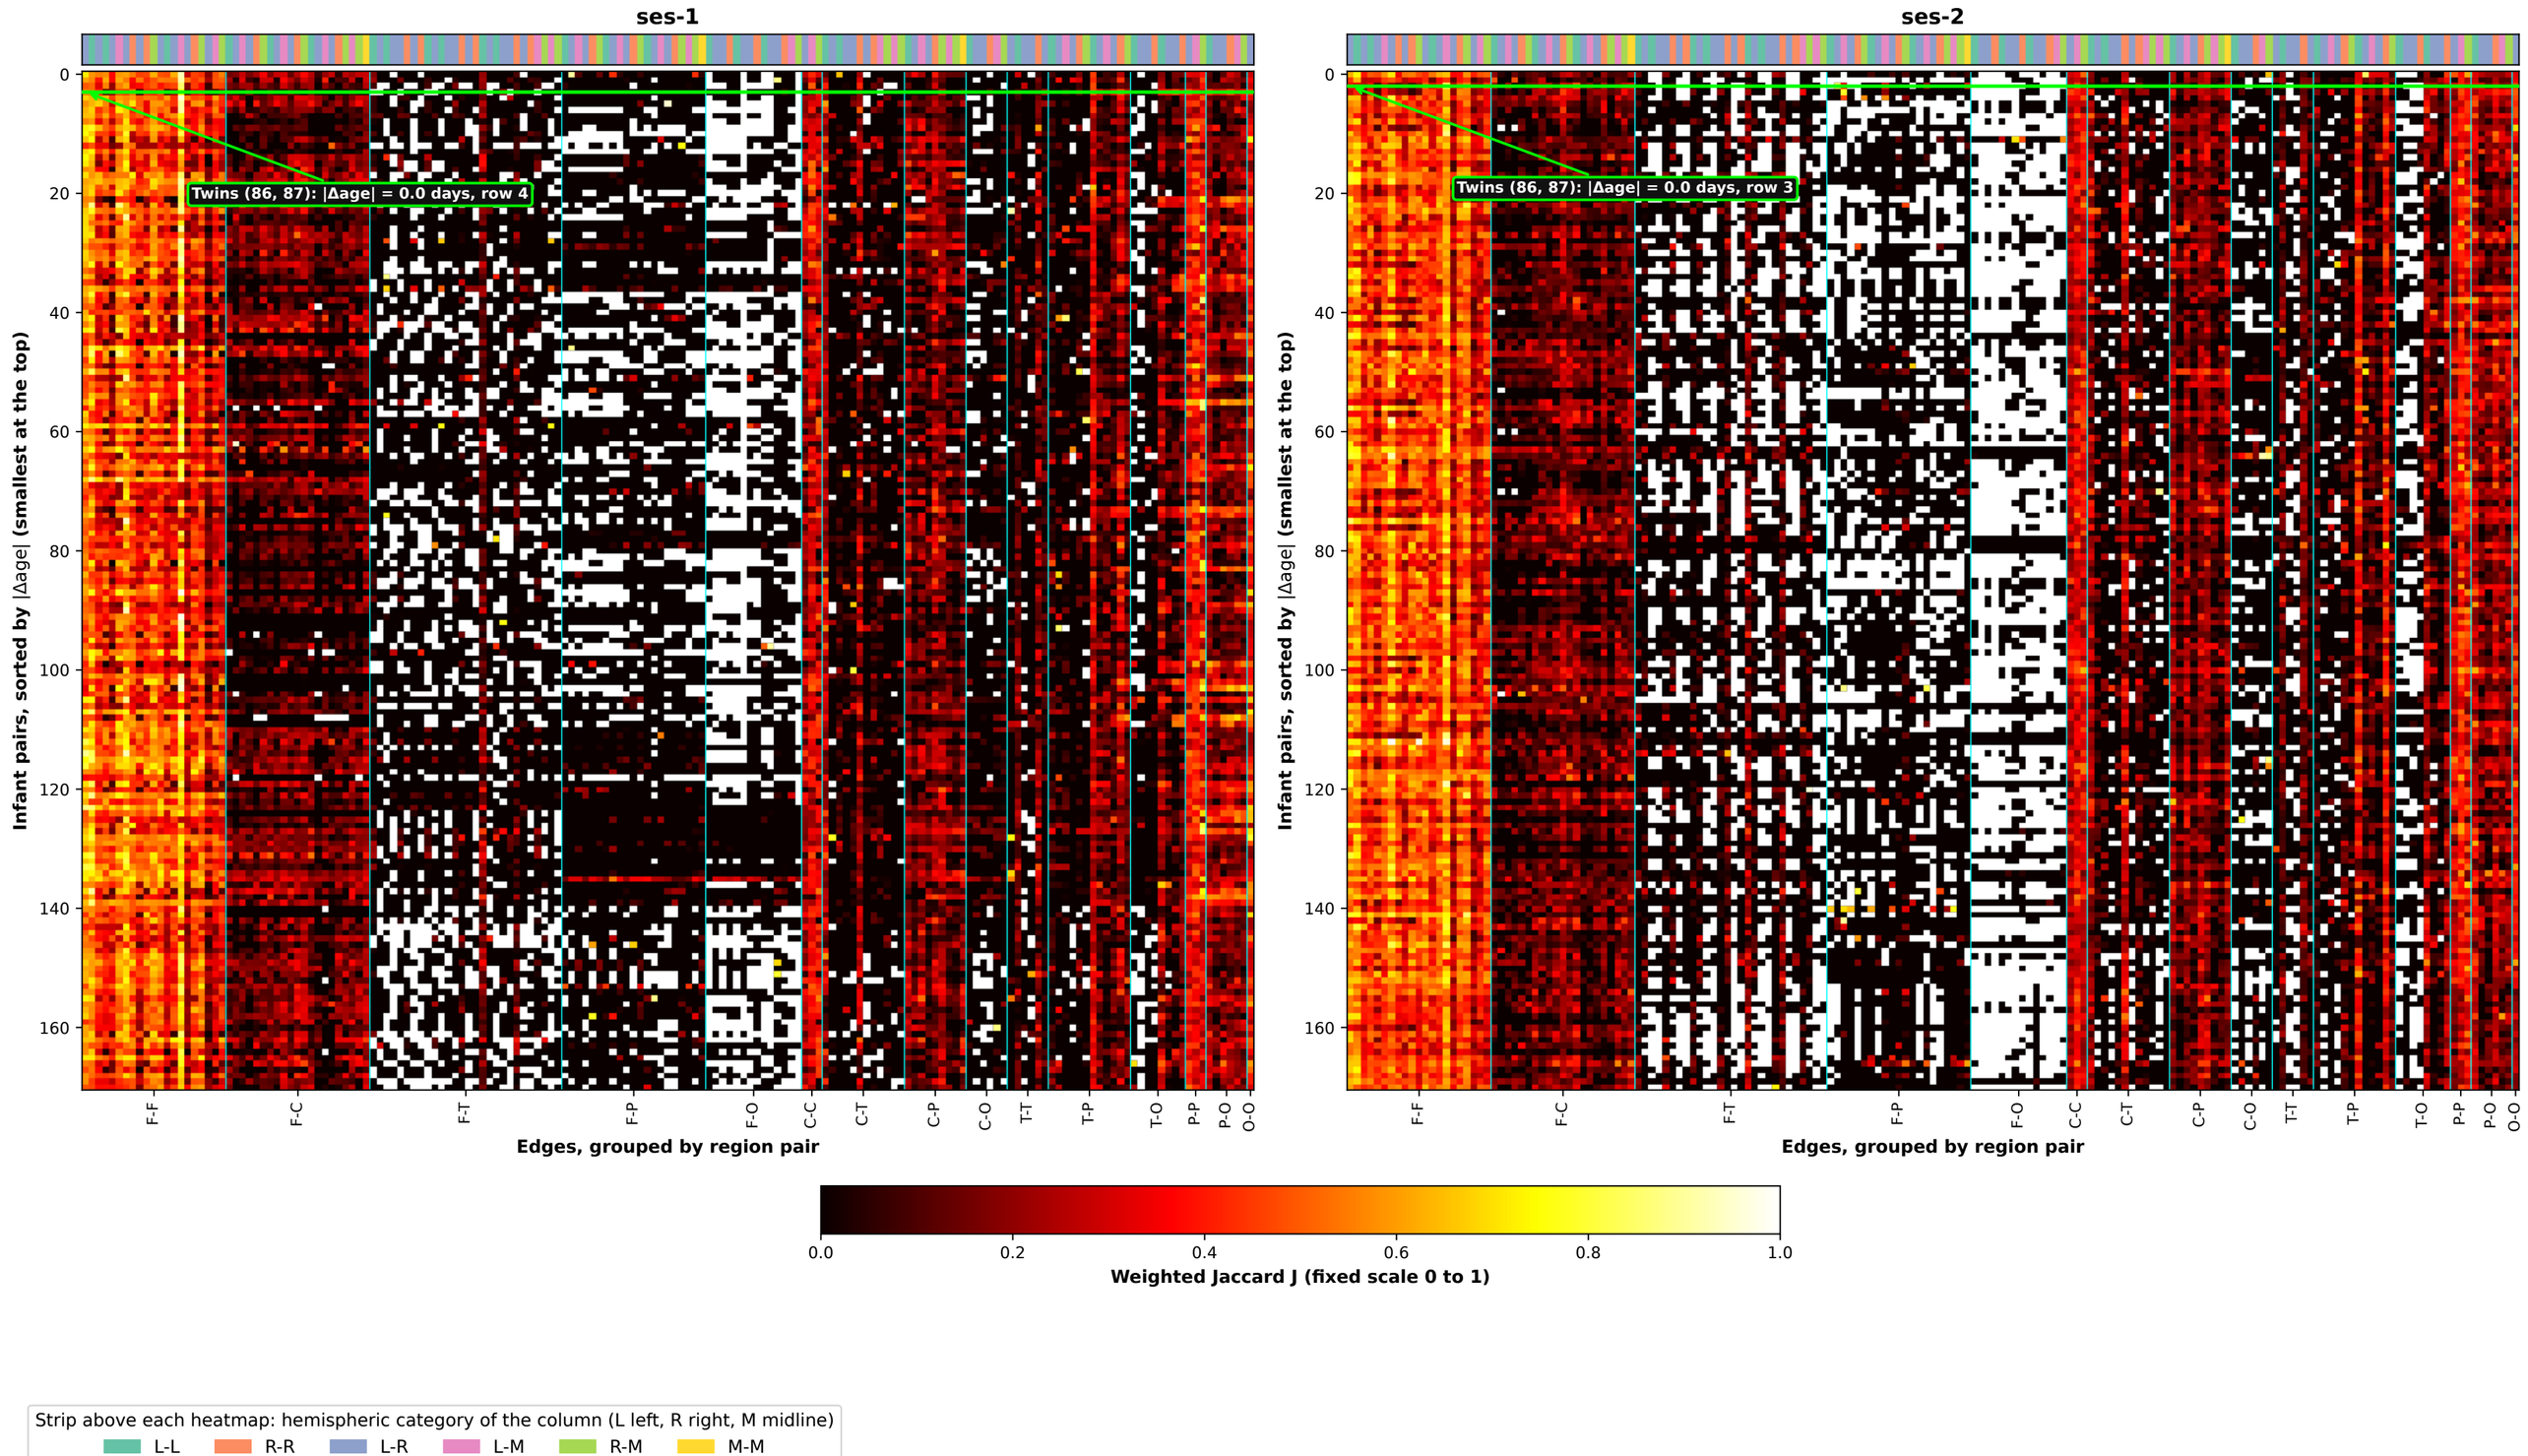

Figure 7: Element Similarity J for Every Infant Pair, f13: broadband binary node degree
Rows sorted by age difference |Δage| at that session

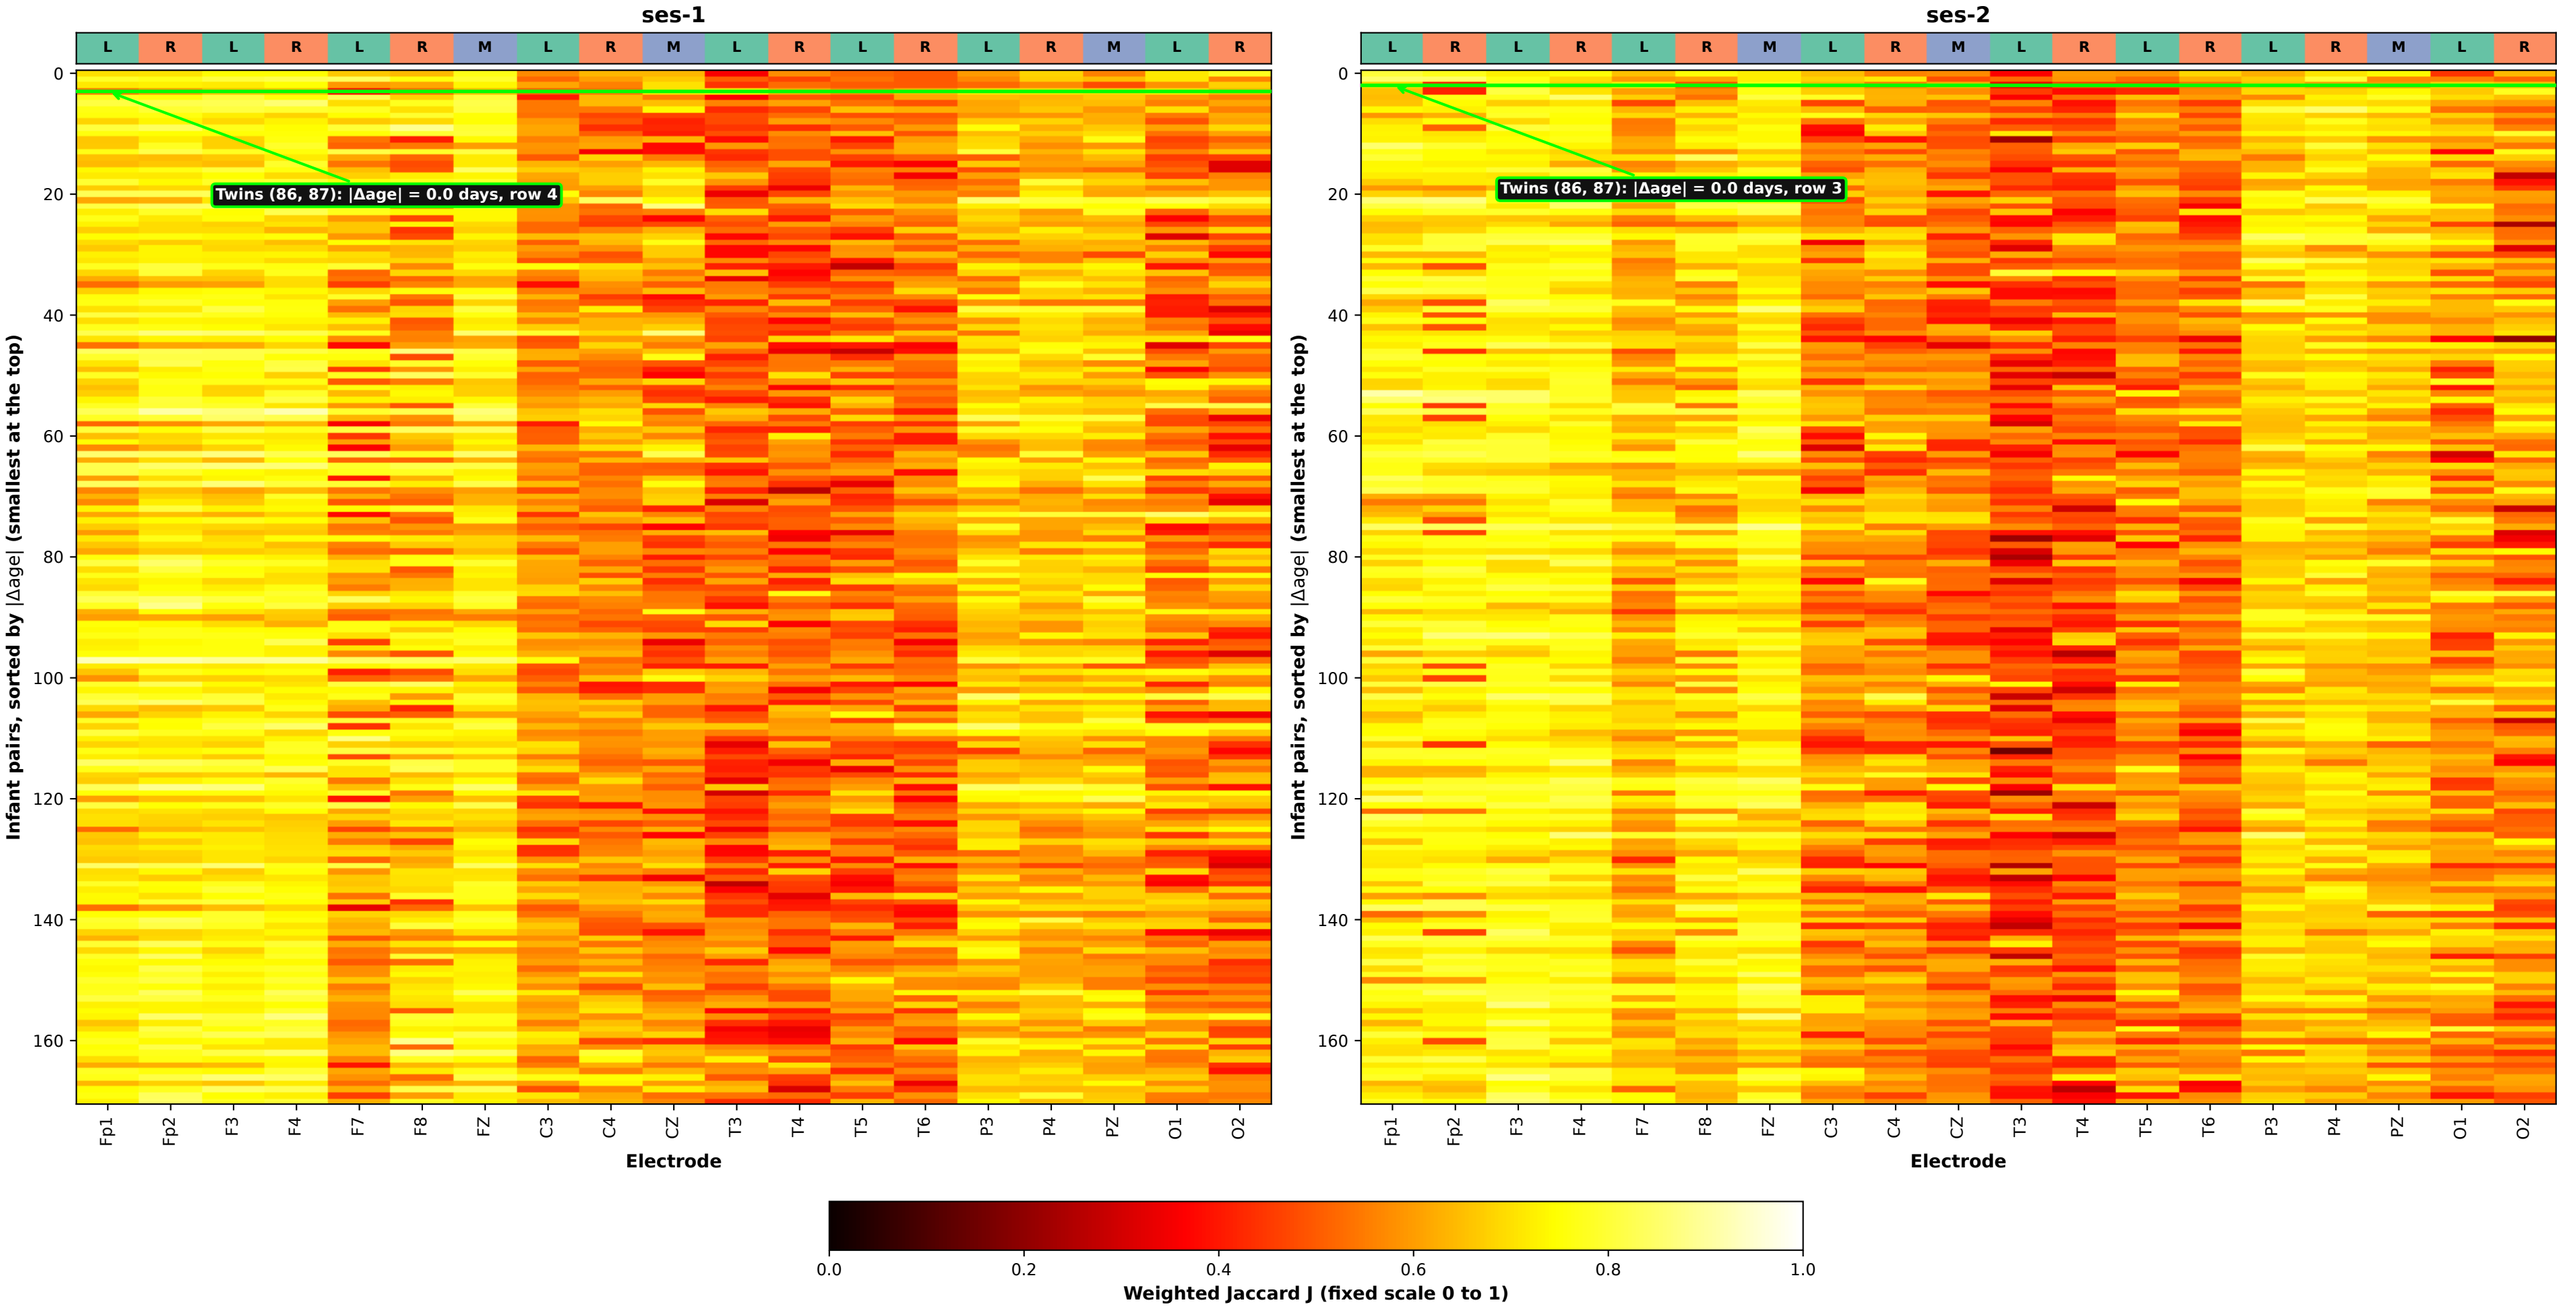

Figure 7: Element Similarity J for Every Infant Pair, f14: broadband binary edge strength
Rows sorted by age difference |Δage| at that session

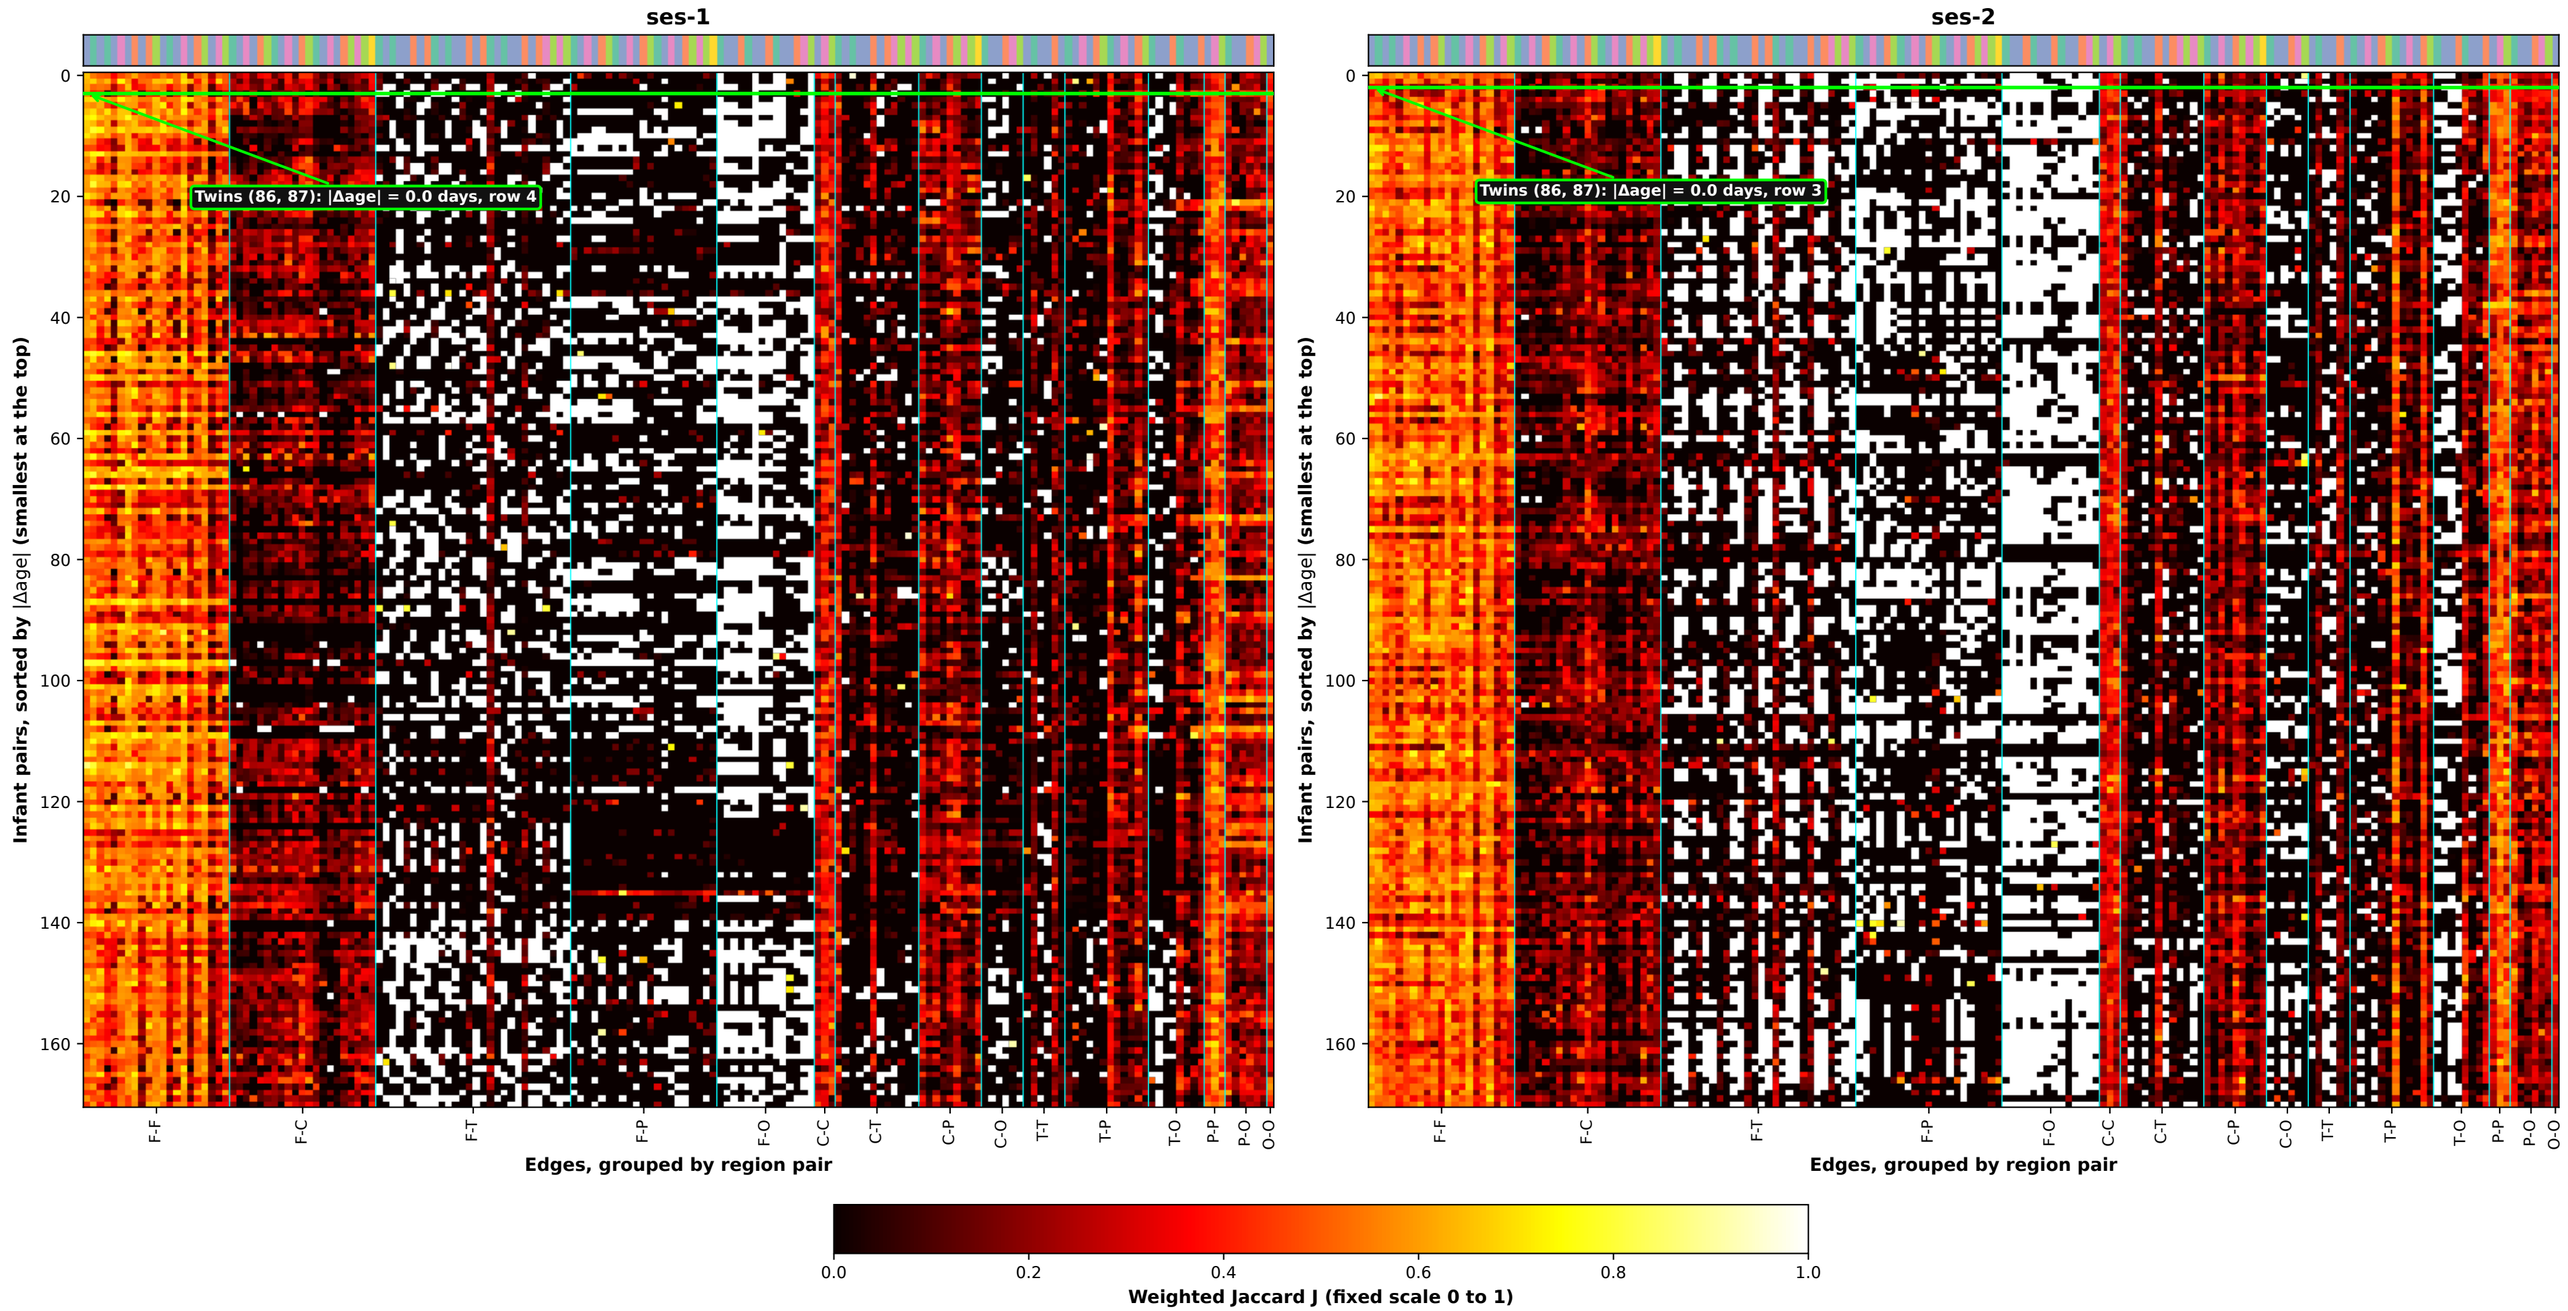

Figure 7: Element Similarity J for Every Infant Pair, f15: broadband binary node eigenvector
Rows sorted by age difference |Δage| at that session

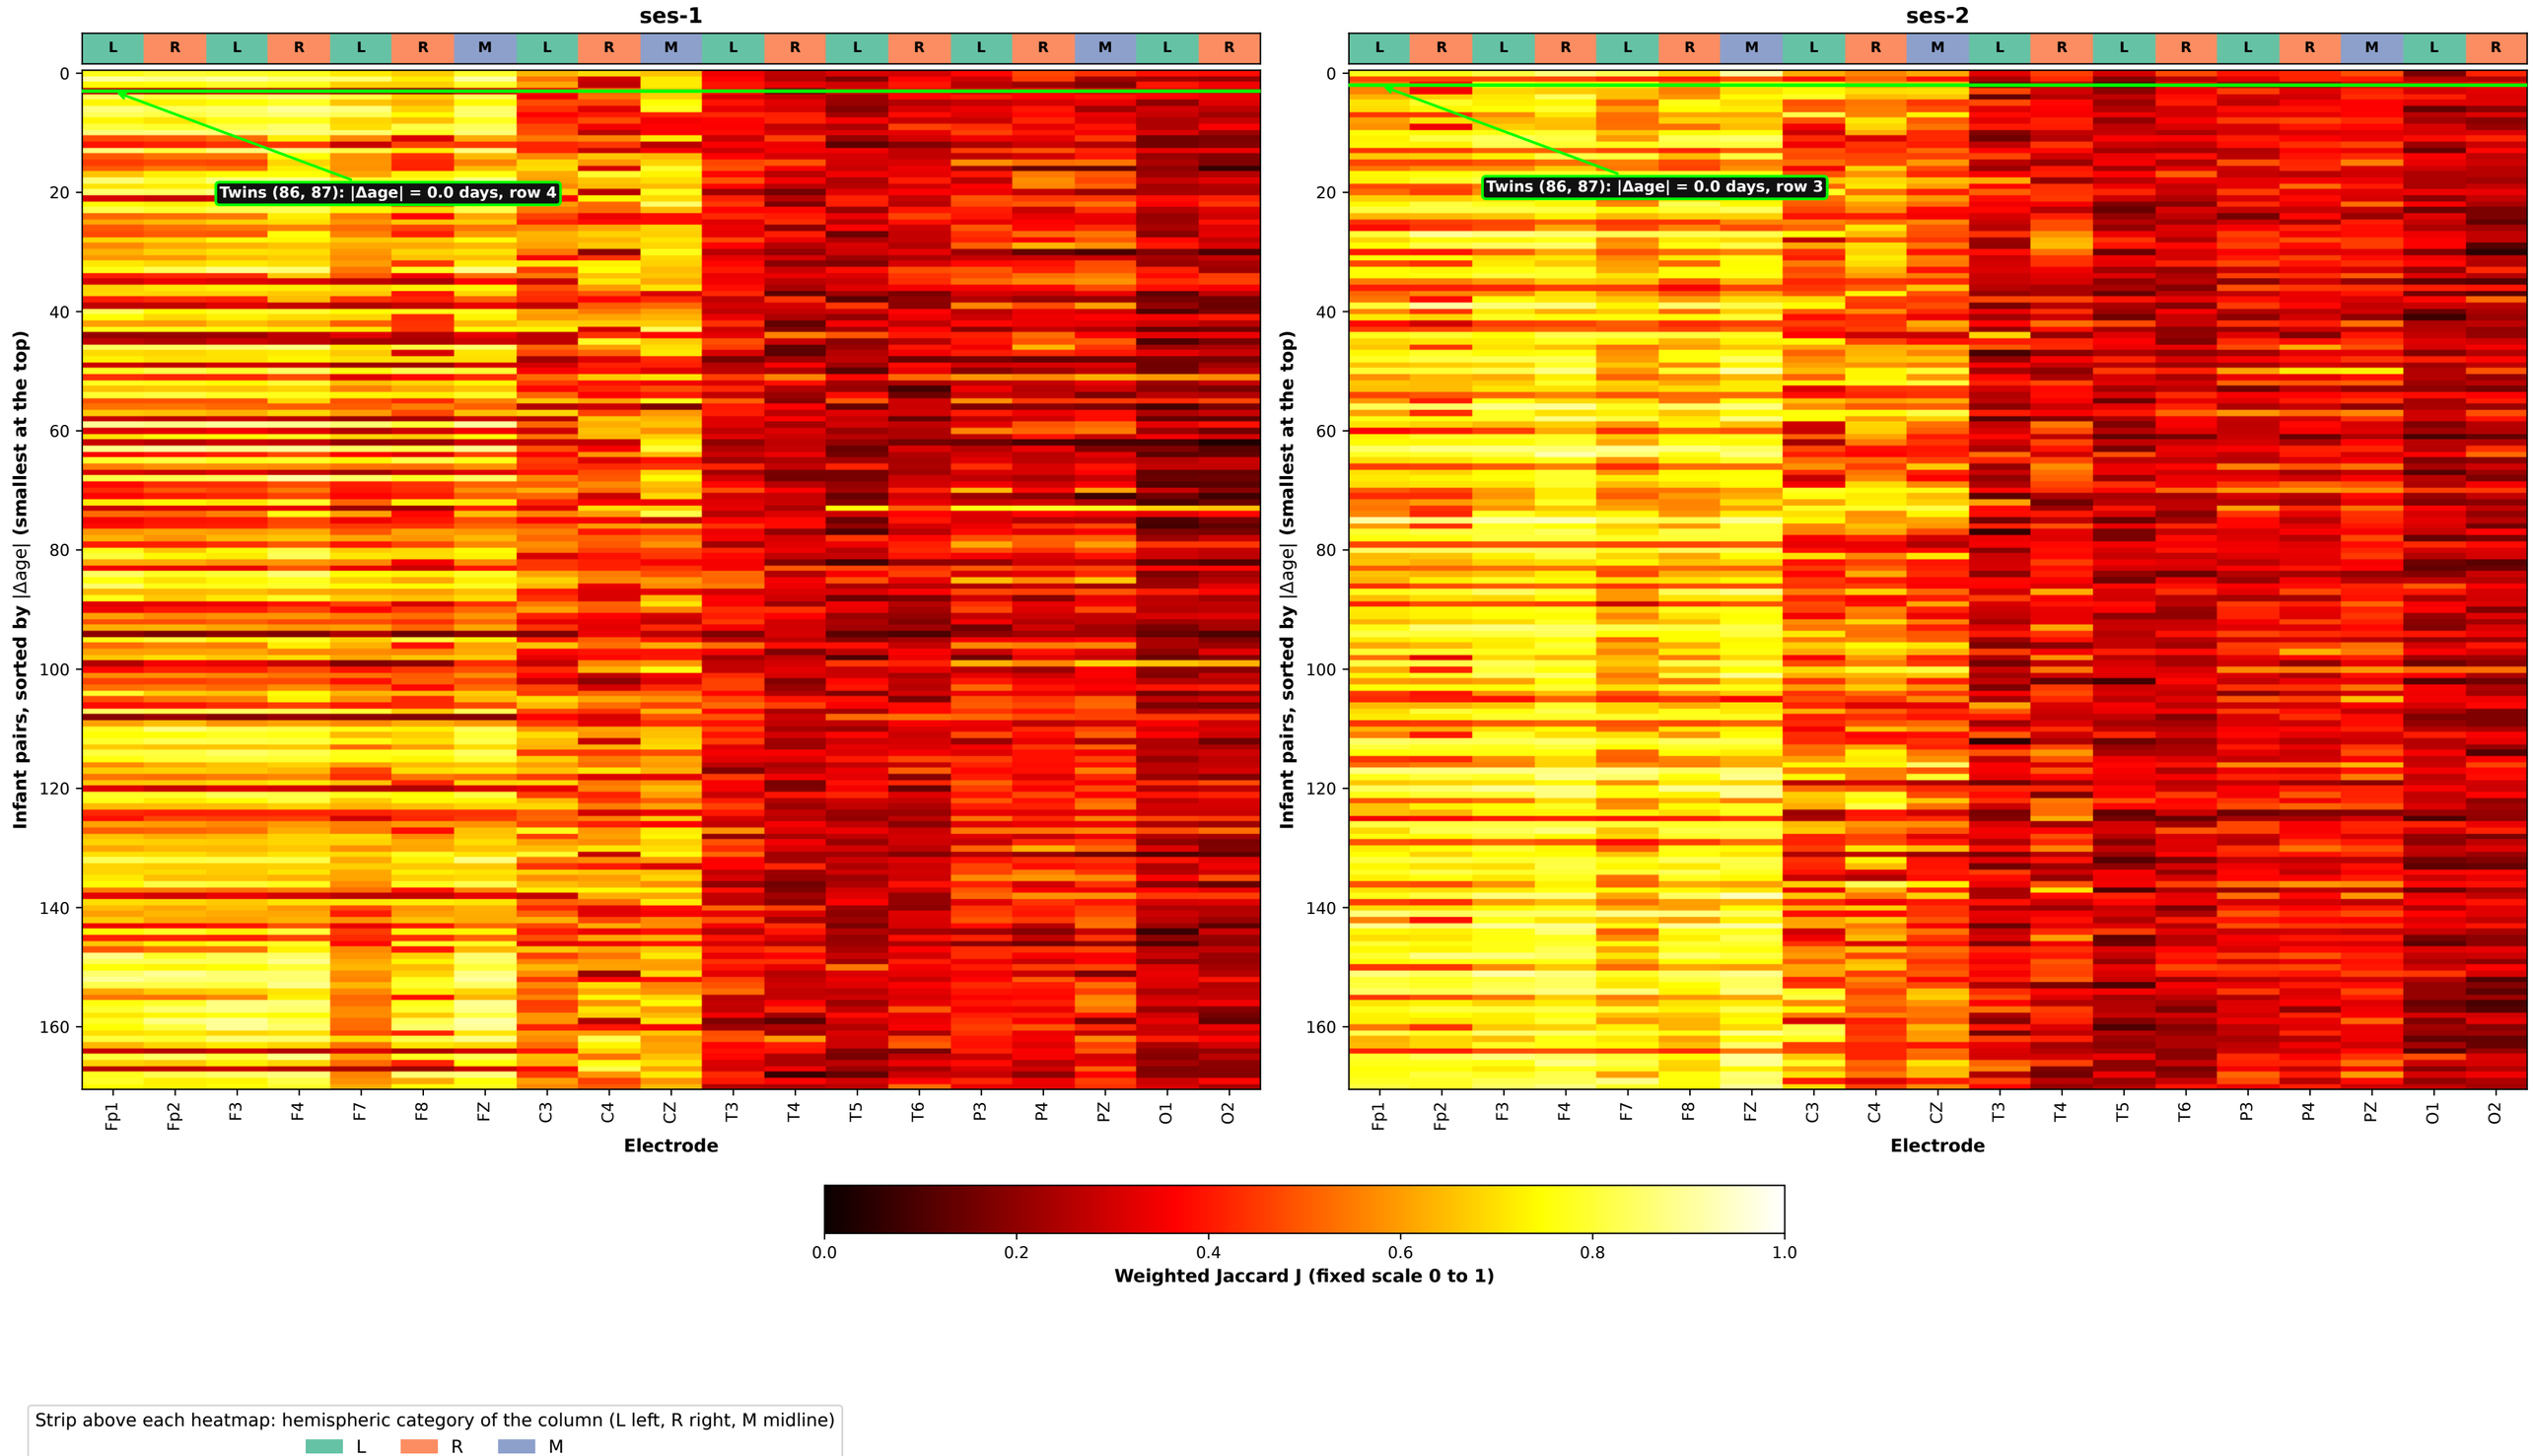

Figure 7: Element Similarity J for Every Infant Pair, f16: broadband binary edge eigenvector
Rows sorted by age difference |Δage| at that session

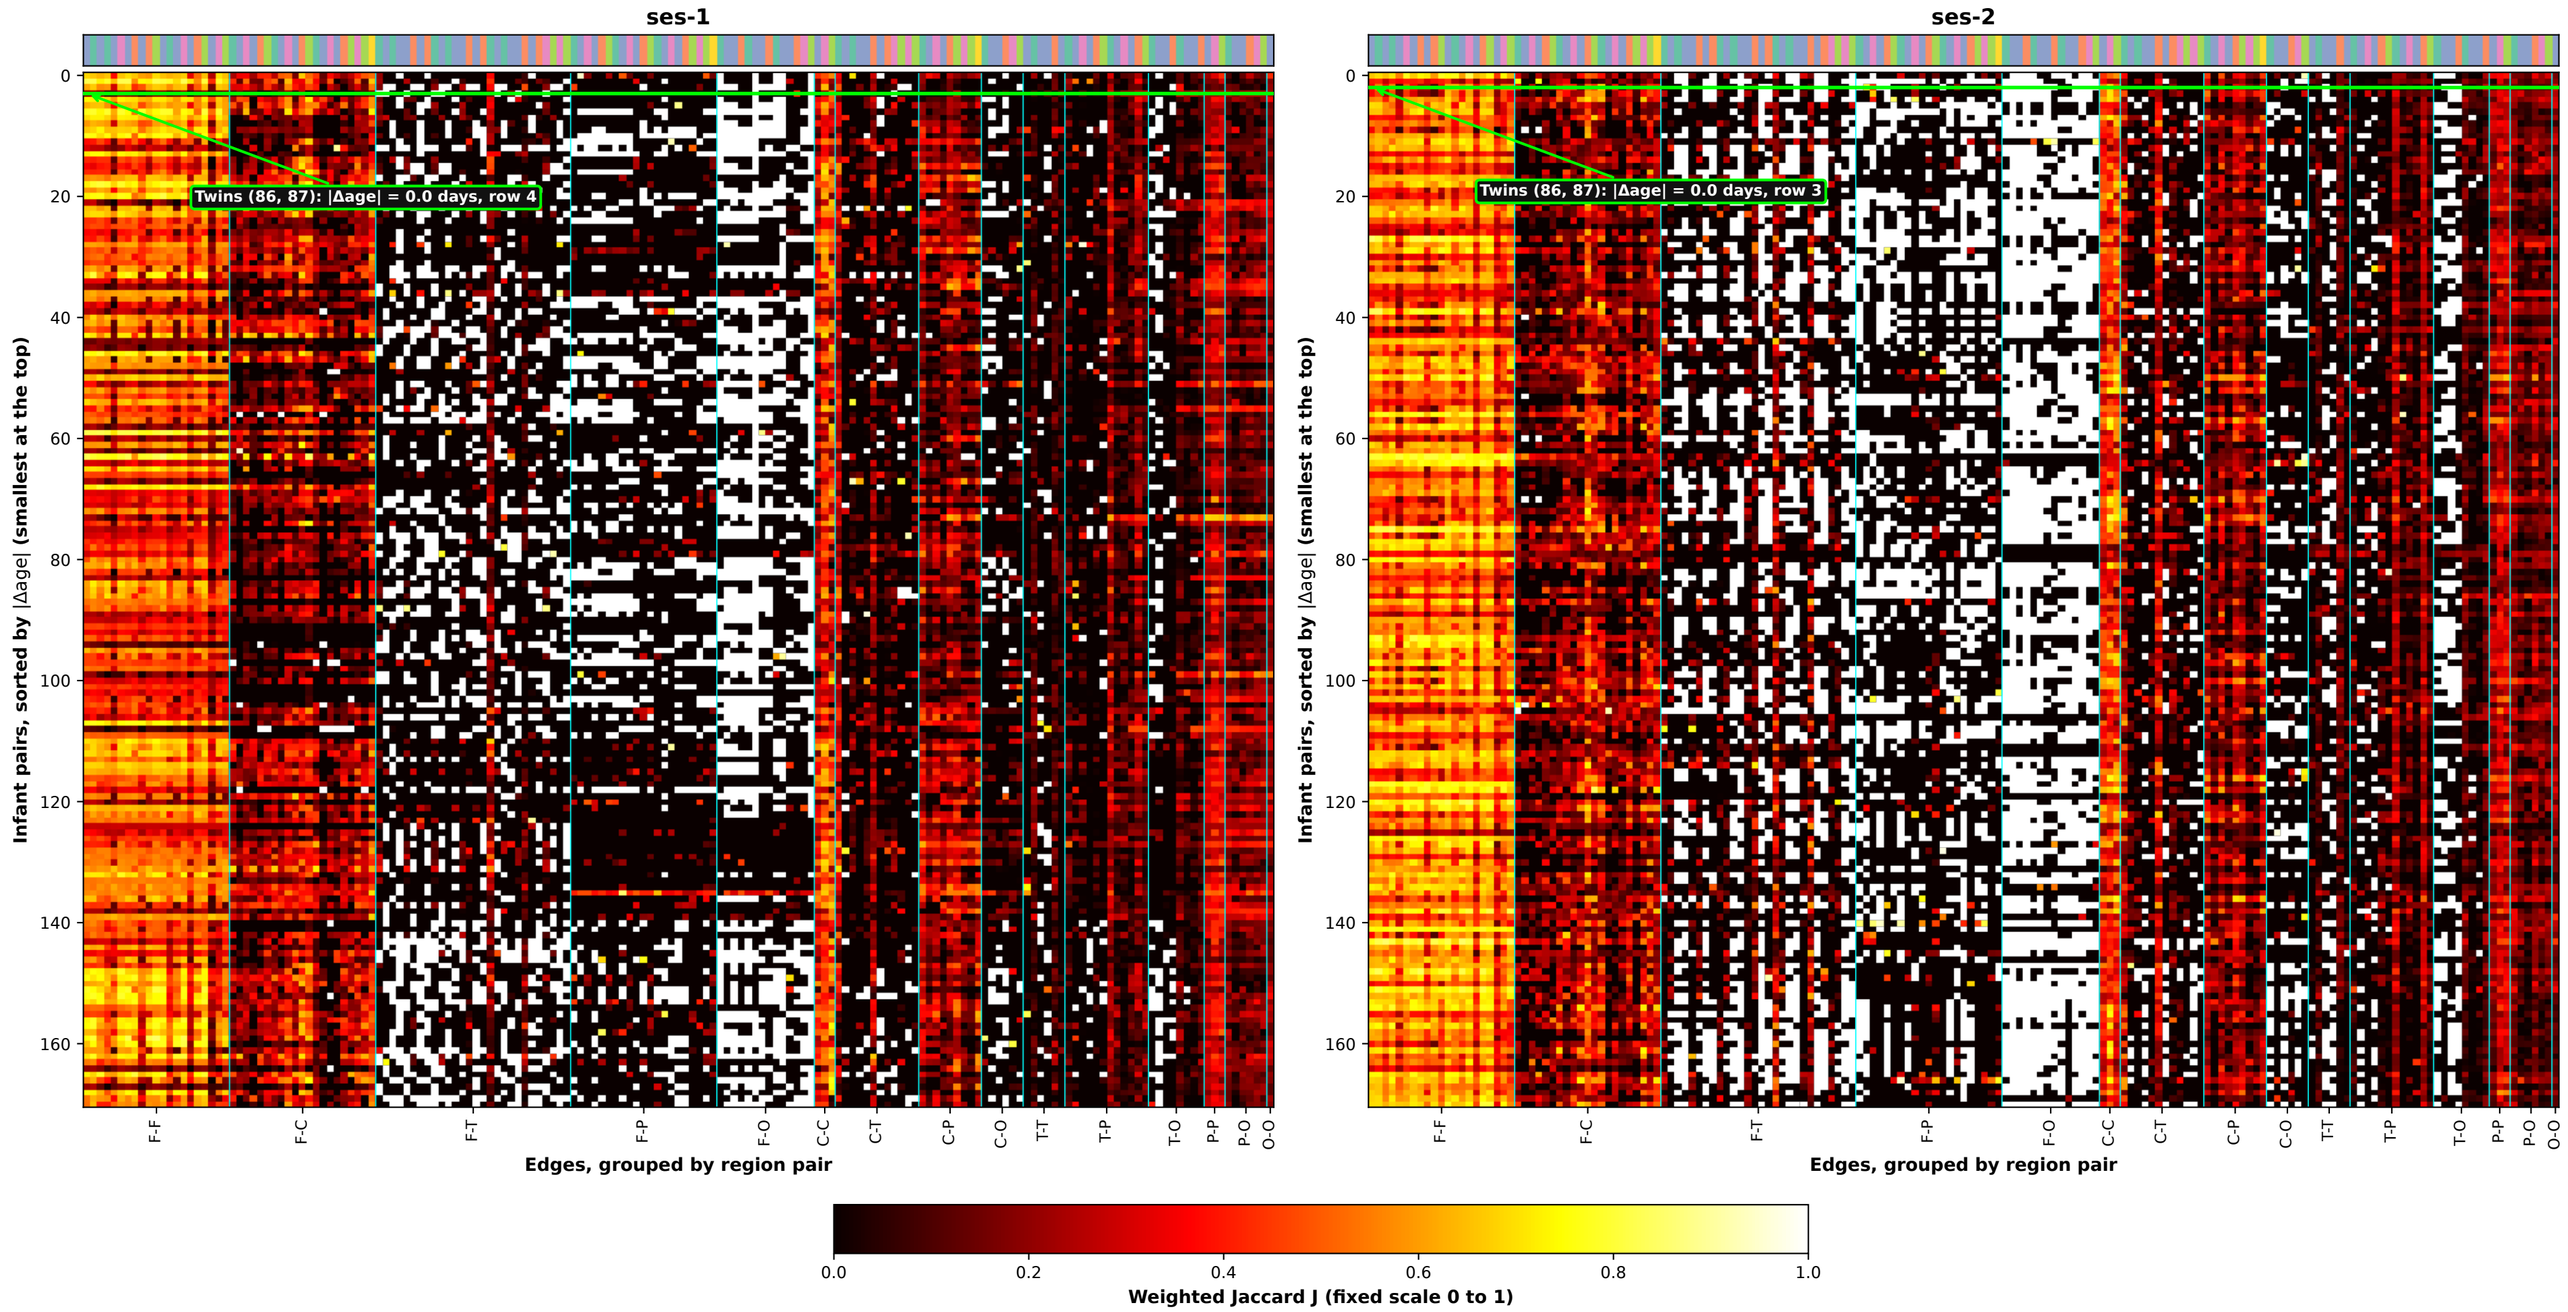

Figure 7: Element Similarity J for Every Infant Pair, f17: broadband binary node closeness
Rows sorted by age difference |Δage| at that session

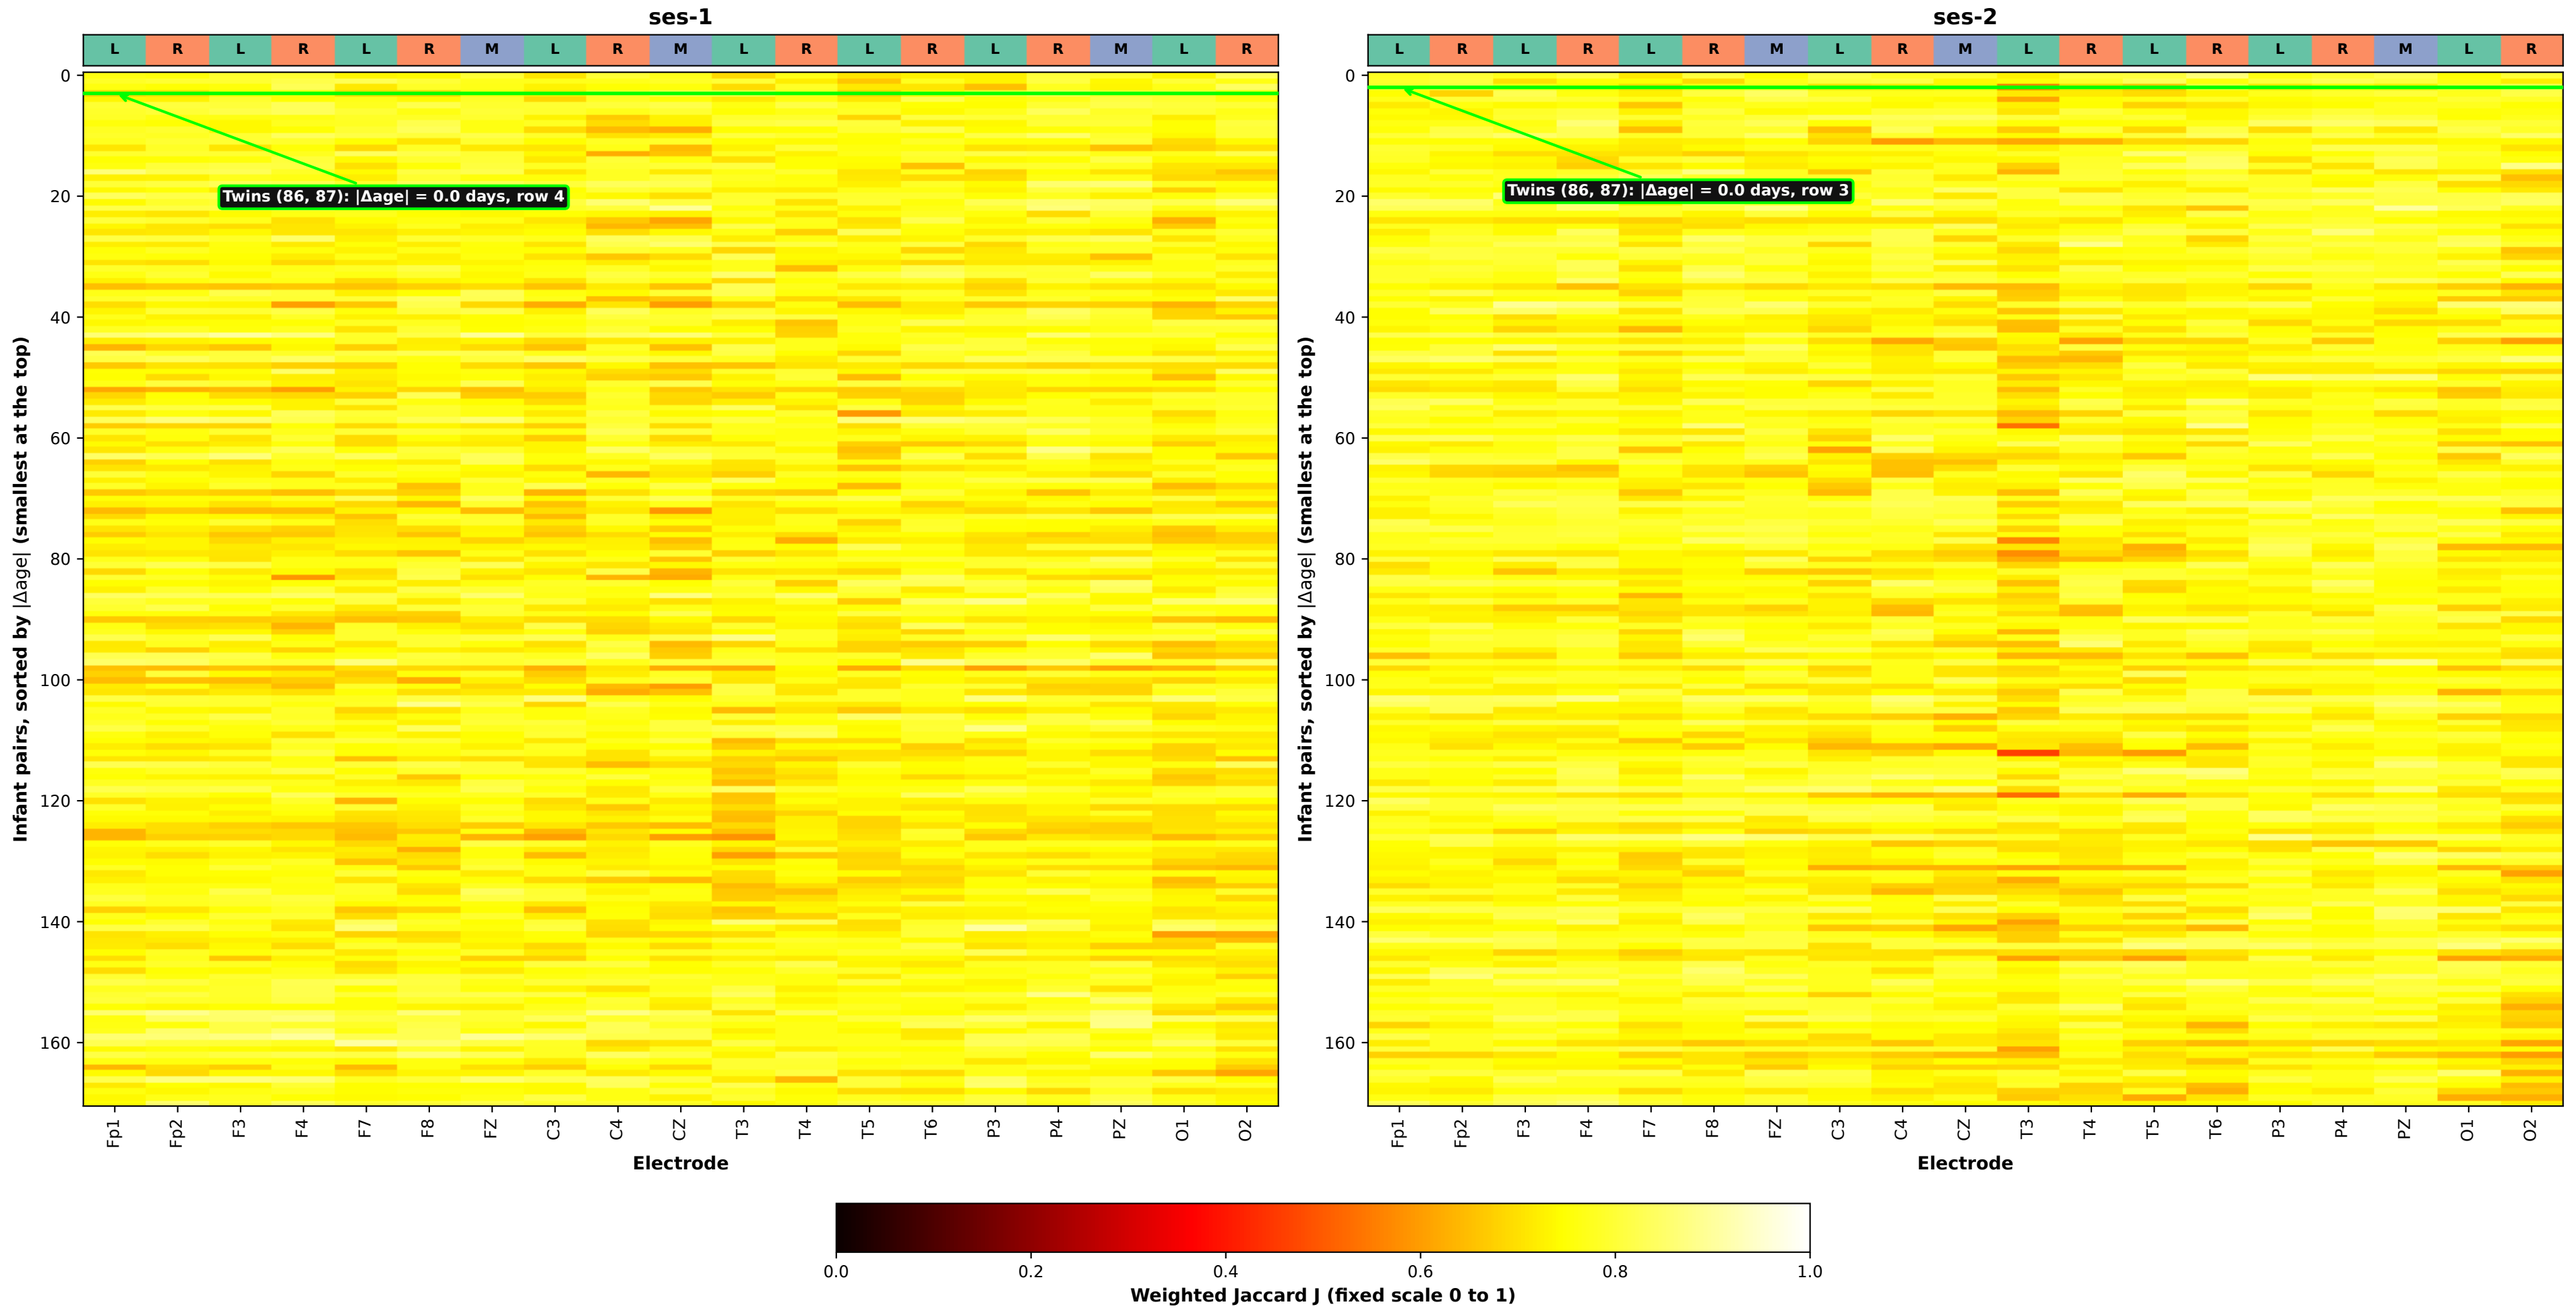

Figure 7: Element Similarity J for Every Infant Pair, f18: broadband binary edge closeness
Rows sorted by age difference |Δage| at that session

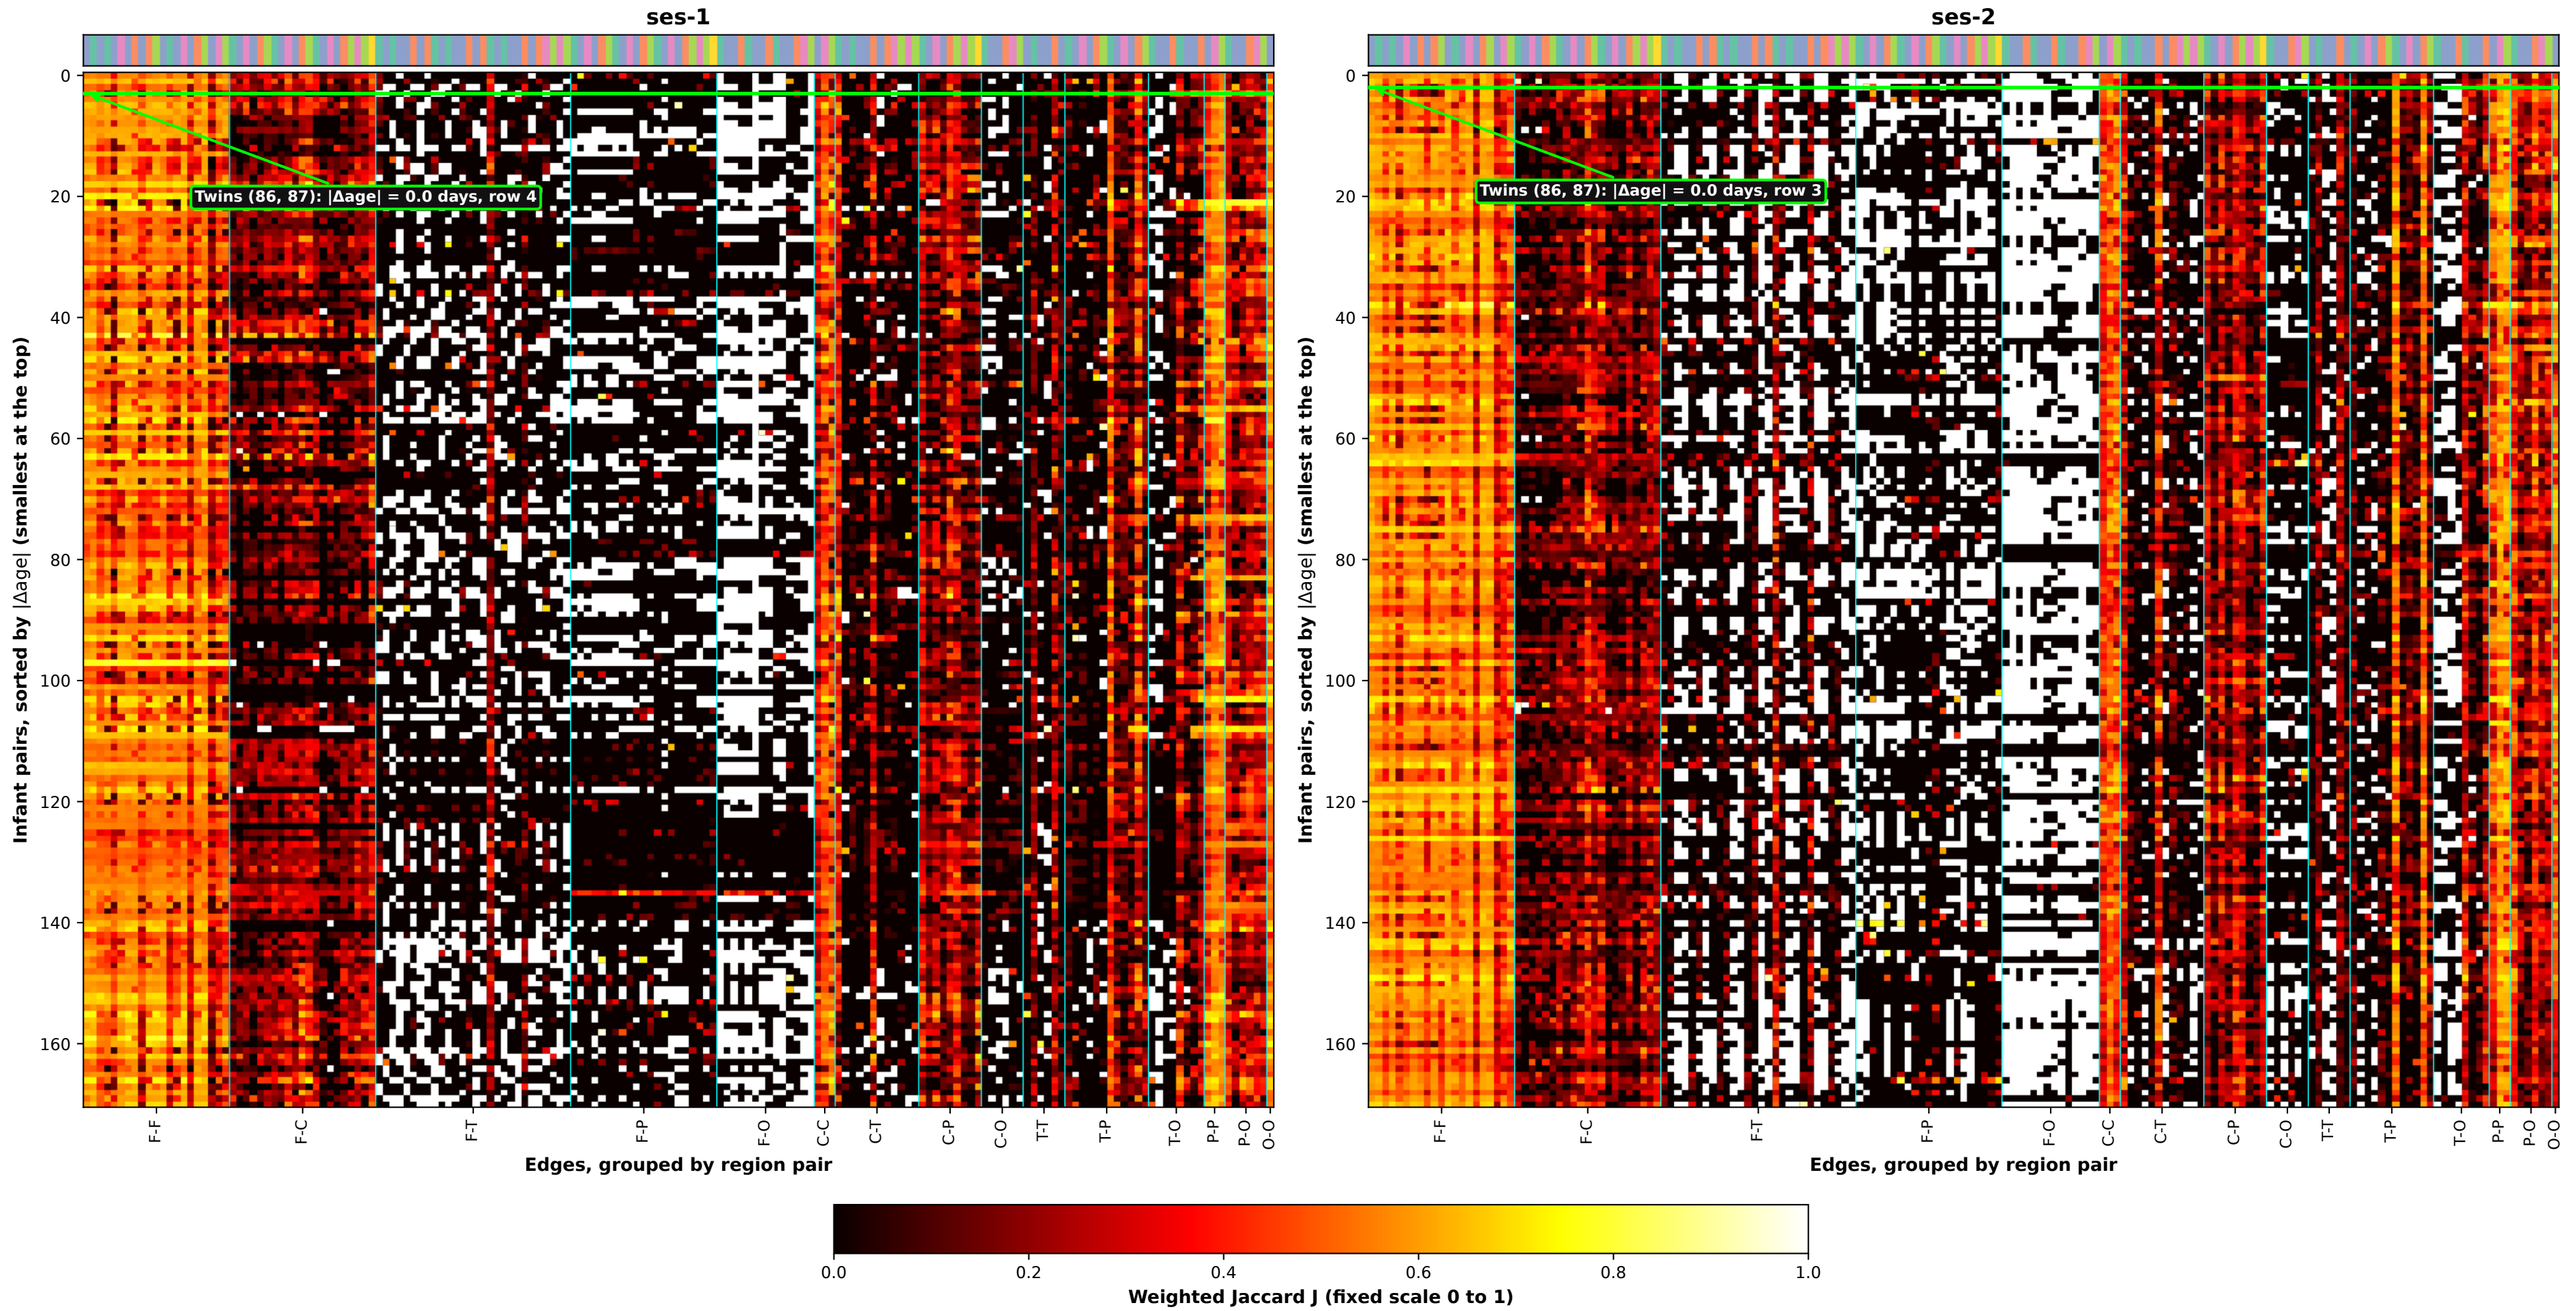

Figure 7: Element Similarity J for Every Infant Pair, f19: delta weighted correlation
Rows sorted by age difference |Δage| at that session

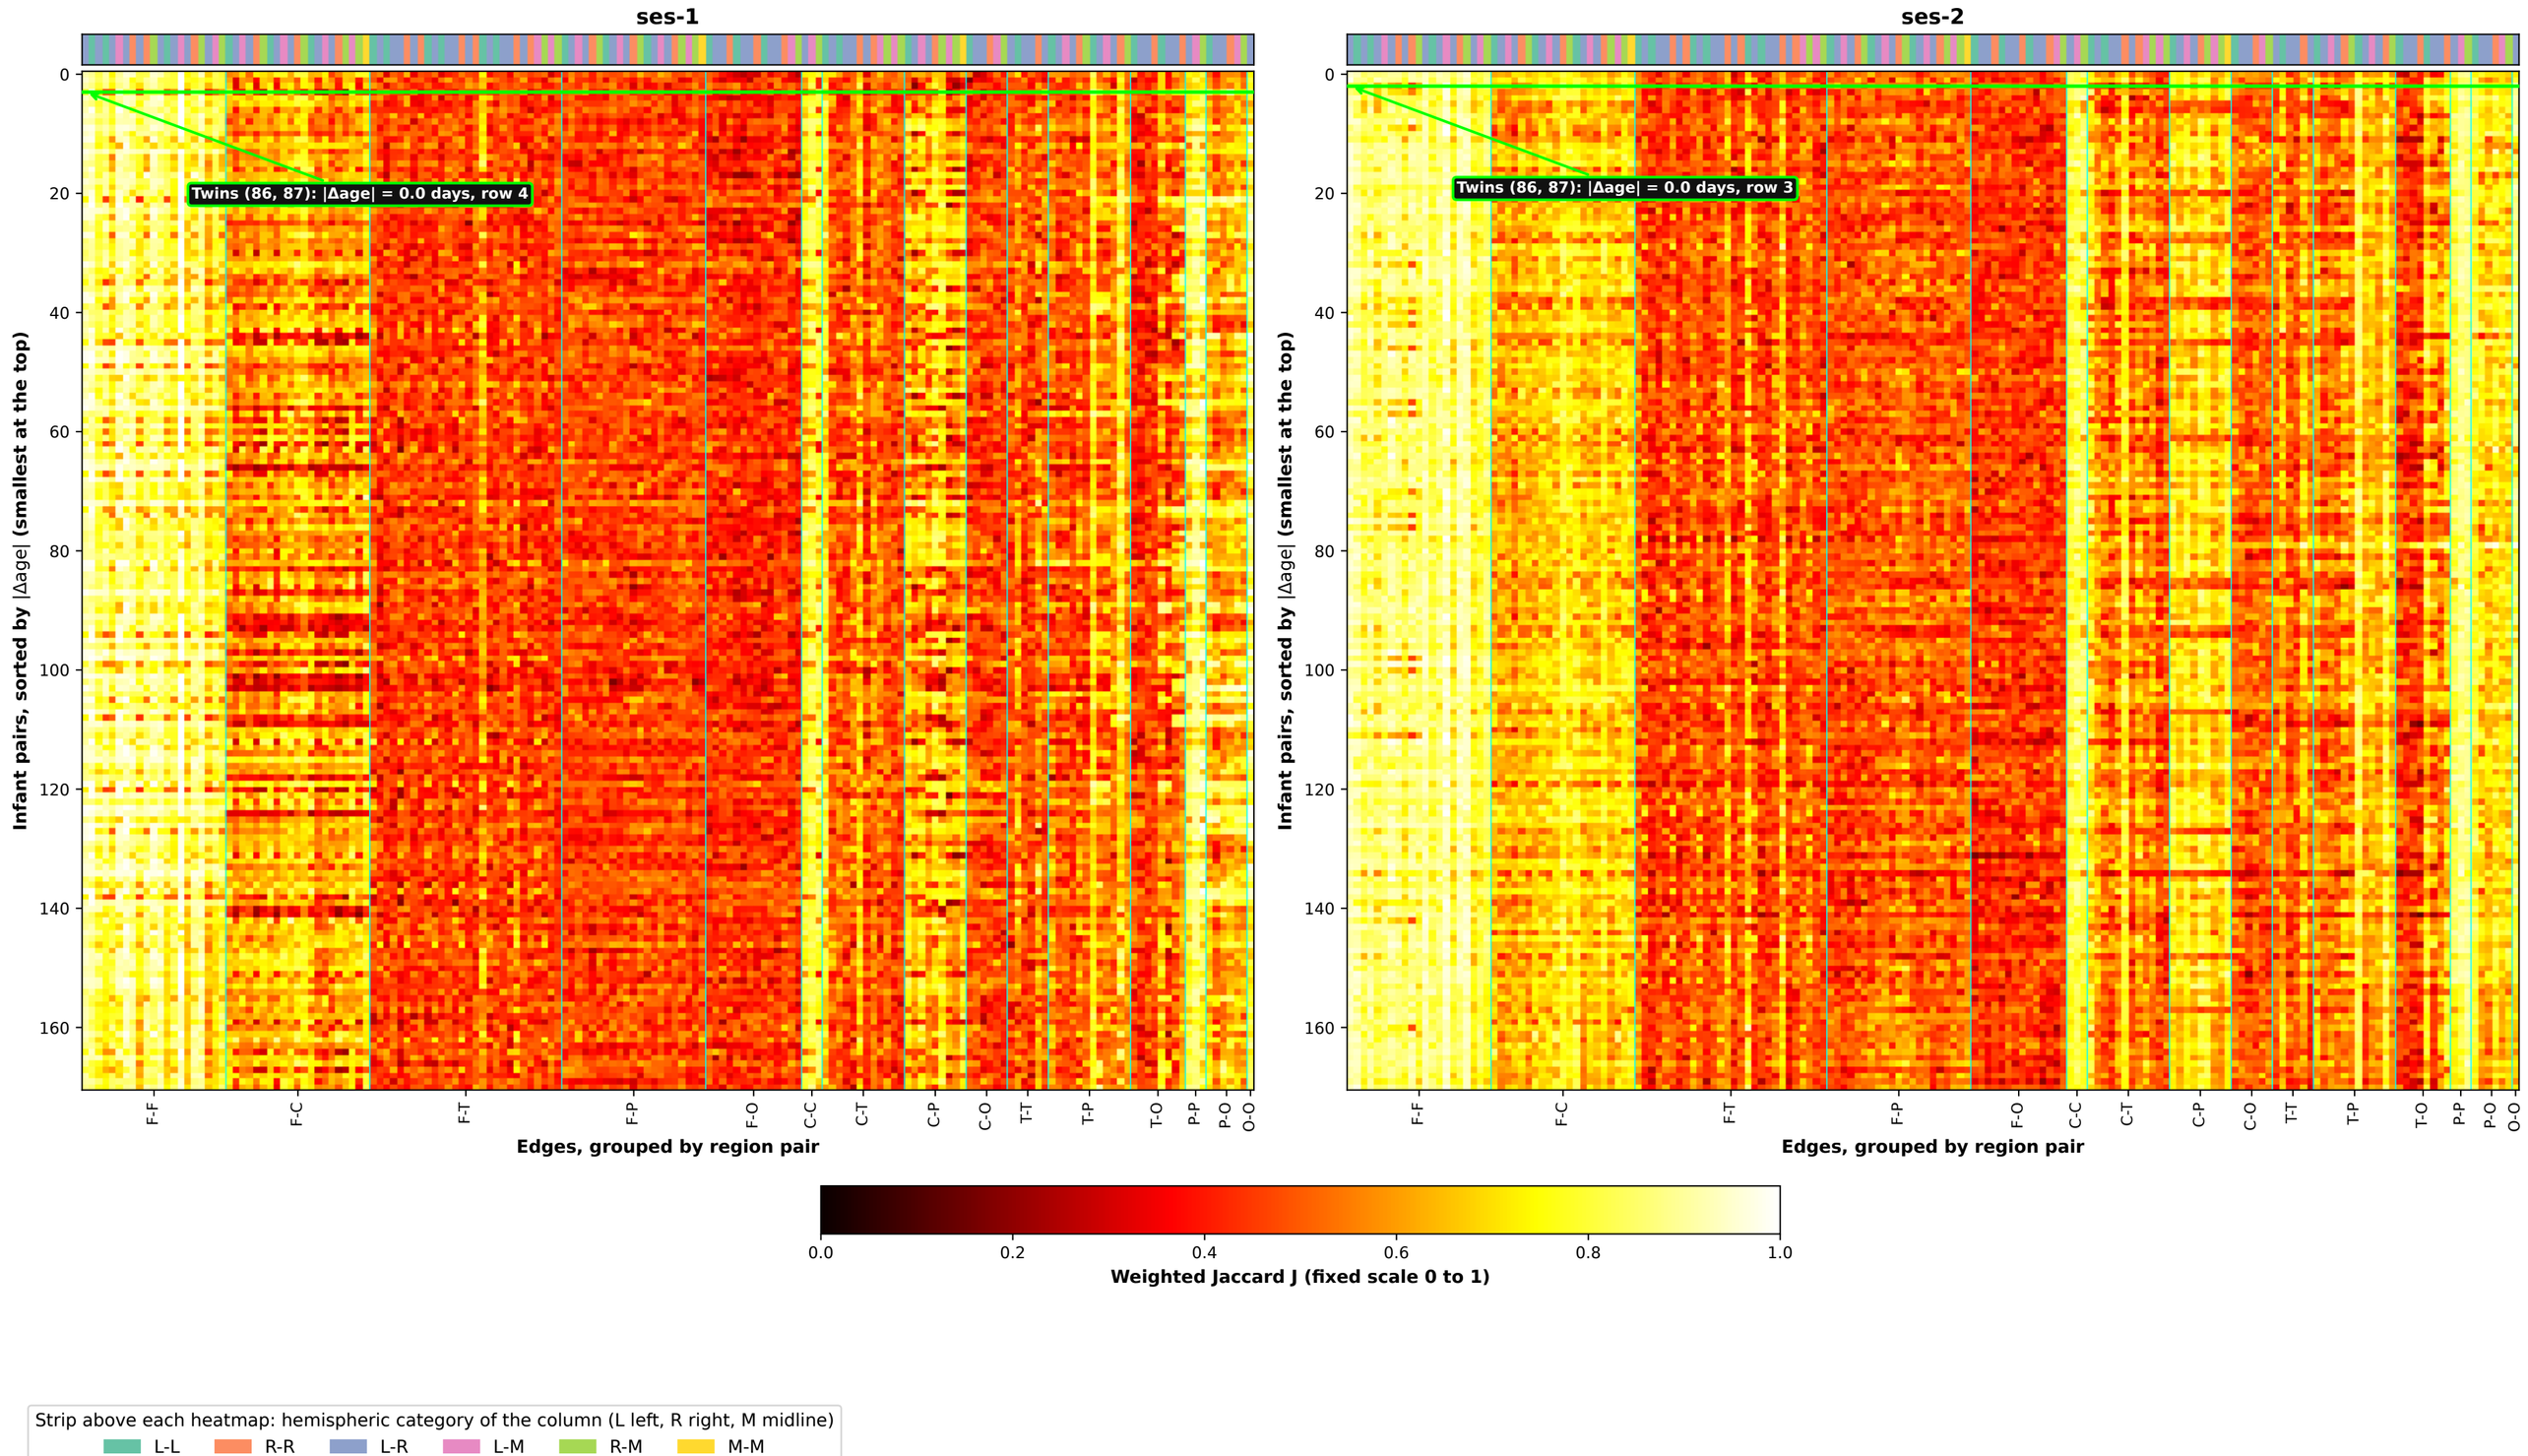

Figure 7: Element Similarity J for Every Infant Pair, f20: delta binary adjacency
Rows sorted by age difference |Δage| at that session

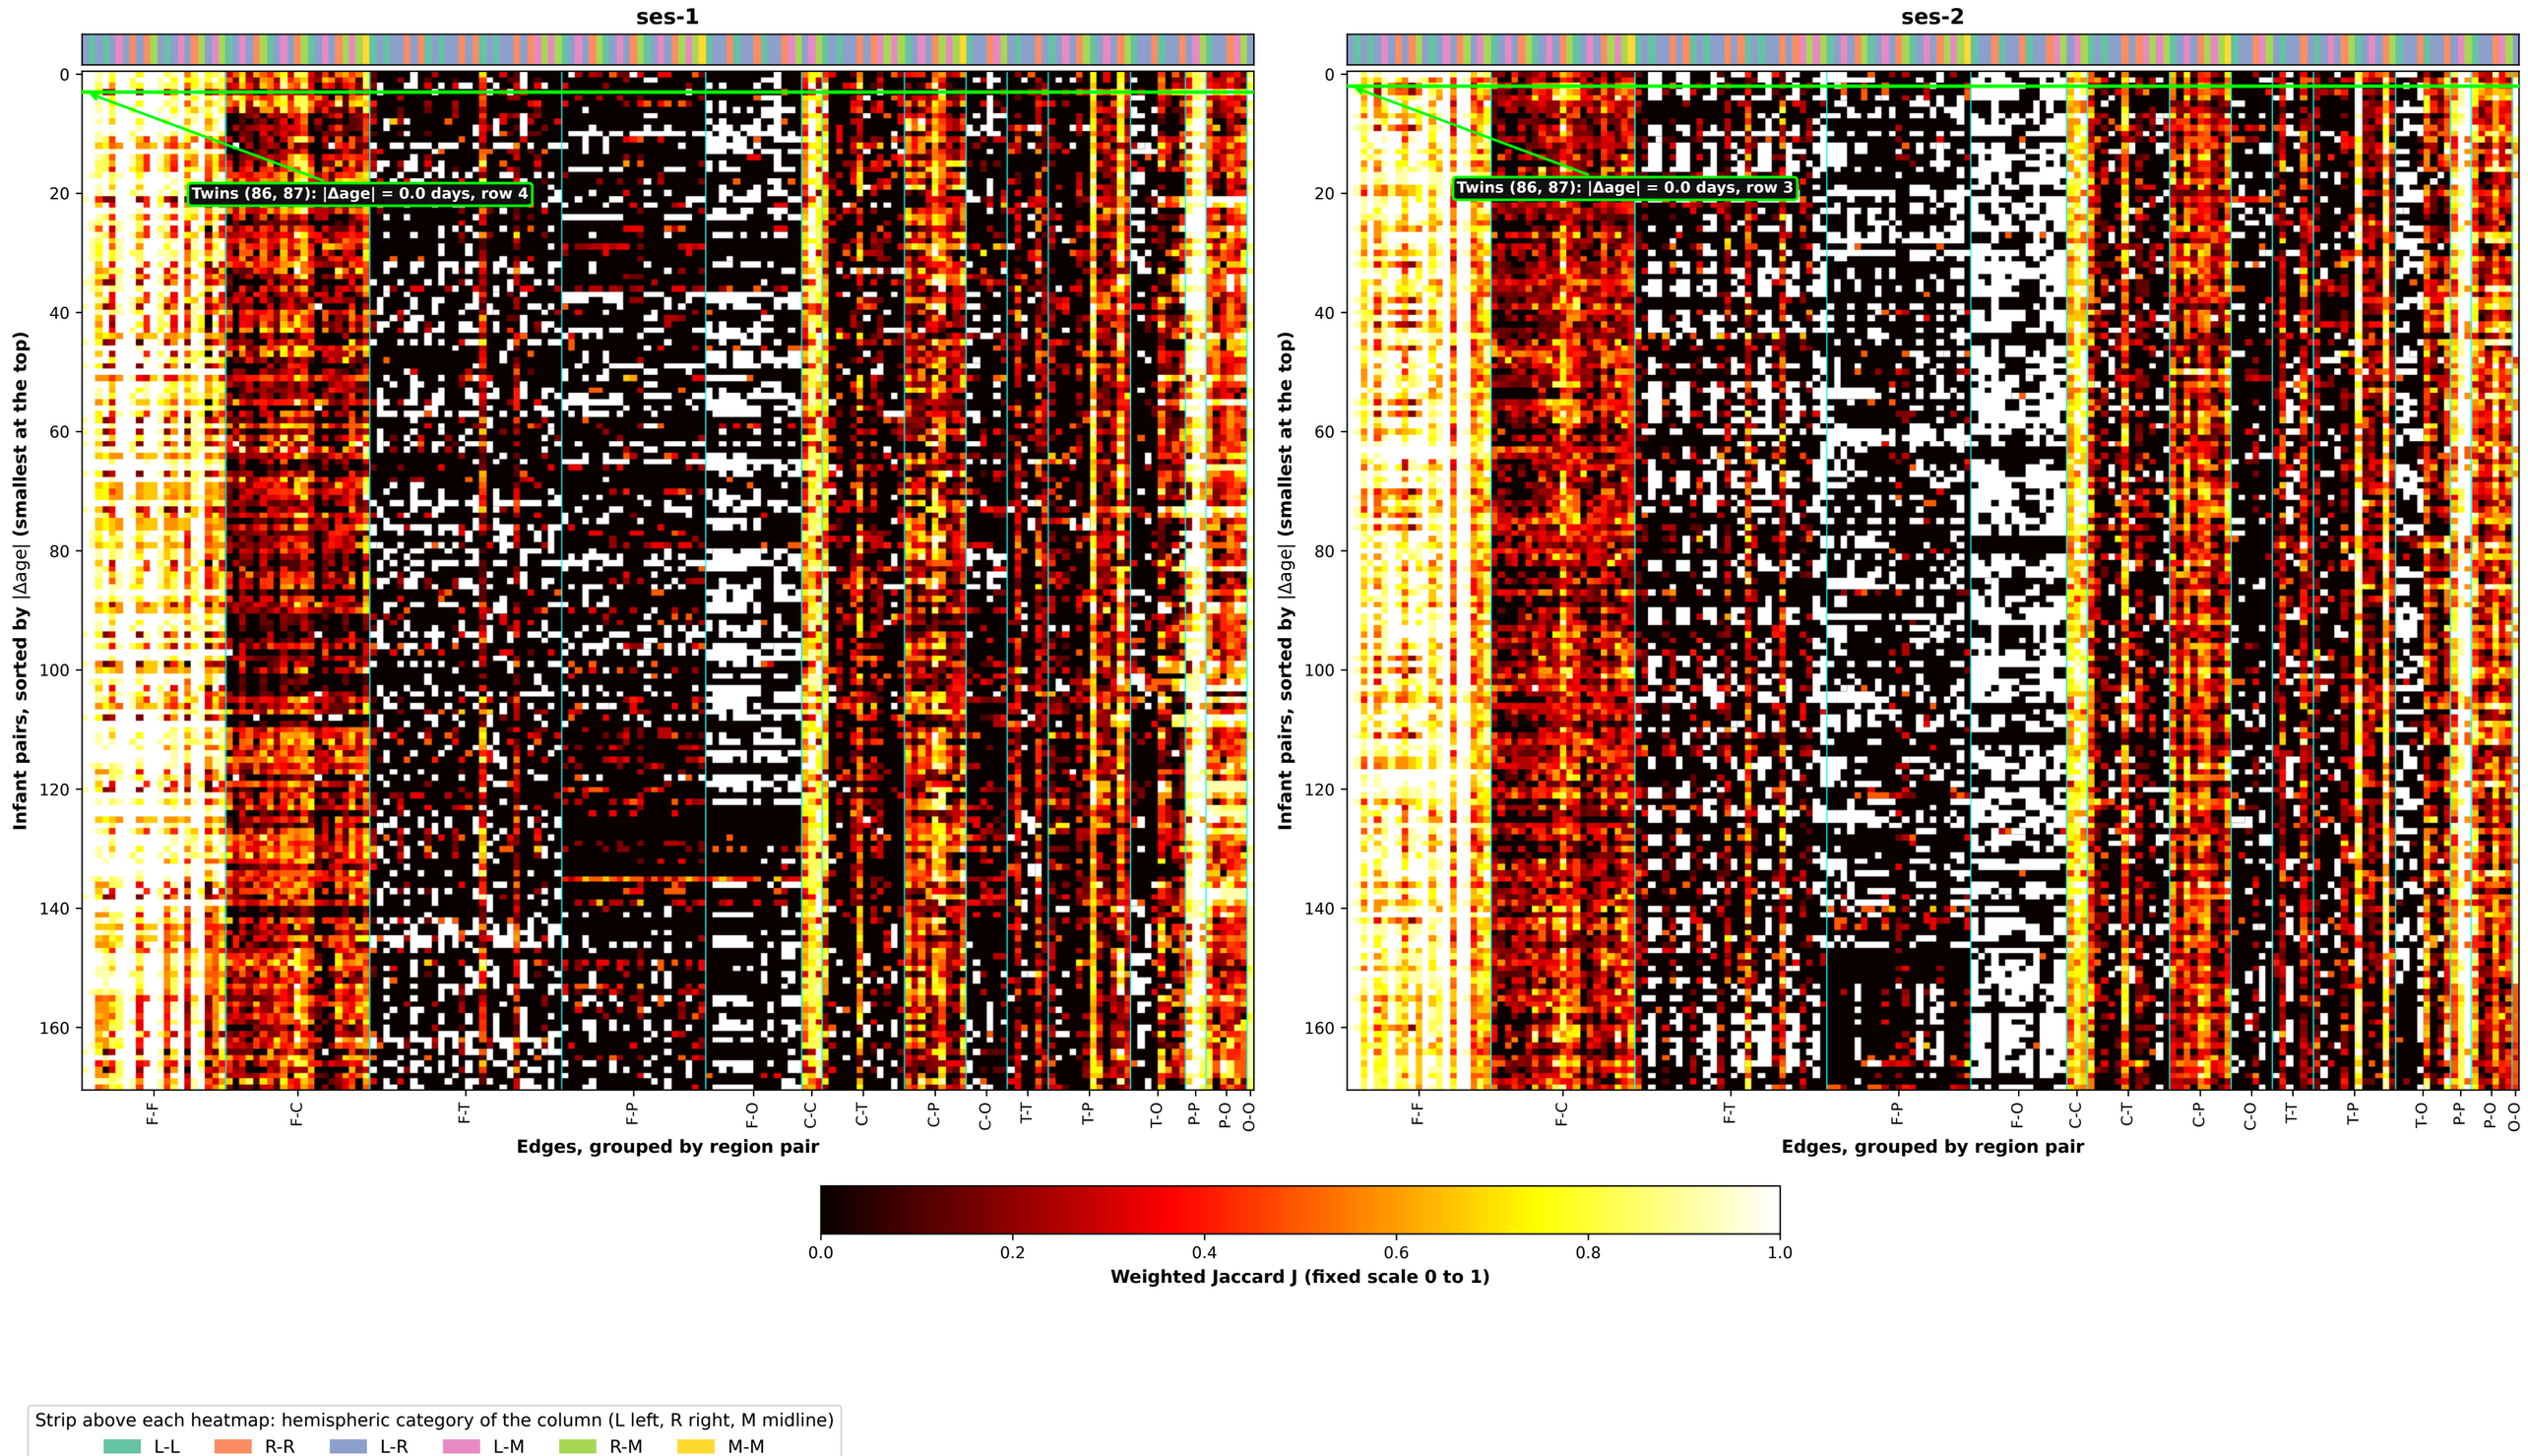

Figure 7: Element Similarity J for Every Infant Pair, f21: theta weighted correlation
Rows sorted by age difference |Δage| at that session

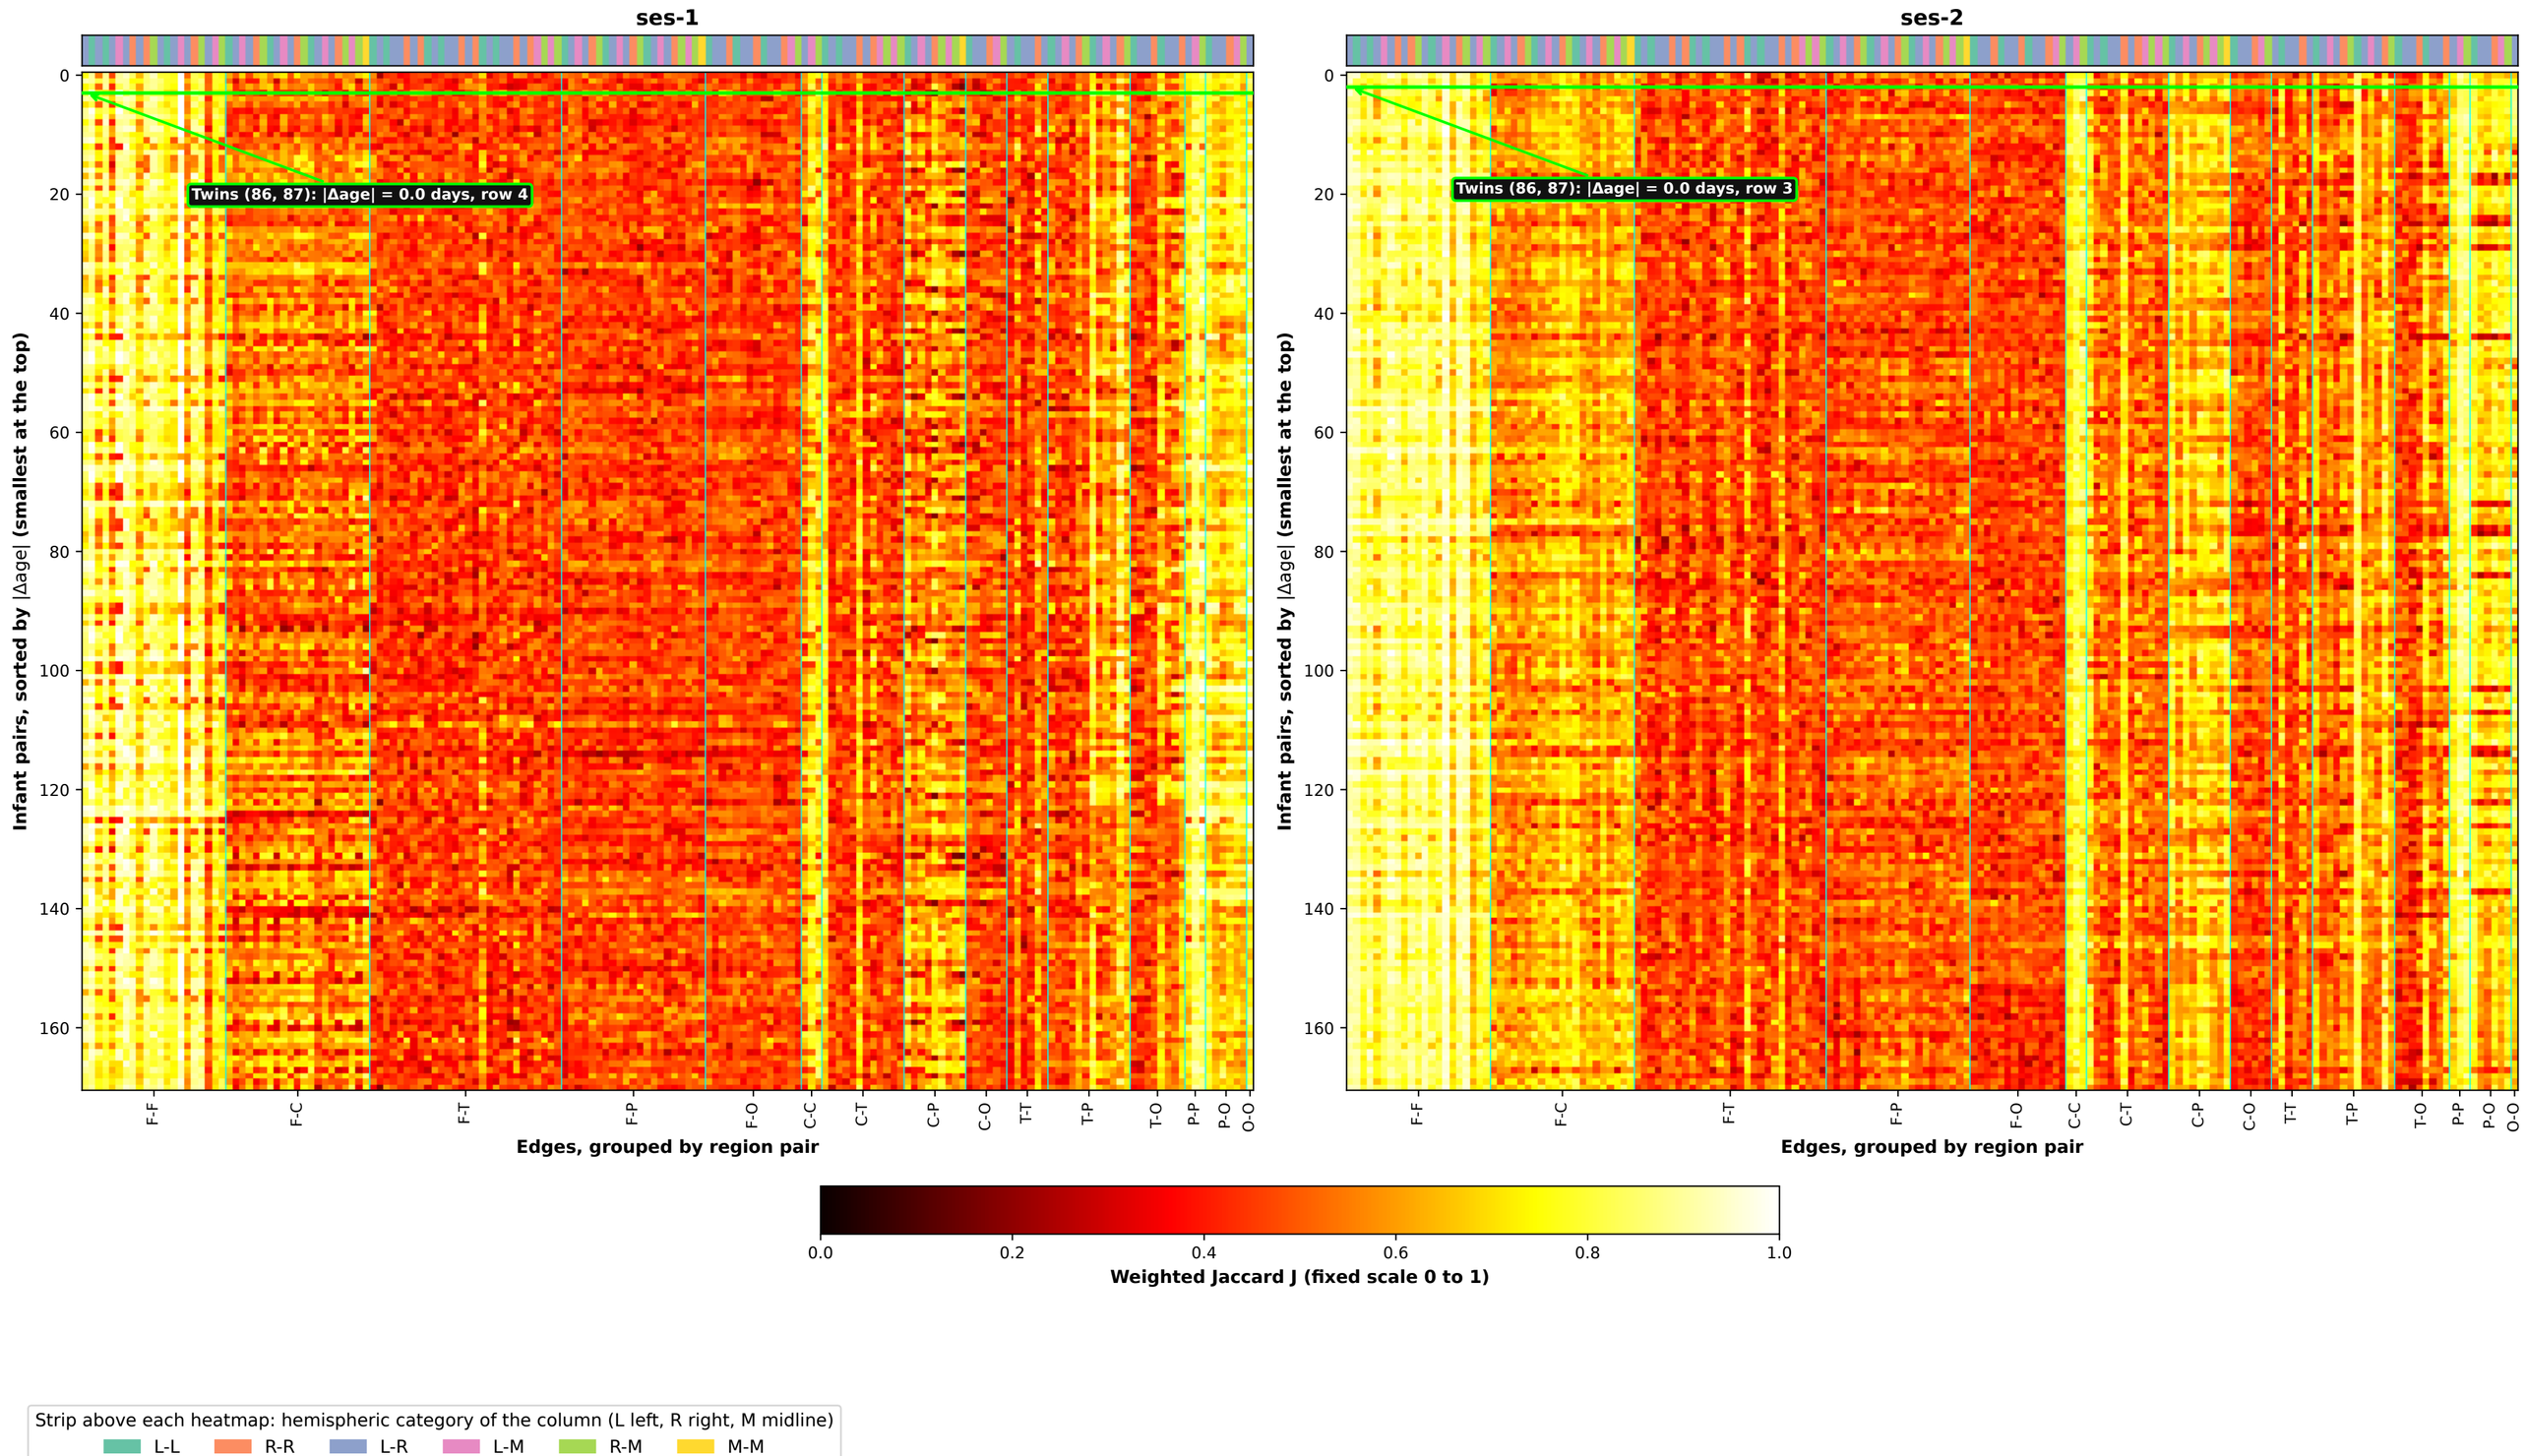

Figure 7: Element Similarity J for Every Infant Pair, f22: theta binary adjacency
Rows sorted by age difference |Δage| at that session

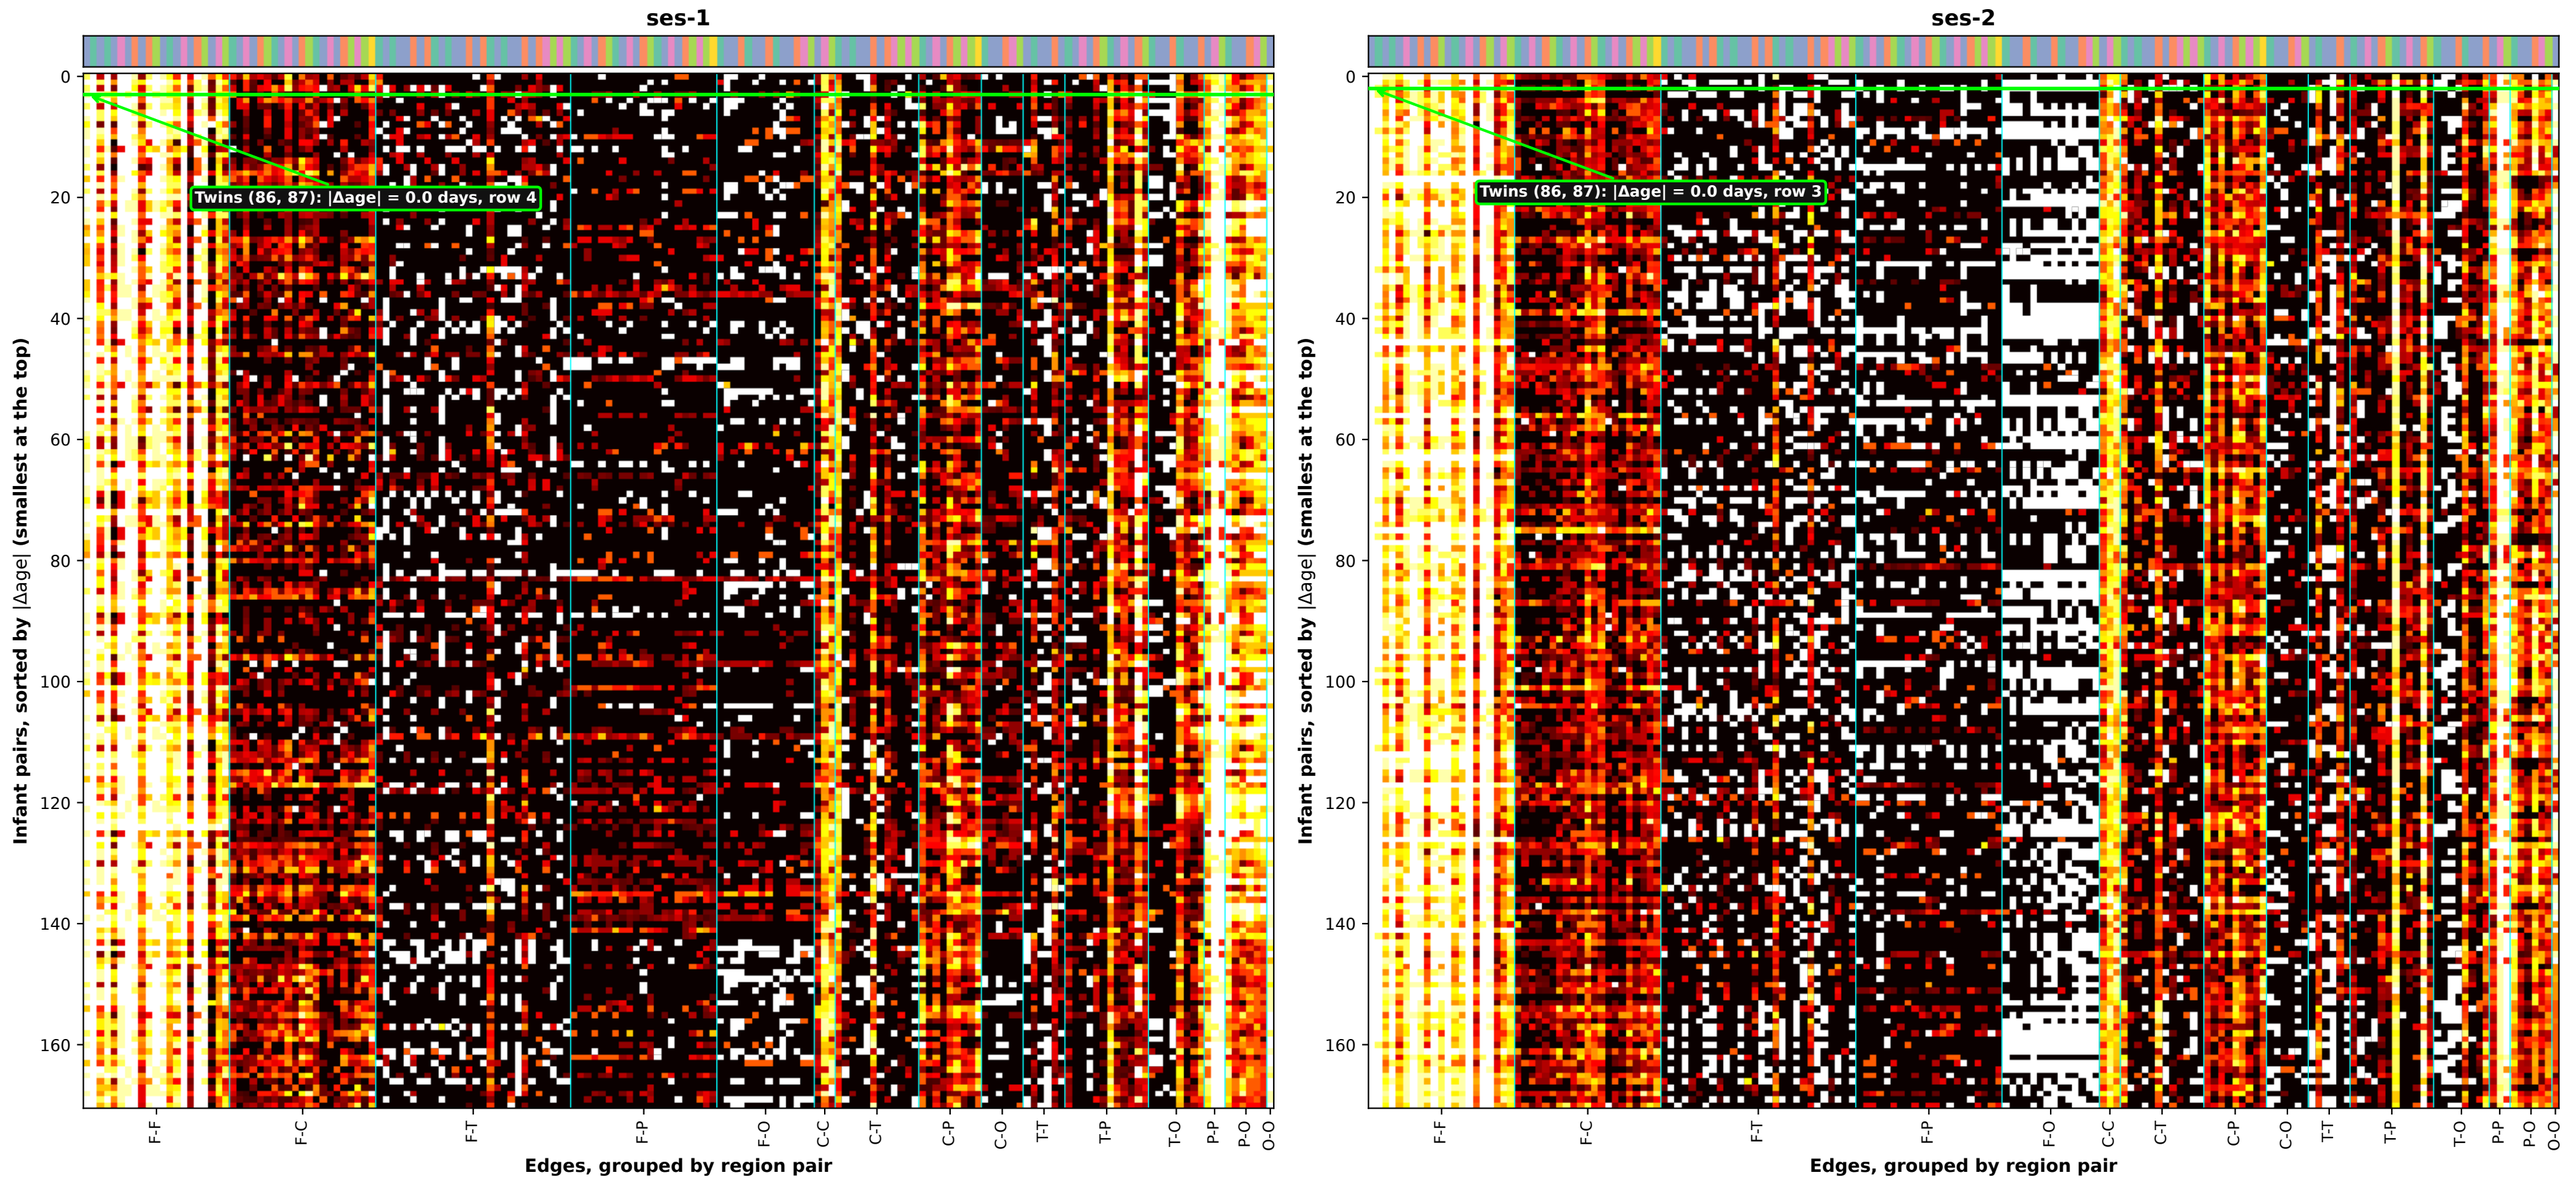

Figure 7: Element Similarity J for Every Infant Pair, f23: alpha weighted correlation
Rows sorted by age difference |Δage| at that session

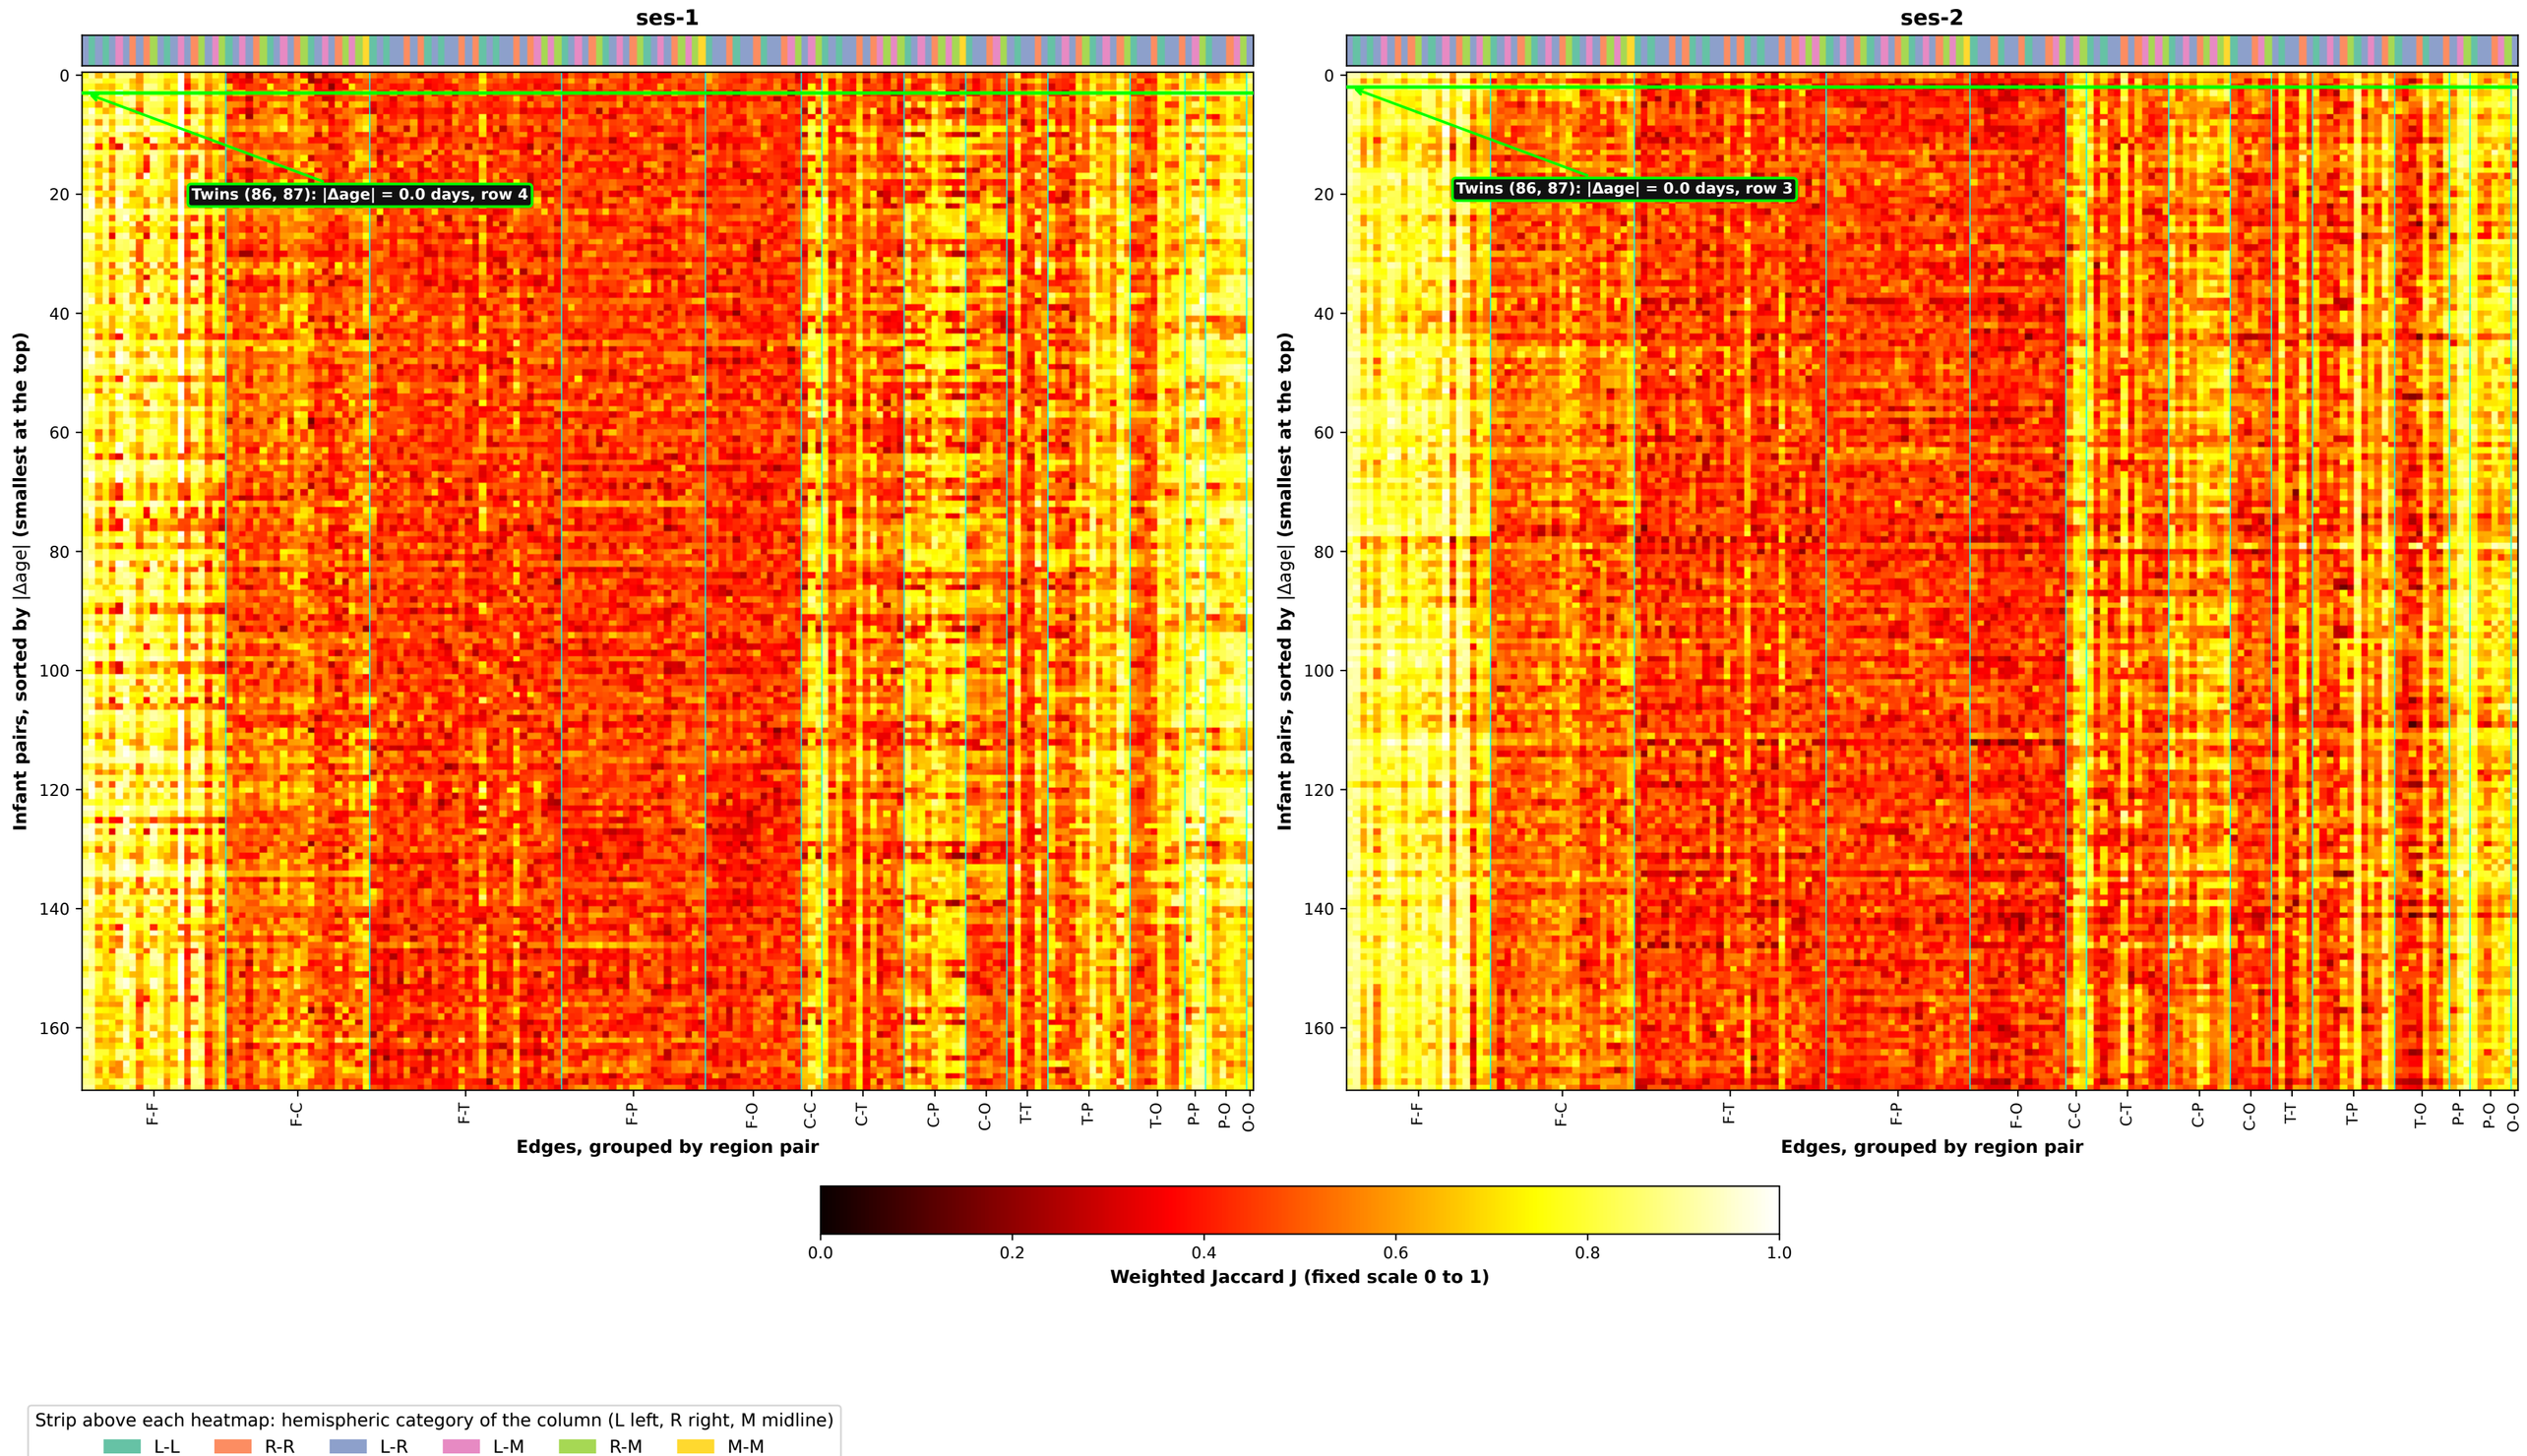

Figure 7: Element Similarity J for Every Infant Pair, f24: alpha binary adjacency
Rows sorted by age difference |Δage| at that session

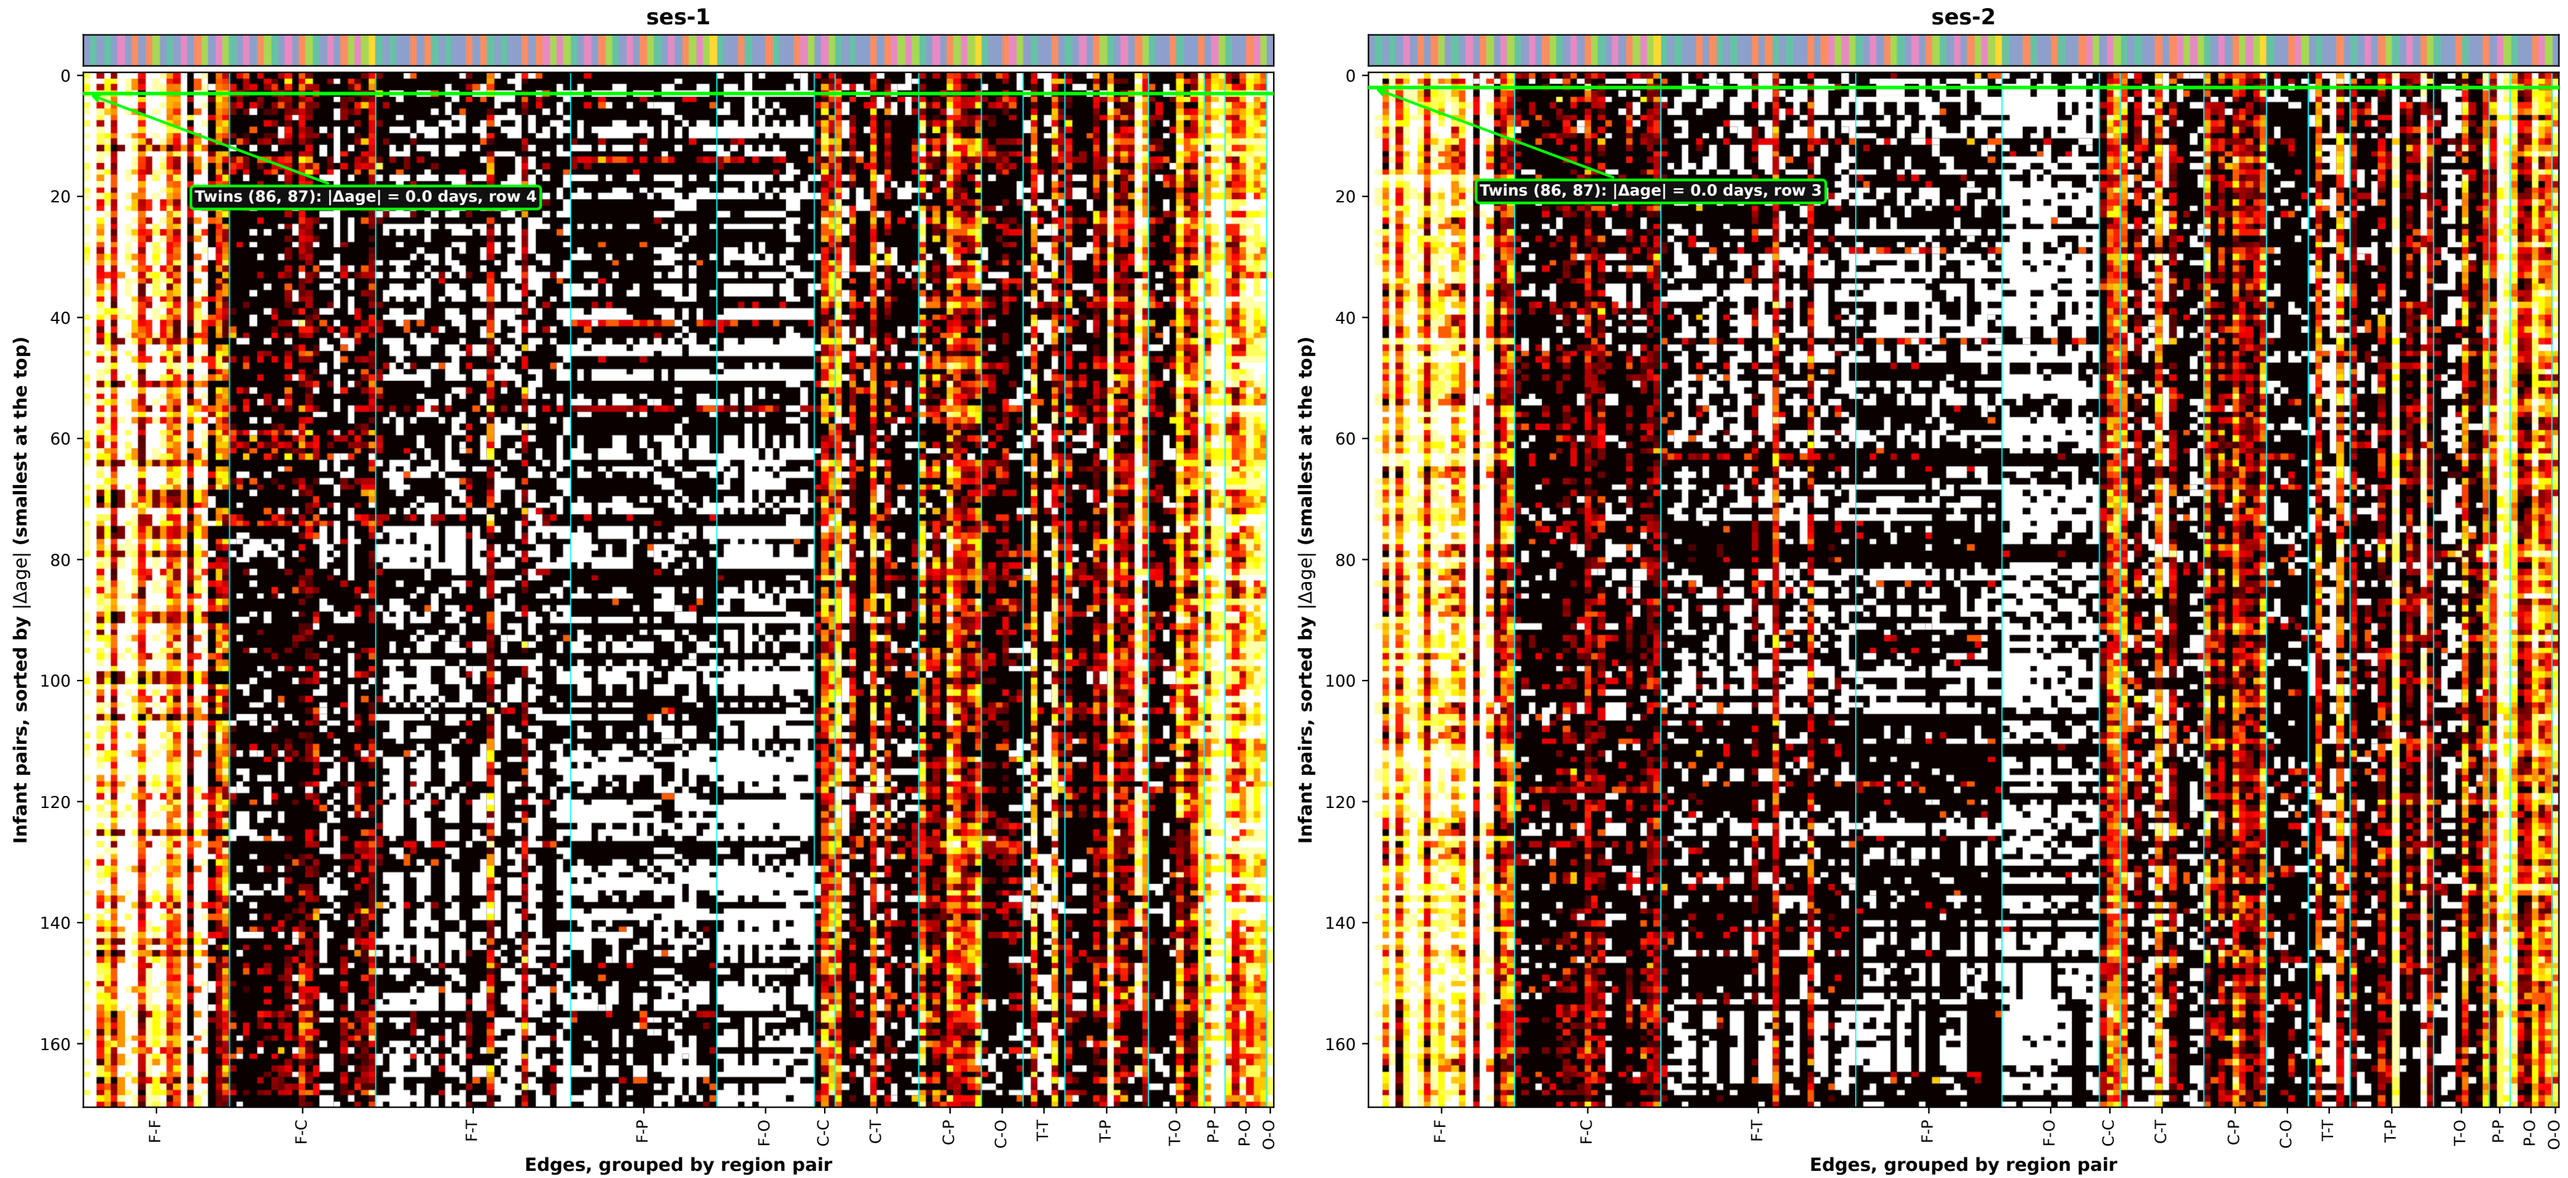

Figure 7: Element Similarity J for Every Infant Pair, f25: beta weighted correlation
Rows sorted by age difference |Δage| at that session

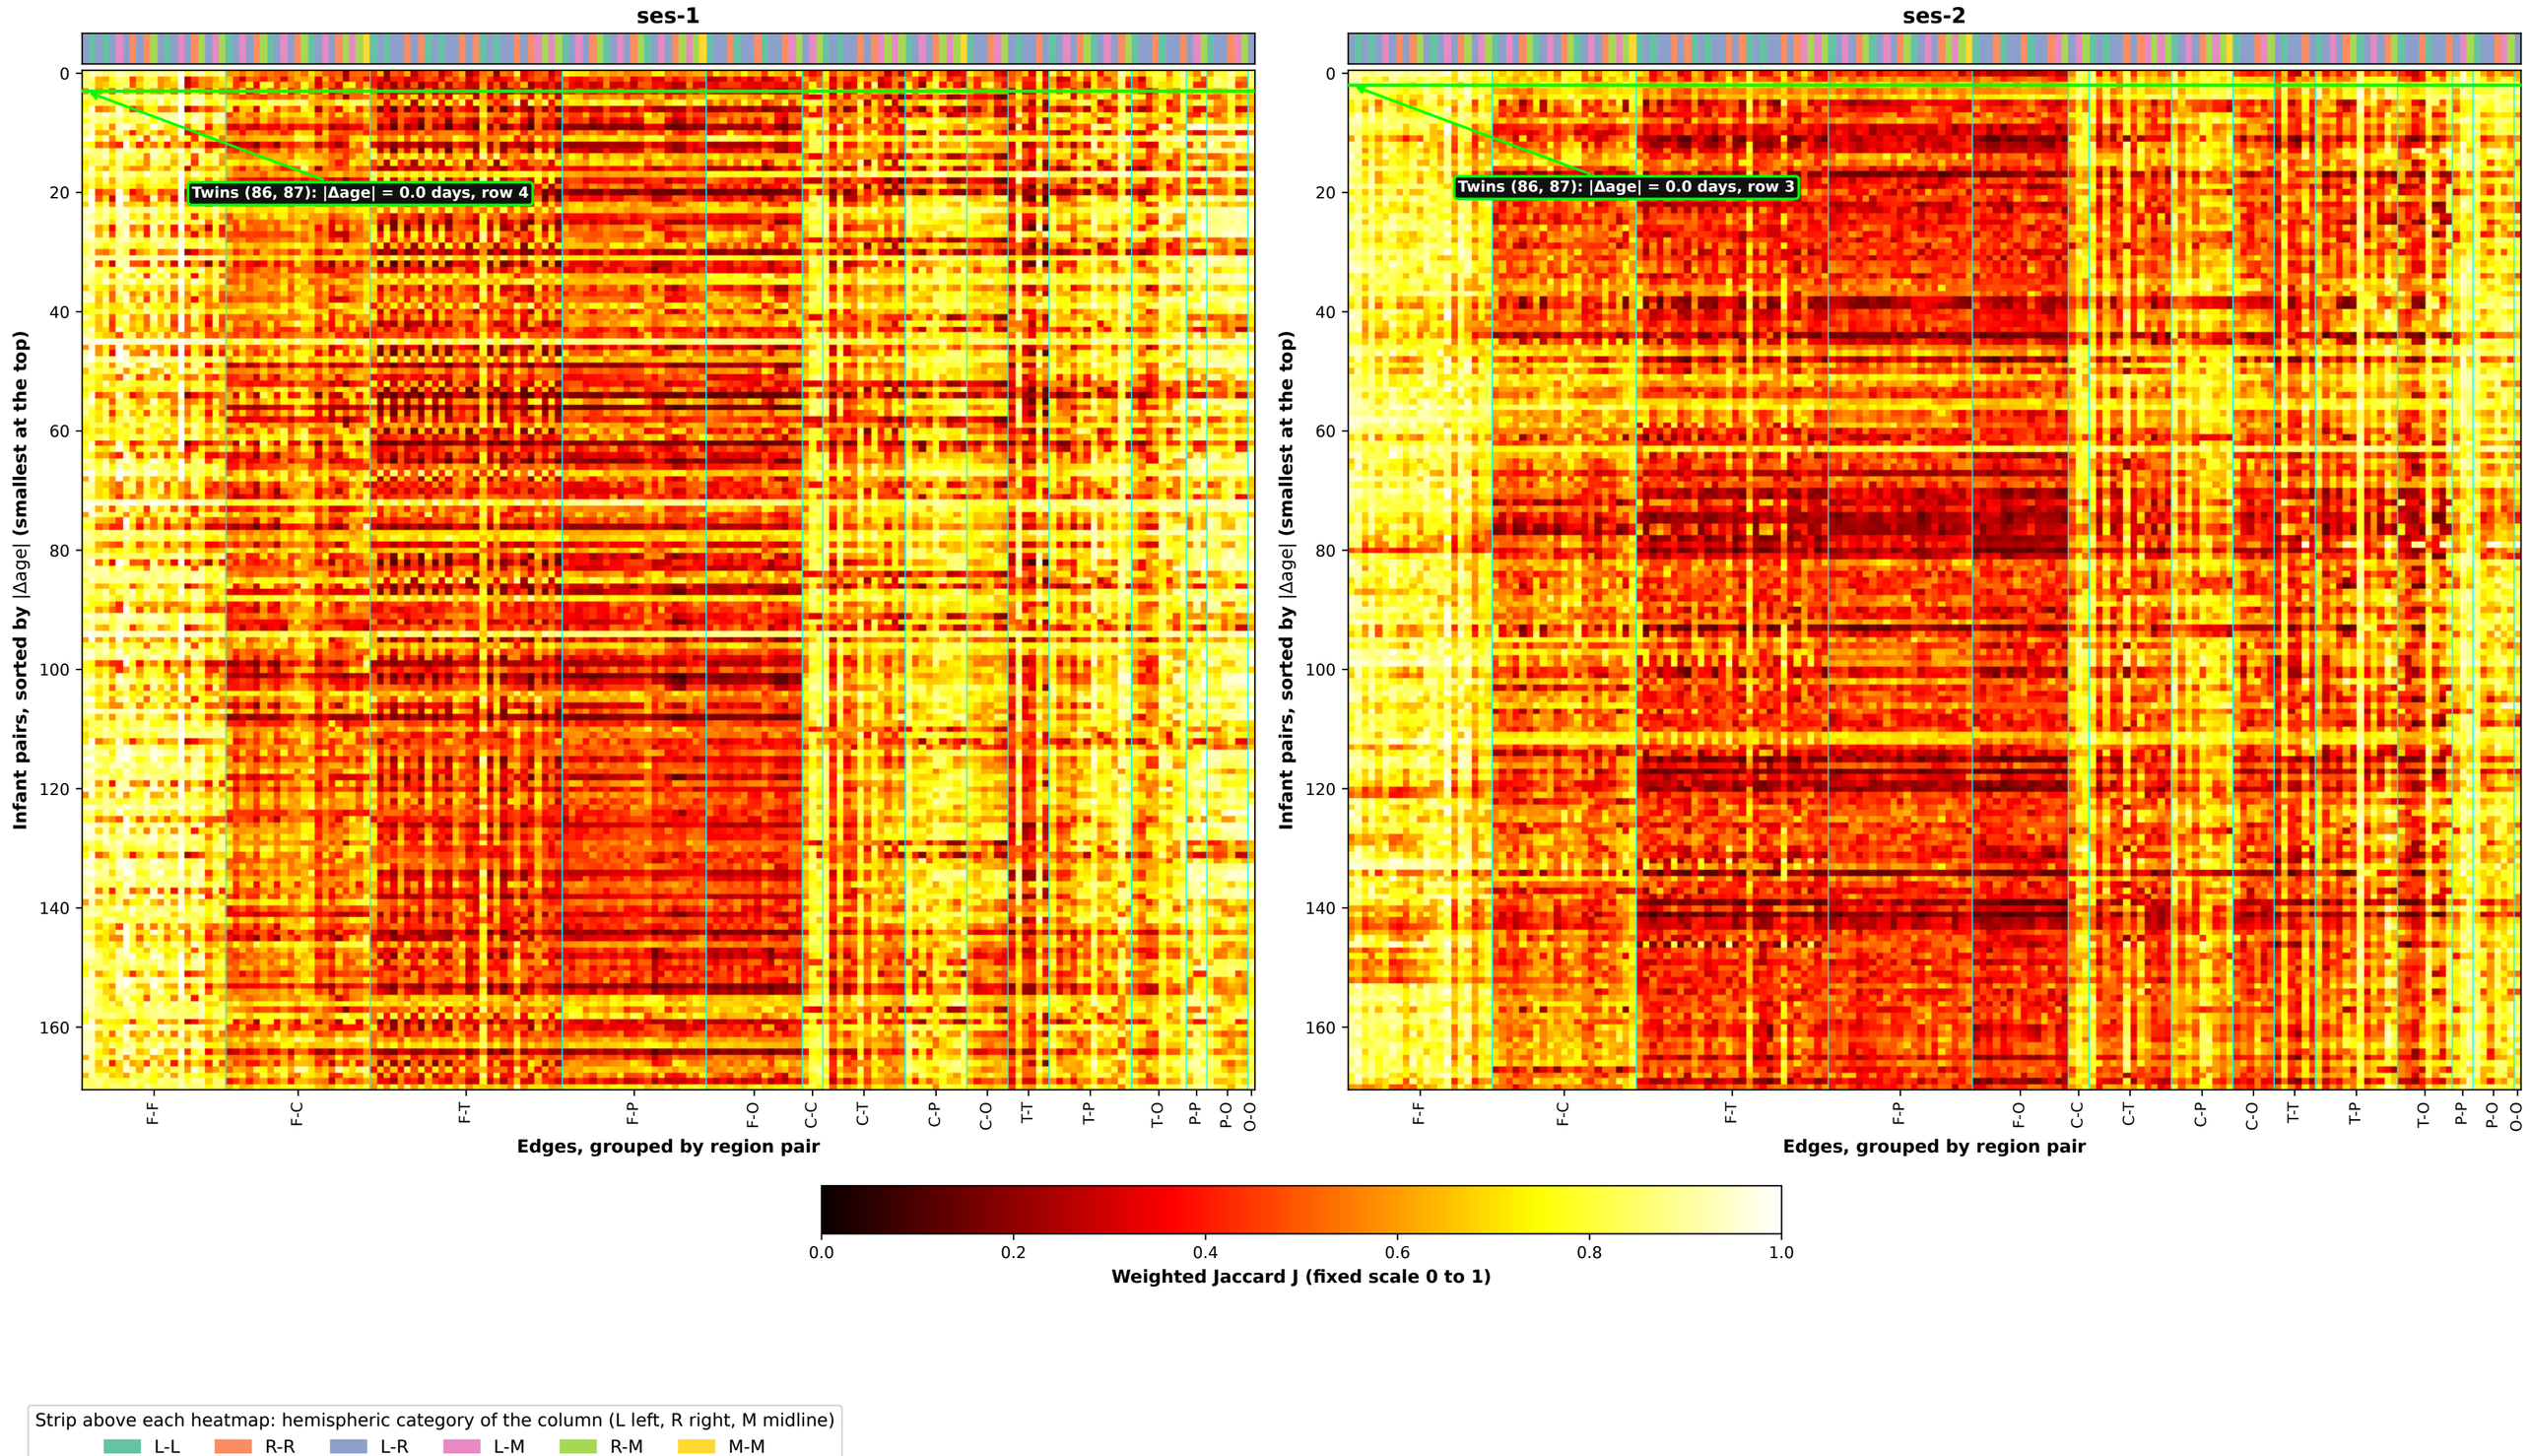

Figure 7: Element Similarity J for Every Infant Pair, f26: beta binary adjacency
Rows sorted by age difference |Δage| at that session
