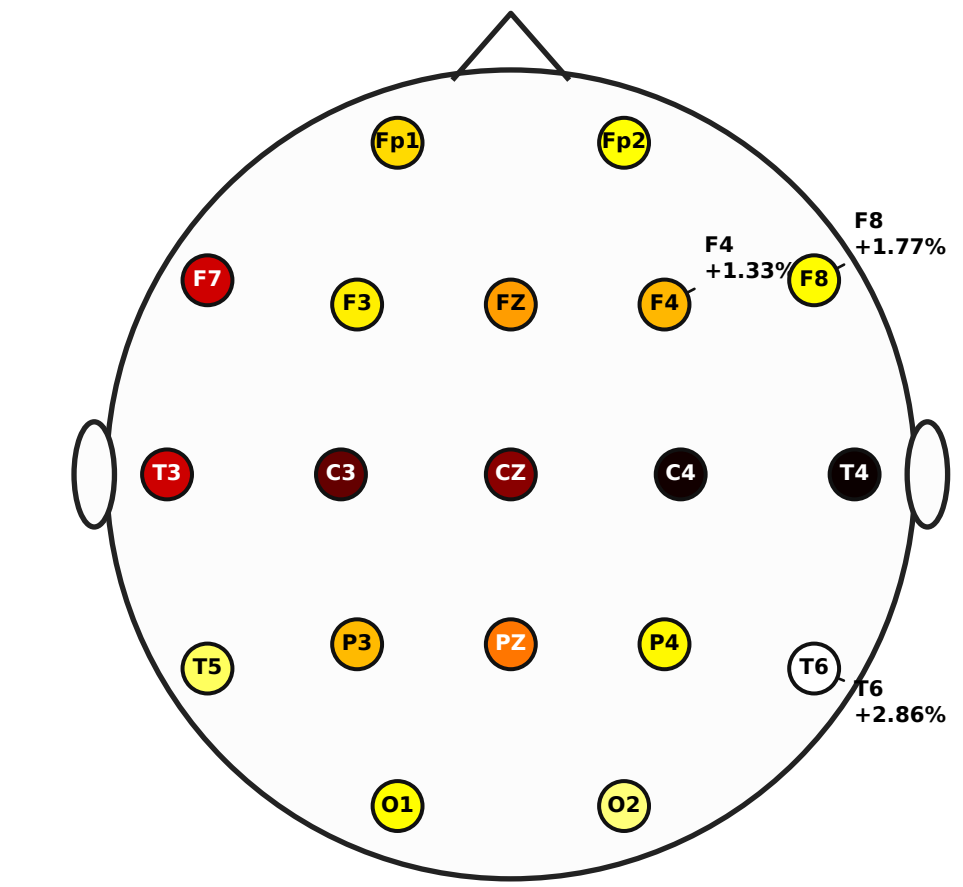

Figure 4: Anatomical Topography of Infant Neural Fingerprints
Right Centroparietal Hubs & Long-Range Fronto-Temporal Edge Specificity

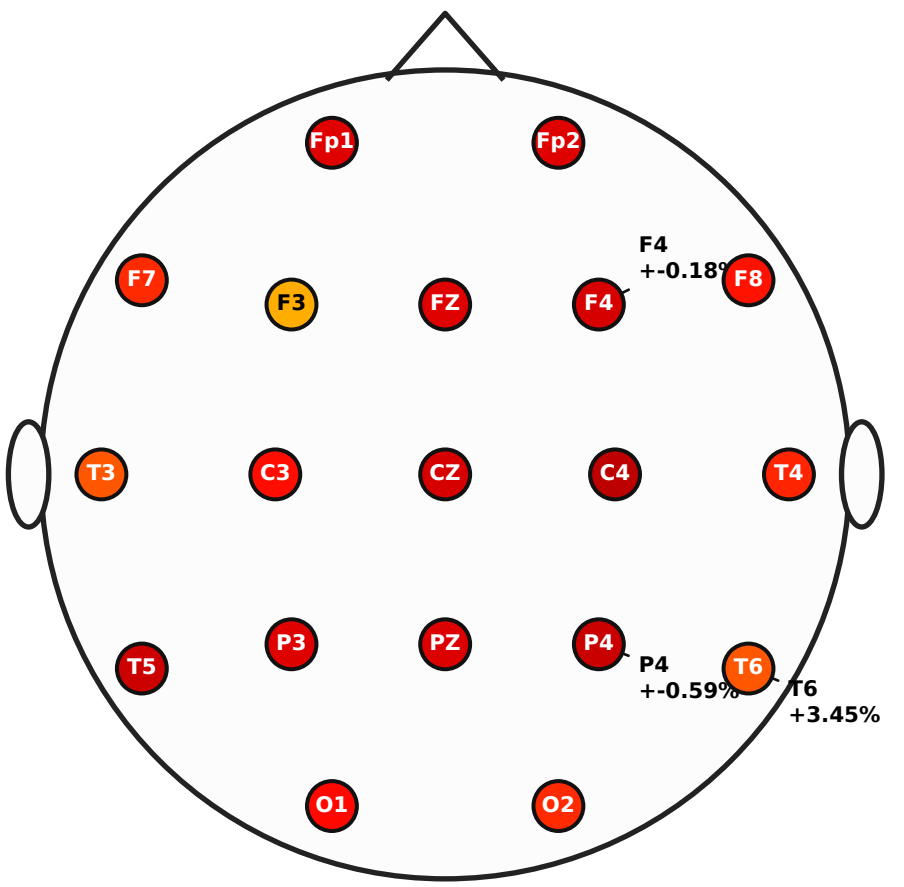

A. Node Centrality Identifiability: Node Eigenvector (f06)

Node $I_{\text{diff}}(e)$ (%)

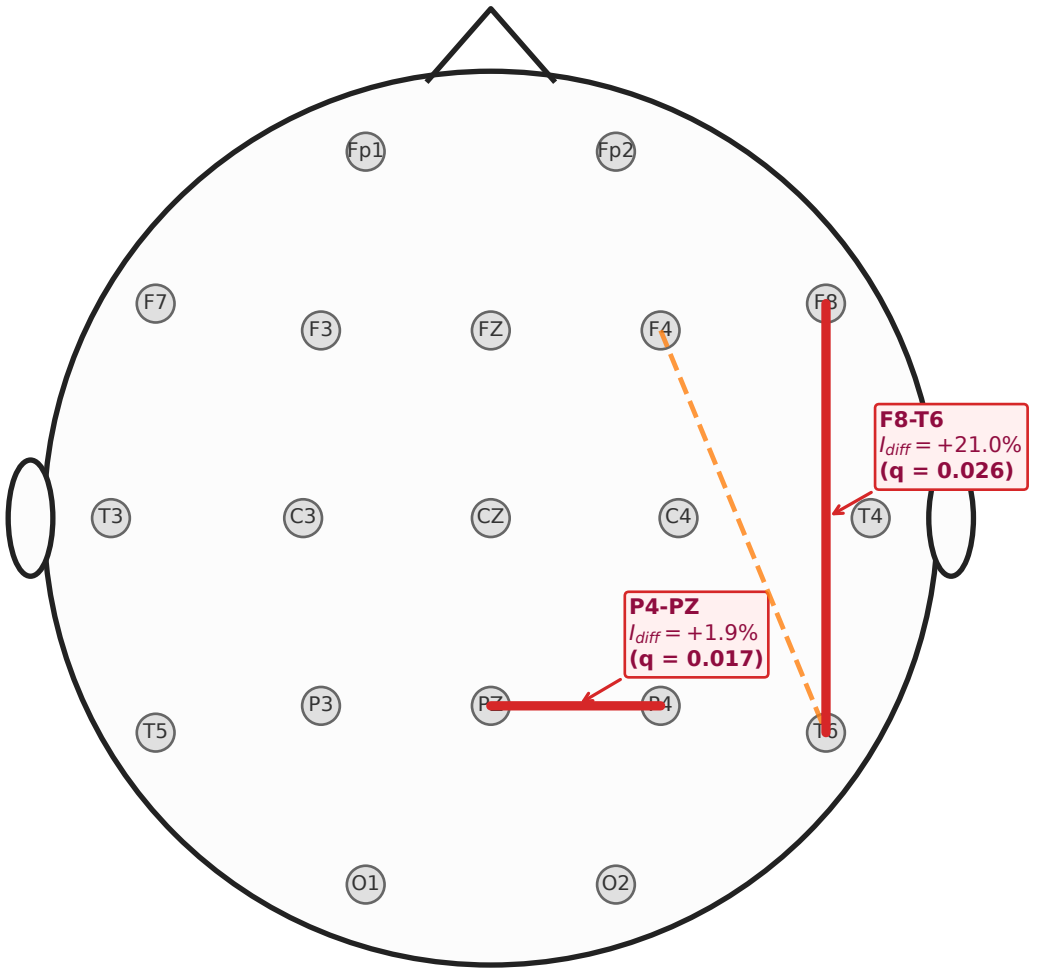

B. Node Topology Identifiability: Alpha Binary Closeness (f24)

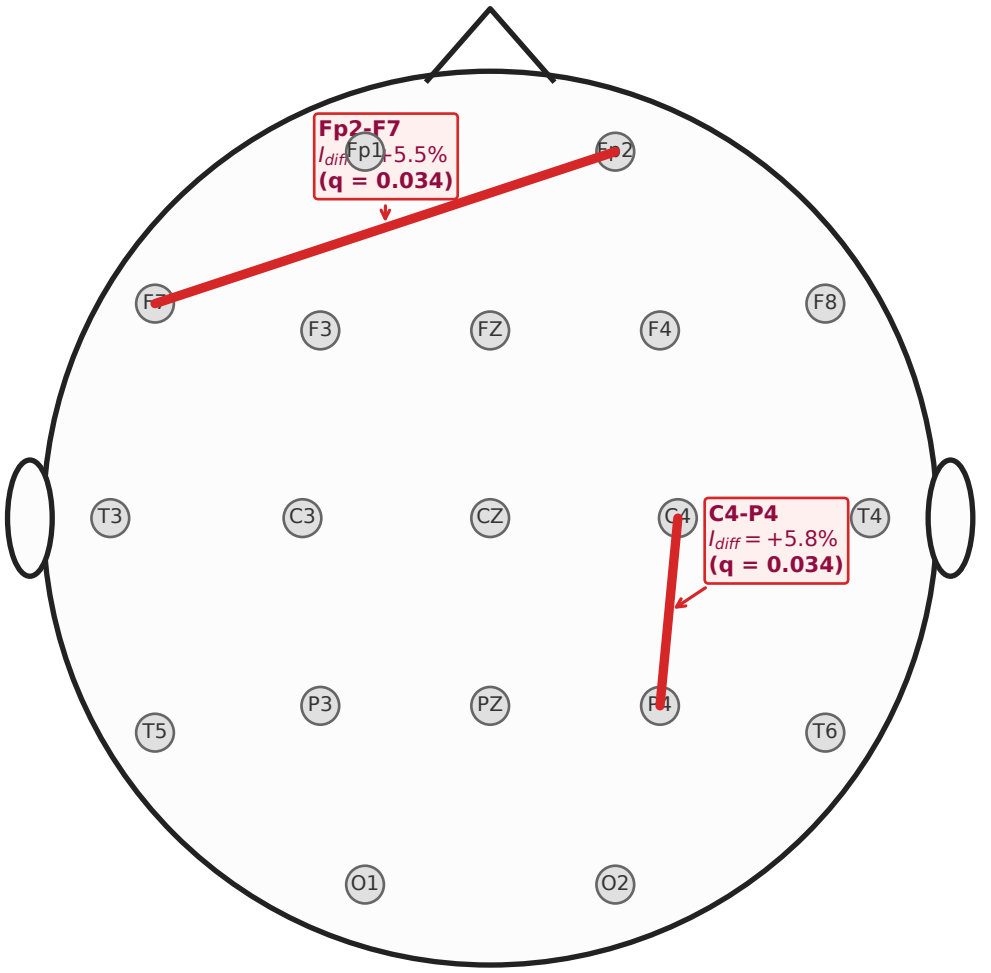

Node $I_{\text{diff}}(e)$ (%)

C. Significant Functional Edges: Delta Binary Adjacency (f20)

Solid Red: FDR $q < 0.05$ | Dashed Orange: Raw $p < 0.01$

D. Significant Shortest Path Edges: Binary Edge Betweenness (f12)

Solid Red: FDR $q < 0.05$ | Dashed Orange: Raw $p < 0.01$
